OLUME 49. KLEMME, IOWA, WEDNESDAY EVENING, JANUARY 5, 1944 NUMBER 7.

cMillin Reports County Is In ood Financial Condition

EN THE POOR FUND SHOWS BALANCE OF $20,000.00 IS YEAR

nty Finished 1943 With Half Million Dollar Balance

oy L. McMillin says that Han- County finished up the year 1943 with half a million dollars ash on hand! McMillin further rts:

This has been a very good year Hancock County and we finish- up with all accounts showing a balance. Prices have been tops the farmer and he has paid his es right up to date. Many of em have cleaned up their taxes were back for a number of rs and are starting 1944 with a an sheet

Out of a total assessed and turn- in for collection we show $588,- 86 and of this amount we have hand 99.65% or a total of $586,- 77—nearly a perfect score.

"Hancock County has pur- ased $101,600 in War Bonds, hich will be held until con- tions warrant improvements the county.

Delinquent Tax collections for year are $9,202.57.

All special drainage assessments he county have been paid in There was not a single farm Hancock County on which the was not paid, and therefore, we not have a tax list to publish is the first time since 1859 the first tax list was made up we have had no delinquent

While new automobile and ck licenses have been very few, we collected in Auto and Truck s $80,581 00, of which the coun- receives $3,159.00. Very little use has been collected on new cars.

Balance In Poor Fund

Of the balances on hand in the erent accounts, one thing stands above all others and this is the r Fund This account, as a rule, all spent but this year it shows alance on hand of $20,000 00 is due to the fact that nearly who received help before are employed in some way.

Out of the 4-point tax collected the State from Sales Tax, etc received $75,631.43 for Home- d Exemption. This was a di- benefit to the home owners of County.

Slight Raise In Tax Levy

Starting out with 1944 we find all taxes have been raised a mills This is due to the in- ed cost of operation, especial- in the schools, which receive ly 65% of all tax collected. On average farm of 160 acres we t have a three to four mill and as the average farm runs nd $8,000 to $9,000, you will that it is only a $25 to $30 in- se over last year. When we der the present prices, this is much of an increase. Taxes on property show a larger in- e."

ROY L. McMILLIN,
County Treasurer.

ESSORS HELD ANNUAL TING FRIDAY

The assessors in Hancock county their annual meeting at the rthouse in Garner with a one red per cent attendance.

J. Pfaltzgraff, auditor from State Tax Commission spoke to gathering, and County Auditor C. Missal instructed the as- rs and distributed their sup- .

he group also held an election ff cers and C. A. Frisbie of er was named chairman, and G. Peterson of Britt, secretary. nch was served in the base- t of the courthouse by county ials.

Ou Men In The Service

SGT. RAYMOND KEEPER EX- PECTED HOME THIS WEEK

Mr. and Mrs Henry Keeper re- ceived word Saturday that their son, Sgt. Raymond Keeper had ar- rived that morning at San Francis- co, Cal fornia, and that he expected to arrive in Klemme this week.

Sgt Keeper is a member of a bomber crew and has seen a lot of ction in the Pacific He was given nationwide recognition on a nation- al broadcast program by Camel Cigarettes when he was chosen as "Yank of the Week," after he had cleared the bomb bay in his plane of live bombs which had jammed and did not release through the open bomb bay doors. At the time Sgt. Keeper crawled along the cat- walk over the open bomb bay door and lowered himself into the hold and handed up the bombs to an- other mmber of the crew who tossed them out, thus saving the en- tire crew from being blown to bits.

Sgt. Keeper was among the first Klemme young men to enlist in the army before Pearl Harbor was at- tacked.

KLEMME YOUNG MAN HOME FROM TWO YEARS SERVICE IN CARIBBEAN AREA

Technician Corporal Elmer Lang- litz arrived last Thursday to spend his first furlough in 2½ years, two years of which has been in over- seas service in the Caribbean area, and is enjoying a visit with his par- ents, Mr and Mrs Wm Langlitz who live west of Klemme.

T-Cpl. Langlitz will report back for duty at Fort Sheridan, Illinois n January 22nd.

PAUL K. HEAFNER ARRIVES SAFELY OVER SEAS

Mr. and Mrs. Wes Haefner re- ceived word Friday that their son Paul K. Haefner had arrived safe- ly over-seas, according to a cable- gram which arrived Friday morn- ng.

Robert Kimball, former Klemme vouth and son of Mr. and Mrs. Walter Kimball of Boone, has been transferred and his new address is:

Robert L. Kimball, F 3-c,
Landing Craft School,
P & M Naval Repair Base,
San Diego, (36) California.

Merle Schaefer writes his sister. Mrs Emory Weaver from some- where in the Pacific that his Navy rating has been raised from A. M M. 2-c to Aviation Machinists Mate First Class.

Calvin, son of Mr. and Mrs. Roy Schaefer has recently been trans- ferred from Holtville, Calif., to Los Alamotis, Calif. He has also won a new rating in the Navy and now is Aviation Machinists Mate Third Class.

Lt. and Mrs. Harold Wicks left Saturday for Oklahoma City, Okla- homa after spending a leave visit- ing at the parental Albert Kehl and E. C. Buntenbach homes over the holidays. Lt. Wicks will take four or five weeks of special aerial photography at Oklahoma City, af- ter which he expects to be sent overseas.

Last Rites For Avery Township Farmer Will Be Friday

FUNERAL SERVICES FRIDAY FOR MR. MAX MACE AT METHODIST CHURCH

Funeral services will be held on Friday afternoon at the Methodist Church in Klemme, at 2:00 o'clock, for Mr. Max Mace of Avery town- ship.

Mr Mace died at the Iowa City hospital following a long illness.

Rev H E. Harvey will preach the sermon and interment will be made in the Goodell Cemetery.

FUNERAL SERVICES HELD FOR LITTLE INFANT

Friends and relatives gathered at the William Meyer home near Miller, Iowa, Thursday afternoon to attend funeral services for Ro- berta Marline Bowles, the 4-months old daughter of Marlin and Ardith Bowles of Perry, Iowa

Roberta Marline was a strong, healthy child but a two week's ill- nes of pneumonia was too much for her and caused her passing at 10:00 o'clock Wednesday morning, December 29, 1943.

Rev H. E. Harvey, pastor of the Klemme-Liberty Methodist church had baptized the child some days earlier, and at the funeral services he spoke on the words: "And Jesus called a little child unto Him."

Mrs. Gerald Koerner and Mrs. C. G. Waterman sang, "In The Gard- en" and "Safe In The Arms Of Je- sus."

Interment was made in the Con- cord Cemetery south of Garner.

She leaves, besides her parents, one sister, Patsie, and her grand- parents, Mr. and Mrs. Wm. Meyer, and other more distant relatives.

Arrangements were in charge of the Wellemeyer Funeral Service of Klemme.

FORMER RESIDENT FARMER BURIED HERE TUESDAY

A brief grave side service, in charge of the Wellemeyer Funeral Service, was conducted by Rev. H E. Harvey at the Klemme Ceme- tery Tuesday afternoon for Grant Henderson, age 74, a former resi- dent of Liberty Township.

The pall bearers were August and Joseph Schuldt, J. E. Stille, Dr D P. Anderson, Henry Ludeke and Quentin Stille.

Mr Henderson passed away Sun- day morning while taking a nap in his chair He lived at Jessup, Iowa.

His wife and two daughters at- tended the Klemme service. Mrs. D. P Anderson and Mrs. J. E. Stille served lunch to the funeral party at the Anderson home.

The Henderson family lived for a number of years on the farm where Bob Marshall now is locat- ed, and the family were well liked as neighbors.

Mr. and Mrs. Paul Van Buskirk went to Des Moines Sunday to at- tend the funeral of Mrs. Van Bus- kirk's grandmother, Mrs. M. A. Tracy, who, if she had lived until March, would have reached the age of one hundred years.

KLEMME CAGERS WON THREE GAMES TUESDAY EVE

The Klemme Graders started the fireworks Tuesday night by down- ing the Kanawha Graders 21 to 10

In the next game the Little Sham- rocks trounched the Crystal Lake second team 23 to 14.

In the main feature the Sham rocks were never threatended by Crystal Lake and stepped into a 10 to 0 lead over the visitors in the first quarter and 21 to 6 at the half The third quarter ended 36 to 9 in favor of the Shamrocks at which time most of the 2nd team took ov- er to end the contest 42 to 21.

Jimmie Thomas went on a ram- page and hung up 22 points to lead the Shamrock scoring.

TRAPPING SEASON CLOSES NEXT MONDAY, JAN. 10

The trapping season on all pro- tected fur bearers closes January 10 after Iowa's most successful sea- son. An abundance of fur-bearing animals and high prices combined have been responsible for the larg- est and most valuable take since the State Conservation Commission has kept fur records.

Furs may be held without per- mit until 10 days after the close of the open season, and upon ap- plication a permit may be secured to hold furs for a longer period of time.

It is unlawful for any person ex- cept a licensed fur dealer to ship or transport furs outside of the state without first obtaining a special permit tag authorizing such ship- ment.

TEN MILLIONS SPENT HOURLY ON WAR COST IN 1943

Figures released from the U. S Treasury Department indicate that every passing hour of 1943 saw more than $10,000,000 pouring out of the treasury to meet the stagg- ering costs of global war.

Governmental expenditures for 1943 will approach the 88 billion dollar mark. More than 82 billion of which will have been for war purposes alone.

Income, although the highest in history, failed by $53,500,000,000 to equal the out-go.

The national debt climbed from $112,471,000,000 at the end of last year to nearly $170,000,000,000.

RUMBLINGS

Rumbling noises preceeding a fire in an elevator of a local mill at LeMars had people puzzled for a time Study later revealed that possibly the rumbling noises were caused by dust explosions.

Card Of Thanks

We wish to thank relatives and friends for their kindness and sym- pathy shown us in our bereave- ment, and for the flowers and help given us.

Mr. and Mrs. Marlin Bowles and Clara Patsy
Mr. and Mrs. William Meyer and family. 1tc

More Hancock Countians Are Inducted For Service

EMIL BEIER"S PUBLIC SALE NEXT WEDNESDAY, DEC. 12

Will Sell Fine Herd of High Grade Holstein Dairy Cows

One of the finests dairy herds in the county will be sold at public auction next Wednesday, Decem- ber 12th, when Emil Beier holds a closing out sale at his farm 3 miles west and ¼ mile south of Klemme

Mr. Beier has been building up his herd of Holstein cattle since 1916 and has some of the highest produc ng cows in North Iowa.

Besides his dairy herd he also has 6 head of horses, 40 head of fall pigs, farm machinery and some household goods.

He will sell 13 head of cattle, 2 horses, 25 hogs, as well as a lot of hay, feed and machinery.

Turn to his advertisement in this issue for complete listing.

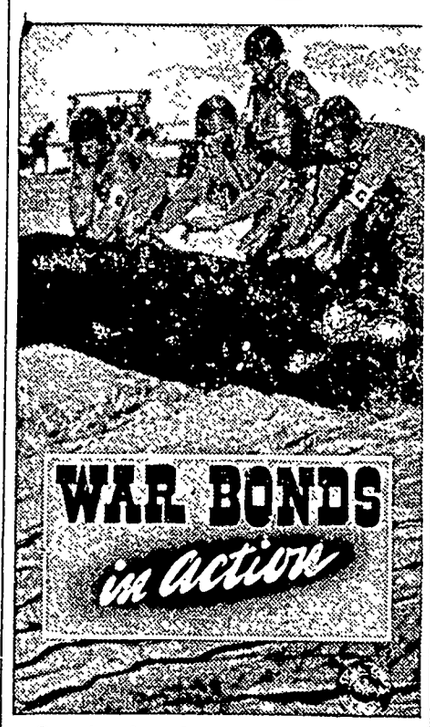
Hancock County Deputies And Clerks Given Salary Raise

Friday the Hancock County Board of Supervisors granted in creases in salaries to deputies and clerks in the various county offic es ranging from $5 to $15 a month The increase became effective on January 1st.

Pooches Are Taxed

It costs money to even lead a dog's life in Hancock County. The Board of Supervisors fixed the li- cense rate on dogs at their meet ing December 31st.

Male dogs can get buy on a $1 tax per year, but the females must have a $3 tag.



On the beaches of Italy, in the jungles of the Pacific—planes, tanks, artillery must move—and fast; no waiting to build roads or airfields. That's when our soldiers must un- roll these "steel mattresses," as you see them in this photo. Your War Bonds pay for them.

U. S. Treasury Department

HANCOCK COUNTY MEN WILL REPORT FOR SERVICE IN ARMED FORCES JAN. 12

The following men who went to Camp Dodge for physical examina- tion on December 21st, passed and will report back on January 12:

Clyde P Lloyd and Louie L. Sweers, Britt, army.

Elvin E. Jacobson, Garner; My- ron C Brown, Woden; and Eugene M Naser, Wesley, Navy.

Harold G. Green, Corwith, Mar- ine Corps.

Clarence F. Chizek, Garner, Air Corps

The following men volunteered for induction and went ahead of the Call and were taken into the Navy: Arnold E Jass and Lloyd L. Anderson, both Garner.

The following men were trans- ferred out of the county for induc- tion: Wilbur Crone, Woden; Clar- ence W. Sebers, Garner; Wayne J. E. Riherd, Britt, and Robert Sut- cliff, Corwith.

OLLENBURG IS RED CROSS CHAIRMAN FOR EAST SIDE

Herbert L. Ollenburg of Garner was elected chairman of the Garn- er Chapter of the American Red Cross at the annual meeting held at the Garner Red Cross room last Thursday. The Garner Chapter takes in the east half of the coun- ty

Other officers elected included Mrs. W. S Pritchard, Jr., vice- chairman; Fern Katter, secretary, and W L. Baggs, treasurer

Chairman Ollenburg will ap- point committees.

Two Klemme Men Have Birthdays The Same Day

Henry Lewis and Clarence E. Kluckhohn both have birthdays on the same date, December 31st

The event is celebrated each New Year's Eve with a fried oyster supper as both men are found of fried oysters.

This year Mr and Mrs Henry Lewis and son Duard were enter- tained at the Kluckhohn home for the annual fried oyster supper

Fire Truck Makes County Call

Klemme's fire department made a run into the country last Thurs- day afternoon to answer a call for help from a motorist near the Al- bert Olsen farm southeast of town The car had caught afire on the road, but the flame had been extinguished by the time the fire truck reached the scene.

FROM FOXES TO WOLF

The Flaherty and Francis men of Pocahontas have been well-known as fox hunters but last week chang- ed to wolf hunters For the past 12 years they have been hunting foxes and have bagged 400 during that time. The wolf they killed last week was the first one for them. They used the same method in get- ting the wolf as they did for round- ing up foxes.

HELLO, FOLKS!

Mr. and Mrs. Walter Henschen, who reside on their farm north- east of Klemme, are the parents of a 10 pound baby boy born to them on Wednesday, December 29. The Henschens now have four boys in their family.

Mr. and Mrs. Irvin Ruka, who reside on a farm west of Goodell, are the parents of a baby boy born to them at the Belmond hospital on Tuesday, December 21.

WEEKLY NEWS ANALYSIS

Steady Progress Marks Allied Drive In Italy; Repulse Nazi Counter Blows; Steel Producers Open Wage Parleys As CIO Asks 17c an Hour Pay Boost

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Released by Western Newspaper Union.

CONGRESS:
Surplus Funds

Government agencies with unspent appropriations would have to turn their surpluses over to the U. S. treasury under an amendment adopted by the U. S. senate.

Sponsored by Sen. Kenneth McKeller (Tenn.) the amendment was part of a $308,000,000 deficiency appropriations bill later sent to a joint senate-house committee for settlement of differences between the two congressional branches.

The amendment was directly aimed against the budget bureau, which recently took control over $13,000,000,000 saved by the army out of its $71,000,000,000 appropriation. The amendment also prohibited the army from transferring 10 per cent of appropriations to other funds.

Said Senator McKeller: ". . . We (congress) don't want to surrender our power to appropriate and designate the purpose for which . . . money shall be spent."

Remove Feed Duties

To encourage additional feed imports for shortage areas, the house passed a resolution removing duties on wheat, corn, oats, barley, rye, flax, cottonseed and hay for a 90-day period.

Frank Carlson

Although approved by a 255 to 55 vote, the resolution was bitterly contested by many middlewestern congressmen, spearheaded by Representative Frank Carlson (Kan.) who said: ". . . It will set a dangerous precedent by removing tariffs. It places the American farmer in competition with farmers of every nation of the world that produces these crops." Furthermore, they contended the action would not increase present imports, already hampered by shipping difficulties.

In advocating passage of the resolution, proponents declared current feed shortages are causing a loss of millions of pounds of milk and poultry production.

LABOR:
Open Steel Parley

With the United States Steel company leading the way, more than 150 steel producers agreed to enter into wage negotiations with the CIO, representing 500,000 workers in the industry.

Employing 166,000 workers, the United States Steel company is the nation's greatest producer, operating through five subsidiaries which turned out 21,064,000 tons last year.

CIO demands a 17 cents an hour pay boost to offset rises in living costs which have allegedly increased 23 per cent since January, 1941, while wage raises have been limited to 15 per cent. Present hiring rates are 78 cents an hour.

In the meantime, the independent union of the National Steel company asked a minimum wage of $1 an hour for 20,000 employees, who thrice previously had been granted wage increases while CIO and other steel producers haggled over terms.

Senate Votes Boost

An eight cents an hour raise for 1,100,000 non-operating rail workers was approved by the senate by a vote of 74 to 4 and sent on to the house for consideration.

Composed of clerks, machinists, and cleaners, the unions originally asked for a 20 cent increase. A special board appointed by the President recommended an over-all eight cent raise, but Economic Stabilizer Vinson opposed it, proposing a substitute plan embracing a sliding scale ranging from four to ten cents more per hour. This latter schedule would cost the railroads 18 million dollars a year less than the flat eight cent raise.

Opposition to the raise in congress was based on the anti-inflation policy of the administration, Vinson stating that in his opinion, the eight cent increase is a violation of the "Little Steel" formula, limiting wage increases to 15 per cent over January, 1941, levels.

Sen. Clyde Reed (Kan.) said that if the senate rejected the plan the workers would set a strike date, and then the government would have to seize the railroads "within four or five weeks."

Battleship Wisconsin

As more than 30,000 cheered, the navy's 52,600 ton super-battleship, Wisconsin, was launched at Philadelphia, Pa.

In the making for 33 months, the Wisconsin cost $90,000,000. With a speed of 33 knots, the huge warhorse will pack nine 16-inch guns, and carry as many antiaircraft fighters in an area less than one-tenth the size of an average city block as an entire antiaircraft regiment.

With a bow towering higher than a five-story building, the Wisconsin is one of the navy's three superbattleships, the others being the New Jersey and the Iowa.

ITALY:
Overlook Rome Road

Having fought their way to the crest of mountain ridges overlooking the road to Rome, doughboys from Lieut. Gen. Mark Clark's Fifth army slowly pushed down the slopes toward the flatlands around the enemy's key bastion of Cassino.

But in this sector, as well as the British sector along the Adriatic coast to the east, the Nazis bitterly counter-attacked, throwing in strong armored forces against Gen. Bernard Montgomery's men in an effort to slow his march toward the important center of Pescara, with its highway leading eastward to Rome.

As General Clark's doughboys edged forward, they left scattered points of resistance behind them, necessitating further action to remove these hot-beds and secure their lines. Continuing action, the Allies' air force pounded Nazi supply depots above Rome, which were being used to stock the enemy in his winter line.

Mihailovitch vs. Broz

While it was reported that Jugoslavia's Chetnik leader Gen. Draga Mihailovitch intended to throw his forces against his fellow-countryman Gen. Tito Broz's Partisan guerrillas for setting up a state in opposition to King Peter's government-in-exile, it was revealed that the British were favoring Broz because he allegedly was offering greater resistance to the Germans.

Mihailovitch

Thus did the garbled Jugoslav situation take a new twist. Britain's support of the communist-backed Broz came after its formal recognition of King Peter's government, but in explaining its about-face, Britain said its policy was to let the people of occupied countries select their own leadership, and late reports indicated Broz had 300,000 behind him compared with Mihailovitch's 30,000.

Broz

SOUTHWEST PACIFIC:
Pound Marshalls

With Old Glory fluttering over the Gilbert islands, the U. S. navy went to work on the Marshalls, lying to the west along our communications lines to Australasia.

Taking off from aircraft carriers, planes roared over the Marshalls to drop explosives, while warships hovered 15 miles offshore to pump heavy shells into the islands' strongholds.

Primarily air bases, the Gilberts and Marshalls not only were a thorn in the U. S. supply lines, but they also flanked any Allied movement toward the South Pacific war theater. Their presence posed a double threat to our forces.

As U. S. airmen softened up the Marshalls, the country was saddened by the navy's announcement that one of its No. 1 aces, Lieut. Comdr. Edward O'Hare, was missing in action. During the battle of the Coral sea, O'Hare singly covered an aircraft carrier menaced by a Jap aerial squadron, shooting down five enemy planes.

MEAT SUPPLIES:
More to Civilians

Civilians as well as the services will share the increased meat supply under a plan outlined by the Bureau of Agricultural Economics.

The BAE also predicted a smaller spring pig crop in 1944, with greatest reductions outside of the corn belt because of feed shortages. While western cattle inventories have not been cut sharply, BAE said, there will be fewer long range stock in the next eight months, and less animals will be fed near beet factories because of the cut in sugar beet feed production.

As a step toward increasing civilian meat supplies, the OPA recently slashed ration point values on veal and lamb, mutton and pork shoulder and loins, and War Food administration lifted restrictions on deliveries of farm slaughtered pork. The services will get a big chunk of increased beef production, partly through acceptance of utility grades.

PRODUCTION:
Sees Long War

Declaring 1944 munitions output should rise to a peak of 30 per cent over this year, War Production board's executive vice chairman Charles E. Wilson said the nation would have to make full use of its economic muscle to beat Germany and Japan.

Charles E. Wilson

A long, hard struggle lies ahead before Germany will fall, Wilson said, adding: "If anyone still clings to the silly delusion that the Japanese will be a pushover for us . . . let him talk to some of the officers and men who have come back from the Pacific theater . . ."

In 1944, aircraft production should reach a rate of 100 per cent above 1943, Wilson said. Naval construction should hold around this year's level of 75 per cent over 1942. Merchant ship construction should rise slightly. Reductions are planned in ordnance, signal equipment and tank output.

DADS' DRAFT:
Million to Go

Because the services will require 2,000,000 men to build up the armed forces to 11,300,000 by July, 1944, approximately 1,000,000 fathers face induction, Selective Service Director Lewis B. Hershey declared.

The other 1,000,000 men will be obtained by recruiting 100,000 17-year-olds for the navy or marines, and drafting 400,000 18-year-olds, 300,000 formerly deferred because of occupations, and 200,000 reclassified 4F's and farm-exempts.

Deferments will be more difficult to obtain and older workers will be favored, Hershey said. Once the services have attained their goal, only about 100,000 men will be drafted a month, he added.

For the home front, the War Manpower commission trimmed estimates for new workers by 900,000 to 1,190,000.

RUSSIA:
See-Saw

Fighting see-sawed in Russia, with the two giants clawing at each other along 600 miles of snowy, wintry front.

To the west of the Ukraine's capital of Kiev, the Russ fell back under the heavy pressure of the Germans, while farther to the south, the Reds chewed deep into Nazi lines above the iron center of Krivoi Rog.

Russian positions along the front disrupted German use of north-south railways. In the Kiev region, the Reds blocked the line to Leningrad and the north, while in the Krivoi Rog area they snapped a railroad running along the whole German defense system.

METAL SALVAGE

Stock piles of strategic metals are now considered sufficient for any foreseeable needs, apparently, as the Steel Recovery corporation has just been dissolved, its task fulfilled. Only a week earlier, the Copper Recovery corporation began dissolution. Similar action has been taken by the aluminum organization.

There are huge supplies in the hands of thousands of dealers, jobbers, retailers and customers, it is stated. The metal stocks were uncovered by questionnaires.

HIGHLIGHTS . . . *in the week's news*

SUITOR: A 95-year-old war worker in St. Louis says that after the war he is going to seek another wife. He has been married five times so far.

DRUGS: The Red Cross has arranged for shipment of drugs worth $97,000 to neutral Switzerland, whence they will be trans-shipped to Holland for distribution by Red Cross units.

CHEWING GUM: A cud of chewing gum is credited with averting a bomber crash over Italy. Flak punctured the gas tank of an A-26 medium bomber, and the crew prepared for a risky belly landing, as the precious fuel drained away. But two gunners patched the hole with chewing gum, adhesive tape, and gauze bandages, and the plane landed safely at its home port.

Walter Winchell

(WNU Service)

Contrasts in the News:

The silver-lining tribe is whooping that everything is peaches and cream. They oppose an increase in manpower for the armed forces. Although every fact debunks them they convey the impression that Americans should start ripping phone books—so they'll have enough confetti to flip at victory parades in a "few weeks" . . . Meanwhile, the Japs are being pushed around in the Pacific. But it's far from a pushover. From Tarawa came a dose of grim news that froze the facial muscles: About 3,000 marines spearheaded the initial assault on that island, but only a few hundred escaped death or injury.

A group of senators are giving our genuine Good Neighbors a coating of mud. We refer to the nations that declared war against America's enemies and have done everything in their power to aid us. Friendly relations between Uncle Sam and most of his neighbors have been a shining light in a darkened word . . . However, these senators have been mum when it comes to a neighbor that has been running errands for our enemies and aiding the Axis to kill American soldiers and sailors. They look the other way when it comes to doing something about pro-Nazi Argentina.

Much space has been devoted to sob stories about the suffering of Berliners. They come from neutral sources. Indeed, the bombing of any city isn't a picnic. But the Nazis asked for it by starting the war and gloating about the cities they massacred. The Nazis gave others a taste of total war. Now they're getting it. All war is brutal . . . Buried in every report of raids on Berlin are figures about the planes lost by the Allies. Let's give our sympathy to the families of the brave fliers who are giving their lives to end a war they never wanted.

There has been an avalanche of postwar plans. All have one ideal in common: Fascism must be wiped out and never allowed to crawl again. They know that Fascists in Germany and elsewhere represent great dangers to America's security . . . At the same time many of those idealists can look you straight in the eye and insist that we must not deprive Fascists in America of their civil liberties. Although they know Fascists here only use freedom to help them spout their poison.

The army, navy and marines are composed of different races, creeds, religions and political beliefs. The United Nations also have many of the same differences. But they are strongly united, fighting and dying together. Their unified strength is winning the war . . . But political differences in Washington are hindering the war. And in too many American cities people of different races and religions will not get along with each other. Although they are far from the battlefields and are forced to make fewer sacrifices than any fighting man of the United Nations—they can't match the patriotism or unity of men in uniform.

Congress is now orally juggling a laudable bill: To provide economic security for demobilized soldiers. That deserves every American's support . . . At the same time, Congress is dynamiting the dam of rationing and price control. It holds back the flood of inflation. If unleashed, it will blast every American's economic security, including the Americans who return from the battlefronts.

Berlin is being drenched with bombs. Headlines about it make thrilling reading. We hope it will force the German-vermin to throw in the brownshirt. But wars can't be won by wishful thinking as some of our editorialists seem to be doing . . . For contrast we offer a headline from Hitler's newspaper at a time when London was being blitzed by the Luftwaffe: "London Bombed Again, British Soon to Surrender."

The Magazines: Wendell Willkie is getting sick of that empty phrase, too—that "free enterprise" echo. In his Look piece, Mr. W. offered this squelcher: "Some of the talk we hear about 'free enterprise' or 'private enterprise' is just propaganda on the part of powerful groups who have not practiced real enterprise in a generation and have no intention of doing so" . . . H. F. Armstrong nutshells our war aims in Foreign Affairs: "Our aim in this war is the defeat of our enemies and permanent victory over their minds."

Never in the history of the world has there been more reason to hope for permanent peace than today. Victory isn't in the bag, but war-loving nations are in a rut. Diplomats among the peace-loving countries have made a vital down-payment on a happy world . . . Only the isolationists are trying to wreck those plans. Only the jack-asstriches sneer at every attempt to form a family of nations. They insist it won't work. Yet they are the same people who said they loved peace and knew how to insure it.

PATTERNS
SEWING CIRCLE

8501
2-10 yrs.

Pattern No. 8501 is designed for sizes 2, 4, 6, 8, 10 years. Size 4, short sleeves, requires 2¼ yards 35-inch material.

Due to an unusually large demand because of current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Soft Drapery

YOU'LL never know how much your appearance may be improved until you try a dress like this one. It has long, slenderizing panels which make you look taller and less wide, and pretty drapery which narrows your waist.

* * *

Pattern No. 8514 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38, short sleeves, requires 4¼ yards 39-inch material, ⅜ yard contrast for trimming.

Quickly Put On

THIS dress is designed so it is easy for little girls to put it on—and button it in a jiffy! It is just like the smart new grown-up styles in its tailored simplicity.

Ship May Break in Two While Being Launched

Ships undergo their greatest physical strain during launching, says Collier's. Most critical moment is when the stern is in the water and the bow is still on the ways; then the weight of the unsupported mid-part causes the section to sag as much as six feet and may break the ship's back if the vessel is not moving fast enough to relieve the strain in a few seconds.

● The Camel Christmas carton (*right*), with its special holiday design, is more popular than ever! Contains ten packages of 20's—in all, 200 extra-flavorful, extra-mild Camels.

ON THE HOME FRONT
With RUTH WYETH SPEARS

A chair is all legs, angles and curves in the wrong places, a slip cover in the right colors and right to bring out graceful lines and cover defects, will give any dining room chair set a new personality. That was the treatment given a set of old chairs like the one shown here. A two-piece frock was

planned to repeat tones in the wall paper of the room in which the chairs were to be used. The bold stripes of the putty tan, green and pine red material gave just the right contrast with the flowered pattern on the wall. Narrow green fringe was used for edging and the sketch shows how the two pieces of the slip cover were made.

Equator Is Dividing Line Of White, Black Swans

All the native swans of Europe and North America have white feathers. The only swans with dark feathers are those which have their native homes south of the equator. Australia has black swans and the southern end of South America has black-necked swans in great numbers.

AT FIRST SIGN OF A COLD USE 666
TABLETS, SALVE, NOSE DROPS

No Gold in Humans

At least 25 metals have been discovered in the human body, among them being nickel, manganese, aluminum, zinc, tin, lead, mercury and silver. About the only important metal that has never been found in human tissues is gold.

Advice To Mothers

Don't compel your baby to take nourishment through a hard, stiff nipple. Baby's refusal to take a sufficient quantity of food may be traceable to this unnatural effort. The Faultless No. 10 Wonder Nipple of highest quality translucent rubber is soft, pliable and resilient. It provides for effortless feeding. Triple-perforated. Slips on bottle easily and anchors firmly. Fits all standard narrow mouth nursing bottles. Withstands repeated sterilizing. 3 for 18c at all drug stores. —Adv.

SNAPPY FACTS ABOUT RUBBER

Water used in a rubber water bottle should never have a temperature higher than 140 degrees Fahrenheit. Boiling water ages rubber prematurely. There should be no air in the bottle when in use if long service is to be expected.

The Amazon Valley, once the world's chief source of rubber, is expected to produce about 35,000 tons of crude in 1943, during which year 50,000 laborers will have been established in the rubber forests. Their contribution will be but a small but important part of our nation's rubber requirements.

The Star That Shone O'er Bethlehem Will Forever Be a Mystery to Science

Could It Have Been A Comet, a Group of Planets, or a Nova?

By ELLIOTT PINE

Now when Jesus was born in Bethlehem of Judea in the days of Herod the king, behold there came wise men from the East to Jerusalem,

Saying, Where is he that is born King of the Jews? For we have seen his star in the east, and are come to worship him.

When Herod the king had heard these things, he was troubled, and all Jerusalem with him.

* * * * *

Then Herod, when he had privily called the wise men, inquired of them diligently what time the star appeared.

* * * * *

When they had heard the king, they departed; and lo, the star, which they saw in the east, went before them, till it stood over the spot where the young child was.

When they saw the star, they rejoiced with exceeding great joy.

—Matthew 2:2-10

THE Star! Matthew calmly records the appearance of this marvelous heavenly portent as a historical fact. For 1900 years many millions have believed that the majestic and unimaginably beautiful herald of the Messiah actually shone over Bethlehem, casting a beam of effulgent glory on that stable "where the young child was."

It has seemed entirely fitting that the birthplace of Christ should be pointed out in so magnificent a manner. Few laymen ever thought of questioning the reality of that star, although nothing like it ever was known before or after the momentous event. But astronomers, being exact scientists, have tried to reconcile the evangelist's words with the known facts on the nature and motions of heavenly bodies. The other three Gospels, by the way, do not mention the star.

In the 17th century, Johann Kepler, one of the greatest of the early astronomers, while calculating the orbits of the planets Jupiter, Saturn and Mars, extended his figures back to the time of Christ. He discovered that these three planets were in conjunction in the year 7 B. C., according to the calendar. Making allowance for the well known error in dating the year of Christ's birth, it was possible to call the year 7 of our era as actually the year in which Christ was born. Now if, as Kepler calculated, the three planets were very close together in that year, they would form a brilliant glow in the sky, during the month of December. So, Kepler reasoned, the conjunction of these planets was the Star of Bethlehem.

In Sign of Pisces.

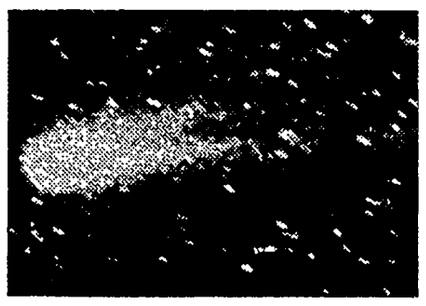
This conjunction appears in the sign of Pisces, or the Fishes, every 800 years. Since the sign of Pisces had a special meaning to the Jews, it was entirely logical for the Magi to interpret an apparently new star within this sign as the long awaited messenger from heaven, and to start on the long journey.

Kepler's theory satisfied pretty well until 1826, when Professor Ideler of Berlin pointed out that at no time are the three planets in absolute conjunction so that they would appear as a single star, even to the naked eye.

Another piece of evidence tending to cast doubt on the Kepler theory was brought in by the geographers. They showed that there were no roads or trails through the mountainous regions that the wise men had to traverse on which they could keep the planets in sight for any length of time. So this attractive explanation gradually faded out. It will not be until early in the 25th century, however, that scientists can test the full possibilities of Kepler's conjecture. It is not entirely ruled out until this time comes.

Perhaps a Comet.

In the last century came a new attempt to explain the Star. Prof. R. A. Proctor propounded the theory



WAS IT A COMET?—Theory that the Star of Bethlehem might have been a comet was advanced in the 19th century. This photo, taken in 1940, shows Cunningham's Comet.

that the mystic sign was really a comet. These celestial travelers of space, flaring up suddenly, moving across the sky often for days or weeks, and then disappearing, always impressed the ancients as mighty portents.

There are a few flaws in this theory, too, as several historians quickly declared. First, a comet was a fearful thing to all peoples of antiquity, a harbinger of evil to come, a warning of retribution for sin. The Magi, being learned in astrology, would know this, of course, and would not likely consider a comet an announcement of the Saviour's arrival. It is possible that these wise men did not follow the prevailing superstition. They might have called some comet his star It is objected, however, that any comet bright enough to attract the wise men's attention would be noted down in some secular history—Josephus, in particular. There is no such confirmatory account.

The Nova Theory.

Lately, a plausible and poetic theory has been presented. The Star of Bethlehem may have been a "nova" or suddenly blazing star. For a brief time a nova may outshine every star in the sky. The most brilliant on record flared up in 1572. Another was observed by the aforementioned Kepler, and by Galileo, in 1604. Novae that can be seen by the human eye are rare. It is only since photography has been applied to astronomy that much is known about them. What causes the flaming phenomenon is not known, but possibly it is occasioned by the collision of two "dead" stars. The impact liberates the fiery interiors of the two bodies, and the seething gases swirl and shoot in a glorious display of light. The nova may burn for some time, but eventually it cools and fades, and generally disappears from sight. Seldom do they last more than a few days.

So if a nova of extraordinary brilliance did burst forth a few days or weeks before the birth of Christ, this could be the Star toward which the wise men hurried, so long ago. It must be remembered, however, that the nova, if such it was, actually had burned out long before the first Christmas eve, because most of the stars are so distant that light takes many years to travel from them to the earth. Only lately the Nova Herculis has been seen, but its light has been traveling through space for 1300 years, at 186,000 miles a second.

Learned Guesses.

But these conjectures and scientific guesses are simply that—guesses. No one knows just what the Christmas Star was, or how it directed the wise men from the east to the little town of Bethlehem. It may be that, since there were prophecies to guide the Magi to that village in Judea, the Star did not exactly point the way, as some fanciful legends have put it, but merely indicated to the wise men the glorious day was near at hand.

The director of the Adler Planetarium in Chicago comments that no star could "stand still" in the heavens while the three Magi plodded wearily onward. It would swing with the other stars in the daily round, as the earth turns on its axis. And again, a star could not remain fixed over the stable on that night of nights, casting down a great broad beam of purest light. That is, no "natural" star could. It would move onward with the procession of the heavens, until it set below the horizon.

A Miracle.

But the world has believed in that Star for 19 centuries. Scientists do not deny that it could have been a miracle—that "Star of Wonder, Star of Hope" that shone over the crib of the Saviour. It is no more difficult to believe that a star could send its beams down on that sacred spot than that angels sang to the shepherds, "Glory to God in the highest." It is one more marvel among many marvels.

From the Scriptures and from tradition it is known that the three wise men or Magi ("Magi" was the term for astrologer in the East) saw a great light in the sky, and took it for the Star that heralded the birth of the King of the Jews, who would deliver mankind from bondage. The three learned men, called kings by tradition, mounted their camels, and came together, one from Chaldea, one from Persia, and one from Arabia. Their names, according to Bede, were Kaspar, Melchior, and Balthasar.

When they came to the stable in Bethlehem, they knelt in reverent wonder, like the simple shepherds gathered about the Babe, and offered their rich gifts of "gold, frankincense and myrrh." Today, although scientific knowledge has advanced a thousand-fold since the time of Christ, the mystery attached to all that sacred story remains.

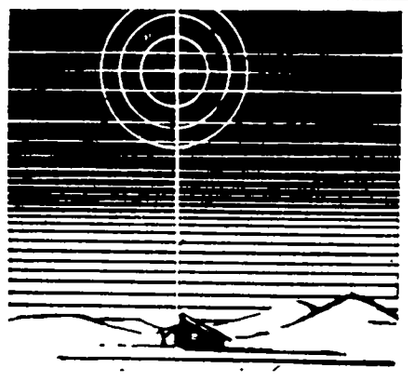
The Star of Bethlehem is still a mystery to science. It will always remain so, for there is no way to recreate the physical conditions of that night, so long ago, and to investigate the phenomena with precise instruments. But millions of Christians will continue to believe that the glorious symbol of hope, the Star, shone over the little stable on that first Christmas, while celestial music floated over the countryside, and all the world was hushed in wonder.

WE THREE KINGS OF ORIENT ARE—An 18th century "presepio" by many authorities considered the finest example of this sort of art, presents the well-known Nativity scene. The perfection of the painted figures is remarkable. In the background, through the end of the gable, can be seen the miraculous Star.

A CHRISTMAS CAROL

There's a song in the air!
There's a star in the sky!
There's a mother's deep prayer
And a baby's low cry!
And the star rains its fire while the Beautiful sing,
For the manger of Bethlehem cradles a king.

In the light of that star
Lies the ages impearled;
And that song from afar
Has swept over the world.



Every hearth is aflame, and the Beautiful sing
In the homes of the nations that Jesus is King.

We rejoice in the light,
And we echo the song
That comes down through the night
From the heavenly throng.
Ay! we shout to the lovely evangel they bring,
And we greet in his cradle our Saviour and King!

JESUS BEGINS HIS MINISTRY

LESSON TEXT—Mark 1:9-22.
GOLDEN TEXT—Repent ye, and believe the gospel.—Mark 1:15.

A new year of opportunity is before us. What will it hold for us and for the world? We do not know, but God does, and trusting Him we move forward. One thing we must have this next year is more Bible study. We need to know what God's Word has to say to us day by day.

In our Sunday schools we begin today a three month series on the Gospel of Mark, which presents Christ as the Servant of God. It is the Gospel of mighty acts.

In our lesson we see Jesus—

I. Entering Upon His Ministry (vv. 9-13).

The baptism and temptation of Jesus were not just a preparation for His work, but were rather His actual entry upon His mission.

The baptism of Jesus was not because of any sin in Him, for He was sinless. It was of real significance as His entry upon the work for which He had come into the world—that of redemption. He who knew no sin became sin for us. He here partook of the sinner's baptism, not because He had sinned, but because He came to be the sinner's substitute (see Heb. 2:17).

What infinite love and condescension! To it God the Father gave His approval (v. 11), and the Holy Spirit gave heavenly witness by descending upon Him.

The one who was to be the constant opponent of Christ and His followers was reckoned with at the very beginning of His ministry as He was led by the Holy Spirit into the wilderness to be tempted of Satan. Around Him were the wild beasts, before Him was Satan, and in it all "the angels ministered unto l..m."

The devil has only three real temptations to present, "the lust of the flesh, the lust of the eyes, and the pride of life" (I John 2:16). He uses the same three types of temptation with us, varying the "dress" in which he presents them. Let us be on guard.

Victory came through the use of God's Word. We need to learn that lesson and not attempt to defeat Satan with any man-made weapons of will power, logic, or culture.

II. Working As Preacher and Teacher (vv. 14, 15, 21, 22).

The Gospel of Mark is the book of Christ's miraculous works. It is therefore significant that His first recorded work was that of preaching, His second that of calling and preparing fellow workers, and last of all the miraculous healing of the demoniac (vv. 23-28).

From a human viewpoint one would think that the opposite order would prevail. First let the Master do some mighty miracle to catch the attention of the people, then organize a great "party," and then preach. Much effort in our day follows that human formula and fails of lasting results. The man who magnifies preaching and gives the Word of God pre-eminence will see real spiritual accomplishments.

Notice also that when Jesus began His ministry in Capernaum (v. 21), it was by teaching, essentially the same as preaching. There is no substitute for the personal presentation of the gospel.

Jesus preached faith and repentance, or perhaps one should say repentance and faith (v. 15). They went together in our Lord's preaching. Let us follow His example.

The preacher of our day, truly called of the Lord and faithfully proclaiming the full counsel of God, may well be encouraged by the importance our Lord gave to that ministry. He too may speak with authority because He speaks for Christ.

III. Calling His Helpers (vv. 16-20).

The orderly development of any work calls for the choosing and training of associates. Moody is said to have observed that "it is a greater thing to put ten men to work than it is to do ten men's work."

Our Lord was no mere human leader, but He desired and used fellow workers and He committed to them the carrying on of His work after He departed.

God still calls men into His service. Would that grace might be given to each one to whom such a call may come to respond "straightway," as did the disciples.

The nature of our Lord's call to these men is worthy of our attention. He wanted them not as executives, or leaders of an organization, or as His personal attendants. They probably served in all these capacities and others. But their main business was to be personal soul-winning.

Let us not forget that such is God's calling to each of us who are Christians. We may have other duties to perform, other work to do, but this thing we must do—we must be "fishers of men."

Household Hints

Most rayon fabrics should be pressed when slightly damp, but spun rayons look best if ironed when almost dry.

* * *

Look over clothes and household textiles regularly, reinforce weak places and mend small holes before they grow large, and fabrics will last longer.

* * *

If you use electric extension cords, check them frequently for frayed places. Never handle a cord with wet hands and handle a wet cord only with a thick pad or dry cloth.

* * *

When the sweetness of cream is doubtful, stir in a pinch of soda. This will prevent curdling even in hot coffee.

* * *

To protect yarn or small woolen articles from moths, put them in a tightly covered glass jar or tin can. The jar is preferable as it enables one to see immediately what it contains.

* * *

It is a simple matter to spread french dressing uniformly over a salad by using a clothes sprinkler of the cock-necked, bottle-top variety. When finished, the sprinkler can be inserted in a hot-water faucet and quickly cleaned.

It's New!
It's Fast!
It's Better
than any other dry yeast we ever used, say 8 out of 10 women recently surveyed

Hancock County Board Proceedings

4TH ADJOURNED NOVEMBER MEETING
Garner, Iowa, December 20, 1943

The Hancock County, Iowa, Board of Supervisors met in session on above date with Supervisors F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 52-54-17.

On motion and second the bond of Penn Eckels, Supervisor, is approved.

Supervisor John Chambers is appointed a committee to investigate and cause repairs to be made in D. D. No. 58 and in D. D. No. 73-139.

In the matter of a hearing on the establishment of D. D. No. 137, a subdistrict of D. D. No. 1 and 2, Hancock County, Iowa, petitioned for by Frank J. A. Hejlik, the time heretofore fixed for said hearing having arrived, the proof of publication of said notice of hearing being on file, said hearing was held as scheduled.

After duly hearing all objections, oral and written, and whereas, objectors requested that the hearing be continued to a later date to enable them to better advise themselves and same being agreeable with the petitioner, and the Board of Supervisors being agreed on the point.

Be and it is therefore resolved by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of the proposed D. D. No. 137, a subdistrict of D. D. No. 1 and 2, Hancock County, Iowa, that this hearing on the proposed establishment of the hereinbefore referred to Drainage District, be and the same is hereby continued to January 17, 1944, at the hour of 1.30 P. M. of said day, to be held in the Board room at the Courthouse in Garner, Iowa.

The foregoing resolution was offered and read by Supervisor Penn Eckels, who moved its adoption seconded by Supervisor Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels, and John Chambers, aye. Nays, none.

Whereupon the Chairman declared the resolution duly adopted.

BE IT RESOLVED, that the claims hereinafter set out be allowed in amounts designated thereon, and the County Auditor be and he is hereby directed to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

5TH ADJOURNED NOVEMBER MEETING
Garner, Iowa, Dec. 27, 1943

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J Schoun, Penn Eckels and John Chambers, present

The minutes of the last meeting were read and approved as read.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D D No. 34.

On motion and second Wm. Henschen, H. C Armstrong, and Charles A. Frisbie are appointed a damage commission to appraise damages caused by the repair and cleanout of the open ditches of the main and lateral No. 1 of D D. No. 14, Hancock County, Iowa.

WHEREAS, the County Funding Account has a balance of $57.46 and said account is a dead fund with all items chargeable to said fund having been paid in full.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the sum of $57.46 now in the County Funding Account be and the same is hereby ordered transferred to the General County Fund of Hancock County, Iowa. The County Auditor be and he is hereby directed to order the treasurer to correct his books accordingly. All as by law provided.

On motion and second December 30th is hereby fixed as a date for the annual inventory of the Hancock County Home.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authoried to draw warrants therefore on the fund indicated in payment of such claims in amounts set opposite each claim.

KLEMME LOCALS

Mr and Mrs. Carl Swanson left Saturday night for Chicago where they visited until Tuesday.

Just to keep the records straight: rationing boards have served exactly two years today, Wednesday.

Mr. and Mrs. W. F. Pavey, Mrs. John Clements and Mrs. Benn Coobs were at Mason City today.

Mrs. Walter Bredlow today took her mother, Mrs. Anna Ulrich, to Clear Lake with her, as Mrs. Ulrich is sick.

Mrs. Gerald Koerner and son Terry left today for Dow City to attend the funeral of Mrs. Koerner's uncle.

The W. S. C. S. of the Methodist Church meets this week Thursday afternon at 2:00 o'clock. The ladies will have a covered dish lunch.

Mr. Edw. Schaefer has been confined to his home the past week with flu, but is reported much better at this time.

Miss Ruth Stille, who is employed in Des Moines, visited over the New Year with her parents, Mr. and Mrs Lester Stille and family.

Mr and Mrs. John Etchen and daughter Betty of Des Moines, visited with Klemme relatives over New Year's.

Mr and Mrs Verner Lewis entertained Mr. and Mrs. Henry Lewis and son Duard to dinner Thursday evening.

"Cap" Blank of Kanawha and Nadine Kimball of Klemme, spent Christmas with Nadine's parents, Mr. and Mrs. Walter Kimball and family at Boone.

Rev. and Mrs. H. E. Harvey and children, Elwood and La Nelle, were dinner guests on New Year's day at the Rev. Broberg home in Garner.

Mr. and Mrs. Otto Lemke entertained to dinner Sunday Mr. and Mrs Edwin Josten and Marcelle; and Mr and Mrs. C. A. Larsen and Eunice and Clarence, Jr. The dinner was to celebrate the 39th wedding anniversary of Mr. and Mrs. Lemke, which was on January 4th.

KLEMME LOCALS

Mrs. Clara Barz entertained to dinner Sunday Mr. and Mrs. Ervin Nuehring and family; Mr. and Mrs. Raymond Barz, and Mrs. Evert Barz and children.

Mr. and Mrs. Arnett Waddingham entertained to dinner Sunday Mrs. Anna Waddingham and son Ardell; Mr. and Mrs. Curtis Waddingham and John Lemke.

Mr. and Mrs. John Neuberger and daughters, Ruth and Faye, enjoyed dinner Sunday at the home of Mr. and Mrs. Walter Blumer in Avery township.

Mr. and Mrs. Henry Jost, Phyllis and Dianne, were at Mason City Sunday for a visit with Mrs. Amanda Kirkwood at the Marvin Lakin home.

Mrs. Lena Schroeder entertained to dinner on New Year's day, Mr. and Mrs. Edmund Josten; Mr. and Mrs. Raymond Barz; Mrs. Evert Barz and children; and Mrs. Clara Barz, Allan and Avis.

Mr. and Mrs. Worthy Usher of Rowan; Mrs. Conrad Quandt and Miss Marie Blank went to Cedar Rapids Sunday for a visit with an aunt. They returned home Monday evening.

Dinner guests at the home of Albert and Mary Swanson on New Year's night were Mr. and Mrs. Oscar Swanson, Mr. and Mrs. Orville Bridges and daughters; Mr. and Mrs John Etchen, and Mrs. Ethel Swanson Petersen.

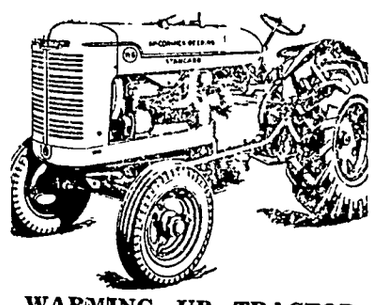
Mrs Daisy Lemke entertained to dinner Sunday: Albert Etchen and family; Robert Greiman; Verner McLaughlin and family of Belmond and Pvt. Leon Lemke of La Crosse, Wisconsin, who was home on a short furlough.

A shower was held at the Elmer Schaefer home in Liberty Friday afternoon for Mrs. Melvin Schaefer, a recent bride. Refreshments were server by the hostess. Mrs. Schaefer received a variety of nice gifts.

Mr. and Mrs. Louis Weaver and Mr. and Mrs. Emory Weaver have received clippings from the Luke Field army paper at Phoenix, Ariz. stating that Cpl. Wiley Weaver won first in a shuttle run in which nearly 5,000 men participated.

Mrs. John Clements received a package of souvenirs from her husband who is stationed in England. The package contained several British coins, a hand made locket and a cigarette lighter, items which John had made himself out of several English coins.

Tips ON FARM MACHINERY



WARMING UP TRACTOR RADIATOR

HEAT WATER QUICKLY!
When operating the tractor during the winter, bring the cooling water up to operating temperature as quickly as possible Don Struthers, Iowa State College extension agricultural engineer, says that wear on engine sleeves and pistons is 25 times greater at 40 degrees water temperature than it is at 180 degrees.

The radiator shutter or curtain should be closed over the front of the radiator as soon as the engine is started. Adjustment is made to hold the water temperature at 175 to 185 degrees when operating on gasoline and 195 to 205 degrees when operating on distillate or tractor fuel.

A cold engine, whether it is in a tractor, truck or automobile, should NOT be "raced" immediately after starting. Allow the engine to idle for 2 or 3 minutes so that moving parts will not wear excessively before the oil has circulated throughout the engine.

• If your tractor is not equipped with a Radiator Curtain or Shutter, we can furnish you with one.

NORTHERN
LUMBER IMPLEMENT STORE
Ira Overholt, Manager

LARGE LOSS

It will be necessary for Mr. and Mrs. Ray Solberg of Manchester to shut down their greenhouse business for the coming winter months. A hot water boiler broke down during a recent cold spell with the result that flowers of every kind were frozen. Mr. Solberg will install a new boiler in the spring and will open the greenhouse as soon as possible.

Begin The New Year Right!

MODERNIZE AND IMPROVE . . .

That's the whole story in a nut-shell. Winter is the ideal time to have our carpenters do the following work in your house:

- **Lay New Hardwood Floors**
- **Build New Closets**
- **Modernize Your Kitchen with new Built-in Cabinets**
- **Inclose Your Porches**
- **Build Book-Cases and Shelves**
- **Build In a Breakfast Nook**
- **Build A Kitchen Bar**
- **Insulate Attic with Zonolite**
- **Install Combination Storm and Screen Doors**
- **Make Needed Repairs, Etc.**

Uncle Sam wants you to keep your house in good repair. Much of this work can be done more economically by our carpenters during the WINTER MONTHS. Come in and get estimates and suggestions, and latest Government Regulations on new work and repairs.

DISTRICT BOY SCOUT OFFICERS ELECTED

Dr. E. H. Phillips of Garner was named Chairman of the Hancock District Boy Scout Committee at Annual Meeting of the Committee held in Britt Wednesday evening. Carl Frick of Britt was named Vice Chairman and Orville Maben of Garner was nominated to the Executive Board for appointment as District Commissioner.

Dr. Phillips has served as District Commissioner for a number of years and as Chairman of the District succeeds Fred Missal, Garner, who also has held that position for a number of years.

Members at large were elected as follows: John Mullins of Corwith, Cliff Stewart of Crystal Lake, Henry Bode of Woden, V. D. Koons of Britt, Oscar Johnson of Kanawha, Sumner Trumbell of Klemme, Amos Hanson of Goodell and Paul Beckwith of Garner.

Reports of Scouting progress during the past twelve months were given by the cairmen of the six operating committees of the District.

Coming Scouting events include the Annual Meeting of the Winnebago Council which will be held in Mason City on January 20th and the next District Committee meeting which will be held in Garner on Jan. 31st.

Fred Missal, Chairman presided at the meeting

It was brought out in the reports that there were now more than seventeen hundred Scouts and Cubs registered in the Council, more than has ever been registered before.

Acid Indigestion

Relieved in 5 minutes or double money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

WNU—N 51—43

When Your Back Hurts -

And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. It is better to rely on a medicine that has won countrywide approval than on something less favorably knowns. *Doan's* have been tried and tested many years. Are at all drug stores. Get *Doan's* today.

DOAN'S PILLS

Threw Self at Cannon; Mob Was Suppressed

Commandant Archibald Henderson was the first marine corps officer to attain the rank of brigadier general, President Andrew Jackson announcing the commandant's promotion while Henderson was leading his Leathernecks in the swamps. The commandant also was cited for gallant and meritorious service in the South.

General Henderson was a fighter to his dying day. During a serious Plug Ugly riot in Washington, marines were ordered to quiet the disturbance. The Plug Uglies, pointing a loaded cannon into the ranks of the Leathernecks, ordered them to withdraw. It was a difficult situation for the marines who could either lose many of their number in capturing the gun, or withdraw.

The commandant, in civilian clothes, reached the scene as the ringleader of the armed ruffians issued his threat. Although he was 74, the general rushed through the rioters and, placing his body against the muzzle of the cannon, ordered his men to advance. Recognizing their leader, the marines seized the opportunity afforded by his bold gesture and took the gun.

During the bitter battle that followed, a Plug Ugly fired a pistol at the general but a timely blow from a marine deflected the bullet and probably saved the commandant's life. Unruffled by the incident, General Henderson and his rescuer marched the gunman off to jail.

Care Should Be Taken With Hides and Pelts

Because of the urgent wartime demand for leather, farmers and ranchers and sportsmen are urged to take proper care of hides and pelts from cattle, sheep, deer and elk, and then see that they are marketed while still in good condition.

Many hides and pelts are spoiled or damaged to the extent that they are unfit for leather because of careless and improper handling. Here are suggestions for handling hides and pelts:

1. Prevent blood from getting in the hair or wool; 2. Do not cut or score the hide when skinning. Very little knife work is necessary on a lamb; 3. Remove all fat and meat from skinned hide; 4. Spread hide flesh side up to cool. Do not wash it. Don't let it dry out; 5. Salt liberally—twice as much as may seem necessary; 6. Fold edges in to center, flesh side together. Fold again and again until the hide can be tied in a bundle; 7. Deliver and sell to a hide dealer as soon as possible—before the hide freezes or dries out.

Bitter Flavor

Pastuerization, high temperature separation of milk and cream, and care in preventing alternate warming and cooling of raw milk help to prevent bitter flavor of milk products caused by action of lipase on the butterfat. Bitter flavors in milk and cream may be caused by strong feed, and by bacteria, but the substance called lipase, present in most milk, may also cause a bitter flavor under certain conditions. Lipase attacks the butterfat globules and breaks them down to produce fatty acids, which cause a bitter flavor much like that of rancid butter, though seldom as strong. Extremely bitter milk may even irritate the throat enough to cause slight coughing. Nearly all samples of raw milk contain enough lipase to cause the bitter flavor, but the lipase does not always break down some of the butterfat in whole milk or in cream. Skim milk never develops the off flavor, as it contains no fat to be decomposed.

Many Ships Damaged

Merchant ships at war may limp home damaged by torpedoes, mines or bombs. Moreover, ships carrying war cargoes take long chances. They bend propellers and weaken plates running through ice lanes. They run aground in badly charted waters. They sometimes collide with each other on foggy convoy nights. The time lost under repair is an important element in the cutting down of the effective worth of the merchant fleet. In summer 5 per cent of our tonnage is laid up for repairs; in winter it runs as high as 12 per cent. In addition, damaged ships lose time waiting their turns in drydock. During one month there were 783 ocean-going vessels under repair in 40 United States repair yards, while only 492 overhauled ships were sent back to sea.

Fewer Heart Deaths Reported in Pregnancy

An abrupt drop in fatalities due to heart complications in pregnancy has occurred within the last 15 years. Dr. John J. Sampson, associate clinical professor of medicine in the medical school on the San Francisco campus of the University of California, now on military leave, reported that surveys from all over the U. S. show that this drop, from 15 per cent of all pregnancies to 3 per cent, was coincident with the establishment of cardiac-obstetrical clinics.

In these clinics, Dr. Sampson indicated, the following points were stressed: early diagnosis of cardiac lesions; termination of pregnancy when feasible in women with impending or obvious heart failure; the frequent observation of patients to detect signs of failure or complications; limiting the physical activity, even to bed rest in a hospital when necessary; digitalis or other drug therapy; and the joint decision as to the mode of delivery, the anesthetic, and post partum care.

The most obvious circulatory strains, Dr. Sampson continued, are caused by the increase in total body weight and disturbance of normal posture. Especially in cardiacs, excess weight gain should be prevented and a well-designed obstetrical corset should be worn.

As to whether caesarian section or labor is safest for the cardiac, Dr. Sampson suggested that that is dependent on the individual case. However, he stated that uncomplicated surgery is surprisingly well borne by cardiacs even in heart failure, only the normal operative risks need be considered.

'Basic English' Would Be Simple but Monotonous

The problem of using the basic English recommended by Churchill as an international language would be to keep it simple, according to Dr. Douglass S. Mead, professor of English literature at the Pennsylvania State college.

Its advantages, he pointed out, are that it is comparatively easy to learn, and it insures simplicity of phrase. On the other hand, its lack of synonyms leads to monotony, and its lack of specific words leads to using combinations of several words to convey one meaning.

"It is a business man's English, not a poet's," Dr. Mead added. "It stifles original and artful expression, but it can be made into a medium for practical negotiation even though it may not be able to convey sense impressions and evoke emotional responsos."

Basic English would still have some difficulties for the foreign learner, he explained. Although it has only 18 verbs, most of those have irregular conjugations, and they combine with prepositions to assume new meanings. Meanings of "put up," "put down," "put up with," "put off," "put in," "put over," "put through," and "put by" are not easy for a foreigner.

Appian Way

Begun by Appius Claudius Caecus, the censor, in 312 B. C., the Appian way was pushed from Rome 132 miles southeastward along the coast of Capua. The original road, 15 feet wide, was first used for military purposes. At Capua it forked. One branch dipped south to Reggio on the toe of the boot, a take-off port for Roman soldiers and merchants headed for conquest and commerce in Africa.

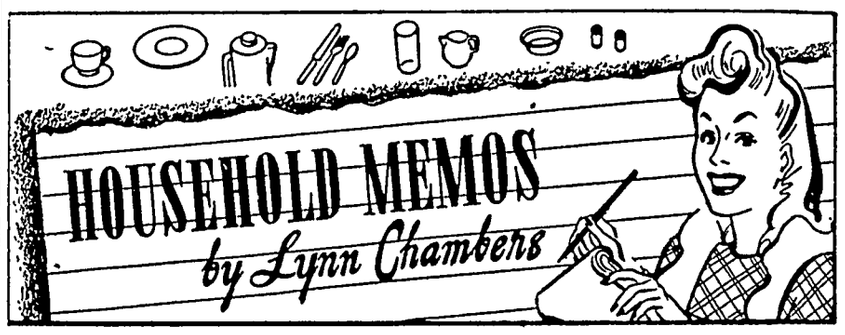
The other branch ran from Capua southeastward to the seaport now called Brindisi, on the heel of the boot. Its harbor swarmed with galleys that ferried traders to and from Mediterranean ports. The modern Levant Fair held at Bari, near Brindisi, recalled Rome's bustling trade with the Near East in the great days of the empire.

Controls Insects

Fumigation is a safe, effective and inexpensive method of controlling grain insects. A thousand bushels can be effectively rid of insects at a cost of about five dollars without hazard to grain, buildings or operator.

Invest in Bonds

Funds held for the protection of policyholders and invested in United States government bonds by 346 capital stock fire insurance companies amount to more than 740 million dollars.



Puddings and Spice And All Things Nice Make Xmas Merry

Traditional holiday cookies and puddings can still appear in this year's celebrations. Make them simpler by using recipes in today's column.

Eyes bright and shining, hearts full of the Christmas spirit and wondrous expectation—you're not going to disappoint these even this holiday season!

There are many foods to please during holiday time and in former years our only worry was to have the time to make all the puddings and cakes we wanted. Now, we have not only the time element to consider, but also the problem of rationed goods, prices, and time, too. For these reasons, today's recipes have been designed to fit all these requirements. Look them over, homemakers, and you'll find they quite fill the bill:

Christmas Pudding.
(Serves 12)

- ½ cup sugar
- ½ cup butter or margarine
- 1 egg
- 1 cup molasses
- 1 cup sour milk
- 1 teaspoon soda, dissolved in sour milk
- 3 cups flour
- ½ teaspoon cinnamon
- ¼ teaspoon cloves
- ⅛ teaspoon nutmeg
- 1 cup chopped raisins
- ½ cup currants or seedless raisins
- ½ cup ground citron
- ½ cup candied cherries
- 1 teaspoon vanilla

Cream sugar and butter or margarine. Add egg, slightly beaten. Add spices to flour. Add molasses, milk and flour alternately, a little at a time, blending well. Add fruit and vanilla. Pour into two greased 1-quart pudding molds. Cover and steam for 3 hours. Serve with hard or foamy sauce.

If you want to splurge a bit and can afford it, here is an old-fashioned, real English plum pudding:

English Plum Pudding.
(Serves 12)

- ¾ cup sifted cake flour
- 1 teaspoon salt
- ¾ teaspoon baking soda
- 1 teaspoon cinnamon
- ¼ teaspoon nutmeg
- ½ teaspoon mace
- ½ pound raisins, chopped
- ½ pound dried currants, chopped
- ¼ pound citron, chopped
- ⅛ pound lemon peel, chopped
- ⅛ pound orange peel, chopped
- ⅛ pound blanched almonds, chopped
- ½ cup fine bread crumbs
- ¾ cup hot milk
- ½ pound brown sugar
- 5 eggs, separated
- ½ pound suet, chopped
- ¼ cup fruit juice (any kind)
- ½ glass currant jelly

Lynn Chambers' Point-Saving Menu

Creamed Chicken in Mashed Potato Nests
Parsleyed Carrots
Crusty Rolls Lettuce Salad
Cranberry Pudding

Sift flour, salt, soda and spices together; stir in fruit and almonds. Soften crumbs in milk 10 minutes. Beat sugar into beaten egg yolks; add suet and crumbs; stir into fruit-flour mixture. Add fruit juice and jelly and mix well. Fold in stiffly beaten egg whites. Pour into greased mold; cover tightly and steam for 3½ hours.

Steamed Cranberry Pudding.
(Serves 6)

- 1 cup sifted flour
- 1½ teaspoons baking powder
- ½ teaspoon salt
- ⅓ cup brown sugar
- ½ cup bread crumbs
- ⅔ cup finely chopped suet
- 1 cup chopped cranberries
- 1 egg
- ⅓ cup milk or water

Mix ingredients in order given. Turn into a greased mold, cover with waxed paper and steam for 2 hours.

Foamy Cranberry Sauce.
(Makes 1½ cups)

- 4 tablespoons butter
- 1 cup confectioners' sugar
- 1 egg, separated
- ¼ cup sweetened cranberry juice
- Grated rind of 1 orange

Cream butter and sugar together. Add beaten egg yolk, cranberry juice and orange rind. Fold in stiffly beaten egg white just before serving.

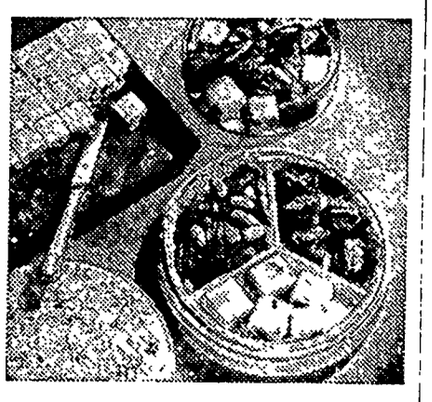
Hard Sauce.
(Makes ¾ cup)

- ⅓ cup butter
- 1 cup confectioners' sugar
- ¾ teaspoon vanilla
- 1 tablespoon cream

Cream butter, add sugar, gradually, beating until light and fluffy. When thoroughly combined, add flavoring and cream. Chill until cold but not hard.

Coffee, ginger, nutmeg, fresh fruit or jam may be substituted for vanilla and cream.

To those of you to whom home-made candy is a real Xmas treat, you will find this recipe has the real holiday touch.



It will be a gay Christmas if you give out candies full of fruits and nuts. Home-wrapped packages bring cheery greetings to friends and neighbors.

Christmas Butter Fudge.
(Makes 1⅓ pounds)

- 2 cups sugar
- 1 cup milk
- ¼ cup butter
- ¼ teaspoon salt
- ¼ cup candied cherries, cut small
- ⅛ cup blanched pistachios

Put milk, butter and salt into a large saucepan and bring to boiling point, stirring constantly until sugar is dissolved. Cook at moderate rate (236 to 237 degrees F.), stirring only occasionally, until candy will form a soft ball when dropped in cold water. Remove from heat immediately and set pan in cold water; do not stir or beat until cooled to lukewarm. Add vanilla and beat until candy becomes thick and creamy and loses its shine. When on point of "setting" add cherries and nuts and fold in quickly. Pour candy in buttered square pan and let stand at room temperature until firm. Cut in squares.

Baked Orange Garnish.

- 8 oranges or tangerines
- 1 cup fruit juice

Cut peeling of fruit into 6 sections, cutting down about 1½ inches. Turn petal-like sections of peeling under, removing part of white membrane. Place on a baking dish. Pour juice over fruit and bake in a hot (400-degree) oven for about 10 minutes. Use with watercress or parsley as a garnish for ham or turkey.

If you want sugar-saving suggestions, write to Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago, Illinois. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

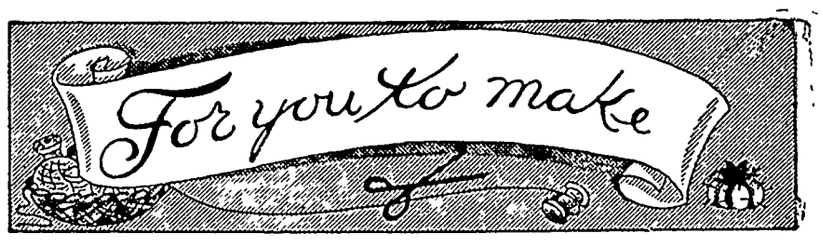
Lynn Says

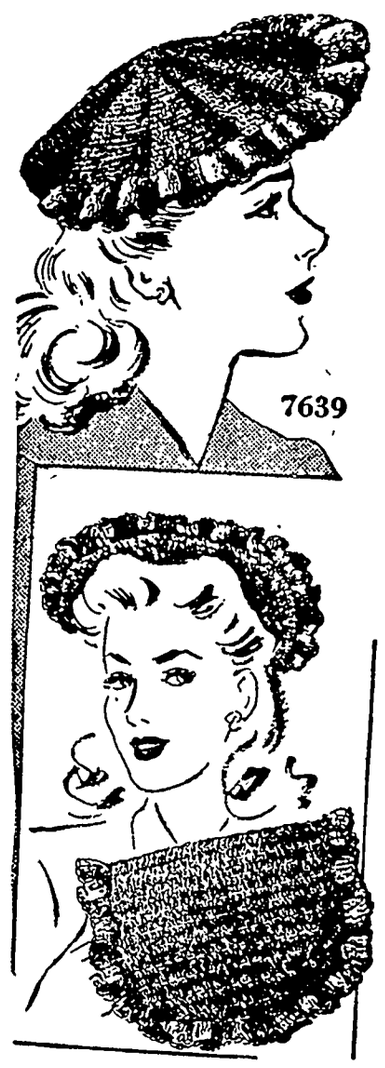
The Score Card: Crop estimates jumped on white potatoes making more available for civilian use. You are urged to buy them by bushel instead of by the pound.

Watch for changes in point and price values. They are an indication of how you can guide your food budget. Figs have gone up in price, grapes down. Prunes and raisins are back on the ration list because there are no longer large stocks of these available. Crabmeat is up in price as are some of the cheeses.

Guide your use of milk carefully as your dealer is now rationed. This is being tried because it would be difficult to ration milk to the consumer by points.

Save every bit of fat that you can and turn it in to your butcher. A tablespoon a day will help to bring your boy back sooner.





JAUNTILY forward tilting or behind a youthful pompadour . . . either of these ways are right for the wearing of this pliant, easily adjusted beret with its flirtatious ruffle and matching bag. You can crochet both at little cost in spare moments. Use a short yarn.

Pattern 7639 contains directions for hat and purse; stitches, list of materials needed.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

ASK ME ANOTHER? A General Quiz

The Questions

1. Gold alloy with nickel and zinc is called what?
2. What island was settled in 1790 by mutineers from the British ship Bounty?
3. A Hibernian is a native of what land?
4. Penelope waited ten years for the return of her husband. What was his name?
5. What city in Italy is known as "the Bride of the Sea"?
6. What chief justice presided over the trial for impeachment of President Andrew Johnson?

The Answers

1. White gold.
2. Pitcairn.
3. Ireland.
4. Odysseus (Ulysses).
5. Venice.
6. Salmon P. Chase.

First Choice in the Service

If you've ever noticed the top of a Marine Officer's visor cap, you've seen on it something you won't find on any other cap worn in Uncle Sam's service—a neat "X" of looped braid.

There's a story back of that braided "X", and it goes back more than 150 years, to a time shortly after the U. S. Marines were first organized.

In those days of sailing ships, naval battles often ended in close hand-to-hand fighting, as the crew of one ship tried to board the other—and Marines, of course, were in the thick of the fight. Some were in the boarding party, and some were posted in the rigging to fire down on the enemy. It was because of those men firing from high on the masts that Marine officers—whose uniforms from above resembled the enemy's — fixed "X'S" on their hats.

In other words, that braid meant to the Marines in the rigging, "X marks the spot—**not** to shoot at!"

Since those days, the "X" on the cap has become a standard part of the Marines' uniform. Another piece of "standard equipment" you'll notice among Marines these days—whether they're wearing dress uniform or combat dungarees—is the American cigarettes they carry with them wherever they go. In all those news pictures you've seen of Uncle Sam's fighting men, snapped as they are relaxing while "off duty," you'll find that in most cases they will be smoking a cigarette. And what brand do they prefer? Well, actual sales records show that the favorite with men in the Marines—as in the Navy—is Camel. Likewise, according to the sales records, Camels are first choice with men in the Army.

Fighting men who have come back from jungles, deserts, and mountains—wherever Uncle Sam's forces are stationed — give one pretty good reason for this choice. They say that Camels stay fresh—that out in the jungles of Guadalcanal, for instance, the Camels they get are actually just as fresh-tasting and full-flavored as the ones they used to get back home.

Of course, the millions of men in training camps here at home want their cigarettes just as much as soldiers. Your dealer now has Camels in special Christmas cartons, gay and colorful—and he will be glad to wrap them for you for mailing.—Adv.

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Klemme Schools began again on Monday after a vacation over the holidays.

Herman Schuldt of Garner was in Klemme on business last Friday morning.

Klemme business places have been busy invoicing the past few days.

Mr. and Mrs. Tom Nelson visited last week with their son, Rev. Harvey Nelson and family at Terrill.

Mrs. John Rapp, who has been sick for the past eight weeks, is still confined to her bed at her

Purd Tompkins of Garner was in Klemme on business Monday afternoon.

F. A Arnold was ill with the flu most of last week and was unable to be at the bank the fore part of this week.

Mrs. Lyle Wilcox returned home Sunday evening from Minneapolis, where she had spent the week visiting at the Wilcox home.

John Day enjoyed a New Year's dinner at the home of Mr. and Mrs. Bert Mathews at Clear Lake Saturday evening.

Mr and Mrs. Henry Lewis and son Duard were dinner guests Sunday at the home of Mr. and Mrs. C. E. Kluckhohn.

Mrs. Wm Berkey of Garrison, came last Thursday to care for her father, F. W McNutt, who is ill at his home in Goodell.

Elwyn and Dean Jacobs spent Thursday and Friday at Simpson College at Indianola Elwyn, who is a freshman at Simpson, returned to his college duties Saturday after spending the holiday vacation visiting with his parents, Mr. and Mrs. Ed. Jacobs.

Get your Sale Bills printed at The Klemme Times.

Margaret Veenstra returned to her work at Des Moines after visiting over the holidays with her parents, Mr. and Mrs. Henry Busse.

Mr. and Mrs. P. M. Wilson and Mr. and Mrs. R. A. Jorgenson were entertained to a New Year's dinner at the C. G. Waterman home Saturday evening.

Miss Helen Knudsen of Hartland, Minn, who is a stenographer in Washington, D. C., visited for a few days at the Earl Ruka home west of Goodell.

Mr. and Mrs. Lyle Liebendorfer of Forest City, and Mr. and Mrs. R. A Jorgenson were dinner guests Sunday at the Joe Liebendorfer home in Hampton.

Rev. and Mrs. H. E. Harvey and children, Elwood and La Nelle, and their house guest, Rev. Bassett, and Ira Overholt were dinner guests at the John Chambers home Sunday.

Harriet Van Buskirk, who is a student at Council Bluffs, returned to her studies after spending the holidays visiting with her parents, Mr and Mrs. Lloyd Van Buskirk.

Frank Gibbs and family of Des Moines spent a few days the latter part of the week visiting at the home of Anna Gibbs and with other Klemme relatives and friends.

Mrs Ethel Swanson Petersen, daughter of Mr. and Mrs. Oscar Swanson, left Monday for Burbank, California, where she will be employed.

There was a large crowd present at the school house auditorium on New Year's Eve to attend the plays put on by the young people of the Klemme Reformed Church. The plays were all very good and the costumes and scenic effects were very nice. The New Year plays are an annual event sponsored by the young people of the church.

Cull out hens the year around.

Mrs. Leslie Smock and children of Kanawha spent last week at the parental Levi Klotzbach home. Mr. Smock came New Year's Day for dinner after which his family returned home with him.

Miss Dorothy Carpenter returned to her studies at the University of Iowa at Iowa City after spending the holiday vacation visiting with her parents, Mr. and Mrs. Harry L. Carpenter west of Goodell.

Delores Cook has returned to her teaching duties at Alleman after spending the holiday vacation visiting with her parents, Mr. and Mrs. J. J. Cook southeast of Klemme.

Mr. and Mrs. G. H. Blakewell, who reside 3 miles south of Klemme, in ocmpany with their daughter, Mrs. Markwardt of Thornton, returned home last Wednesday from a visit with relatives in South Dakota.

TO AID OF BABY

When her two-year-old daughter, Naomi, accidentally fell from a moving car, Mrs. L. V. Coons of Confidence plunged out of the car to rescue the baby. Naomi received only minor bumps and bruises but her mother was more seriously bruised and cut. Mrs. Coons clothing was torn to shreds in the fall.

FIRST AID COURSE

If enough persons are interested Rev. Grosshuesch and C. G. Waterman will conduct a Red Cross First Aid course this winter.

If you are interested leave your name with either of the gentlemen or at The Times office.

Investigations show great shortages of refrigerators and washing machines. Plans are underway to manufacture some in 1944.

uneral Services Held Friday or Max Mace, Farmer

OUNG FARMER DIED AT IOWA ITY HOSPITAL AFTER YEAR'S ILLNESS

Burial Was Made In Cemetery East Of Goodell

Funeral services were held Friday afternoon for Max Mace, 38, very township farmer, with Rev. erschel E. Harvey, pastor of the lemme Methodist Church officiating. A short service was held at e Mace home southeast of Klemne at 1:30 o'clock, followed by serces at the Methodist Church in lemme at 2:00 o'clock.

Special music was provided durg the service by a mixed quartte, composed of Mesdames C. G. aterman and C. C. Kilgore, and mil Patet and W. C. Keraus. They ere accompanied by Mrs. Matt nith at the piano.

Interment was made in the cemery east of Goodell.

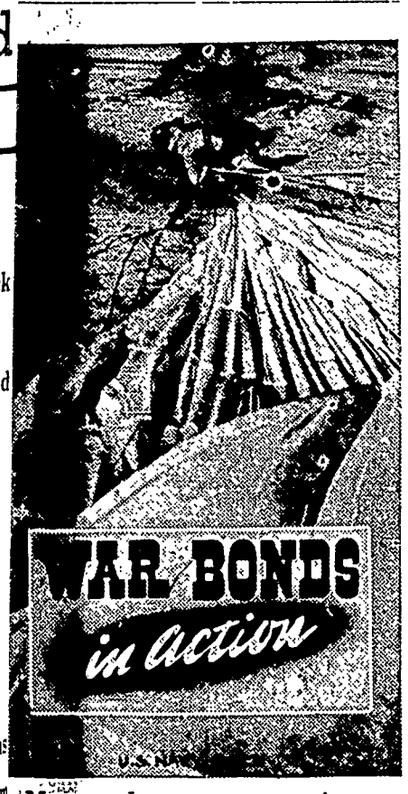
Following is the obituary read y Rev. Harvey at the service:

Obituary

Millard Max Mace made his apearance into this world at Geddes, outh Dakota, on June 25, 1905, beg the son of Mr. and Mrs. Millard Mace. The state of his birth uld not hold him for long, for hile he was still a boy, he came Iowa where he grew to manhood lling the rich soil which he loved. e gained his stature as a man in ayne County and was perefct in uman qualities as was the tall rn which he grew in natural ualities.

Max did not stay put in one spot ways. He went to Fort Dodge to ork, and later he farmed near itt and Corwith. He was happily arried in 1925 to Miss Vivian B aser of Britt. The young couple gan their journey of life togetr with high hopes and zealous bitions. After some experiences farming for others, they came to odell in 1940 and purchased a rm for themselves, where they inded to make their home for a ng time.

Max was baptised in infancy, and thpereopr Reytletacin etaoin tt the proper age made his affiliatn with the Methodist Church in llerton, Iowa. After moving to odell, as was their custom, they gan to look for a church home here they could worship and rear eir children in the faith of their arental guidance. They found it Klemme in the fellowship of the ethodist church where Max provd himself a faithful and worthy



More and more our armies are landing our fighting troops by parachute, disrupting enemy lines, enemy communications, but paying a heavy price in casualties.

Silken fineries and their substitutes are fast passing from the market to provide safe landings for our distant fighting men. We can still buy silk and nylon for them with **War Bonds** and **Stamps.**

U. S. Treasury Department

Our Men In The Service

SGT. RAY KEEPER ARRIVES HOME ON FURLOUGH

Sgt. Raymond Keeper, son of Mr. and Mrs. Henry Keeper, arrived home Sunday morning on an extended furlough, after an absence of about two years

Sgt. Keeper is a member of a bomber crew who saw action in the Pacific theatre of war, and who holds a certificate issued by the War Department for aerial gunnery.

Sgt. Keeper will report back to Keesler Field, Mississippi on February 10th, when he begins training as a pilot in the army air corps.

Sgt. Keeper's experience in combat, along with hundreds of hours in the air, will give him an excellent background as a pilot.

Begins Advanced Flight Training

Lyle Ruka, Goodell, aviation cadet has been transferred from an army air field in California to Douglas, Arizona, where he is now taking advanced flight training

Mrs. Ruka teaches music in the schools at Terrill, Iowa.

Address Changed

Robert Kimball's address has been changed and is as follows:

Robt. Kimball, F 2-c,
L. S C. E. Component,
U S N. Repair Base,
San Diego, (36) California.

member. The church folk will miss him as truly as will the members of his immediate family. He leaves to mourn the loss of his valued friendship and companionship, his devoted wife, and two small children, Reverdy and Bonnie. Also his mother, Mrs. Eva Mace of Fort Dodge; and the following brothers and sisters:

Mesdames: Beulah Kerr, Des Moines; Thelma Mason, Sacramento, California; Wilma Winterode Huntington Park, California, Ethel Benson, Longmont, Colorado; Lucille Lagerstorm, Fort Dodge; and Miss Wanda Mace, Springfield, Missouri.

Brothers: Leland Mace, Fort Dodge; Marlin Mace, South Gate, California; Staff Sergeant Dwight Mace, Avon Park, Florida.

His father preceded him in death in 1936.

Max had been sick since last January, and made a stern determined struggle to regain his health and strength that he might further prove his usefulness to his family and community of fellow workers. But the fight was too much for him. He laid down the armour at the early age of 38 years, 6 months and 9 days, on January 3, 1944 at the hospital in Iowa City. Friends will remember him in kindness, and brothers and sisters will say, "He was a favorite among us."

CARD OF THANKS

We wish to express our thanks to the many rfiends, neighbors and relatives, who so kindly helped us in words of comfort, acts and deeds of kindness during the illness and death of our beloved husband, father, son and brother.

Mrs. Max Mace and children,
Reverdy and Bonnie.
Mrs. Eva Mace.
Brothers and Sisters.

BONDS OVER AMERICA ★ ★ ★

Children play in Esther Short Park of Vancouver, Washington, beneath a heroic statue dedicated to the pioneer women who came with their husbands and children into the Northwest country, newly opened after the Lewis and Clark expedition.

Pioneer Woman

There is little cause for mirth in occupied Europe and even the children have little stomach for play. Millions have been orphaned by Nazi guns or labor camps; all are undernourished and will bear the scars of this war to their dying day.

Prepare for Peace; Buy War Bonds

Coop. Oil Association To Meet Next Monday

COOP. OIL ASSOCIATION WILL HOLD ANNUAL MEETING MONDAY, JAN. 17

The annual meeting of the Hancock County Cooperative Oil Association will be held at the Avery Theatre in Garner at 1:00 o'clock on Monday, January 17, for the purpose of electing three directors and transacting other business.

Dividend checks will be distributed and free movies will be the entertainment feature.

Members are invited to bring along their families

First National Bank Has Deposits Over Million And A Quarter

The First National Bank is this week publishing their statement of condition at the close of business on December 31st.

The statement shows total deposits exceeding a million and a quarter dollars, to be exact: $1,288,014.81.

The total footings on the bank's statement is $1,354,959.50.

The people of this community could finance the next War Loan for Hancock County's quota and still have a balance in the bank!

TURN IN YOUR CHRISTMAS SEALS AND MONEY

Mrs. Martha Bredbenner, local Christmas Seal Sales chairman, reports that there are still some letters that have not been returned. She asks that those who still hold letters to return stamps or money so that she can balance her account. Letters may be mailed to Mrs. Bredbenner or left at the H. Lau Sons store.

LOCAL RED CROSS NEEDS MORE HELPERS TO SEW OVERSEAS KITS

Also Need Sewing Machines, Can You Loan Them Your's?

The ladies of the Klemme Red Cross began sewing 200 overseas kits Tuesday, but they need a lot of more women to help them with the sewing ahead.

The Red Cross meets at the high school each Tuesday afternoon at 2:00 o'clock and will be glad to have any women come and help.

The ladies could use a few more sewing machines. Three are perhaps some machines in the community not being used and which would be a big help to the workers. If you are not using your machine, why not let the Red Cross use it? They will take good care of it.

Card Of Thanks

We wish to express our sincere thanks for the flowers, letters and cards received during the holidays and during the illness of Mr. Helps. We also want to thank those who called at the house.

Mr. and Mrs. Henry Helps.

FIRE AT IMPLEMENT SHOP TUESDAY FORENOON

The Klemme Fire Department was called out Tuesday forenoon at about 11:30 o'clock to extinguish a blaze at the Northern Lumber Implement Co. shop, where fire was burning underneath the plank floor in the repair shop. The blaze was soon brought under control and extinguished.

The fire evidently had started from a spark caused by an electric welding machine being used, when a spark had fallen through a crack in the floor and lodged against a tar paper lining underneath the planks, causing the fire to spread rapidly underneath the floor. However the damage was slight.

The firemen lost some time in getting at the blaze as the pump on the truck was frozen up and a line of hose had to be laid from a nearby hydrant. Ordinarily the firemen start pumping direct from a large supply tank on the truck and use the truck's booster pump for a high pressure spray.

GET BUTCHERING DONE DURING EARLY WINTER

Many Iowa farmers need to butcher hogs earlier than is their custom, C. W. McDonald, Iowa State College extension animal husbandry specialist, belives. Temperature plays an important part in the curing process, which must be completed in cold weather. If warm weather comes before the meat is thoroughly cured, sour hams and spoiled meat may result.

A good job of cutting up the carcass also is essential. It is not difficult, yet it does require some study and practice. A well-chilled pork carcass properly cut up provides cuts of meat of best size and quality for making sausage, ham slices, bacon, head cheese, chops and many other pork dishes.

The carcass is halved during the butchering, and each half is cut up separately. A meat saw, one or two good-quality knives and a stone for keeping the knives sharp are needed. The carcass should be placed on a solid table of planks at waist height.

As a guide for dividing the carcass, farmers may obtain copies of the "Pork Cutting Guide" published by Iowa State College. The guide is part of a new edition of the miscellaneous publication, "Home Butchering in Iowa." The publication also contains a "Beef Cutting Guide," practical information on meat curing methods and recipes, preparation of meat for the freezer locker, canning of meat and preparation of good lard. Copies are available through county extension offices or may be ordered direct from Iowa State College at Ames.

GIRLS JOINS U. S.

June Gray, a Goodell high school graduate, has been sworn into the WAVES. Mary Jane Dawson of Mora, Minn., a former Goodell girl, has joined the WACs.

Annual Farm Bureau Banquet Will Be Held January 19

MRS. EMMA SCHWICHTENBERG DIED TUESDAY MORNING AT HOME OF SON

Funeral Services Will Be Held On Friday Afternoon At Klemme Methodist Church

Mrs. Emma Schwichtenberg, age 79, pioneer resident of Liberty township, passed away Tuesday morning, January 11th, at the home of her son, David Schwichtenberg

Funeral services will be held on Friday afternoon at 2:00 o'clock at the Klemme Methodist Church, with Rev H E. Harvey officiating.

She was preceded in death by her husband, John C., who died on February 16th, 1916.

Interment will be made in the Klemme Cemetery beside her husband.

Arrangements are in charge of the Wellemeyer Funeral Service of Klemme.

LT. PAUL SCHULDT IN RADAR WORK

The Times is in receipt of a letter from Lt. Paul H Schuldt of the U. S. Marine Corps in which he states that he is now specializing in Radar, but cannot tell about his work, other than that it is very interesting and is helping to win the war.

Paul's address follows:

Lt. Paul H. Schuldt, USMC,
104 Beacon Street,
Boston, Mass.

PFC. KEMIT V. SMITH NOW AT FORT DIX, NEW JERSEY

Matt Smith has received word that his son, Pfc Kermit V. Smith has recently been transferred to Fort Dix, New Jersey and that his address now carries an A. P. O number.

Methodist Study Cirlce Will Meet Thursday, Jan. 13th

The Methodist W. S. C. S. Study Circle will meet at the home of Mrs. Clarence Lemke on Thursday afternoon at 2:00 o'clock, January 13th.

ICE PUSHED UP ON NORTH SHORE OF LAKE CAUSES MUCH DAMAGE

Natural Phenomena Has Everybody Guessing At Clear Lake

Ice on Clear Lake is pushing up on the shores all the way from the retaining wall at the city park in the town of Clear Lake and west almost to Ventura, along the north shore. In some places considerable damage has been done by the action of the ice.

The tracks of the Mason City & Clear Lake railroad on N. First St somewhat resemble an ocean wave and the promenade on the lake shore at Wellmon's Beach is being ground out. Further up the ice is making inroads into the shore.

At the fish hatchery C. L. King, who is in charge there, is cutting a 30 inch channel every day. By the next day the ice has crowded in to shore again. Some buildings along the north shore have been damaged.

The reason for the phenomena is not easy to explain. Some say that it is the effect of sunshine on the ice while others believe that it is due to expansion of the ice sheet as it freezes. Others think the wind has something to do with the ice movement inshore. But no one can explain why the ice movement affects the north shore and not the other sides of the lake.

The next controversy at Clear Lake will take place in the spring when the ice disappears. The big question then debated is "Does the ice go out or does it go down?"

HARRK BRYSON TO SPEAK AT KICK-OFF MEETING

Harry Bryson, organization director for the Iowa Farm Bureau Federation of Des Moines, will speck at the annual Hancock County Kick-off meeting and banquet at 7:00 o'clock on Wednesday evening, January 19, at the Catholic Church basement in Garner.

This is the final organization leaders meeting before going out to contact every farmer in Hancock County who has not already paid his 1944 Farm Bureau dues.

Four Hundred people are expected to attend this meeting according to Clark Lackore, County organization director, which include the County Farm Bureau leaders their wives, guests and county workers. The meeting is set up by the organization director and organization committee consisting of Gratus Cooper, Kanawha; Jack Ostercamp, Britt; and Geo. Urich of Garner.

All services of the organization will be be explained - legislative, policies and how they effect farmers will be discussed by the speaker and leaders Other entertainment will be furnished.

Some of the guests will include editors, bankers, commercial club chairmen, AAA committee, O C. D. chairmen and others.

1,000 or More In 1944 is Hancock County Farm Bureau Slogan

Seventy Farm Bureau leaders met with Clark Lackore, County Organization director to discuss and lay out the plans for the Kick-off meeting and the Farm Bureau membership drive that they are to conduct in Hancock County.

Clark Lackore, organization director, C. M. Palmer, Insurance agent, and Paul Henderson, County Extension Director, discussed the various progarms of the County Farm Bureau and County Extension Service

Mr. Lackore, with the help of the leaders from each township, set up quotas for each township. The slogan "1,000 members or more in 44' will be heard quite often during the next few weeks.

LOUIS HENSCHEN APPOINTED JANITOR AT COURT HOUSE FOR THE 41ST TIME

Louis Henschen was re-appointed janitor at the Hancock County courthouse at Garner for the 41st consecutive time by the Board of Supervisors at their annual meeting.

Mr. Henschen was first appointed janitor of the courthouse building in 1903, the day after the opening of the present building, and has been on duty continuously since that day.

HELLO, FOLKS!

Mr. and Mrs. Bernard Meyer of Robins, Iowa, are the parents of a 7 pounds, 12 ounces baby daughter born to them December 30th at a Cedar Rapids hospital. The new arrival has been named Linda Kay. The Meyers also have another little girl in their family.

Mr. and Mrs. Wm. Meyer, near Miller, former Klemme residents, are the grandparents.

County Extension Director Paul Henderson and wife are the parents of a baby son born Monday, January 3rd at the Rust nursing home in Garner. The new baby has been named Dale Jackson.

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try *Doan's Pills*. *Doan's* help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. *Ask your neighbor!*

DOAN'S PILLS

Household Hints

Coffee pots need scrubbing, airing and sterilizing frequently. If you have difficulty in making clear, well-flavored coffee, the pot may be at fault.

* * *

To keep irons from sticking when ironing starched pieces, keep a piece of green cedar on the board to rub the iron over before ironing.

* * *

Tests show that cookies baked on glistening new tins required an oven 25 degrees hotter than those baked on darkened tins.

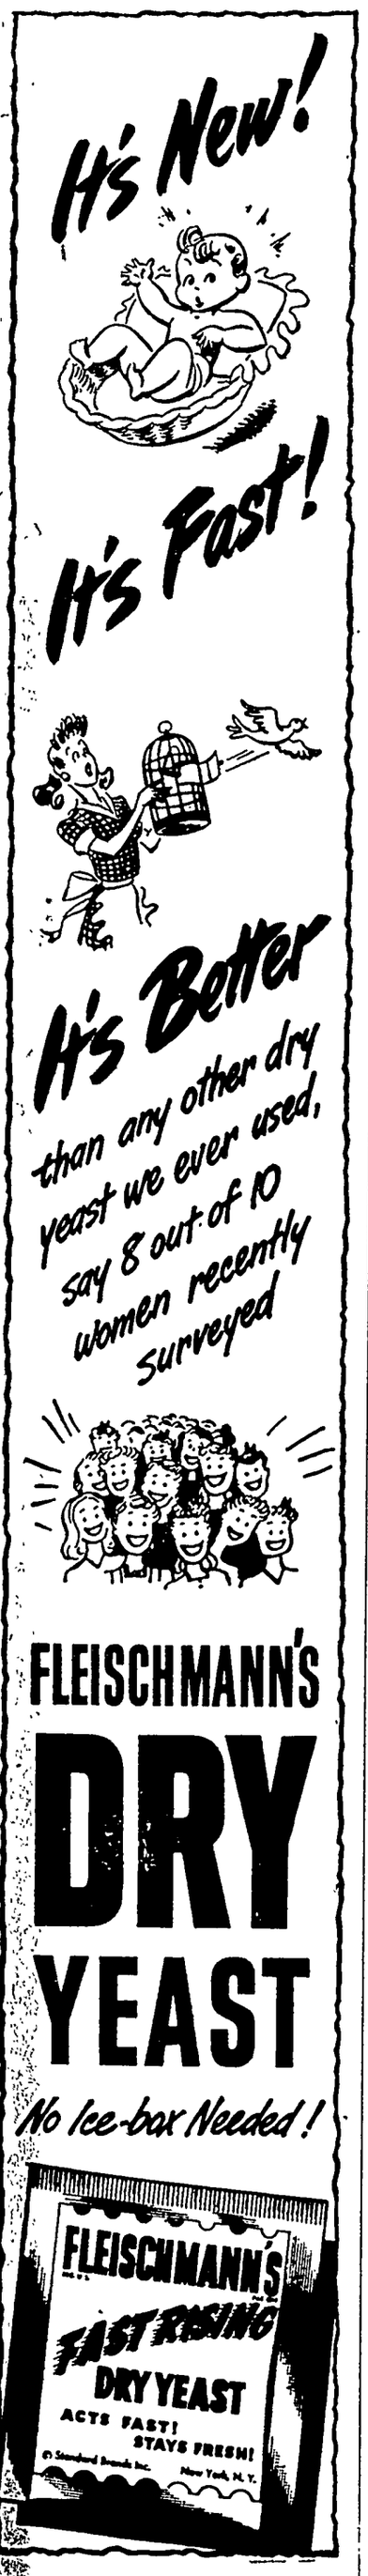
* * *

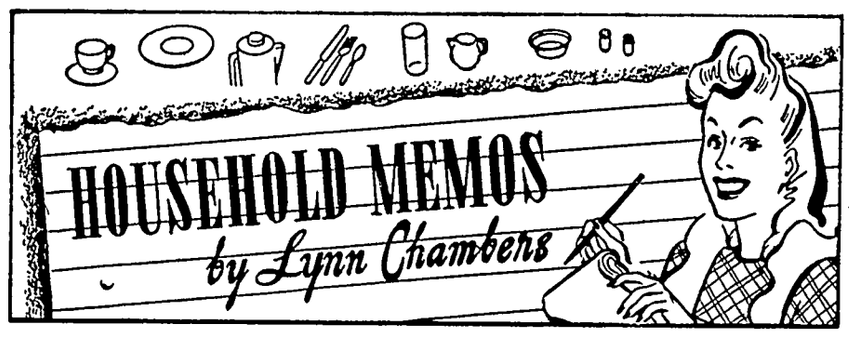
Bananas should be ripened at room temperature, not in the refrigerator.

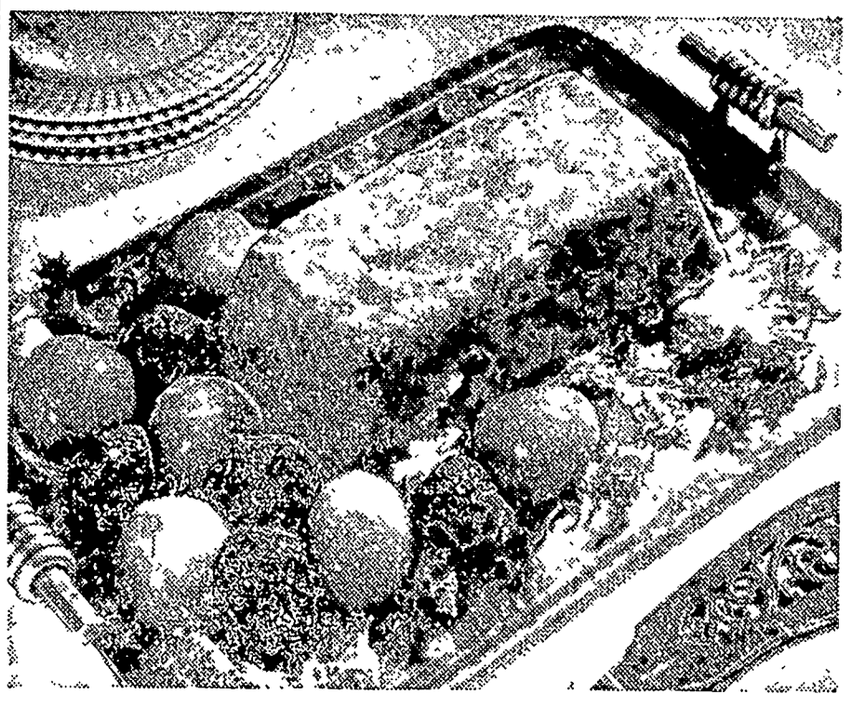
* * *

Cream a little butter or margarine with prepared mustard. Brush on a slice of cold cooked ham and let heat quickly in the oven. Serve with pan-fried sweet potatoes and cauliflower.

GRANDMA AND COLDS' COUGHS
She rubbed on medicated mutton suet—then covered with warm flannel. Today, mother uses Penetro, modern medication in a base containing old fashioned mutton suet. Double action: inside, vapors soothe stuffy nose—outside, warms like comforting plaster. For colds' muscle aches, demand Penetro.





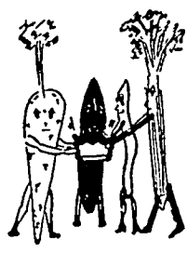


Small Amount of Chicken Makes a Loaf
(See Recipes Below)

Little Makes Lots!

There were several requisites for recipes which made today's column and I think you'll appreciate all of them. First, they must be easy on the budget; second, they must be easy on ration points; and third, they must be leftovers, but incognito!

All three are particularly timely because you have probably splurged during the holidays and want to take it easy on points and the budget now; and third, you may have leftovers that want things done with them but still won't taste like leftovers because you know how the family sniffs at them. So, here we go, first of all with leftover pieces from that holiday bird:



***Chicken Noodle Loaf.**
(Serves 8)

½ to 1 cup diced cooked chicken
3 eggs, well beaten
½ pound noodles
3 tablespoons butter or substitute
3 tablespoons flour
2 cups milk
¾ teaspoon salt
1 cup soft bread crumbs
1 teaspoon chopped onion
1 tablespoon chopped parsley
¼ teaspoon pepper

Cook noodles in boiling, salted water until tender (2 quarts water, 1 teaspoon salt). Drain. Meanwhile, prepare white sauce of butter, flour and milk. Combine chicken, eggs, noodles, white sauce, crumbs and seasonings. Pour into a well-greased loaf pan 9 by 5 by 3 inches. Bake in a moderately slow (325-degree) oven until firm in center, about 1 hour. Let stand for about 8 minutes after removal from oven, then loosen around edges. Invert on hot platter. Slice to serve. If desired, serve with cheese, mushroom or vegetable sauce. Garnish with pickled pears and spiced prunes.

Are there remainders of a veal roast still standing in the refrigerator? You can make a perfectly delicious chop suey from a few cupfuls of the roast meat:

Veal Chop Suey.
(Serves 6)

2 cups roast veal, cut in strips
2 sliced onions
1 cup green pepper, cut in strips
4 tablespoons melted shortening
1 teaspoon salt
⅛ teaspoon pepper
2 cups celery, cut in strips
2 cups sliced radishes
3 tablespoons cold water
2 tablespoons flour
Hot cooked rice

Cook veal, green pepper and onions in shortening, in a large skillet for about 10 minutes, stirring frequently. Add seasonings and celery. Cover and cook slowly for 5 minutes, then stir in flour and water which have been blended to a smooth paste. Cook, covered, 5 minutes longer. Add radishes. Heat thoroughly, and serve on hot, cooked rice.

Frankfurters are sometimes left over, too, and the problem of what to do with them after they've lost moisture and shriveled a bit can be easily solved if you do this with them:

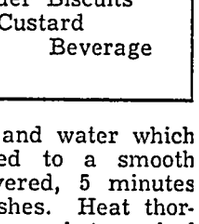
Rosy Rounds.
(Serves 4 to 6)

2 tablespoons fat
¼ cup minced onion
5 to 6 frankfurters, ground
½ teaspoon worcestershire sauce
Salt and pepper
Biscuit dough
1 cup medium white sauce
1 teaspoon dry mustard

Melt fat; add onion and frankfurters. Cook until lightly browned, stirring often. Add worcestershire sauce; season with salt and pepper.

Prepare biscuit dough as follows: Sift together 2 cups flour, 3 teaspoons baking powder, ½ teaspoon salt; cut in ¼ cup shortening; add ¾ cup milk, mixing to a soft dough.

Roll dough into rectangle ¼ inch thick. Cover with meat mixture; roll up in jelly-roll fashion. Cut into 1½ - inch slices; place in baking pan. Bake in a very hot oven (450 degrees) 15 minutes. Combine white sauce and mustard; serve on hot biscuit rings.



Both leftover meat and vegetables get used in this meat roll with chili seasoning:

Chili Vegetable Meat Roll.
(Serves 4 to 6)

1 cup ground cooked meat
1 cup chopped cooked peas, carrots or green beans
½ teaspoon chili powder
1 teaspoon minced onion
1 teaspoon minced green pepper
2 cups meat gravy
Salt and pepper
Biscuit dough

Combine meat, vegetables, chili powder, onion, green pepper and 1 cup gravy. Season with salt and pepper. Prepare biscuit dough. Roll in rectangle about ¼ inch thick. Spread with meat mixture; roll up in jelly-roll fashion. Place on baking sheet and bake in a hot oven (425 degrees) 30 minutes or until well browned. Slice 1½ inches thick. Serve with remaining hot gravy.

Tastiness plus describes this lima bean and leftover meat casserole to perfection. Serve it with a cabbage and apple salad, hot rolls, beverage and jelly roll and you have a well-balanced and economical meal:

Lima-Meat Casserole.
(Serves 6 to 8)

2 slices bacon or salt pork, diced
2½ cups leftover beef, ground
1 onion, diced
3 cups cooked tomatoes
1 teaspoon salt
1 teaspoon chili powder
4 cups cooked lima beans (fresh or dried)

Fry out bacon or salt pork. Add meat and onions. Brown slowly, stirring frequently. Add remaining ingredients. Pour into a well-greased casserole. Cover. Bake in a moderate oven (350 degrees) for 30 minutes.

Lynn Chambers' Point-Saving Menu

*Chicken Noodle Loaf
Glazed Carrots — Spiced Prunes
Waldorf Salad
Baking Powder Biscuits
Orange Custard
Cookies — Beverage
*Recipe Given

Lynn Says

Point Pointers: When you run low on stamps for processed foods, be sure to find fresh ones to substitute. To extend a processed food, use it with a fresh, seasonal food.

Using foods that are grown near your own community helps the transportation problem, as well as your near-by grower.

For children or invalids who use canned, pureed foods, extend by mixing with milk and cream. Use with purees of other vegetables and fruits.

Leftovers can be combined with other foods to use them up; for example, leftover beets can be mixed with onion, vinegar and spices for relish or salad; leftover corn may be combined with lima beans, carrots or peas.

Save Used Fats!

If you want sugar-saving suggestions, write to Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

THE TRADE-IN HOME

Dr. Harvey N. Davis of Stevens Institute predicts that the postwar world will bring a house that can be traded in for a new one every three or four years. It will be made of paper and plastics and will be delivered in packages, assembled at high speed and have a prescribed "trade-in value" each year.

—*—

We assume it will be ordered by color, with a Duco finish, and that every little while pop will hear mommer say: "Now remember, Chidsey, this is the day you wash and simonize the bungalow."

—*—

Can't you imagine the situation when considering the Home of the Future? The folks will be sitting around the old (aged three years) homestead:

Mom—What was that?

Pop—What was what?

Mom—That funny noise I keep hearing.

Pop—Oh, that's the house. It's beginning to RATTLE.

—*—

Mom—Yes, and it's full of squeaks. I suppose we ought to take it in and have it tightened up.

Pop—How long have we had this home?

Mom—Lemme see . . . they delivered it three years ago Fourth of July.

Pop—Well, there ain't much sense trying to go on in a house much longer than that. It's stood up pretty well.

Mom—I don't agree with you. We had trouble with this house from the minute they delivered it. It never was what you'd call a smooth job.

Pop—You didn't take the care of it that you should.

Mom—Now don't go giving me that stuff. I was very careful about this place.

—*—

Pop—Well, I guess I'll phone the builder and see about getting a new one. They've got some pretty smart houses on the market this season.

Mom—Mrs. Maloney just got a new home and it would knock your eye out. It's got sensationally new lines and comes in three colors. It is heated by radio.

Pop—That's nuthin'. They're turning out a house now that's heated by television.

—*—

Mom—I read about a seven-room job where you can raise or lower the windows by pressing a button.

Pop—And they say there's a model out this year with a gadget which installs or removes the screens by hydraulic pump.

Mom—What do you think they'd allow us on this place?

Pop—Oh, about 50 per cent of the original purchase price, I suppose. I'll have the man come over and appraise it. What are you doing tomorrow?

Mom—Why?

Pop—I thought maybe we could go down and look at a new house and maybe take a DEMONSTRATION!

* * *

"Urge Clare Luce for Vice President."—Headline.

—*—

This department is all for Mrs. Luce as vice president. If there is any place in America where glamour is desperately needed, it is in that office. It would be nice, too, to be able to look at the little girl babies and say: "She has the same chance every other girl has to grow up and become vice president."

—* —

We can imagine the women making regular trips to Washington just to see what the vice president of the United States is wearing.

* * *

Says Elmer Twitchell—
The rubber shortage doesn't seem so critical now after we have chewed on the wing and neck of the holiday birds.

—*—

Some of the turkeys we have seen look as if they were retreads.

—*—

That tie-up racket persists. We went into a store to buy a turkey yesterday and the butcher tried to make us take a goose, a pigeon, a rabbit and some pigs feet as well.

* * *

The Nazis have a new war weapon, the most terrible of all time. And gosh are they scared of it!

* * *

A proofreader quit the job today because the Russians had captured 300 more of those towns no two people spell alike.

ASK ME ANOTHER?
A General Quiz

The Questions

1. What is the name of the fabulous animal with one horn in the center of its forehead?
2. Was Sitting Bull a war chief?
3. What President of the United States served the briefest term of office?
4. What dogs are allowed meat rations?
5. A proposition to which people in general agree is called what?
6. According to the Bible by what method did Gideon choose his warriors?

The Answers

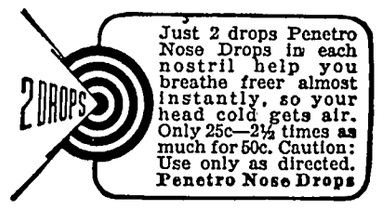
1. Unicorn.
2. Sitting Bull in reality was a medicine man and never a war chief.
3. William Henry Harrison, who died after serving one month.
4. "Seeing eye" dogs. Blind persons using such dogs may obtain up to 12 extra points weekly.
5. An axiom.
6. By their method of drinking water (Judges 7:5, 6).

Voodooism, Witchcraft Still Practiced in South

Voodoo worship and witchcraft, which were brought to this country by slaves of Africa and the Indies, still are alive in New Orleans. Brainy Negro men and women have set themselves up as "doctors" and "queens" of the voodoo order and have unscrupulously acquired fortunes from gullible colored people and lower-class whites.

Illegally operated in New Orleans are voodoo drug stores, selling scores of potions, charms, and oils which are concocted to bring good luck or drive away the evil spirits.

Wealthy white girls sometimes finance hysterical voodoo dances in hopes of winning back a lost husband or sweetheart.



Just 2 drops Penetro Nose Drops in each nostril help you breathe freer almost instantly, so your head cold gets air. Only 25c—2½ times as much for 50c. Caution: Use only as directed. **Penetro Nose Drops**

Gas on Stomach
Relieved in 5 minutes or double money back
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

FALSE TEETH
AND A
GRAND SMILE!
YOU CAN LAUGH, TALK AND EAT, FREE OF PLATE EMBARRASSMENT
It's so easy to enjoy all-day confidence when your plates are held firmly and safely in place by this "comfort-cushion"—a dentist's formula.
1. Dr. Wernet's Powder lets you enjoy solid foods, avoid embarrassment of loose plates. Helps prevent sore gums.
2. Recommended by dentists for 30 years.
3. Economical; small amount lasts longer.
4. Pure and harmless—pleasant tasting.
All druggists—30¢. Money back if not delighted.

HERE'S INSIDE DOPE ON WHEN THE WAR WILL END!

BALDWIN, GA.—Virgil Smith, the farmer who predicted the correct date for the end of World War I, says that the present war will end on Easter Sunday, 1944.

Smith, who makes his predictions as a result of dreams, said 3 months before the end of the first World war that it would end on Nov 11, 1918. He even predicted correctly just how that war would end and how peace terms would be arranged.

Smith also made another prediction which came true—that Italy would be out of the present war by the middle of October, 1943, and would immediately declare war on Germany. He said that major battles would be fought on Italian soil, and adds that before the winning battle is fought, the allies will have gained enough strength to force Hitler to retire to private life on Easter of 1944 He said Japan would follow in "short order."

He further predicted that the world, following this war, will be "war-proof"—that this will end all wars and that the United States will have the leading voice in arranging the "everlasting" peace.

BUY AT HOME

No matter where you live, first try to buy at home Reasons can be cited until one runs out of paper but let's enumerate just a few.

Because your interests are at home, because the community good enough to live in is good enough to buy in.

Because you transact business with your friends; you see actual goods before you buy; because you want to get what you want when you pay for it.

Because every dollar spent at home works for the community in which you live; because the home town merchant stands behind his goods.

Because you live in the home town and hope to remain; because the man you buy from pays his part of town, county and state taxes.

Because the man you buy from helps support your schools, lodge, church and home.

Because when ill luck, misfortune or bereavement comes, the man you buy from is here with his kindly greeting, his word of cheer, and his pocketbook if need be.

These are just a few of the reasons one should ponder over before thinking that the store in the next community is better than your own home.—Anamosa Journal.

PROBLEM FOR SCIENTISTS

Thomas Edison once paid a visit to the laboratory of Dr. Charles Steinmetz, the electrical wizard, who delightedly plunged into an explanation of one of his pet theories. But, Steinmetz soon realized, the aged inventor was too deaf to hear him.

After waiting so long for an opportunity to exchange ideas, this was something the two scientists had not counted on. Then Steinmetz had an idea. He tapped out a message in Morse code on Edison's knee. The inventor's eyes lit up. He tapped a message in return. After that, the two men conversed for hours in dot and dash.

LIFE WITH FATHER

In my youth, George M. Cohan paraded around town in brightly-colored socks, gaudy neckties and checkered coats. His father regarded this reckless splash of color with undisguised horror, and one day, when George's outfit was particularly colorful, the elder Cohan said with disgust:

"It's about time I told you what a perfect ass you look like!"

At that moment, a servant who had been with the family for years entered the room. He stopped short a startled look on his face.

"George," he exclaimed, "you're the spitting image of your father when he was your age!"

"I know that," Cohan said mischievously. "Father was just saying the same thing!"

GETTING OUT A PAPER

Getting out a paper is no picnic.
If we print jokes, people may say we are silly.
If we don't, they say we are too serious,
If we publish original matter, they say we lack variety.
If we publish things from other papers, we are too lazy to write
If we don't show contributions, we don't show proper appreciation.
If we print them, the paper is filled with junk.
Like as not some fellow will say we purloined this from another paper.
We did—and thank him.

TELLING THE DOCTOR

One of Queen Victoria's doctors who was also a professor of medicine at the University of London was inclined to brag about his royal services in order to inspire the envy of his colleagues and the respect of his students.

On one occasion, his students filed to his lecture-room only to find a large sign which read: "My class is dismissed for today because I am awaiting a call to the sickbed of Her Majesty, the Queen."

When the professor entered his classroom the next day, he found that the sign was still there. Beneath his words there was printed in large letters: "God Save the Queen!"

THE RESOURCEFUL BERNHARDT

Sarah Bernhardt may have been a temperamental actress, but as a mother, she had a homely knack for curing the bad habits of childhood At one time, her son began chewing the tips of his gloves. First, she tried to break him of the habit by reasoning with him. She spoke sharply to him. She spanked But he still chewed Finally, seizing a new pair of gloves, she fried them in butter, and made him take a bite. He stopped nibbling.

Sarah Bernhardt, in her declining years, lived in an apartment which was five stories above the streets of Paris. She was visited one evening by an old friend who entered all out of breath from the long climb.

"Mon Dieu," he exclaimed breathlessly, "why must you live so high up?"

"Alas!" replied the brilliant Bernhardt, "it is the only way that I can still make the hearts of men beat faster."

HE GOT THE RAISE

After working for some time on a Mid-western newspaper, Eugene Field felt that he was entiled to a raise, but the editor felt otherwise.

One afernoon, the editor looked up to find his star reporter standing before him; tears in his face. Swarming around him were the most pathetic-looking dozen kids in the world. They were obviously undernourished, their coarse clothes were in tatters, their elbows were sticking out of their threadbare sweaters.

"These are my children," sobbed Field. "Look at them. Doesn't the sight tear your heart?"

"I'll give you a raise," the editor said. "But take them away. I can't stand it."

With a happy smile, Field escorted his legion of ragamuffins from the room. Downstairs, he left the street urchins where he had picked them up. Into each hand he pressed a quarter in reward for a swell performance.

POSTWAR HOG WILL BE NOT TOO LARDY

The postwar hog that will yield the best returns in the national market will be an animal marketed at 225 pounds live weight. This hog would measure about 40 to 42 inches along the side from base of tail to a point between the ears, with a depth in back of shoulders of 14 to 15 inches, and a width back of the shoulders of 11 to 12 inches.

These specifications are suggested by J. L. Lush, who directs the operations of the regional swine breeding laboratory at Iowa State College, and W. A. Craft of the United States Department of Agriculture, who coordinates the breeding work in Iowa with that of other swine breeding experiments in most of the Corn Belt states.

Meatier Hog

The fact that lard is likely to experience at least as much competition from vegetable oils as it did in the early 1930's, and that demand for export lard is likely to be less than at present, indicate that a lighter, meatier hog than is now being produced will be demanded in the postwar period.

For the last half century the general trend in this country has been away from the very lardy hog and toward an intermediate or so-called "meat type." Two notable exceptions in this general trend are attributable to abnormal demands caused by two great wars.

Legs Too Long

Hogs that are too thin will probably be penalized after the war as always. Hogs that are appreciably less than 40 inches in length are likely to get excessively fat when well fed to weights of 220 to 240 pounds. Fertility and pig raising ability of this type of hog also seem low.

Experience of the swine breeding laboratory also suggests that American breeds are longer in the leg than is desirable for present use. Hogs which at 225 pounds have legs 1 or 2 inches shorter than is characteristic of American breeds are desirable from standpoint of carcasses and have no basis of objection for the producer.

AVERY 4-H BOYS HELD FIRST MEETING WITH NEW LEADER

The Avery 4-H boys met with their new leader, Raymond Wille, on Thursday evening, January 6, at the home of Melvin Pearson.

Pvt. Fred Olthoff takes this way of saying "Thank You," to the folks in this community who sent him so many Christmas cards, as well as letters and packages.

Pvt. and Mrs. Loren Gast of San Antonio, Texas, came last week for a visit at the Herman Gast and Ben Ridder homes, as Loren was enjoying a furlough from his duties in the army air corps.

Always open the garage doors before starting the car because of the danger of being poisoned with carbon monoxide The gas is colorless and odorless so that one may become unconscious without knowing that something is wrong. It's also a good idea to keep a window open when sitting in a car with the motor running.

Most of your friends away?

SEED OATS MUST CARRY STATEMENT

Grain sold on the producers' farm for seed must be accompanied by a placard or written statement certifying the quality for the purchaser. According to County Extension Director Paul Henderson, Iowa's seed law requires that such seed be accompenied by the following information:

1. Number of secondary noxious weed seeds per pound.
2. Percentage of germination.
3. Freedom from primary noxious weed seeds.

There is no law requiring sellers to have the seeds tested or examined at any particular laboratory. R. H. Porter, director of the Iowa State College seed laboratory has stated that the seller may make his own examination and test, provided it is accurate. However, most producers hire this work done for them, and Porter states that numerous seed companies are well equipped and qualified to make an official examination and test. A small fee is charged for the service.

The Iowa State College seed laboratory maintains a testing service for farmers. Samples of one pint of the large-seeded crops, or one-half pint of small seeded crops, should be sent direct to the laboratory at Iowa State College, Ames, or may be forwarded through county extension office.

MUCH BUYING AFTER END OF WAR FORESEEN

Washington—:Some 22,400,00 of the nation's 35,000,000 famileis intend to go on a buying spree as soon after the war as the goods they want become available, the U. S. Chamber of Commerce reported Thursday.

These families, the chamber added, not only are planning early postwar purchases but "are also accumulating the necessary money" to buy what they want.

A survey conducted by the chamber brought out that while 20 per cent don't know precisely how much they will spend when spending again becomes possible, 12 per cent intend to lay out more than $10,000 each for everything from refinished floors to new automobiles.

All this would apear to add up to considerable economic demand, but even so it does not tell the whole story, the chamber, said adding:

"Many people do little or no advance planning and therefore the index of current buying intent is less than the actual consumer demand that will likely develop."

Of the families sampled, 51 per cent told the chamber that they now have accumulated savings equal to at least one-tenth of their annual income.

Of the 64 per cent of families now planning to start buying when the war ends, 10.5 per cent expect to purchase automobiles. Other intentions ranged from dining room furniture, 1.9 per cent, to mechanical refrigerators, 7. 5 per cent.

WEIGHED IN THE BALANCE...
and found Ready and Able!

The new year is under way. What achievements are to be recorded on its pages no one can say.

In looking back on '43 there is great satisfaction in the transportation job that has been done. America's railroads performed brilliantly. Millions of fighting men were moved with clock-like regularity . . . millions of tons of war materials were transported with amazing precision.

But America's railroads live in the present and plan for the future. The achievements of '43, however noteworthy, are history. Laudable, yes, but useful now only insofar as they provide the railroads with the experience necessary for greater and still greater achievement.

And so we have moved into another year, to face with confidence the war job still to be done. It's a big task . . . a tremendous task. But every ROCK ISLAND employe is determined to do his part to see it through. This war for Freedom is our war, too.

As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation.

in-up picture for the man who "can't afford" to buy an extra war bond...

YOU'VE HEARD people say: "I can't afford to buy an *extra* War Bond." Perhaps you've said it yourself . . . without realizing what a ridiculous thing it is to say to men who are dying.

Yet it *is* ridiculous, when you think about it. Because today, with national income at an all-time record high . . . with people making more money than ever before . . . with less and less of things to spend money for . . . practically every one of us has *extra* dollars in his pocket.

The very *least* that *you* can do is to buy an *extra* $100 War Bond . . . above and beyond the Bonds you are now buying or had planned to buy. In fact, if you take stock of your resources and check your expenditures, you will probably find that you can buy an *extra* $200 . . . or $300 . . . or even $500 worth of War Bonds.

Sounds like more than you "can afford"? Well, young soldiers can't afford to die, either . . . yet they do it when called upon. So is it too much to ask of us that we invest more of our money in War Bonds . . . the best investment in the world today? Is that too much to ask?

Let's All BACK THE ATTACK!

WEEKLY NEWS ANALYSIS

Red Army Drives Toward Baltic Sea; Partisan Forces Ban Jugoslav Ruler; Allied Heavy Bombers Smash German Gun Installations in Northern France

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Released by Western Newspaper Union.

PACIFIC JITTERBUG:—Doughboys on captured Makin island in the Central Pacific watch somber little native hula dance.

EUROPE:
Blast Rocket Guns

While U. S. and British troops battled the Nazis at close quarters in southern Italy, waves of Allied bombers rumbled over northern France to smash at German rocket gun installations.

Both on the U. S. Fifth and British Eighth army fronts in southern Italy, doughboys and Tommies engaged the Germans in hand-to-hand fighting, Lieut. Gen. Mark Clark's men fighting for mountain peaks flanking the road to Rome, and Gen. Bernard Montgomery's warriors striving to clear the path to the highway hub of Pescara.

As reports continued to seep into Britain and the U. S. of the Germans' new rocket gun capable of hurling an explosive charge of from 7 to 21 tons about 20 miles, Allied bombers combed the French channel coast around Calais to blast at the installations for the new weapon.

Ban King

Charging that the war minister of the Jugoslav government-in-exile had made a "lasting" deal with the Germans and organized civil strife against patriotic elements, Josip (Tito) Broz's communist backed Partisan forces forbade King Peter's return to the country until after the war.

King Peter

Broz's action followed the attachment of U. S., British and Russian officers to his staff, as a result of the Allies' preference for the Partisan forces over King Peter's Chetniks because they have been offering the Germans more resistance.

Further, Broz's political council canceled all treaties and international obligations of King Peter's government, on the supposition it no longer was representative of the people.

VETS:
Discharge Pay

To every vet discharged after 18 months of service overseas would go $500 under provisions of a bill passed by the senate and sent to the house for consideration.

Vets serving abroad for 12 to 18 months would be paid $400 and those less than 12 months, $300. Vets with 12 months or more service in the U. S. would get $300, and those with less than 12 months, $200.

In the house, 44 representatives have organized for higher discharge payments, favoring Rep. William Lemke's bill providing $100 on release and up to a year's pay.

RUSSIA:
Match Wits

Russian and German generals matched wits along an 800-mile front as winter fighting flared to major proportions in the east.

While the Reds surged into German lines guarding the Baltic region, the Nazis threw strong tank forces against the Russians on a 400-mile stretch further to the south. Thus did one attack act as a lever against the other.

The Russian drive was concentrated on reaching the shores of the Baltic sea: (1) to cut off Nazi armies in the Leningrad region from those to the south, and (2) to cut off shipping at present helping supply them over Baltic lanes.

RAIL STRIKE:
FDR Intervenes

Seeking to avert a strike of 1,450,000 railroad workers which threatened to tie up the nation's whole transportation system, President Roosevelt acted to bring the unions and owners together, while orders were drawn for U. S. operation of the lines in case negotiations failed.

Following a suggestion of FDR, the basis for compromise seemingly lay in payment of overtime to the rail workers after 40 hours, instead of after 48 hours as has been the case.

For the 350,000 operating employees of the roads, the overtime pay coupled with a flat four cents an hour wage increase, would result in an average hourly boost of eight cents.

Besides the eight cents an hour for which they threatened to strike, the 1,100,000 non-operating rail employees also proposed overtime pay over 40 hours. Under their terms, their average hourly increase would exceed eight cents.

SOUTHWEST PACIFIC:
Things to Come

A thorn in the Allies' shipping lanes to the Southwest Pacific, Japan's Marshall islands took heavy poundings from U. S. army and navy planes, while off to the New Britain area, Yankee airmen blasted the enemy's supply centers of Wewak and Cape Gloucester.

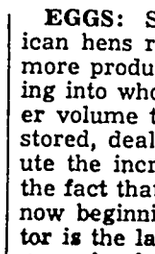
In both cases the destructive aerial bombardment presaged ground action. As a springboard for future ground operations, U. S. troops stood on the Gilberts, to the south of the Marshalls, and in New Britain, doughboys recently landed at Arawe consolidated their positions and poised to the north, looking toward the Cape Gloucester region from which the enemy has been supplying its embattled troops on New Guinea to the east.

To meet the Allies' challenge to their whole defensive system in the Southwest Pacific, the Japs strengthened their air forces throughout the area, and poured in supplies for their troops.

Stays on Job

"MacArthur for President!"

A rallying cry for some politicians, a popular topic for the man on the street, these three big words have tended to color the 1944 presidential picture.



General MacArthur

Recently MacArthur talk received two strong stimulants:

First, there was the war department's ruling that there was no bar to any officer accepting a political nomination.

Second, the rumor gained currency that the cocksure chieftain of the Southwest Pacific was preparing to return to the U. S. for conferences in Washington, D. C.

It was pointed out that MacArthur's reigning goal is to lead Allied armies back into the Philippines.

However, from General MacArthur's advanced headquarters in New Guinea's jungles, a spokesman for the general said: "There is no foundation whatsoever for the statement that General MacArthur expects to go to Washington in the near future for conferences."

BOLIVIA:
New Government

First order of business on the new Bolivian revolutionary government's calendar was compensating survivors of the 19 striking tin miners shot by troops under direction of the ousted Gen. Enrique Penaranda last December.

As calm was restored in the country, U. S. withheld recognition of the new government, to determine whether it was a successful pro-Axis coup in view of the fact that the guiding light of the movement, Paz Estenssoro, was once locked up in connection with pro-Nazi activities.

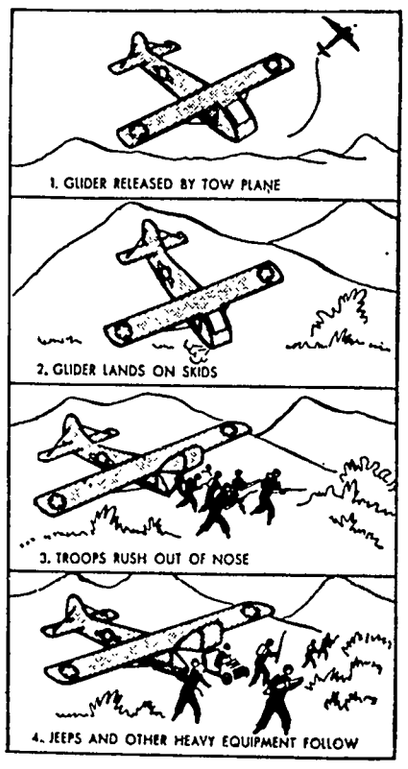
U. S. interest in Bolivia centers around its rich tin and quinine resources, among the last left to the Allies following Japan's occupation of Malaya and the Indies. The revolutionists have expressed a desire to continue favorable business relations with the Allies, a matter on which General Penaranda himself had hedged.

STORAGE:
Seek to Ease Glut

With U. S. food storage facilities crammed, many meat packers have been selling pork products below ceiling prices or in carload lots at a discount. At the same time, it was revealed that the War Food administration prepared an order restricting storage of such meat specialties as hogs' heads, bones, ox tails, tripe, hearts and liver to 10 days without permit.

Meanwhile, WFA extended its price support of $13.75 per hundredweight to 270 to 300 pound hogs, because, (1) packers have been buying bargains outside of the 200 to 270 pound support range and guaranteed weights have been piling up in the yards; (2) farmers have been sending 200 to 270 pounders off to market to get the $13.75 top.

Troop Gliders



CORN BORER:
New Treatment

Irked by the corn borer's damage, 29-year-old John Bell of Watseka, Ill., hit on the idea of curbing the pests by making the stalk of the plant distasteful.

A soil expert for a fertilizer concern, Bell worked for three years on his project, reaching the point where he planned to submit his product to the University of Illinois' agronomists for testing.

Mixing commercial fertilizer with combinations of minor plant food essentials, Bell spread his product over 1½ acres of a 42-acre corn plot infested by borers. Shortly after, it was seen that the borers began leaving the treated tract, which yielded 22 bushels more than the other acres.

Although the compound absorbed by the stalk is unpalatable to the borers, it is not toxic to livestock, tests showed.

GREAT BRITAIN:
Migrations Planned

Actual contacts of many Britons with the many parts of the kingdom's far-flung empire have aroused their interest to resettle in Australia, Canada, New Zealand and South Africa after the war.

Circulating among the population, numbers of soldiers from the dominions have acquainted Britons with opportunities existent in their countries, and British youth now being trained in South Africa have interested folks about its wealth and climate in letters home.

But while dominion representatives in London have been besieged by inquiries as to taxes, education and resettlement financing in their countries, the dominion governments themselves were said to be chiefly concerned with reemployment of returning war vets before immigration.

TAX REFUNDS:

Cash refunds will go to about 16 million taxpayers on their 1943 payments, when March 15 arrives, government experts figure The rebates will be made to wage earners who have paid in more than they owe under the "pay-as-you-go" collection system.

On the other hand, it is pointed out that many of the other 35 million taxpayers will wind up the year owing the government, and will have to make additional payments. Many refunds, it was said, will be small.

HIGHLIGHTS . . . *in the week's news*

RICE: This year rice production reached the highest level in history at more than 70 million bushels, 48 per cent above the ten-year average, 1932-42.

BOMBER: A new "super" bombing plane that is called better than the B-29, itself a new wonder, is now in production, according to the chairman of the house military affairs committee.

EGGS: So splendidly have American hens responded to the call for more production that eggs are coming into wholesale markets in greater volume than they can be sold or stored, dealers report. They attribute the increased supplies partly to the fact that last spring's pullets are now beginning to lay. Another factor is the lack of a government program for dried eggs.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

FARM LAND BOOM

Secretary of Agriculture Wickard will soon trot up to Capitol Hill with a proposed bill in his pocket to put an end to the farm land boom. He is keenly worried about speculation in farm properties, has made a couple of speeches on that subject, but has not disclosed the full extent of the penalties he will propose to stop land speculation.

His bill carries a tax of 90 per cent on profits from the sale of farms held less than two years. In other words, if a farm is bought and then sold again in a few months, the deal is obviously for speculation, not for farm production, and the profit would be practically confiscated by the proposed tax.

Farm sales are so heavy that, if the present trend continues, they will surpass those of 1919-20, which was a record year. Iowa farm land, for example, is bringing $225 an acre.

Wickard has evidence indicating that the men engaged in this speculative buying are not farmers, and most of them are not even residents of farm areas. They are investment houses and insurance companies, who have money lying around loose and think they can make a killing, as they did in World War I.

The record of their speculation in that period is still written black on the pages of farm history. It is seen every time AAA makes benefit payments, for the largest checks in many states go, not to individual farmers, but to insurance companies and banks which have bought land or taken it over by foreclosing mortgages.

Wickard is prepared for opposition to his bill. However, the opposition will come, not from farm elements, but from the speculators, and also from Wall street brokers who fear that the next move might be a capital-gains tax on stock-market operations.

ELK HILLS BOILS

Latest developments in the Elk Hills oil controversy are known only to those who can see the inner workings of the cabinet.

Attorney General Biddle was expected to denounce the navy's contract with Standard Oil of California as illegal. The reason he didn't is that two cabinet colleagues got next to him and changed his tune.

Experts in the justice department have declared the contract definitely illegal, and passed their findings along to Biddle. Biddle, in turn, was expected to tell the house naval affairs committee the same thing, with the result that congress would undoubtedly recommend condemnation. Thus, Standard of California would relinquish all the property to the government.

But when Biddle appeared before the committee, he pulled his punches. Instead of declaring the contract illegal, he merely stated that he had "grave doubts" about it.

The committee was expecting a forthright statement. Even its chairman, Congressman Vinson of Georgia, who is very close to navy officials, privately favors condemnation.

Secret of what happened is this. Two cabinet colleagues got hold of Biddle's coattails. One was Secretary of the Navy Knox, who was responsible for the contract in the first place; the other was Harold Ickes, whose Petroleum administration is headed by a Standard Oil of California executive.

The fight is not over. Look for fireworks in public hearings before the committee next month.

* * *

SUBSIDY ISSUE POSTPONED

The 9-8 vote by which the Bankhead anti-subsidy bill was defeated in the senate banking and currency committee came as a surprise to insiders.

When they first took it up behind closed doors, most members of the committee figured that the bill would be reported out favorably and that Roosevelt would suffer a resounding defeat on subsidies. As it turned out, the deciding vote for subsidies was cast by Republican Senator Joseph Ball of Minnesota, whom Bankhead supporters considered in their anti-subsidy camp.

Terrific pressure had been exerted on Ball by some of the big dairy interests in his state. However, the young Minnesotan is a fearless statesman who believes in putting the interests of the nation and of the majority of the people over special or state interests. He not only voted against the inflationary Bankhead bill, but also against the Taft compromise which was licked by a lopsided vote.

* * *

TIP ON PEACE RUMORS

Note to New York stock brokers: When you get panicky over peace rumors, read the following words of Col. N. B. Briscoe, commanding officer at Fort Knox, Ky.:

"There is much talk of early peace. If you were in a poker game, consider when you would like the game to end. Obviously that would be when you had all the chips in front of you. The Germans and the Japanese would be greatly pleased to make peace now while they hold captured possessions."

Dismal Italy

By Frank Gervasi

(WNU Feature—Through special arrangement with Collier's Weekly)

Already the words "sunny Italy" have for the American doughboys of this war the same hollow sound that "La Belle France" had for their fathers in the last one. In terms of rain, mud and misery, Italy has become the France of this war—France, however, without Paris, for the only major city the Allies have captured thus far is Naples, a dark, sad city.

The next big town on the road to victory, Rome, promises only more waterless water closets, and children crying for biscuits and sourballs, and black-market prices spiraling out of an inflation partly influenced by the arbitrary Allied pegging of the lira at one hundred to the dollar, and partly out of an ancient Italian aptitude for gypping foreigners. And nowhere from here to Rome and beyond, is there even a faint promise of a hot bath.

Win and Go Home.

Ever since they volunteered or were drafted, two thoughts have been uppermost in the minds of the men variously known as doughboys, doughfeet, jeeps, dogfaces and G.I. Joes. The first is to whip the pants off the Germans; and second, but not secondarily, to return home to double features, hamburgers, beer, baseball, girls, families, firesides, and Sunday clothes. A year in North Africa, Sicily, and more particularly, Italy, has accentuated those American desires.

That isn't so completely true among those more highly organized intellects known as officers. Among them, I have found many who believe that America's responsibilities go beyond mere victory. But it's overwhelmingly true among the common soldiers (and I have talked with hundreds of them in and out of battle) in the militarily stagnant Middle East and on the active fronts in Italy. Here they cry, with one voice: "Let's get it over with and let's go home. Let's leave Africa to the Arabs, Sicily to the dagos and Italy to the wops."

Their state of mind is attributable to the fact that, in the broader sense, they don't know what they are fighting for, and anything beyond the necessity of defeating Germany will be one for the gentlemen in striped pants to contend with when they gather around the green baize tables to draft plans for the postwar world. In even the most inarticulate Britons, I have found yearnings, however vague, for the creation of world order wherein there shall be peace and justice, and work for all people, so organized that opportunities for tyrants again to raise their heads will be reduced to a safe minimum.

Britons Fight Professionally.

Here on a front which is roughly half British and half American, it is possible to compare the British attitude toward war and its end, with the American. The British seem to understand war and to fight it almost daily and certainly professionally. They seem to know that war and politics are inseparable. The Americans fight much as they play football—intensely and enthusiastically, but with the sole idea of winning. There's nothing gay about Americans in battle. They fight dutifully, doggedly, bravely, but animated solely by the desire to win.

The Englishman knows he's not going to find the same old England when he returns to Limehouse and Leicester Square, and he's not at all sorry, but rather glad. The American doesn't want anything changed. To him social progress or change of any kind is synonymous with Communism, and he wants no part of Communism, preferring, as one doughboy put it, as he stood in the blood and muck of the battlefield after he had crossed the Volturno: "At least, under our way, every guy got the same chance of being President. Yeah, sure, it's dog eat dog, but you've got an even chance of being the dog that wins."

None of this is cabled in the spirit of viewing with alarm, but merely to set down what constitutes a major problem confronting the architects of peace, a problem which is drawing closer now with every hard-earned mile of conquered or liberated Europe. The problem is simply what to do about "I wanna go home."

The mentality of the American soldier and how to fit what that state of mind implies—isolationism—into, for example, the Willkie world is the problem. Unfortunately, although the defeat of Germany is assured, Doughfoot or Dogface won't be able to go home as soon as he would like or, worse still, as quickly as citizens in the United States widely believe.

The fall of Rome doesn't mean that Italy has been conquered. There is the prospect of a long, hard winter fight, and only the disintegration of Germany, like a flywheel gone wild, will bring victory early in 1944.

Master Mentalist' Finds Thought Reading Easier Than Addition; Challenges Skeptics

unninger Denies 'Supernatural' Aid, Credits Telepathy

By ALBERT J. PUGNER
eleased by Western Newspaper Union.

rithmetic was tough for Joe nninger. So he found an easy y to get the answers. He just d them from the minds of his cher and classmates.

his was fun, so after school Joe d reading others' minds. He soon nd out, says he, that if a person ould concentrate upon any simple stion for a second, he could tell ctly what that person was think- Today, 35 years later, Joseph nninger is still reading others' ughts on the radio, over the tele- me, and, previously, on the ages of America and most foreign ntries.

fter relating how he discovered thought-reading ability, Dunnin- , a tall, solid man with receding r and searching eyes, empha- d:

There is nothing supernatural ut my work, and I am not a for- e teller."

hose are the words with which usually opens his weekly per- nance before a visible and radio ience. A few seconds later he s from his desk on the stage:

Someone is thinking of Harriet. l that person please rise?"

woman in the audience rises. minger asks her: "Have we ever before, madame?"

No," she answers.

Very well," continues Dun- ger. "You are thinking of a Har- Davis. Her address is 6217 th Campbell street. Is that cor- ?"

Absolutely," gasps the woman.

unninger calls out, "I seem to a word that looks like Baylor. eems to be a university."

military officer stands up.

Is that your thought, sir?"

e officer nods and Dunninger s out with great emphasis: "Do swear that I have prearranged ing with you and that you have revealed this information to any- in the audience?"

do, sir," answers the officer.

Very well," says Dunninger. u are thinking of Baylor Uni- sity in Waco, Texas. You stud- there, and now you are thinking he course you took. Chemistry pre-medical. Is that right?"

t certainly is," answers the of-

Judges Check Show.

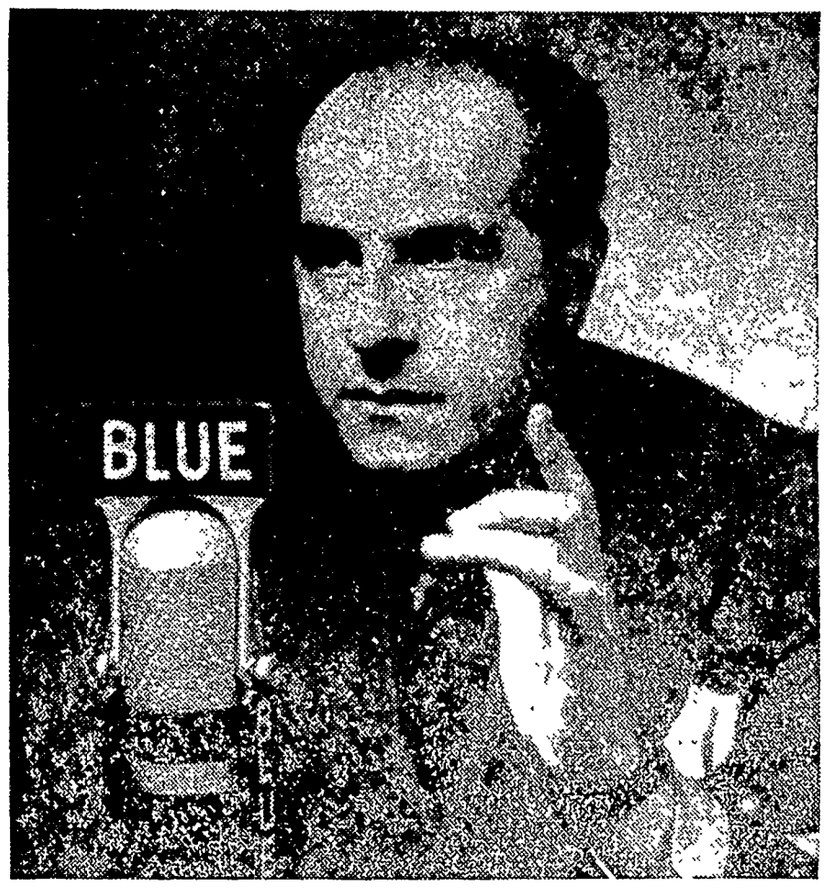
refully watching these strange eedings are three judges seated Dunninger. They are usually ous persons such as U. S. Sen. ie W. Caraway, Paul Whiteman, e Edward R. Koch of the New Supreme court, and John A. ers, president of the Advertising of New York, all of whom have d as observers on the program.

ecently, Maj. Lenox Riley Lohr, ident of the Museum of Science Industry, former general man- of the National Broadcasting pany, acted as a judge and as- d Dunninger in what was de- ed as "the greatest long dis- e mental telepathy experiment attempted."

ajor Lohr, seated next to Dun- er in Chicago, Ill., telephoned ressman William A. Rowan in hington, D. C. He asked Rowan elect any volume of the Con- sional Record, and then select three words on any page of volume.

ell Mr. Rowan to put his finger a word—any word," instructed ninger. Major Lohr relayed the sage. Dunninger quickly wrote ething on a large white sheet of r. "Now the second," he con- ed, and immediately wrote n. "And the third," he con- ed.

ow," announced Dunninger, "I the judges to initial this paper



JOSEPH DUNNINGER, who bills himself as the "Master Mentalist," sits at a desk before the studio audience during much of his program. Sometimes he writes on a slate, or draws symbols that come to him from his subjects' minds. The "Blue" on microphone refers to Blue network.

I have written on so they can identify it, and then to place it in an envelope and seal it."

Then Major Lohr asked Rowan by telephone to reveal the words. They were "Thanksgiving," "unanimous," and "consent." The envelope was opened. One of the judges read Dunninger's words. They were "Thanksgiving," "unanimous," and "consent."

The paradoxical Dunninger constantly insists that his work is not related to the supernatural and in the same breath relates that he has asked the United States navy to let him make our battleships invisible to the enemy. He's a magician, too.

When he gets bored reading minds, he might be found on a stage making an elephant or two disappear, sawing a woman into eight pieces, or, if the sawing makes her nervous, he'll just let her float in midair.

But thought reading occupies most of his time these days. According to Dunninger, this is how it's done:

"The sender must concentrate upon his thought. The receiver does not try to form a preconceived idea of what the thought will be, but keeps his mind open and then accepts the first impression without question.

"I usually vision a black slate and my impressions usually come in the form of white writing or images upon this slate."

Sometimes Dunninger uses real slates, as he did in Chicago when entertaining a group of 4-H youths at their 22nd annual congress. The "Master Mentalist" called a young farmer to the stage, handed him a piece of chalk and a large slate, then told the youth to leave the room and draw any symbol upon the slate.

This Time It's a Real Slate.

Dunninger picked up another slate. Almost as soon as the youth had left the room the "Master Mentalist" drew a large dollar sign which he displayed to the audience.

The youth returned and held up his slate. On it was a dollar sign.

Dunninger hopes to try a variation of this feat with Walt Disney of Hollywood soon. He will ask Disney to draw Mickey Mouse, Donald Duck, or any other famous animated cartoon character. Dunninger, seated in another room, or possibly another city, will try to read Disney's mind and reproduce the character.

"I am not an artist, but I believe I can reproduce a fairly clear likeness," he ventures. He probably will succeed. For although he says he is not a musician, he succeeded in reproducing a bar of music written by Paul Whiteman while the two men were separated by the thick walls of different broadcasting studios.

"Of course," explains Dunninger, "I go out on a limb when I read single minds. Naturally, the more minds concentrated on the same subject, the easier it is to receive that subject. Therefore, in practicing thought reading, it is best to start out with a group of minds concentrating on the same thought."

Some of the famous minds Dunninger has read are those of Theodore Roosevelt, Calvin Coolidge, Franklin D. Roosevelt, Eleanor Roosevelt, the duke of Windsor, Thomas Edison and Pope Pius XII.

The "Master Mentalist" discusses his strange art quite freely. He believes it could be developed for use in such fields as criminology, psychology and psychiatry, but he thinks the time is a long way off, because so little is known as to the nature of thought reading. He believes the reception is in the subconscious mind and "possibly may operate as a radio receiving set."

A Mental Radio.

His theory is that he figuratively twists dials until he hits wave lengths on which he receives messages or images.

Before a broadcast, he tunes up by walking through the audience as he distributes slips of paper on which they are to write their thoughts. These slips stay in the possession of the writers and everyone is urged not to show his slip to anyone in the studio.

"Those slips are the explanation of your mind reading act," wrote one person to Dunninger. "Somehow or other you manage to read them, probably when you walk down in the audience." Another skeptic wrote: "You take the slips away from the people, read them, and return them without the audience realizing it."

He disposed of the slip theories by reading several thoughts which had not been written down. "I ask people to write their thoughts," explains Dunninger, "because it usually makes those thoughts clearer in their minds." As for walking in the audience, Dunninger says he does that "to become acquainted with my subjects. It seems to make the impressions come clearer and faster."

Skeptics Amuse Him.

Skeptics are constantly trying to explain Dunninger's work in terms other than telepathy. Sometimes this is a source of amusement, says he.

"Two or three men investigating my work apparently were passing notes to each other in the studio during one Sunday afternoon broadcast," Dunninger relates. "I kept receiving impressions of these notes. One note read: 'Dunninger walks down in the audience.' Another was: 'I'm a criminologist. I don't get this.' Some day I'm afraid I'll embarrass one of these investigators by reading his note over a nationwide hookup.

"My work cannot be explained except as telepathy, and my offer of $10,000 to anyone who can prove that I use confederates, employees, or stooges, still stands."

THREE FAMOUS personages whom Dunninger has mystified. Thomas Edison, the great inventor, Barbara Hutton, the heiress, and Maj. Lenox Lohr, scientist and radio executive, who assisted in a startling experiment on thought transmission by telephone.

Foe of Frauds

or the last 20 years, Dunninger, hairman of the Universal Coun- or Psychic Research, has been g his prestige and influence to se fraudulent spiritualistic me- ns.

conjunction with the magazine, ntific American, he has a stand- offer of $10,000 to anyone who roduce any physical phenome- psychic methods or supernat- means that he cannot produce atural methods. He has offered the same sum to anyone who can disclose the translation of secret code messages that were entrusted to him by Harry Houdini and Thomas Edison. Both these remarkable men were interested in investigating the possibilities of spirit communication.

Dunninger also has a code message written by Sir Arthur Conan Doyle, who was a deep and scholarly student of spiritualism and the world of the supernatural. No one has successfully received the messages from the three men, all dead for several years now.

Sir Arthur Conan Doyle

Walter Winchell

(WNU Service)

Notes of a Newspaper Man:

"Dear Walter Winchell," affectionately writes Vivian Gardner of Dayton, Ohio, "I noted on the cover flap of Bob Casey's book that you made claim to his famous saying about newspaper men being such interesting people. I've written Bob's publishers inclosing an item from your column in the Wisconsin News (Milwaukee) back in 1935 or '36. I've carried it all that time. To quote your column, you distinctly paragraphed: 'We always liked Bob Casey's parody on the cliche: "It must be swell being a newspaperman—you meet so many interesting people." Casey, a big-time Chicago scribe, says: "It's nice being in the newspaper business where you meet so many interesting people—because they're in it!" ' To this you added Jimmy Cannon's snapper. So I've asked the publisher just when you claimed it as original. I'm a former staffer on the Wisconsin News and am here writing for an Air Force technical mag. This is another time you've caught a heckler looking sappy."

A recent issue of Life has an engrossing essay by their correspondent, Carl Mydans, who just returned from Japan. One observation in it deserves repetition: "Despite the Jap propagandists' new respect for America's power, they temper their warnings about it with encouraging news of America's internal problems. We who have been away for two years can tell you all about the zoot suit riots, the coal strikes, the train wrecks and industrial sabotage, the race riots, the black markets, the successes of isolationist congressmen, the shabby politics, the grumbling under rationing" . . . In short—when Americans on the home front refuse to aid their country—they just aid their country's enemies. Yet some tell us we can separate domestic policies from foreign policies!

The Orchid Garden: Speaker Sam Rayburn's greatest speech, urging the Congress to fight for our nation, instead of for pressure groups, etc. We are pasting it on our heart . . . The film, "Voice in the Wind" . . . Esquire's 1944 Varga calendar plus the epics of Philip Stack . . . The new Latin Quarter show (via Our Girl Friday's endorsement) . . . Peter Donald's Mutual program—nostalgic nonsense.

New York Novelette: The current song hit, "Paper Doll," was written in 1922 by Johnny Black. He first played it for a publisher as his pet canary chirped along, perched on Johnny's shoulder . . . E. B. Marks was so impressed he bought the ditty. "Any tune so simple," he said, "that a bird can whistle should be a sensation" . . . But for some reason or other Mr. Marks never really plugged it and it perished . . . Johnny Black died soon after . . . The Mills Bros. heard a small-time cafe singer offer it this year . . . But the Marks firm had run out of copies, and none could be found . . . Until Tommy Lyman located an old copy in his trunk . . . The Mills freres then made a Decca recording of it, and "Paper Doll" was re-born . . . Over a million platters have been peddled to date plus 700,000 or more song copies . . . Mr. Marks then had to search for the author's survivors to pay the royalties . . . He finally located Johnny's father living on an old "Tobacco Road" farm . . . The 82-year-old father of Johnny Black, who died young and penniless, will realize $50,000 in royalties from "Paper Doll," which his boy wrote 21 years ago.

Many editorialists are pouting about the press relations fiasco at Cairo and Teheran. They have good reason to be irked by the bungling. But why allow such petty annoyances to smother the great significance of the momentous confabs? Why not devote more space to pointing out that the conferences marked the greatest political victory in history? They marked the birth of civilization's greatest dream—the hope for permanent peace. Isn't that worth more newsprint than the fact that an error was made in the release of the news?

Sounds in the Night: At Paris Qui Chante: "She didn't add any weight, she multiplied it!" . . . At Jimmy Dwyer's: "He has a face only a love could mother!" . . . At the Yacht Club: "I never feel my first dive frinks" . . . In Duffy's Tavern: "Aren't you too old to believe in Sinatra Claus?" . . . At Jimmy Kelly's: "Weak? He wears suspenders to hold his shoulders on!" . . . In the Hurricane: "Falling in love is like falling downstairs."

This is why noncensorship drives newsboys nutz: British gazettes were not allowed to publish stories about the Cairo confab, taken from Reuters, the British news agency, or from the official version—but only from German broadcasts . . . The German broadcasts were based on the Reuters stories!

Note to those who pooh-pooh the value of propaganda: The Japs still haven't told their people about the Cairo accord for fear it might weaken their will to fight.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

JESUS ANSWERS HIS CRITICS

LESSON TEXT—Mark 2.23-3:6.

GOLDEN TEXT—Blessed are ye, when men shall revile you, and persecute you, and shall say all manner of evil against you falsely, for my sake.—Matthew 5:11.

Criticism and opposition was the constant lot of our Lord as He gave Himself in His labor of love for mankind. It follows His disciples to this day, for men seem to have not only ingratitude, but an evil spirit which rewards kindness with hard words and unjust accusation.

The scribes and Pharisees had already found ground for their complaint, for He had eaten "with publicans and sinners" (2:16). The fact that He went there to win Matthew and to heal the sinsick (2:17) made no difference. Then they wanted to know why His disciples did not observe a fast (2:18) in the solemn way they should. How could they, when the Lord was in their midst? They were joyful.

In our lesson we find these hating, watching enemies of our Lord's showing their bitterness in two ways.

I. Open Accusation (2:23-28).

They got at Him this time through His beloved disciples. It was the indirect approach so often used by cowardly people who want to hurt someone, but who dare not face him squarely. They spread evil reports or unkind criticism about a loved one, and thus wound the one they hate.

Their accusation was, however, in a sense a direct one. They claimed that He was the one who had permitted His disciples to violate the Sabbath law by plucking and rubbing the ears of corn to prepare them to be eaten. In other words, He had allowed them to do a secular thing on a sacred day and thus to violate the holiness of the Sabbath. What they did was not wrong, but they did it on the wrong day, said these critics.

Jesus met the charge by reaffirming the high viewpoint of God concerning man. We have lowered our conception of man's position, while at the same time exalting his undependable judgment.

Everything that concerns man is sacred in the sight of God. Hunger is natural, God made man that way. He gets hungry on the Sabbath day, so he must have food on that day. The Sabbath was made to serve him, and he must not be harmed or hindered by his servant.

Now, someone will say: "That means I can do what I like on the Sabbath—or the Lord's Day." No, it does not. What you need is right. What you desire may not be. You are more than an animal, so you must have more than physical rest and recreation on Sunday. You are more than a mental being, hence you need more than culture—reading, music or friendship on that day. You are a spiritual being and must have fellowship with God.

See how nicely it all balances up when we go God's way. Then nothing that concerns us is common or secular. It is all sacred.

II. Silent Hatred (3:1-6).

Open criticism is bad, but it becomes worse when it is hidden in the heart of a watching man (v. 2), one who looks for his opportunity to strike.

The scene is a most dramatic one. Jesus came into the synagogue on the Sabbath day as was His custom. (By the way, is it your custom to go to church on Sunday?) "In that synagogue was a man with a withered hand. Here occurs one of those incidental things, which are so full of beauty in these narratives. Seeking to find accusation against Him, His enemies nevertheless all unconsciously paid Him a supreme compliment. They associated Him immediately, not with the chief seat of the synagogue, but with the most needy man in the crowd."

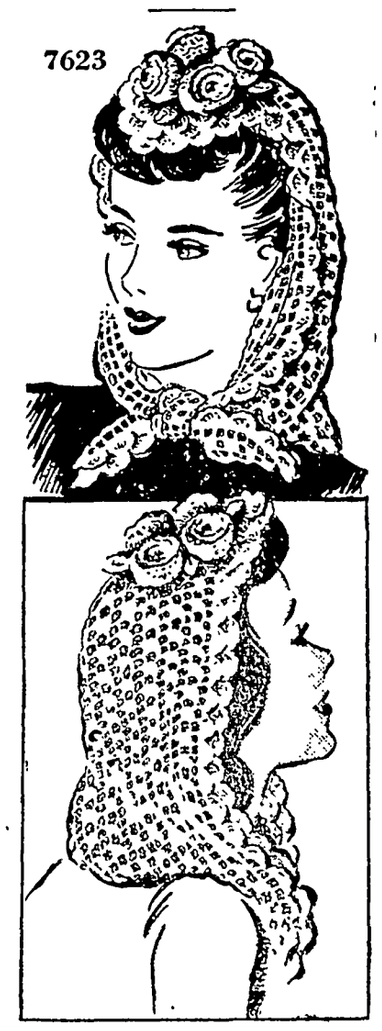
"They watched Him" (v. 2). The air was full of silent, malicious, cunning hatred. Jesus faced them with an alternative so high, so holy and exacting that they dared not speak. He pointed out that we either do good or harm, heal or kill, by our response to a human need. It cannot be ignored. What would they do with it? Keep their strict man-made regulations, or honor God by helping a needy one on the Sabbath? They dared not answer.

Then He healed the man. He did not touch him. He did not do any work, except a miraculous healing. But it was enough. The Herodians and the Pharisees, who hated each other, now became friends because they both hated Jesus.

What an awful picture of what may be in the human heart, even in the Lord's house on the day of worship. What was in your heart when you last went into the church? Love and a desire for the good of your neighbor, or hatred and malice?

Here again our Lord declared the dignity of man in the plan of God, and placed his need above the keeping of a day. We are too little interested in the help we can give, and too fearful of the criticism of others.

Fascinator Topped By Cluster of Roses



HERE'S a fascinator crocheted in wool for fall that has a "different look." A cluster of roses atop your pompadour gives a "finished," calot-like effect. A double shell stitch edging ripples round your face. The pattern stitch is finished quick as can be.

* * *

Pattern No. 7623 contains instructions for fascinator; stitches; list of materials.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

For this pattern send your order to:

SNAPPY FACTS ABOUT RUBBER

Crude, or natural, rubber has been defined as a substance found as liquid latex in many types of trees and plants and being characterized by the physical qualities of stretch, bounce, and impermeability to water.

In 1939 crude rubber was the most important single commodity imported into the United States on a dollar basis. Gross imports then were 499,636 long tons, valued at $178,489,142.

A small test plot of land in a Pacific Coast experimental project last year produced at the rate of 50 pounds of rubber per acre from Russian dandelion.

Garner, Iowa
Dec. 31, 1943

The Hancock County Iowa, Board of Supervisors met in session on above date with F J Schoun, Penn Eckels and John Chambers, present.

The minutes of the last meeting were read and approved as read.

On motion and second the annual report of County Superintendent, Charles S. Whitney is approved.

On motion and second the quarterly reports for the year 1943 of L. M. Brower Sheriff, are approved.

On motion and second the quarterly reports of County Recorder, Fern Peck Katter County Clerk, Elmer Raw and County Auditor, Fred C. Missal, are approved.

F. J. Schoun is hereby appointed a committee to count the cash in the various County offices at the close of business on December 31, 1943.

On motion and second the Board adjoured "Sine Die"

ATTEST Fred C. Missal, Co. Auditor
F J Schoun, Chairman

USE ELECTRIC FAN TO VENTILATE IN WINTER

The electric fan that serves so faithfully in the summer can do its part in the winter, too, by serving as an amateur air-conditioning unit.

A little heat can go a long way on mild winter days if a fan is used to direct warm air into chilly corners of the room. A fan hung in a doorway can move air from an overheated kitchen into a room without heat, if only one stove is being used.

The humidity can be regulated, too, on wash days if a fan is used to stir the air. Cooking odors can be erased quickly by facing the fan into an open window to draw air out.

NO MATTER WHAT THE TIME . . .

When Yon're Hungry

This is a mighty fine place to sit down and satisfy that appetite. Whatever the hour . . whatever you want to eat . . you'll find lots of real GOOD FOOD here!

Quandt's CAFE

VICTORY FIRST

. . a new home tomorrow!

That's right, lady—buy the bonds to bomb the bums. That's the first item on the order of business. Petriotism gives you a nice comfortable feeling inside . . . and when this is all over, you've still got the bonds. That's comforting, too. What are you going to do with 'em? Build a new home, I betcha! And that's a smart idea, too. Come in and talk it over with us; we know a lot about building houses and we have some attractive home designs to show you.

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. to

Mr. and Mrs. Henry Ward were Mason City visitors Tuesday.

Miss Jacqueline Kudje, teacher at Kanawha, spent the week end at the parental Art Kudje home.

Mrs. C. G. Waterman and daughter Mrs. Lyle Wilcox, were Mason City visitors Saturday.

F. A. Arnold returned to his duties at the bank Monday after an absence of two weeks due to illness.

Miss Darlene Perkins left Tuesday evening for Des Moines for a visit with friends.

Herman Paul and Fred J. Arnold were in Des Moines on business Monday.

W. J. Barz of Garner, was a business caller in Klemme Tuesday afternoon.

Fred Yates of Corwith was in Klemme on business Monday afternoon.

Mr. and Mrs. Paul Grange of Mason City visited Sunday at the Henry Keeper and Benn Coobs homes.

C. C. Kilgore went to Ft. Dodge Monday to assist with work at the Farmers Grain Dealers Association office for several days.

Bernard Smid returned Thursday from the University hospital at Iowa City where he went for an examination and check-up.

Rev. Calvin Grosshuesch conducted services at the Christian Church at Kanawha Sunday afternoon, supplying for Rev. Plessler.

Mrs. Gerald Koerner and Terry returned home Saturday from Dow City, Iowa, where they went to attend the funeral of a relative.

Mr. and Mrs. Arthur Wellemeyer spent Sunday visiting with their son-in-law and daughter, Mr. and Mrs Donald Bacon and family near Thompson.

Truels Steffen and family of near Miller were visiting in Klemme on Tuesday afternoon. They will move to a farm near Ft. Atkinson, Wis., March 1st.

Mr. and Mrs. H. F. Jost and Diane; Charles Bielefeldt and Mr. and Mrs. Fred Nagel spent Thursday visiting at the C. A. Bielefeldt home at Dougherty.

Mrs. P. M. Wilson was ill and confined to her bed all of the past week, suffering with a heart ailment. She was able to be up and around the house again Monday.

Mrs. Archie Christie of Goodell, came last week to spend the balance of the winter visiting with her son-in-law and daughter, Mr. and Mrs. Sumner Trumbell.

Ira Overholt visited Sunday with his brother, who is principal of the high school at Sheffield. On his way home he visited at the Wm. Messelheiser home southeast of Klemme.

Mr and Mrs. Melvin Neuberger entertained to dinner Monday evening Rev. H. E. Harvey and family and Pvt. Lester Neuberger and family.

Mr. and Mrs. W. C. A. Gast of Garner, and Mr. and Mrs. Emil Patet of Klemme, were entertained to a goose dinner at the home of Mr. and Mrs. Kenneth Schultz in Liberty township, Sunday.

Art Wellemeyer returned from a buying trip to the Twin Cities last Thursday. Mr. Wellemeyer made the trip to buy furniture for spring and will be getting furniture in by the car load from several markets.

This part of the country had a cold snap that last only a few days but the thermometers went to 15 degrees below zero. Friday and Saturday the weather warmed up again. We have had very little real winter weather in this part of the state and there is just a bare trace of snow on the ground here and there. The people in California and the southern states should come to North Iowa and enjoy the nice winter climate.

R. A. Jorgenson was at Britt on business Saturday afternoon.

Mrs. Benn Coobs, Mrs. Verner Lewis, Mrs. Martha Bredbenner, Mrs. W. F. Pavey and Mrs. John Clements were Mason City visitors on Tuesday.

Mrs. Asa Arnold who teaches the 5th grade of Roosevelt grade school in Ames, came Friday evening for a visit over the week end at the F. A. Arnold home. Mrs. Arnold husband, Sgt. Asa R. Arnold is now stationed at Fort Dix, New Jersey.

Pvt. Lester Neuberger arrived in Klemme Sunday morning from Trenton, New Jersey, to enjoy a furlough visiting with his wife and daughter, and for a visit at the home of his mother, Mrs. Lewis Neuberger and at the Frank Schultz home.

Mr. and Mrs. Ed. Thompson, Mrs. Edna Thada and Miss Avis Barz went to the Twin Cities Sunday to buy merchandise for Thada's Store. Mr. and Mrs. Thompson returned home Sunday evening, but Mrs. Thada and Miss Barz remained there for a couple of days.

Mr. and Mrs. Levi Klotzbach have received word that their son, Pvt. Walter Klotzbach is now in England. Walter had gone through the African campaign and saw action a number of times. Walter has spent his second Christmas overseas.

Mrs. Leppo Wessels of Clarion was visiting in Klemme today. Mr. and Mrs. Wessels have both been ill with the flu. Mr. Wessels was seriously ill, but is making a good recovery. She reports that their bowling alley at Clarion is doing a brisk business.

Mrs. E. G. Schaeffer of Forest City, began teaching in the seventh and eighth grades of the Klemme school Monday. Mrs. Schaeffer, a former Klemme grade teacher, is taking the place of Mrs. Smith of Goodell, who resigned because of the Ilness of her mother, and whom she is caring for at Goodell.

Methodist Choir Entertained To Taffy Pull At Chambers Home

The Methodist choir met at the John Chambers home south of town last Wednesday evening and after the rehearsal Miss Thelma Chambers entertained them to an old fashioned taffy pull. Later Mrs. Chambers and Thelma served a nice lunch.

ELI. BOYS AND GIRLS MET AT THE WEAVER HOME

The Ell 4-H boys and girls met at the L. F. Weaver home Thursday evening, January 6. The boys discussed feeds and feeding. The discussion centered around the feed budget sheets that the boys received at the December meeting.

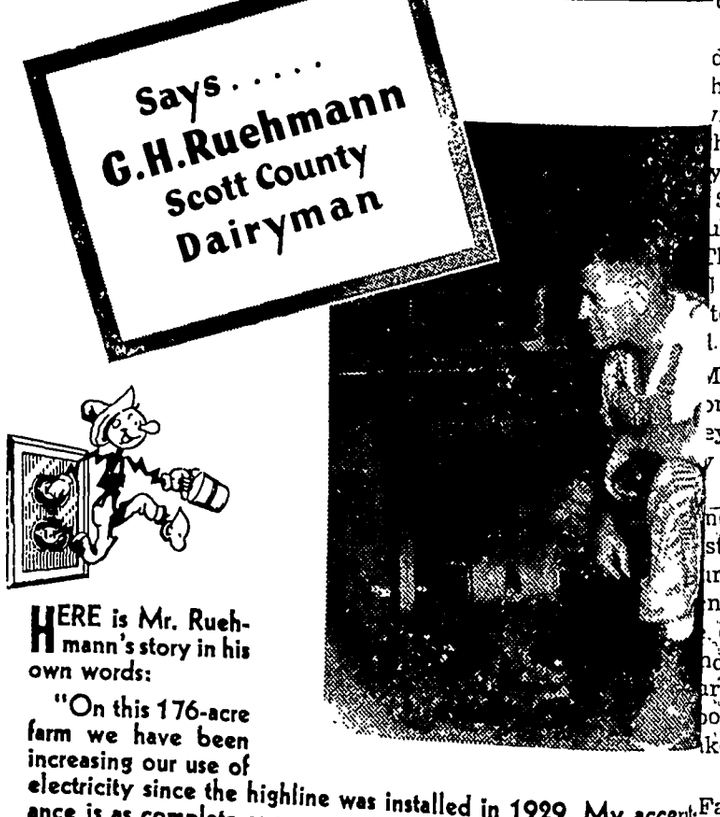
"I'd Quit Farming If I Didn't Have Electricity"

Says . . . . .
G.H.Ruehmann
Scott County
Dairyman



HERE is Mr. Ruehmann's story in his own words:

"On this 176-acre farm we have been increasing our use of electricity since the highline was installed in 1929. My acceptance is as complete as your service — and that is about 100%.

"As owner and operator of the White Rose Dairy, near Davenport — using 34 electric motors, electric shop equipment, electric lights, an electric milking machine, an electric water heater, an electric range, an electric water system, and most every other electrical device, I would say that I'd quit farming if I didn't have electricity.

"My number one pet (if there is such a thing as splitting up convenience, dependability and savings) is probably our electric pressure water supply system. However, the electric four unit milking machine in our 58-stall dairy surely is a time, money and work saver. The more I think of it, the more convinced I am that my choice is simply electricity with a capital "E"— rather than any one specific type of equipment. On a farm there are 101 jobs to do, and if you have electricity you can get these jobs done." (Signed) G. H. Ruehmann

If your farm is not electrified, we suggest that you have the representative of this company call and explain how the WPB's new liberalized line extension policy can help you increase production and cut costs without further delay!

ME PROJECT WOMEN TO SACRIFICE STAMPS & NDS

t a recent County Committee ting of the Home Project wo- of Hancock County, it was ded to urge all rural women to cipate in buying sacrifice s and bonds during January February. This would be in tion to the bonds purchased by family in the present war bond ve.

The plan was started by the te home project committee of ch Mrs. Raymond Sayre of Ack- is chairman. Twenty five thou- d dollars was set as the goal for h county. Broken down for nships, the amount would be htly over $1500 for each. If half the rural families invest- $18.75 in a bond, the quota uld be reached.

The women in each township l decide how they wish to pro- te the, "Buy Sacrifice Stamps l Bonds".

Madison township has designated ruary 12 as "Sacrifice Day". ey suggest that every women stamps with the money from eggs for that one day. They nder whose hens will be the st patriotic Report the results to ir township chairman, she will n report to Mrs. E. J. Schneider, county home project stamp and d chairman at the end of Feb- ary results by townships will be orted. Watch for them and help ke them good.

Farmers who have light weight gs will find it advantageous to d them up to at least 200 pounds nomists at Iowa State College v. Light hogs will suffer a size- e discount in price for the next w months.

FIRST NATIONAL BANK HELD ANNUAL MEETING

F. A. Arnold Named President; E. J. Arnold, Chairman of Board

The annual meeting of the shareholders of the First National Bank was held on January 11th and the following directors were elected:

E. J. Arnold, F. A. Arnold, J. N. Day, A. J. Kudje, C. B. Tice, and C. G. Waterman.

A report was made to the shareholders showing that the deposits had increased from $1,004,345.43 a year ago to $1,288,014.81, and that the total feelings are now $1,354,959 50.

After the shareholders meeting adjourned, the directors elected the following officers: E. J. Arnold, Chairman of the Board; F. A. Arnold President; E. J. Arnold, Vice-President; A. R. Arnold, Vice-President, (inactive); C G. Waterman. Cashier, and A. J. Kudje, Assistant Cashier.

MRS. MAX MACE TO HOLD CLOSING OUT SALE

On account of the recent death of her husband, Mrs. Max Mace will hold a closing out sale at her farm southeast of Klemme next week Thursday, January 27.

Listed for sale are 4 horses, 44 hogs, two milk cows and a full line of farm machines and tools.

Turn to Mrs. Mace's large advertisement in this issue of the Times for complete details of the sale.

SHAMROCKS SPLIT WITH BELMOND BRONCOS

The Little Shamrocks defeated Belmond Colts here Tuesday night 27 to 24, while the Shamrocks were thrown by the Broncos for a terrific bump of 54 to 30.

Greiman lead the Shamrock attack by lacing through 17 points.

MISS VELLA MAE PAUL AND CPL. BATES E. SADLER IN MARRIAGE CEREMONY

Wedding Took Place January 8th At Wilshire Wedding Chapel

Miss Vella Mae Paul, the eldest daughter of Mr. and Mrs Herman Paul of Klemme, Iowa, and Corporal Bates E. Sadler, son of. Mrs Lydia Sadler of Eldon, Iowa, were united in marriage at the Wilshire Wedding Chapel in Los Angeles, California on Saturday evening, January 8th, 1944, at 9:00 o'clock, with Dr. Jesse, Congregational minister, officiating. The double-ring was used in performing the marriage.

The Chapel was decorated with fresh flowers and lighted with white candles.

The Chapel organ provided music for the ceremony.

The ceremony was attended by twelve close friends of the couple

Mr. and Mrs. Fletcher, a couple from Iowa, acted as bride's maid and best man.

The bride wore a two-piece blue-gray dress makers suit with Navy blue accessories.

Friends of Mr. and Mrs. Sadler entertained them at a breakfast the following morning. The table was decorated with fresh California flowers and two wedding cakes were used as the center-piece The cakes were decorated in California style: using fresh flowers on the cakes for trimming.

Cpl and Mrs. Sadler spent their honeymoon of a week in Los Angeles after which he returned to his army camp at Elgin Field, Florida, and Mrs. Sadler returned to her work as telephone operator at the army camp at Banning, California, where she has been employed for a couple of years.

The bride is a graduate of the Klemme high school after which she studied beauty culture in Des Moines where she graduated in that profession. It was while she was employed in Des Moines that she met the man of her choice.

RAY SORENSON SPEAKS TO THE YOUNG MARRIEDS

The Young Married group of Hancock County Farm Bureau discussed, "If we make a profit in our Farm Business this year, what should we do with it," with Ray Sorenson, youth director of the Iowa Farm Bureau Federation A delicious "pot luck" supper was enjoyed by the group.

The next meeting of the group will be on February 11 at Britt. Plan to attend.

Fourth War Loan Bond Drive Now On In Full Swing

LIBERTY CHURCH GIVES FAREWELL FOR MR. AND MRS EMIL BEIER

Mr. and Mrs. Emil Beier were the guests of honor at the most colorful Birthday Social of the year at the Liberty Church Monday evening, when about a hundred folks came to enjoy supper together and a program of unusual interest

Mr Emil Blumer was chairman of the program committee and acted as toast-master. After an introductory instrumental solo by Miss Darlene Schultz, the chairman called ofr a reading of the "Liberty Tribune," which is in its fourth edition, and was read by Miss Lola Gast and edited by Lois Gast and Le Roy Bredlow.

A humorous radio skit was given by a group of young people with Rev. H E. Harvey acting as master of ceremonies, and Mrs. J. L. Abele accompanying them on the piano The group of singers were Misses Lola and Lois Gast, Lois Riemer Hilda Abele, Lorraine Bredlow, Marie Perkins, Bernice Tanner and Alrdys Polsdofer, and Messrs. Le Roy Bredlow, Elwood Harvey, Eugene Beier and Lawrence Polsdofer. They sang "Playmates," "You Tell Me Your Dream, I'll Tell You Mine," and "Oh, What a Beautiful Morning," "The Bells of St. Mary's" "Short'nin' Bread," and "Smiling Through," concluding with the group singing "Auld Lange Syne." Mrs. H. E. Harvey read a couple of verses of poetry appropriate to the occasion.

The Ladies Quintet sang two numbers, and the Men's Octette also sang two favorite songs to the delight of all.

Mr. and Mrs. Beier were presented with a lovely leather bound Bible as a gift from the Sunday School as a token of their many years of service in the Church and in the community.

The chairman then called upon Mr. Beier to address the group He spoke of his intimate relations with the church and the growth of the community, and wished that the future would be bright and prosperous in a greater degree than in the past. After a closing prayer by the pastor, the meeting adjourned

AVERY SUNBEAMS HELD MEETING

The Avery Sunbeams met at the home of our Historian, Mildred Busse. The meeting was our annual Christmas party. Games were played and gifts were exchanged.

Our club has grown this year with eleven members. The Avery Club is very happy to have Mrs Raymond Wille as their assistant leader for the coming year. We hope she will enjoy the club as much as we do.

—Betty Lacey, News Reporter

We can't win the war without the navy; our soldier can't win unless our ships deliver; merchant ships can't deliver unless the home front provides. One important convoy job is flashing signals as this youth is doing in the Battle of the Atlantic.

Your equally important job is to continue buying **War Bonds** until victory. *U. S. Treasury Department*

WAR BONDS GOOD FARM INVESTMENT

It Will Provide Funds After War to Pay for Things Needed Then

"Farmers generally made heavy purchases of War Bonds in the Third War Loan Drive. With good incomes increasing the already large financial reserves of most Iowa farm people, farmers are now in an excellent position to invest more of their extra dollars in War Bonds," R K. Bliss, extension director of Iowa State College, said

"Rural bank deposits, which were low during the depression years, have improved steadily and are now at record levels," he explained.

"In Iowa, bank deposits in towns of less than 15,000 population are now about two times as much as in the 1935-1940 period This accurately reflects the higher income of the past 2 or 3 years.

Financial Position Good

"The reserves, coupled with record 1943 incomes on most Iowa farms, put farmers in the best financial position for many years. In many cases, it is their best year in history.

Bliss pointed out that Iowa farmers receive 40 percent of their cash farm income from September through December.

"Bonds purchases in rural areas during the April and September War Bond drives show that farmers are buying bonds out of cash reserves as well as from current income And purchases by individual farmers during the September drive show that all farm cash reserves are not in banks—much of these are stored away in the sock This is substantiated by the fact that bank deposits have further increased during the past summer and fall

Help Win The War

Bliss explained that most farm people realize that much of today's higher returns does not constitute real income In normal times farm people would be spending much of the money they receive in especially good years to repair buildings and machinery and buy new equipment But certain of these things are out for the duration because war needs come first Therefore, now is the opportune time to invest current income and cash reserves in War Bonds.

War Bonds will help win the war today and will provide funds later on with which to buy things that War Bonds can be sold to a higher proportion of farm people everywhere.

MR. AND MRS. MENNO ALBERS ENTERTAIN AT "500"

Mr and Mrs. Menno Albers entertained some friends at a card party at their home Friday evening. Three tables of "500" were played and the high scores were won by Mrs. August Josten and Mr. Ewalt Josten. Low scores for the evening were held by Mr. and Mrs. Les Hartbeck.

Lunch was served at a late hour and all enjoyed a good time.

HELLO, FOLKS!

Mr. and Mrs. Verle Keraus of Garner are the parents of a baby daughter born to them at the Rust Nursing Home at Garner on Sunday, January 16, 1944.

They have named their daughter Kay Verlaine. They also have a little boy, Mickey, in their family.

OBITUARY OF EMMA SCHWICTENBERG

Mrs Emma Schwichtenberg, for 47 years a resident of this community, passed away Tuesday morning, January 11, 1944 at the home of her son David, in Twin Lake township. She had been in poor health for many months.

Mrs. Schwichtenberg was born near Elkport, Clayton county, Iowa, July 9, 1864, a daughter of Henry and Elizabeth Kraus.

She attended the rural schools and received religious instruction at Elkport, and at an early age became a member of the Elkport Methodist Church.

At the age of 20 years she became the wife of John C. Schwichtenberg. They commenced housekeeping on a farm near Elkport, and 12 years later they sold out and moved to Twin Lake township, Hancock county, Iowa, where they had purchased a larger farm.

They were members of the Liberty Township Methodist Church.

Her husband passed away in 1916, after which Mrs Schwichtenberg and the family of children continued to operate the farm.

Mrs. Schwichtenberg reached the age of 79 years, 6 months and 2 days, and leaves of her immediate family, seven children:

Ida (Mrs. Wm. Nuehring), Mason City, Iowa.
Rosetta (Mrs. Albert Tanner), Garner, Iowa.
Ben Schwichtenberg, Oswego, Illinois.
David Schwichtenberg, Goodell, Iowa.
Ernest Schwichtenberg, Rockwell, Iowa.
Vera (Mrs. Roy Joneson), Seneca, Illinois.
Berdice (Mrs. Wesley Fensterman), Auroa, Iowa.

Twenty-nine grand children, 15 great grand children.

Three brothers:
Henry Kraus, Elkport, Iowa.
Wm. Kraus, Garner, Iowa.
Jacob Kraus, Volga, Iowa.
and many more distant relatives and friends.

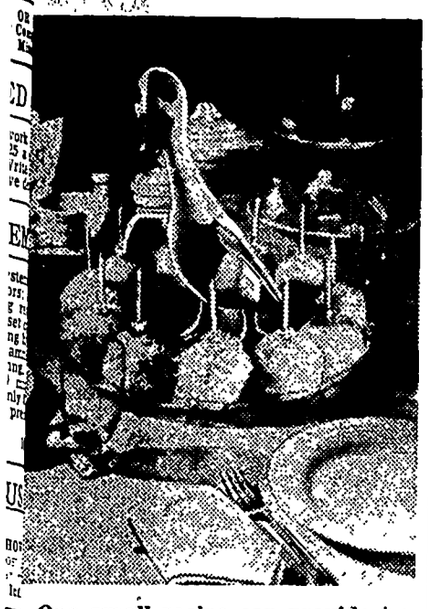
Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.
Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.
Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. *Doan's* have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*
DOAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Entertain Simply, But Do Entertain Even in Wartime



One small recipe can provide two dozen of these small, fluffy candle cakes which will be a delight at any get-together for your dessert luncheon or afternoon refreshment. They're particularly nice for a birthday.

Now that you've finished entertaining the family and relatives during the holidays, you can get back to your club work and social activity in earnest.

Most of us, from either the budget or ration point consideration, cannot afford to entertain for luncheon as we did formerly, but we can still afford the same gracious hospitality, even with less food for our guests. Should you wish to entertain at luncheon, do so with a simple salad, sandwiches or beverage. Or, it's very fashionable to entertain at a dessert and beverage luncheon.

A simple cake to go nicely with your dessert luncheon or afternoon refreshment is this one. The surprise item is coconut which now has found its way, even though in small quantity, to some markets:

***Coconut Candle Cakes.**
(Makes 2 dozen small)

⅔ cups sifted cake flour
1½ teaspoons double acting baking powder.
⅓ cup butter or substitute
1 cup sugar
2 eggs, unbeaten
½ cup milk
1 teaspoon lemon or vanilla extract
1 cup moist sweetened coconut

Sift flour once, measure, add baking powder and sift together 3 times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add eggs, one at a time, beating well after each addition. Add flour, alternately with milk, a small amount at a time, beating after each addition until smooth. Add flavoring. Turn into lightly greased cupcake tins filling ⅓ full. Bake in a moderate (375-degree) oven 20 minutes or until done. Frost with snowy lemon frosting and sprinkle with moist, sweetened coconut. Arrange cakes on a platter and insert candle holder with candle on each cake.

Snowy Lemon Frosting.

2 egg whites, unbeaten
1½ cups sugar
3 tablespoons water
2 tablespoons lemon juice
¼ teaspoon grated lemon rind

Combine egg whites, sugar, water and lemon juice in top of double boiler, beating with rotary egg beater until thoroughly mixed. Place over rapidly boiling water, beating constantly with rotary egg beater and cook 7 minutes or until frosting stands up in peaks. Remove from boiling water, add lemon rind and beat until thick enough to spread. Makes enough frosting for 2 dozen cupcakes.

Well-seasoned finger sandwiches made from flaked fish will go well with an aspic salad for a very lovely luncheon:

Lynn Chambers' Point-Saving Menu

For Luncheon
*Tomato Aspic Vegetable Salad
*Finger Sandwiches
*Coconut Candle Cakes
Beverage
*Recipe Given

***Tomato Aspic Vegetable Salad.**
(Serves 8)

1 tablespoon unflavored gelatin
¼ cup cold water
2 cups tomato juice
¼ teaspoon salt
¼ teaspoon celery salt
1 tablespoon grated onion
1 teaspoon worcestershire sauce
1 tablespoon lemon juice
1½ cups grated raw carrot
½ cup diced celery
2 green onions, sliced
¼ cup sliced stuffed olives
Mayonnaise or salad dressing

Soak gelatine in cold water. Heat 1 cup tomato juice to boiling. Add gelatin and stir until dissolved. Add celery, salt, grated onion, worcestershire sauce, lemon juice and remaining tomato juice. Stir to blend. Pour into a ring mold. Chill until firm. Unmold. Fill center with carrot, celery, green onions and olives which have been mixed with salad dressing.

This satisfying main course is prepared by melting ¼ pound of process cheese with ½ cup evaporated milk, seasoning with worcestershire sauce and ½ teaspoon prepared mustard, then serving on toast with poached egg. It's delicious.

Dieting friends will welcome this combination custard and cake dessert because it doesn't contain as many calories as rich desserts. It's delicate and ideal when served with tea for afternoon refreshment.

Lemon Cups.
(Serves 6)

1 cup sugar
2 tablespoons butter or substitute
3 egg yolks, beaten
¼ cup flour
⅛ teaspoon salt
1½ cups milk, scalded
5 tablespoons lemon juice
1 tablespoon grated lemon rind
3 egg whites, stiffly beaten

Cream together sugar and butter. Add egg yolks. Beat in flour and salt. Add milk. Stir in lemon juice and rind. Fold in egg whites. Pour into custard cups. Bake at 375 degrees for 10 minutes, then reduce heat to 350 degrees. Bake for 35 minutes longer or until a toothpick thrust into the center comes out dry. Chill. Serve directly from custard cups.

Your guests, young or old, will like these attractive corsages. They're very much edible and good, too!

Popcorn Corsages.
(Makes 16)

1 cup sugar
½ cup water
1 teaspoon vinegar
2 tablespoons light corn syrup
½ teaspoon salt
1 tablespoon butter
1 teaspoon red food coloring
6 cups popped corn

Combine sugar, water, vinegar, corn syrup and salt; stir until sugar dissolves. Cook to hard ball stage (265 degrees F.). Remove from heat; add butter and coloring. Reserve small amount of syrup for fastening wooden skewers. Pour over popped corn, stirring constantly. Form into two-inch balls. Dip skewers into syrup; push into balls. Back with lace-paper doilies and cellophane circles. Tie on bows of ribbon or cellophane.

If you want sugar-saving suggestions, write to Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says

Bits of Wisdom: Gentle treatment is the rule for eggs. They are liable to get tricky if you use anything else.

Pare, not peel potatoes. You'll be able to see the difference. When boiling potatoes, be sure to use boiling water, plenty of salt.

For mashed potatoes, use enthusiasm plus a wooden spoon and don't spare either.

Waffles should be crisp. Don't open the waffle baker while the iron is steaming. That means it's cooking.

Recipes are a chart and a guide. Good cooks as well as brides need them—then you can always get good results, avoid failure.

Save Used Fats!

The Once Over by H. I. Phillips

THE TERRORS OF PEACE

To hear some people talk you would think Sherman had said: "Peace is hell."

—*—

Ask a business man how things are and he replies: "Pretty good, but I'm worried. The war could end suddenly." Ask your broker why the market is weak and he says: "Don't forget there's a possibility of an early peace." Try to borrow $5 from a friend making big money in an airplane factory, and he will freeze you with a stern: "I've got to be mighty careful. This war can't last forever."

—*—

Ask a senator or any other public official how things look to him, and he will back you into a corner and give you a long talk on what may happen to this country if the fighting ever stops.

—*—

The thought of going back to a quiet, orderly world of brotherly love throws them into depths of pessimism. Of course, the men and women who are doing the fighting don't feel this way; it's the folks far behind the lines with none of their loved ones at the front.

—*—

The less danger they're in the more they're nervous about waking up some morning and finding peace staring them in the face.

—*—

Peace? Why, even the thought of an early armistice makes some easily frightened fellows shiver. They're so timid you might have to draft them to get them to face the peace.

—*—

It's just too bad. Maybe Washington should begin now to do something to build up peace morale; to condition people for struggling on through peacetimes. Maybe there should be an OPI (Office of Peace Information) created immediately to keep the fidgety folks fully informed of the dangers ahead.

—*—

The government could even create some medals for Distinguished Conduct in the Face of Peace.

—*—

Give special ribbons to the fellow with nerve enough to hear a peace rumor and say, "Fine. Peace can't come too soon to suit me. I'll take it over war any old time."

* * *

OLD DRINKING VERSES REVISED

Fill the bumper fair!
Every drop we sprinkle
O'er the brow of care
Smooths away a wrinkle.
Sprinkle is the word—
If you use it rightly;
With the tax so high,
You must sprinkle lightly.

Give a rouse, then, in the Maytime
For a life that knows no fear.
Turn nighttime into daytime.
With the sunlight of good cheer!
For it's always fair weather
When rich fellows get together
With a stein almost paid for—
And the final payment near.

I cannot eat but little meat—
My ration points are low.
But sure I think that I can drink,
For I've come into dough.
No frost nor show, no wind, I trow,
Can hurt me if I'm cold;
A safe I've blown, and now I own
Some jolly good ale and old.

Then let the chilly northwinds blow
And gird us round with balls of snow;
Or else go whistle to the shore
And make the hollow mountains roar.
We'll think of all the friends we knew,
And drink to all worth drinking to.
We merely need to float a loan
To call a glass or two our own.
We'll let Old Winter take his course
And roar abroad till he be hoarse.
We'll wine and dine while Winter shakes—
If we can get financial breaks!

* * *

Add similes: As childish as the fellow who is always harping about the importance of "the adult view."

* * *

Can You Remember—
Away back when:

—*—

Your car's backfire scared horses?

—*—

You fumed at backseat drivers?

—*—

A man had so little to worry about that his chief concern was to get a low auto license number?

* * *

The favorite sons are now beginning to throw their hats into the microphone.

* * *

The National Horse Show has been called off this year. It was felt that high hats are not necessary to the war effort.

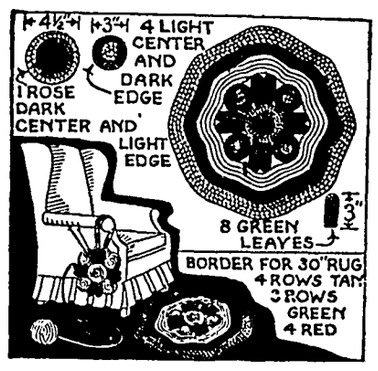
—*—

And, besides, if the news got around town that there was a big supply of oats and hay anywhere the people would mob the show and fight it out with the horses.

—*—

Then, too, it may be that in view of the meat shortage the exhibitors were afraid to show their horses in public.

ON THE HOME FRONT with RUTH WYETH SPEARS



WHEN you have made one rag rug you will find yourself a member of an enthusiastic clan; counting the days until you fall heir to a dress of a particular color that fits into the design that is developing under your fingers. These enthusiasts also bleach materials to tone them down; they brighten others with dye; they antique some with tea and they have a wonderful time.

* * *

The sketch gives all the directions you will need to copy this fascinating braided rag rug with a flower medallion in the center. Or you may make two of the medallions, sew them together and add a braided handle for a knitting bag. Braid the fabric strips tightly and keep the work flat while you sew the circles for the roses and the loops for leaves; then sew them together. Use carpet thread double for this and for sewing the braided rows around the edge of the rug.

NOTE—This rug design is from BOOK 8 which contains 31 other things to make from scraps of fabric and other odds and ends. Price of book is 15 cents. Address:

MRS. RUTH WYETH SPEARS
Bedford Hills New York

Even a Friend Might Not Appreciate Such Greeting

Several years ago George Ade was visiting London and, feeling lonesome, suddenly spotted a man he thought he knew back home. He rushed up eagerly and gave the fellow a resounding whack on the back, causing his glasses to fly off, his hat to sail into the air and his armload of bundles to fall into the street.

Then he discovered his mistake and apologized profusely to the stranger, explaining that he thought the man to be an old friend.

"Oh, that's quite all right, old chap," said the Englishman, "but—er—tell me, does your friend care for this sort of thing?"

Historical Bugle Call Was Recorded 53 Years Ago

A unique phonograph record is that of the bugle call which sounded the Charge of the Light Brigade at Balaklava, Russia, on October 25, 1854, during the Crimean war. Using the original bugle, the English soldier who sounded the call on the battlefield made the recording in London 53 years ago.

One of the few copies of it is owned by Yale university.

THERE IS NO ASPIRIN

WHY TAKE HARSH LAXATIVES?

Simple Fresh Fruit Drink Makes Purgatives Unnecessary for Most People

Here's a way to overcome constipation without harsh laxatives. Drink juice of 1 Sunkist Lemon in a glass of water first thing on arising.

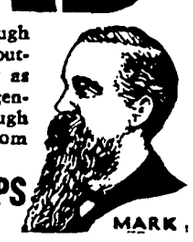
Most people find this all they need—stimulates *normal* bowel action day after day!

Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply valuable amounts of vitamins B_1 and P. They pep up appetite. They *alkalinize*, aid digestion. Lemon and water has a fresh tang too—clears the mouth, wakes you up, starts you going.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

TOO BAD

We can't make enough Smith Bros. Cough Drops to satisfy everybody, because our output is war-reduced—so please buy only as many as you really need. Through three generations and five wars, Smith Bros. Cough Drops have given soothing relief from coughs due to colds. Still only 5¢.



SMITH BROS. COUGH DROPS

WHY U. S. WAR BONDS ARE A SOUND INVESTMENT

So you think that maybe so many War Bonds are being sold that your Government won't repay when you ask to cash your bonds.

So you think maybe that gas rationing is "all wet" and that it is all right to chisel on meat and canned goods stamps.

So you think participation in the War effort is all right for the other fellow, but isn't meant for you.

Well-Mister you're wrong. If you're an American citizen, you've got to come through and stop chiseling and you've got to do your share of the bond buying, too.

Let's just take up one of the questions here. You say that there is no sense to buying bonds. The bonds won't be paid. We first heard that story over the German radio and we said at the time it was Nazi propaganda of the worst sort; an attempt to undermine the financial structure of the United States.

Did you ever stop to think that United States currency is worth more, on the basis of our dollar, than the currency of any other country? Did you ever stop to think that our war bonds are backed by the full integrity of the United States Government and that same currecy? Just remember the very patent to the title of the land you own is backed by your government.

Just give thought to this for a minute. When that currency is worthless, then and only then will those War Bonds be of no value. When those War Bonds are worthless, you can count on it that there will be no banks in this country and that the insurance companies will have closed their doors. Just remember this, your investment in war bonds is the world's safest investment. Your investment in War Bonds is a better investment every day, as our fighting men continue to make progress in the battle of Europe and in the battle against the "Nips."

You remember reading recently of those meetings at Cairo and Tehron At these meetings, the United States, Great Britian and Russia tied themselves together China was also represented at the Cairo meeting These meetings were a real step ahead and they added to the value of your War Bonds The more War Bonds you buy, the closer we get to victory and the more War Bonds you can buy provide you with greater security in more ways than one. A war bond is an investment in America. If you like America and if you want to win this war, you will put every possible dollar into War Bonds.

CASH FOUND

While going through the belongings of the late Charles Porter of Burr Oak, Melvin Underbakke, executor of the estate, discovered $1320 hidden in a mattress. Mr. Underbakke was preparing the things for an auction sale at the time he found the money.

SLIGHT MIXUP

Clp. Romane Van Dorn formerly of Waverly, now stationed in Italy received the following cable from his sister, Estelle Van Dorn, who teaches school in Cedar Falls: "Everyone fine; children evacuated; all is well." The Corporal returned the cable to his sister. Estelle had sent greetings to her brother but the contents had evidently become mixed with one from some occupied country.

A LITTLE SOFT!

Eggs laid regularly by a black minorca-leghorn rock cross hen on the Richmann farm near Waverly would hardly do for actual pratice, but they do resemble footballs. The shells are seamed like a football with even the stitch markings along the seams.

DIDN'T CHANGE MUCH

J. H. Haehlen and R. T. Baird of Waverly learned recently that they knew each other years ago. Haehlen, who moved to Waverly a short time ago, encountered Baird, a local hotel manager, in the hotel. The men thought each recognized the other and began comparing notes. The two men worked in the same grocery store in Des Moines 20 years ago.

Safety demands that electric motors be wired properly. The use of ordinary lamp or extension cord is hazardous and should be avoided. Permanent connections should be made by a qualified person, making sure that no bare wires or knife switches are present.

REPORTS ON IOWA BIRTHS

Des Moines,— Preliminary state health department figures Thursday showed there were 35,343 birth in Iowa during the first 9 months of 1943 compared with 36,416 during the corresponding 1942 period. Late reports may increase the 1943 figure to the 1942 level, department officials said.

WHY NOT DISHONOR ROLLS?

Now that most every community has erected War Service Honor Rolls as a tribute to the young men and women who are serving their country in the armed forces, we are in favor of erecting some dishonor rolls bearing the names of strikers who are engaged in essential war industries. Let those who put a price on their patriotism receive suitable recognition.

THIS IS A FINE PROFIT

A Britt farmer, Mark Miller, reports that he recently completed delivering his hemp crop to the mill. The 15 acres of hemp produced 52,474 pounds of No 1 hemp and 36,717 pounds of No. 2 hemp, bringing a total of $2,046 19 His deduction for seed and machinery hire was $203 25, leaving a net return of $1,842 94 or $128.87 net per acre.

CHECK FARM MACHINERY NOW FOR REPAIR NEEDS

With this in mind, J B. Davidson, head of the Agricultural Engineering Department at Iowa State College, suggests that farmers prepare for the 1944 crop season by repeating the 1943 machinery preparedness campaign He proposes this five-point program:

Check every machine for needed repair as soon as possible.

Order repair parts as once

Arrange with service shops for major repairs at once.

Put repairs on machines during the slack season.

Check the adjustment on all machines.

HANDY GADGET

Melvin Pete of near Greenfield built an elevator for a power feed grinder out of salvaged material. The elevator saves scooping the ground feed into a wagon box and prevents loss from feed blowing away.

STUDY GROUP MET AT HOME OF MRS. C. LEMKE

The Study Group of the Methodist W S C. S met at the home of Mrs Clarence Lemke on Thursday afternoon, January 13th.

Mrs Levi Ridder was Devotional Leader, using the subject: "Meeting Other Faiths."

"We Who Are America," is the new study Mrs. C C Kilgore is giving from chapter one of "Our America."

Lovely refreshments were served by Mrs Lemke Twenty-four members attended and all had a most enjoyable afternoon.

ITS GETTING WILD AND WOOLY IN THESE HERE PARTS!

Blame it onto the war, or blame it onto the Democrats . . . anyway things are going haywire here in Iowa, and to top it all off wolves are running at large right here in Hancock county!

Just a few weeks ago a deer was killed on the highway south of Klemme. Now for the wolf story:

Wast Wednesday morning, about 1 mile west of where the deer met with a fatal accident, a wolf stepped into the road just as Emil Pringnitz was driving to town. Emil gave chase and suceeded in running down the wolf near the W F Greiman timber, south and west of town. The wolf was injured when hit by the car, and landed in the ditch and then tried to crawl thru a woven wire fence. Emil got out the car jack and used the handle to finish off the wolf!

Has anybody seen a bear around here lately?

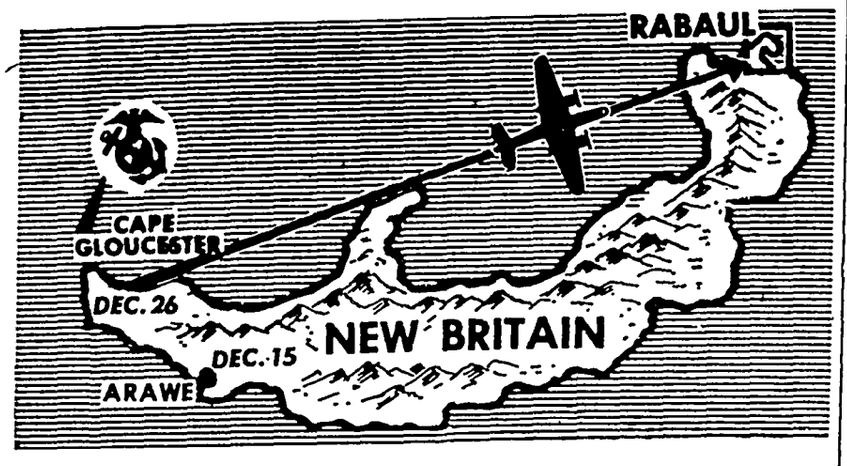
WEEKLY NEWS ANALYSIS

Nazis Reel Under Combined Pressure Of Heavy Air Attacks and Sea Losses; New Air Blows Strike Japs in Pacific; Fifth Army Steps Up Assaults in Italy

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Released by Western Newspaper Union.



New Britain—Map shows points of U. S. landings on New Britain island at Arawe on south and Cape Gloucester on north. (See: Southwest Pacific.)

INVASION:
Eisenhower Commands

Hitler's high command shuttled troops in western Europe as America's four-star Gen. Dwight D. Eisenhower assumed command of Allied forces and the stage was set for the big second front.

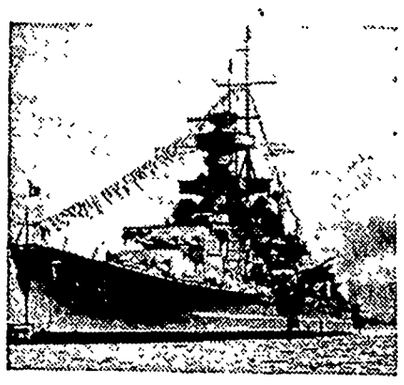
Britain's Air Chief Marshal Arthur Tedder stood at General Eisenhower's side as deputy commander, with Britain's Adm. Bertram Ramsay as the leader of naval forces, and Britain's Air Marshal Trafford Leigh-Mallory in charge of all air forces.

As the Allies' supreme command buried itself in the mass of invasion detail, the tensed Germans reported heavy aerial bombardment of their channel fortifications and Commando attacks along the French coast to test their defense. As the Germans awaited the grand assault, said Nazi Marshal Erwin Rommel: Our defenses are technically correct.

FORTRESS EUROPE:
Step Up Action

Bringing heavy artillery into play, Lieut. Gen. Mark Clark's Fifth army blasted the Nazis from strong points blocking the 75-mile road to Rome, while farther to the east, the British clambered past the enemy's Adriatic bastion of Ortona, won after more than a week of vicious street-to-street fighting.

As U. S. and British troops punched their way through the Nazis' stiff mountain defenses in



Germany's Scharnhorst.

southern Italy, aerial and naval warfare in Europe stepped up.

Fleets of Allied bombers winged their way over the English channel to pound Nazi fortifications along the French coast, and the RAF rained another 2,234 tons of explosives on battered, hapless Berlin.

Following the British home fleet's sinking of the 26,000-ton Nazi battleship Scharnhorst off North Cape, Norway, light Allied and German naval units tangled in the Atlantic off the French coast, with airplanes being called into play to help sink three enemy destroyers and a speedy blockade runner.

RUSSIA:
Reds Advance

Delivering trip-hammer blows all along the 800-mile Russian front, Red armies surged forward again in the south as Germany's harassed high command shifted forces to check the big push.

The Reds' heavy blows in the south fell as German resistance stiffened in the north around Vitebsk. Quickly shifting the gravity of their attack, the Russ struck on a 110-mile front in the south, first punching hard at Zhitomir, then punching still harder above that railway hub at Koresten.

This winter's Russian offensive was a real slugging match, with each side in the south primarily concerned with exhausting the other.

SOUTHWEST PACIFIC:
Bombings Jar Japs

Japan's great air and shipping base of Rabaul on New Britain came within closer range of U. S. bombing planes with the marines' capture of two air strips on Cape Gloucester on the western end of the island.

Gen. Krueger

Following up heavy bombing which helped crumple the enemy's strong line of pillboxes, the marines stormed remaining Jap positions with flame throwers. As the marines advanced at Cape Gloucester, elements of Lieut. Gen. Walter Krueger's Sixth army encountered heavy resistance at Arawe to the south.

The Allies made increasing use of air power to jar the Japs loose on the wide Pacific front, dropping gasoline tanks on enemy strong points on Bougainville and sending fleets of bombers to pound installations on the Marshall islands.

AGRICULTURE:
Meat Production

Farmers received an all-time high of four billion dollars for livestock slaughtered under federal inspection in 1943 as meat production also reached an all-time high of more than 24 billion pounds.

Fifty per cent more meat was produced than during the 10-year prewar average, but after allocations to the government, civilian consumption was held to the prewar rate of 132 pounds per person. Because of rationing, however, supplies were more evenly distributed than formerly.

Meat output for 1944 was estimated at 25 billion, 600 million pounds, of which 8 billion, 500 million pounds will be required for military and lend-lease purposes.

CCC Program

To help stimulate production and fulfill commitments to support crop and livestock prices, the Commodity Credit corporation spent 3½ billion dollars during the 1943 fiscal year.

As of December 18, CCC possessed 32,898,338 bushels of wheat under 1942 loan, while 96,101,516 bushels were redeemed. CCC wheat stocks at that date totaled 86,928,000 bushels.

Principal objective of the CCC's 1943 program was to increase the production of vegetable oils, dairy and poultry products and meats, and at the same time to underwrite OPA price ceilings.

U. S. NAVY:
42 Carriers

The U. S. finds itself well equipped as naval operations throughout the world quicken, with Uncle Sam's navy boasting of 42 aircraft carriers, including sleek destroyer-escorts for protecting convoys. The U. S. started the war with seven.

Corsair and Hellcat fighter planes taking off from the carriers' decks have increased their striking power, and a deadly new dive bomber has been put in service. During 1943, the navy trained twice as many pilots as in 1942, and three times as many combat planes were sent to the front.

During 1943, arming of merchant ships was speeded, 4,000 now being outfitted with weapons.

HIGHLIGHTS . . . *in the week's news*

INSURANCE: British maritime insurance companies have reduced the war risk rates on cargoes to and from the United Kingdom to about half the former rate, reflecting the greater security of the seas.

RESTAURANTS: The nation's restaurants, hard pressed by food restrictions and difficulties in keeping employees, are serving 25 million persons daily.

PRESSURE COOKERS: The government has taken pressure cookers off the ration list, but all purchasers will be required to specify that they intend to use the cookers for preserving food. Retailers have been instructed to take the customer's word for it. Those wanting cookers for other purposes must make application with the War Food administration office in Washington.

FOOD:
Chickens, Points

As the War Food administration requisitioned 170 million pounds of dressed chicken and fowl for the government, OPA slashed point values on canned vegetables and ordered frozen vegetables point-free.

WFA's action was prompted by the government's inability to obtain more than 20 per cent of the fowl they required in recent months, and the army was said to be particularly anxious to get the poultry for Sunday dinners at camp and hospital diets. Civilians may be little affected by WFA's order, however, since it does not apply to stock stored after December 30, 1943.

Because of comfortable stocks of canned green and wax beans, zero point values were established for them. A 10 per cent reduction in consumer demands for canned peas and tomatoes during the last two months led OPA to chop their point values for No. 2 and 2½ cans to 15. In an attempt to move frozen vegetables from storage to make room for record pork stocks, all point values were removed.

RAILROADS:
Strike Off

Seeking to avert a threatened strike after the switchmen, conductors and firemen and enginemen had refused his offer to arbitrate their wage demands against the carriers, President Roosevelt quickly seized the nation's railroads for the government.

Representing about 150,000 men, the three unions had balked at presidential intervention even after the trainmen and engineers accepted FDR's proposal, as a result of which they received an overall pay increase of 9 cents an hour.

Also accepting FDR's offer at the last minute were the 15 non-operating railroad unions representing 1,150,000 employees, who suddenly agreed to a former government proposal of pay increases ranging from 10 cents an hour for the lowest paid to 4 cents an hour for the highest paid, but also insisted on overtime compensation past 40 hours.

Biggest Year

Nineteen hundred and forty-three was the greatest year in the history of American railroads.

(1) 725 billion ton-miles of freight were handled, a ton-mile equaling one ton hauled one mile.

(2) Passenger traffic totaled 85 billion passenger miles.

(3) Gross earnings exceeded 9 billion dollars, although net operating income amounted to 1 billion, 385 million dollars.

LEND-LEASE:
Aid to Russia:

With many of its great industrial cities razed and natural resources overrun, 3½ billion dollars of lend-lease assistance bolstered Soviet Russia in its critical hours.

To the Russ, the U. S. has sent nearly 7,000 planes, 3,500 tanks, 130,000 sub-machine guns, 150,000 trucks, 25,000 jeeps, 225,000 field telephones, and 750,000 miles of field telephone wire.

In addition, the U. S. has sent 1,000,000 tons of steel, 350,000 tons of non-ferrous metal, 400,000 tons of chemicals, 600,000 tons of petroleum products, and more than 18,000 metal cutting tools.

Besides sending wheat, flour, meats, fats and oils, the U. S. also has supplied 10,000 tons of seeds to Russ farmers.

Traffic Toll Drops

On the basis of reports for 11 months, the National Safety Council estimated that America's traffic death toll for 1943 would reach 23,000, 13,000 below the prewar year 1941.

The north central region of the U. S. showed the sharpest decrease for the 11 month period, with 29 per cent less fatalities than in the simi-

This was a fatal accident.

lar period last year. The mountain region recorded a drop of 28 per cent, the south central 24 per cent, the north Atlantic 22 per cent and the Pacific 6 per cent.

Mount Vernon, N. Y., was the largest city in the country without a fatality in the first 11 months of 1943, while among cities of 250,000 population or more, St. Louis reported the biggest decline of 52 per cent and Philadelphia the smallest with 1 per cent.

OPA UPHELD

Officials of the Office of Price Administration in replying to a house committee charge that the OPA was guilty of "usurpation and abuse of its powers" pointed out that the courts have upheld the OPA orders in nearly all tests.

Out of 4,991 cases to the end of September, the courts have rendered decisions favorable to the OPA in all but 291 actions, officials said. They also denied that OPA regulations have caused "widespread business failures."

Washington, D. C.

LITTLE PIGS GO TO MARKET

Agriculture officials are staring with bulging eyes at the telegrams received from the livestock markets. The number of hogs killed in a single day has passed the figure of 300,000, and is still going up.

November has already set an all-time record in hog slaughter of 6,900,000 (federally inspected). December will go still higher. Cattle slaughter also set a record in November, but is now tapering off. Not so with hogs.

Nothing like this has ever happened in the history of the world. Nature, plus a low ceiling price on corn and the delay in putting a ceiling price on hogs, is now scattering pork all over the landscape. This will continue through January, February, and into the month of March.

In spite of the pork flood, however, there is no surplus, and officials insist that there must be no "holiday" from rationing. OPA and War Food administration agree on this. They have had many differences in the past, but they stand together on the matter of red points.

Fact is, they have debated removing pork from rationing, but ran into so much prospective grief that they gave it up. For if housewives could buy pork without stamps, they would use their stamps for beef and butter, which are still short. Or if OPA tied the points to the product, making separate stamps for pork, others for beef, and others for butter, etc., there would be outcries from different groups, such as Jewish people, who ban pork.

Conclusion is that the ration books must be left alone, and the only way to solve the bounty problem is to make federal purchases heavier and move them more rapidly.

Army purchases of beef were extremely heavy in the beef months of September through November. Today, Lend Lease purchases of pork are growing heavy and will hold up through the "hog run" now flooding the market.

But this does not always take the meat out of storage. Lend Lease shipments to Russia can be made only when Russia is ready to eat the pork, since they have no storage space. Britain, on the other hand, can store pork, and is taking shipments faster than the rate of use.

With livestock production high, and submarine sinkings low, more beef and pork are getting to Allied fighting forces overseas than ever before.

* * *

MORE STRIKES AHEAD

There are a lot more strikes in the country than the public is aware of. The government has abandoned the policy of regular announcements of the number of strikes and the number of man-hours lost. Thus the strikes do not get into the newspapers.

But here are some figures which reveal that the no-strike pledge of labor organizations is not very effective.

In November alone, there were 120 strikes. The December figure will be only slightly lower. In the week before Christmas, 91,000 man-days were lost in plants engaged in war production. Two days before Christmas, 21,000 people were out on strike, and a number of critical items were behind schedule.

Some of the strikes have no relation to wages. Take for example the strike which Washington officials refer to as "the Baltimore backhouse strike." The Western Electric plants at Baltimore are producing such highly important items as marine cables and radar wire. But white workers went on strike because white and colored workers did not have separate toilet facilities.

The war department was obliged to step in last week and take over the plants—solely because of toilet trouble. Workers began coming back slowly, but four days after the plants were taken over, over half the workers were still out.

Unfortunately, there is every probability that strikes will increase, rather than decrease in the future. Next in line demanding wage increases will be aircraft, steel and shipyard workers. John L. Lewis' victory broke the line, has stimulated demands for increases in many industries.

After the President yielded to Lewis, George Harrison, railroad brotherhoods chief, visited the White House and said: "For Gawd's sake, you give it to your enemies, why not to your friends?"

* * *

MERRY-GO-ROUND

¶ President Rios of Chile recently told newsmen he expected to visit the United States. This plan is now set aside, due to the grave situation in Argentina and Bolivia.

¶ The Germans now make mines of plastic, which cannot be located by magnetic detectors. They are reported to have sowed a dense minefield along the coast of France to head off the second front.

¶ Army has a special course of instruction for cooks serving in cold climates—Alaska, Iceland, etc.

¶ Senator Wiley of Wisconsin, recently leading a visitor through the labyrinthine subway of the Capitol building, said: "I'll take you through the catacombs—and they might really be the catacombs to judge by the smell."

Japan's Resources

By Max Hill

(WNU Feature—Through special arrangement with The American Magazine.)

We hear a lot about Hitler's Fortress of Europe, but seldom about Japan's larger, and vastly richer, Fortress of Asia. Yet, if you could shuffle the lands of the earth around as you do pieces of a jigsaw puzzle, you would find that Hitler's empire could be tucked away in far less than half of the area that Japan now rules.

Emperor Hirohito's domain is larger than continental United States, and he has more than he can use of many vital war materials which are so scarce here that our scientists are on day and night shifts trying to find practical substitutes. It is the richest natural area in the world, and its resources transformed Japan overnight from a poor relation among the world powers into an empire that spreads from the cold of the northern Pacific to the tropical heat of the Indian ocean below the equator. And a determined enemy is welding this conquered region into a war machine that, given time, will dwarf the military might the other end of the Axis has at its command.

The areas which Japan either captured or just walked into and took over, amount to some 3,100,000 square miles and contain fabulous quantities of war materials. All of it was taken in the first few months of the war, and since that time we have been able to recapture not much more than 20,000 square miles.

Germany does have one important advantage over her Pacific ally: She is looting a continent which already was industrial; Japan's conquests, for the most part, were in an area predominantly agricultural and primitive. Japan must fight a war steadily growing more serious for her, and at the same time build the war plants to handle the plenty that is there for the taking. She is somewhat like the burglar trying to tote off more than he can carry.

Plenty of Oil.

As to resources, let's take oil first, as one of Japan's most necessary raw materials. Before the war, Japan stored up millions of gallons of the oil she bought from us and from the Netherlands East Indies. Then she struck, and you may be sure she didn't start out empty-handed. Tokyo's radio boasts that she now has approximately 70 per cent of the Indies oil wells back in production.

The Indies produce less than one twenty-fifth of the oil flowing from American wells, about 2,500,000,000 gallons each year. But Burma has oil wells, too, and I am told by sources I know are reliable that the Japanese program for this year is to store 42,000,000 gallons of oil, just put it away for the future. Even so, they are at work at home, taking 3,500,000 barrels of oil each year from the Manchukuo shale fields, extracting oil from coal, experimenting with oil from sardines for glycerine, and with oil from soya beans, boiling pine-tree stumps for another type of oil, and—most important of all—building synthetic oil plants.

The synthetic plants, which are scattered throughout the empire, are the big question mark in Japan's oil production. Some of them use German patents; others a process invented by the Japanese themselves. We have never been able to locate all of them or find out how much they are producing.

Rubber, Tin and Quinine.

Oil is only the beginning of the riches of the Indies. This great region also produces one-third of the world's natural rubber; one-fifth of the tin; 90 per cent of the quinine, so valuable in tropical fighting; and extensive deposits of nickel, bauxite (from which aluminum is made), manganese, gold, and silver.

But Japan can put all of these riches in a side pocket and forget them, with the exception of the nickel on the island of Celebes, and look with greedy eyes on the rest of the conquered area.

Including the Indies, this empire produces 98.8 per cent of the world's natural rubber and 80 per cent of the world's tin. Two million tons of ore high in iron content are dug out of the Malaya mines each year, and the Japanese are now supposed to be busy on a plant to smelt this ore near Singapore.

We read frequently of the difficulties Japan has with her shipping, but you never hear any mention of the American tonnage it takes to bring tin from Bolivia, halfway down the west coast of South America, and inland, a much longer haul than the Japanese have.

The enemy has 80 per cent of the world's tin; we have about 15 per cent, which is what Bolivia produces, and by agreement we have to split most of that with England. Do you wonder, now, at the almost desperate pleas of the government that we save our used tin cans?

Farmers Get Set to Achieve Still Higher Food Production as 1944 Planting Begins

FA Calls for a 6% ncrease Over 1943's Food Crop Acreage

'armers all over America are y with preparations for their 4 production battle. They 'e set a goal of 380,000,000 nted acres, from which—in- ding meat, poultry and eggs hey expect to produce 4 to 6 cent more than the 1943 food ord and enough vegetable and fibers to meet essential r needs.

hat is an ambitious program, but War Food administration points that America's farmers have son for their confident outlook. ey've just closed the seventh suc- sive year in which their intention produce more food than the year ore was fulfilled. Food produc- , at the beginning of 1944, has ched a point 32 per cent higher n before Pearl Harbor and 5 per t more than the 1942 record, ich many believed could not be licated.

creages on most food crops will increased in 1944, according to nting goals set at fall meetings farm leaders in the agricultural as. National needs for farm ducts, previously determined by War Food administration, were sented at these sessions. Upon basis of these needs, the goals re set.

Whether they are met or not will end upon many factors, the chief being the yield the farmer s from his land.

hat yield, in turn, is influenced t by weather. A farmer may have finest of soil, plus all the labor, chinery and supplies he needs, if the weather is bad his crops not be up to expectations. On other hand, excellent growing ather can do much to mitigate the blems involved in labor and sup- shortages, and even low fer- y of land. The past few years, en records have been broken right left under conditions far from al except as to weather, make very clear.

Conservation Ups Yields.

t should be pointed out, however, t conservation practices have yed an important role in bringing productivity of United States ms to its present all-time high. lds per acre have averaged 20 cent more during the past five rs than during the previous 20, on some crops the increase been phenomenal.

he total acreage increase need- to meet the 1944 goal, most of ch will be devoted to food crops, be about 16,000,000 acres. Av- ge yields would result in the ed for upping of production over year.

hief increases in acreage planned U. S. farmers are 50 per cent re sugar beets, 24 per cent more eat, 23 per cent more peanuts, 21 cent more dry peas, 19 per cent re soybeans, 14 per cent more et potatoes, 11 per cent more sh vegetables, and 9 per cent re dry beans. Small increases set up for potatoes, sugar cane, vegetables for processing.

he farm goals also recommend a er cent raise in total milk and output, with a similar increase the number of dairy cows. A ht decrease will be sought in chickens and turkeys raised, together with a sufficient volume of livestock slaughter to reduce the number of meat animals on farms from the record high reached in 1943. Such a volume of slaughter would bring an increase in total meat production this year of 8 to 10 per cent, and a 4 to 6 per cent increase over the all-time high reached in 1943 for the combined output of poultry, dairy and meat products.

The number of milk cows on farms on January 1, 1944, will be large enough to permit realization of the 121 billion pounds of milk set as the year's goal, according to figures from the Bureau of Agricultural Economics. However, it is pointed out that the level of milk production during the year will depend to a considerable extent upon the quantity of feed concentrates available to dairy producers. The feed situation is expected to become tighter as locally grown crops are used up in areas where supplies are short.

Livestock feed will be one of the chief problems in the northeastern dairy states and in the southern states where dairy farming is a comparatively new enterprise. It will enter into calculations everywhere, however, and in some areas maintenance of milk supplies may necessitate cutting in on other crops in order to provide sufficient feed.

The estimated feed-grain production for 1943 was 116 million tons, 7 per cent less than the record output of 1942, but 16 per cent higher than the preceding five-year average. While supplies of both wheat and rye available for livestock feeding and by-product feeds may be larger in the coming months, the number of grain-consuming animal units currently on farms is much above normal and considerably larger than a year ago.

Cattle-feeding operations are expected to be on a smaller scale than last season as to the number of cattle on feed, with shorter feeding periods also indicated.

Double-Cropping Emphasized.

Another problem of national scope is the continued need for double-cropping to make possible the planting of some 15 million more acres to crops than there is good growing land to be planted. In 1943 farmers put 360,457,000 acres in crops on an actual acreage of some 340 million acres. This was accomplished by the planting of two or more successive crops on a given piece of land which otherwise would have lain idle after a single harvest for the year.

It is expected that inroads will have to be made in 1944 on summer fallow land, and that much idle land of low productivity may have to be brought into use if it does not seem feasible to continue double-cropping on certain farms or to increase sufficient of the permanent crop acreage to take care of the planting goals. Pressure for cropland is going to be heavy everywhere, says WFA, but especially in the West.

Machinery problems are not expected to be as severe in 1944 as last year, although machinery for harvest will still be less in quantity than would be desirable. Some planting equipment will be at a premium, also. Relaxation of specified restrictions by the War Production board, and continued efficient application of the time-honored sharing of equipment always a part of neighborly farming, will help alleviate those shortages that must be overcome.

Labor, while it will be scarce again in 1944, is not expected to present any unusual problems except in specific areas. The main difficulty will probably be to get the workers where they are needed when they are needed. As in 1943, farmers will have to rely in the peak harvesting periods on voluntary help from the urban centers.

Assembling and marketing of crops, especially in the South, will need some attention to make the best possible use of the abundant harvests to be sought during the year. Marketing problems may be expected to remain largely local in character, and their solutions also local.

Conservation practices will receive further emphasis in 1944, with attention focused on those practices which will increase production this year and in 1945. The need is to keep a cover on the land, prevent immediate danger of erosion and apply vitalizing material to the soil in such forms as lime, superphosphate, slag and other fertilizers, green manure "turn under" and legume planting. These are all calculated to aid in increasing yields as well as in preserving the productivity of the soil.

Conservation problems vary with the different regions, depending upon topography, soil, climate and conservation needs of each state. Four points must be considered, says WFA, in determining the necessity for any specific practices. They are:

1. Will it contribute to increased production?
2. Will its returns be immediate and substantial?
3. Is it easily understood, and is its performance practical for the farmer?
4. Can it be easily and effectively administered?

For example, the use of more fertilizer is recognized as a major method of increasing food production on the proposed acreage of cropland, without increasing labor and farm machinery requirements. The use of fertilizer is estimated as probably accounting for a minimum 20 to 25 per cent of total food production in 1944, if supplies are available as anticipated.

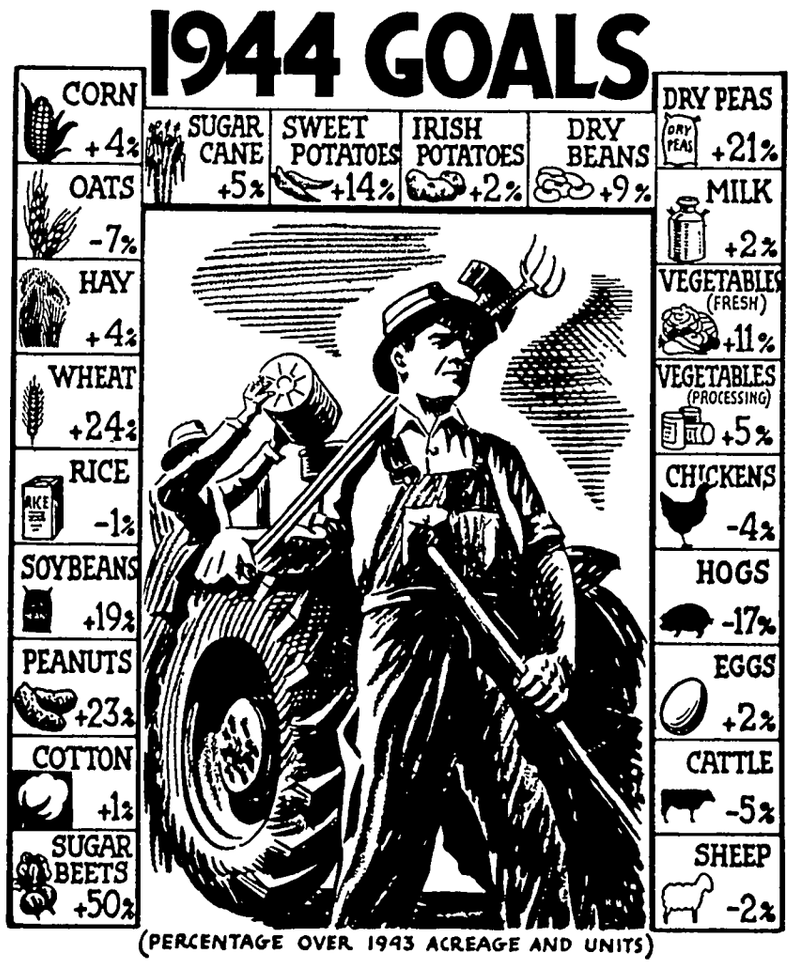
Assistance Available.

Government aids to assist farmers are available for the most part through the County Farmer Committeemen of the Agricultural Adjustment agency and the County War boards. These include help in procuring essential machinery and supplies, labor, information on marketing and transportation, necessary credit, and technical assistance of various kinds. Certain types of loans are expected to be available which will aid food producers.

Overall objective of the 1944 farm program, with its record-breaking goals on acreage and production, is to supply the largest amounts possible for food, feed and fiber for war without destroying future productivity.

Emphasis will be on production of crops with high food value for direct human consumption. War demands call for the right amounts of food, the right kinds of food, and food in the right places at the right time.

That is why producers are planning to grow the things that will stretch the food supply to the utmost.



Amateur farmhands will be available again this year, particularly during the summer vacation period when many city boys and girls are going to help raise food. This Long Island, N. Y., high school girl is learning to milk during a four-week course.

Manganese Found Essential to the Growth of Plants

Recent research work has disclosed that the element manganese is essential to plant growth and in the nutrition of animals, but it must be controlled so that excesses, which are injurious to growth may not develop.

H. J. Snider, assistant chief in soil experiment fields, University of Illinois college of agriculture, points out that as soils become depleted of their natural fertility, manganese becomes available in larger quantities and may, under these conditions, prove injurious to crops. When soils are treated with limestone, the availability of manganese is greatly reduced and there may be no injurious effects on well-limed soils. However, the small amounts that are required must be supplied to prevent improper development.

Plant leaves contain relatively large percentages of manganese while grain and seed contain comparatively minute quantities. It is conceivable that deficiencies might occur in animals and poultry when a strict grain ration is followed too closely. If they are allowed access to leafy plants, possibilities of manganese deficiences are remote.

This extensive research project was made possible by the development of improved chemical methods for the study of manganese, Snider says, and the results have brought out the importance of this heretofore little known trace element.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for January 23

JESUS TEACHES IN PARABLES

LESSON TEXT—Mark 4:1-9, 26-32.
GOLDEN TEXT—If any man hath ears to hear, let him hear.—Mark 4:23.

Parables were often used by our Lord, particularly when He had truth to reveal which was not for unbelieving hearts that had hardened themselves against it (see Matt. 13:10-16).

The method is that of telling an earthly story, true to life (hence, not a fable), which is placed alongside of the spiritual truth it is designed to teach. It thus differs from an allegory, which gives the meaning with the story (see John 15:1-6).

Jesus used parables in our lesson to teach the truth that the good seed of the Word of God will be received in various ways and will bring forth widely differing results. He—the Lord—was the Sower, and the field was the world (Matt. 13:37, 38).

We note first that in that field there were and are—

I. Four Kinds of Soil (Mark 4:1-9).

The reception of the seed is determined by the condition of the soil. The great field was essentially of one kind of soil, but it had become widely different in its ability to take in the seed and bear fruit.

The interpretation of this parable is given by our Lord in the verses immediately following (vv. 3-20). It has striking application to our day.

A road, or beaten pathway, was a common thing in the fields of Palestine. On such hard soil a seed found no place to grow, and the birds carried it away. Such is the condition of a man who permits the heavy and sinful traffic of this world to harden his heart against spiritual truth. If our heart has reached that stage we should ask God to break it up. The birds (always a symbol of evil in the Bible) are Satan and his emissaries. They are always busy about carrying away the Word of God when it is truly preached.

The rocky soil was a thin layer of good soil on a rocky ledge. At first this caused rapid growth, but without deep roots it could not survive the heat of summer. This is the one who enthusiastically responds to the gospel appeal, but being without real conviction and repentance, he has no stability when persecution comes.

The thorny ground—where the growing grain was choked by weeds—typifies the professed believer who lives in worldliness. The friend of the world is God's enemy (James 4:4). Note the things which destroy spiritual life (v. 19), and shun them. In the good ground—open to receive and ready to yield itself for the growth of the seed—there is abundant harvest. Even here there is a difference in the amount of fruit. Why not be a "hundredfold" believer?

Changing the picture a little our Lord now speaks of—

II. Normal Growth and a Good Harvest (4:26-29).

This parable, found only in Mark, has a lesson for the sower. He is not to expect the harvest immediately after the time of sowing. There is a period of patient waiting while God is producing the growth (and only He can do it!)—then the joy of harvest.

There are many lessons to learn here. We who serve the Lord in teaching or preaching the Word are too impatient, too eager to be able to announce results. God is always willing that things should mature naturally and in due season. Let us wait for Him and be at rest in our spirits (v. 27).

Then let us be glad as the seed begins to show signs of maturing, but let us not be slow to gather the harvest when it is ready. Some forget to gather the spiritual fruit of their labors, possibly having long since lost patience and interest.

We should also be encouraged by this parable to continue sowing the seed, knowing that it will find place in the hearts of some and bring forth fruit unto eternal life.

Next we are warned to be on our guard against accepting or approving—

III. Abnormal Growth and an Evil Harvest (4:30-32).

The mustard is an herb, not a tree; hence this parable gave warning that there would be an overgrown religious system calling itself Christian. The birds are (as in the parable of the kinds of soil) evil men, or "isms," or organizations eager to take shelter in a religious system without spiritual power.

The church had such an abnormal growth when Constantine espoused Christianity as a political move, mixed it with paganism, and elevated it to a position of worldly power.

All this was and still is contrary to God's plan for the church. He wanted a spiritual body distinguished by lowliness, meekness and service. These are the things that mark the true Christian spirit. The marks of true Christianity are always those of likeness to Him who said: "I am meek and lowly in heart," who came "not to be ministered unto but to minister."

PATTERNS SEWING CIRCLE

The Right Jumper.

IF YOU'VE been waiting for the right jumper costume for larger women to come along—you need wait no longer. It is here—in this button front style, with the waist defining set-in belt and the classic blouse.

* * *

Pattern No. 8552 is in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 jumper takes 3¼ yards 39-inch material. Long sleeve blouse, 2¼ yards.

Suit Pick-Up.

GIVE a bright new feeling to your suit by adding a splash of color in the shape of a neatly fitted weskit! Complete the rejuvenating treatment with a soft, whopping sized handbag to match

* * *

Barbara Bell Pattern No 1917 is designed for sizes 12, 14, 16, 18, 20, 40 and 42. Corresponding bust measurements 30, 32, 34, 36, 38, 40 and 42. Size 14 (32) weskit requires 1⅜ yards 39-inch material; handbag ¾ yard.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE PATTERN DEPT.
530 South Wells St. Chicago

Enclose 20 cents in coins for each pattern desired.

Pattern No.....Size.....

Household Hints

More juice can be obtained from lemons if they are warmed before squeezing. A good way is to let the fruit stand in warm water for a few minutes.

* * *

Insulating board, cut to proper shape and size, makes a neat and serviceable table pad. For larger tables, it can be made in sections.

* * *

When sewing, a medicine dropper filled with water and run along a seam which is to be pressed, is the simplest method of dampening the material.

* * *

Empty butter cartons are handy for storing cookie dough in the refrigerator. The dough is then easily sliced into uniform pieces for molding.

* * *

A small section of rubber hose slipped over the end of a faucet will help to prevent chipping and breaking of glassware.

* * *

When making a chocolate pie, try using half left-over coffee and half milk and see how much it improves the flavor.

* * *

To keep the clothes prop in place when used on a wire line, place a clothespin on each side of the prop.

BACK IN GRANDMA'S DAY
colds often called for medicated mutton suet as a "home remedy" to comfort muscle aches, coughing. Today, it's for Penetro, modern medication in a base containing mutton suet. Penetro's double action relieves these miseries—(1) vaporizes to soothe stuffy nose (2) acts like warming plaster right where rubbed on. 25c. Double supply, 35c. Get Penetro.

SNAPPY FACTS ABOUT RUBBER

Low costs prevailing, postwar world consumption of natural and synthetic rubber may total 2,000,000 tons a year, is the prediction made recently by John L. Collyer, president of The B. F. Goodrich Co. This would be nearly twice as much as ever consumed in a record year to date.

Some 32 million pounds of rubber will be needed by the Army Signal Corps this year for insulating W-110-B wire used in maintaining direct communications. An additional 4 million pounds will be required for friction and splicing tape. Just two of the many rubber-using items of this Army branch.

MARCH OF TIME: "Youth In Crisis"

This issue has received widespread publicity as it deals with juvenile delinquency.

Mr. and Mrs. Henry Keeper had a belated Christmas dinner Sunday in honor of their son, Sgt. Raymond Keeper, who is home on a furlough. A big goose, with all the trimmings was served. Mr. and Mrs. Paul Grange of Mason City were guests.

Sunday dinner guests at the Wm. Ax home were Mr. and Mrs. Leslie De Merritt and children of Thornton, and Mr. and Mrs. Harold Lassohn and children of Klemme. Afternoon visitors at the Ax home were Mr. and Mrs. Fred Goll and children.

Mrs. Harold Wicks returned home last Wednesday from Oklahoma City for a couple of week's visit with her parents, Mr. and Mrs. E. C. Buntenbach. Lt. Wicks is taking some special flight training for a few weeks that will keep him on the move and at various air fields.

Ira Overholt left this Thursday morning by train from Ames for Los Angeles, California, Where Mrs. Overholt has been visiting at the home of her son-in-law and daughter for several weeks. Mrs. Overholt has not been well and Mr. Overholt made the trip at this time to bring her home.

Mrs. Walter Drake and small daughters, Marlene and Annette of De Ridder, Louisiana, arrived here Thursday for a visit with Klemme relatives. Chief Petty Officer Walter Drake, U. S. Navy, arrived from Seattle, Wash., Saturday morning to be with his family and to visit with relaives. Mr. Drake has been in the Navy for about eight years.

Pvt. and Mrs. Lester Neuberger and daughter Claudia; Mrs. Lewis Neuberger; Wert Loger; Mr. and Mrs. Melvin Neuberger and children; Mr. and Mrs. Clarence Lemke; Mr. and Mrs. Frank Shulz and Robert; all of this community, and Mr. and Mrs. Albert Hippen and family of Woden, all took well filled baskets to the Donald Neuberger home Sunday where a duck dinner was enjoyed. The occasion was in honor of Pvt. Lesetr Neuberger who was home on a furlough from Camden, New Jersey.

MRS. MARTIN BARZ ENTERTAINED AT BRIDGE

Mrs. Martin Barz entertained a group of ladies at two tables of bridge at her home Friday afternoon.

The highest score was made by Mrs. W. Krietlow of Garner, while Mrs. Verle Keraus of Garner had second high, and Mrs. Keith Albertson won third high score.

Mrs. Barz served lunch after the games.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

John Day was at Mason City on business Saturday afternoon.

Ira Overholt was at Mason City on business Monday morning.

Mrs. W. F. Greiman is spending several weeks at the home of her daughter, Mrs. Daisy Lemke.

Seaman Alfred Lau arrived from the West Coast Tuesday for a visit with Garner and Klemme relatives.

Henry Beier of Beltrami, Minn., came last week for a visit with relatives in this community.

Seaman Lloyd Wistey arrived Sunday for a visit with Clear Lake and Klemme relatives.

F. A. Arnold is on the sick list this week and unable to be at the bank.

Mr. and Mrs. Stewart Hevilin took his mother back to Clarinda Tuesday after she had visited here.

Mrs. Gretchen Schlawin was visiting at the Mrs. Naska Bock home Wednesday.

Mr. and Mrs. Mitchell Bock were dinner guests Sunday at the home of Mrs. Naska Bock.

Carl Wille, Fred Bell and G. A. Goll visited with Fred Grieman at a Mason City hospital Saturday.

Mr. and Mrs. Carold Larson were at Omaha, Nebraska on business over the week end.

Mrs. Ed. Buntenbach and Mrs. Keith Albertson were Mason City visitors last Wednesday.

Mrs. Gerald Koerner and Mrs. John Clements were Garner visitors last Friday.

Art Wille and son Allen, of near Garner, were business callers here Saturday night.

M ss Oda Hanson went to Thornton Sunday to spend a few days visiting with her parents.

Miss Darlene Perkins returned home Monday morning from a visit of a week with friends at Des Moines.

Mr. and Mrs. Fred Barz visited at the Ronald Barz home in Garner Tuesday. Ronald is quite ill at this writing.

Mrs. A. N. Ahrenkeil left Sunday for Victorville, California, for a visit with her son, Lt. Taalkeus Ahrenkeil and wife.

Mrs. Wm. Ax returned home last week from Mason City where she spent a few days visiting at the home of her son, Lloyd Ax.

G. B. Kirchner, manager of the Avery Theatre at Garner, was in Klemme on business Thursday afternoon.

Sgt. Raymond Keeper spent last Wednesday and Thursday visiting at the Paul Grange home in Mason City.

Leon Lemke, of Camp McCoy, came last week to spend a furlough here visiting with his mother, Mrs. Daisy Lemke, and other relatives.

Mr. and Mrs. Wm. Bessman of Dows were visiting at the home of Mr. and Mrs Mitchell Bock Friday evening.

Mr. and Mrs. Alfred Josten and Rosemary were dinner guests Sunday at the home of Mrs. Louise Josten.

Mr. and Mrs. Matt Smith and daughter, Ruth, visited at the Harold Smith and W. E. Burke homes at Belmond, Sunday.

Mr. and Mrs. C. J. Wille and Mrs. Gretchen Schlawin visited with Fred Greiman at a Mason City hospital, Thursday.

Mrs. E. J. Arnold and daughter Evelyn, and Mrs. Martha Bredbenner were Mason City visitors Saturday.

C. C. Kilgore, who has been assisting with work in the Farmers Grain Dealers offices at Fort Dodge for the past week, spent the week end in Klemme, and returned to Fort Dodge again Monday.

Mr. and Mrs. Wallace Pavey and daughter, Mrs. John Clements were dinner guests Sunday at the Wayne Pavey home at Webster City.

The Work Circle of the Methodist W. S. C. S. will meet Thursday afternoon at the home of Mrs. Fred Ridder at 2:00 o'clock.

Miss Helen Albers is not teaching this week as her mother, Mrs. George Albers is ill, and she is caring for her.

Miss Harriet Gibbs of Mason City spent the week end here visiting with her parents, Mr. and Mrs. Harry Gibbs and family.

Pvt. and Mrs. Lester Neuberger; Mrs. Lewis Neuberger and Wert Loger were entertained to a 6:30 o'clock dinner at the Clarence Lemke home Saturday evening.

Mrs. C. A. Arnold returned home last Thursday from Watertown, S. Dak., and was accompanied here by her sister, Mrs. Martha Ridder, who will visit here for some time.

Mrs. Wayne Chambers left Sunday night for her home in the state of Washington after spending the past six weeks visiting at the John Chambers home.

Mr. and Mrs. E. J. Schneider attended the joint installation ceremony of the Masonic Lodge and the Eastern Star Chapter at Belmond last Wednesday evening.

Walter Blumer is assisting with work at the Northern Lumber Co. Implement Store during the absence of Manager Ira Overholt, who was called to California by the illness of his wife.

The Fifty-Fifty Class of the Methodist Church enjoyed a party Tuesday night at the C. G. Waterman home. Mesdames John Clements and Lyle Wilcox were hostesses. Lunch was served after a social hour was enjoyed.

Mrs. Daisy Lemke entertained to dinner Sunday, the following: Mrs. W. F. Grieman, Sr.; Henry Grieman and family; Albert Etchen family; Carl Swanson and family; all of the Klemme vicinity, and V. V. McLaughlin and family of Belmond.

Another of the delightful paintings of "Flower Girls" by the well-known artist Henry Clive that you can't afford to miss. See "Hibiscus" with verses by Phyllis McGinley on the front color page of the American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Birthday Party After School Tuesday Evening

La Nell, daughter of Rev. and Mrs. H. E. Harvey, was ten years old Tuesday, January 25th, and in honor of the event her mother invited her little friends to come after school for a party.

Games were played and a nice lunch was enjoyed. La Nell received some nice gifts from her friends.

Klemme Farmer Seriously Injured In Accident Tuesday

LEW GRIFFEN IN HOSPITAL WITH FRACTURED LEG

Lew Griffen, farmer residing west of Klemme, is a patient at the Mercy hospital in Mason City where he was taken Tuesday afternoon in Wellemeyer's ambulance following an accident in which both bones of his right leg were broken above the ankle.

Mr Griffen was helping his son-in-law, John Eenhuis move to the farm vacated by Elmer Beier, and was driving cattle. Mr. Griffen was about to mount his horse when a car drove by and the horse shied to one side as Mr. Griffen was about to mount, and landed behind the saddle when the horse bucked and threw him of onto the hard, frozen road, fracturing his leg.

He was taken to his home and a physician summoned who took him to the hospital.

4-H GIRLS LEADERS MEETING

Help with subject matter for all the girls 4-H Club leaders and assistant leaders will be presented at a meeting on Friday, January 28, in the conference room of the Central States building in Britt.

The second year of home efficiency course is being studied by the girls in the eight organized clubs in the county.

At a recent conference at Iowa State College, Miss Hazel Grimes secured additional material which will be explained to the leaders at the meeting.

LIBERTY 4-H GIRLS MEET

Lois and Lola Gast were hostesses to the Liberty Busy Bees 4-H girls on January 15.

The girls answered roll with "My Favorite Song". A talk on prevention was given by Lola Gast and a parlimentary quiz was conducted by the president, Carmen Goll. Entertainment was planned by Marjorie Greiman and Dorothy Moll, after which lunch was served by the hostesses and their Mother.

"KLEMME KARNIVAL"

The "Klemme Karnival" held in the school gym, sponsored by the Freshman Class was the scene of the fun-fest for the high school students, Thursday evening, January 20.

The students enjoyed having their fortunes told, pitching pennies at the Patch Penny Board, and seeing the famous "Tall Man and Fat Lady". The mnay dunkings taken by Roger Ridder and Charles Christie in the "Africian Dip" was the main attraction of the evening.

A dance was held in the other half of the gym and later refreshments topped off the evening.

IOWA RATIONING CALENDAR

TIRES
Certificates no longer needed for recapping truck tires.
Class A Ration Third Inspection Period through Mar 31 1944

Our Men In The Service

Seamen Lau And Liscomb Honored At Family Dinner Sunday

A dinner was given Sunday at the home of Mrs Henry Lau, honoring her grandson, Seaman Alfred Lau and his friend, Seaman Curtis Liscomb, who are both home on a furlough.

Those present besides the above were Will Lau of Garner; Mr. and Mrs. Albert Koerner; Mrs. Martha Bredbenner and Novella; George, Erwin and Leona Lau.

The table decorations were red, white and blue, carried out with Navy emblems.

Afternoon visitors were Mrs. E. J. Arnold and Wilbur; Lloyd Lau and Cozette; Mrs L. A. Ridder, Maralee and Dennis; Glenn Bridges and family; Mrs. Orville Stokesbary. Janice and Jerome; Mrs. Gerald Koerner and Terry; Chief Petty Officer Walter Drake; Miss Irene Bridges and Marjorie Lau.

Sgt. Asa R. Arnold of Fort Dix New Jersey, and Mrs Arnold, of Ames, arrived Friday morning for a week's visit with Klemme relatives and friends. Sgt. Arnold will return to his army duties Saturday while Mrs. Arnold will return to her teaching position at Ames

Lt. Harold Wicks arrived Saturday night for a brief visit with relatives, until Monday evening when he returned to Oklahoma City, accompanied there by Mrs Wicks.

Pvt. Lester Neuberger returned to Camden, New Jersey, Saturday after spending a furlough here visiting with his family and other relatives for two weeks.

KLEMME SCHOOLS GO OVER TOP ON JEEP DRIVE

The Grade School of the Klemme Schools showed the High School how it should be done when they sold $717.75 worth of War Bonds and Stamps to lead the Jeep contest that ran from the 10th to the 24h of January, inclusive.

A "Jeep" valued at $980 00 was the goal set for the bond drive and when the contest was over $1251.25 had been sold in Bonds and Stamps. The Bonds were figured at cost value rather than maturity value, and of the above amount $675 00 was for bonds or a total of 36 bonds of the $18.75 denomination.

The Primary Room did especially well with a total of $225.00.

Much credit is due to the two Senior girls, Eunice Larsen and Corrine Merkel, who had charge of the contest

HANCOCK COUNTY FARM BUREAU HELD KICK-OFF BANQUET

About 300 attended the Hancock County Farm Bureau membership drive "Kick-off" banquet last Wednesday night held at St Boniface church in Garner Clark Lackore, County Organization Director, presided at the program. Harry Bryson Des Moines, State Organization Director of the Iowa Farm Bureau Federation, gave the principal address to add impetus to the drive. Donald B Groves, Webster City, District Farm Bureau Field man, also spoke

Remarks were made by Virgil Cook, County Farm Bureau President; Paul Henderson, County Extension Director; Miss Hazel Grimes, County Home Economist; and Alfred Josten, County AAA Chairman.

During the dinner Eloise Etchen and brother Merle, Goodell, played several musical selections. Community singing was led by County Auditor Fred C Missal Supplies for the membership drive were distributed

At least 80 per cent of the egg cases next year likely will be made of fiber instead of wood.

Will Mr. Ground Hog See His Shadow Next Wednesday?

Long before the first Department of Agriculture meteorologist took off his derby, adjusted his specs, and with a quick glance at the barometer announced "Fair and warmer," the ground hog was credited with being the number one long-range weather forecaster.

According to popular superstition, the ground hog wakes from his long winter sleep on February 2. He yawns a time or two, stretches, then crawls from his snug underground burrow for a "look-see." If the sun is shining and Mr. Ground Hog sees his shadow on the snow (if there is any), he retires posthaste to his bed for six more weeks of uninterrupted snooze, while the blizzards howl outside.

If, on the other hand, no shadow puts in his appearance, the old boy hastily combs his chin whiskers and leaves his winter home for a six-week series of visits (object: matrimony) in the lovely pre-spring weather.

This picturesque notion, like so much of our American folk-lore of "the little people," originated among the Negro slaves of Colonial days and, like Uncle Remus stories and many others, has added a richness to our lives and literature. Many of our animal traditions have been disproved by scientists, as has this fable, but let no one forget that February 2 is, and always will be, Ground Hog Day.

If you were to say the first bugle call of the day in the Army is "Reveille"—you'd be wrong. It's "First Call." But you probably know what cigarette gets first call with Army men—it's Camel. And Camel is the favorite with men in all branches of the service—Navy, Marines, Coast Guard, too. (Based on actual sales records from service men's stores.) And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard **wherever** they are. —Adv.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for January 30

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS USES HIS POWER TO HELP

LESSON TEXT—Mark 4:35-41; 5:35-43.
GOLDEN TEXT—Why are ye so fearful? How is it that ye have no faith?—Mark 4:40.

Help—that is what man needs, and nothing but the power of Christ will suffice to meet his fears and sorrows. Christ appears in Mark as not only the matchless Teacher of the parables we have just studied, but the mighty Worker.

This is the Gospel in which Christ is presented as the Servant of Jehovan, who came to use His infinite grace and power for our deliverance.

Two great fears gnaw at the vitals of man's existence. Life is full of awful dangers, and death is so dreadfully final and sorrowful. He is afraid to live, and afraid to die—apart from his faith in Jesus Christ. We find the answer to both these fears as we here see—

Jesus' Power Overcomes

I. Fear of Life's Dangers (Mark 4:35-41).

The long day of teaching had ended (v. 35), and the disciples carried out His request that they go to the other side of the lake to rest. Just "as he was" they departed, and before long the tired Jesus was asleep. We know how He felt, and what is even more blessed, He knows how we feel when we are tired.

As He slept, a sudden storm (common on the Lake of Galilee) brought deathly fear to the hearts of His disciples. For the moment they saw only the angry waves, the smallness of their boat, and the hopelessness of their situation.

Had they forgotten Jesus? With Him in the boat, they had no reason to fear. They called on Him, and in His majestic and authoritative "Peace be still" the wind and waves recognized their Master's voice.

Should we not learn that in this day of fears and alarms, we may (if we are Christians) count on His presence and His power. If we look at the overwhelming waves of circumstances and think how frail we are, surely our hearts shall fail us for fear. But if Christ is with us, we are in no danger.

Now they were struck with awe at His power. "Sometimes the deliverances wrought by our Lord so reveal His presence and power that His followers are more deeply moved than they were by the perils which threatened. Whether mastering the storm, or standing unseen in our midst today, He appears to the eye of faith, clothed in divine energy and power" (Erdman).

II. Fear of Death's Deep Sorrow (5:35-43).

Trouble is a visitor in every home, it does not matter how securely that home may be founded upon wealth or social position. Frequently, death chooses a shining mark in taking a dearly beloved child. Children strike their roots deep into our hearts and when they are torn from us our whole beings are rent and convulsed. Such was the great storm of sorrow which had come upon the home of Jairus, leading him to make the brave step of faith and hope which brought him to Jesus.

Then as Jesus turned to go with Jairus a woman touched Him. He stopped to seek her out and commend her for her faith. The seeming delay must have greatly troubled Jairus, particularly when the servants came and informed him that he need no longer trouble the Master since his daughter was dead. Not infrequently we have similar experiences, where it seems that while God has promised to help us, He has been turned aside and has forgotten us. The psalmist in Psalm 42:3 cries out, "My tears have been my meat day and night, while they continually say unto me, Where is thy God?"

Our Lord was not troubled at all by the message of the servants of Jairus, but He showed His thoughtful consideration of the father by reassuring him with the words, "Fear not, only believe."

Everywhere fear blocks the way of human peace and progress. Divine wisdom offers a remedy for it all—only believe. We excuse our lack of faith by the conditions which confront us, but none of us face conditions worse than those which confronted Jairus. His daughter was dead and he was told to believe! He obeyed and his faith was rewarded.

When He said, "The child is not dead, but sleepeth," our Lord did not mean that actual death had not taken place, but He meant that in the sight of God death is like a sleep. In the eyes of Christ spiritual death was undoubtedly far more terrible than physical death. A man may be physically alive and yet being spiritually dead be worse off than a man who, though physically dead, is spiritually alive.

After putting forth the mourning scorners, the Lord performed a miracle by simply speaking to the child and saying, "Little girl, arise."

Here then is the Lord who can overcome every fear, in both life and death. Is He not the one we need as our Saviour?

For you to make

ASK ME ANOTHER?

A General Quiz

The Questions

1. The old-fashioned daguerreotype picture was made on a thin sheet of what?
2. How old is the Statue of Liberty?
3. Who was Toussaint L'Ouverture?
4. Was Pocahontas an Indian princess?
5. Which is the longest verse in the Bible? The shortest?

The Answers

1. Copper.
2. The Statue of Liberty is 58 years old.
3. The Liberator of Haiti.
4. No. There are no royal families among the Indians—no kings, queens, princes or princesses.
5. Esther 8:9 is said to be the longest verse in the Bible, and the Gospel of St. John 11:35 the shortest.

Shark's Small Teeth

Teeth of the whale shark, largest living fish, are only one-eighth of an inch long. The whale reaches a length of 60 feet and weighs 25,000 pounds.

GRANDMA'S IDEA FOR COLDS' ACHES: She often used medicated mutton suet—now many mothers use Penetro, modern medication in a base containing mutton suet. Rub on—double-action relieves colds' muscular aches, coughing. (1) vaporizes to comfort stuffy nose (2) outside, stimulates at spot where applied. Get Penetro.

Naturally a man looks old beyond his years when he's sore from lumbago or other muscle pains. The famous McKesson Laboratories developed Soretone Liniment for those cruel pains—due to exposure, strain, fatigue or over-exercise. Get the blessed relief of Soretone's *cold heat* action;—

1. *Quickly Soretone acts to enhance local circulation.*
2. *Check muscular cramps.*
3. *Help reduce local swelling.*
4. *Dilate surface capillary blood vessels.*

Soretone contains methyl salicylate, a most effective pain-relieving agent. There's only one Soretone—insist on it for Soretone results. 50¢. A big bottle, only $1.

SORETONE
soothes fast with
COLD HEAT* ACTION
in cases of
MUSCULAR LUMBAGO OR BACKACHE
due to fatigue or exposure
MUSCULAR PAINS
due to colds
SORE MUSCLES

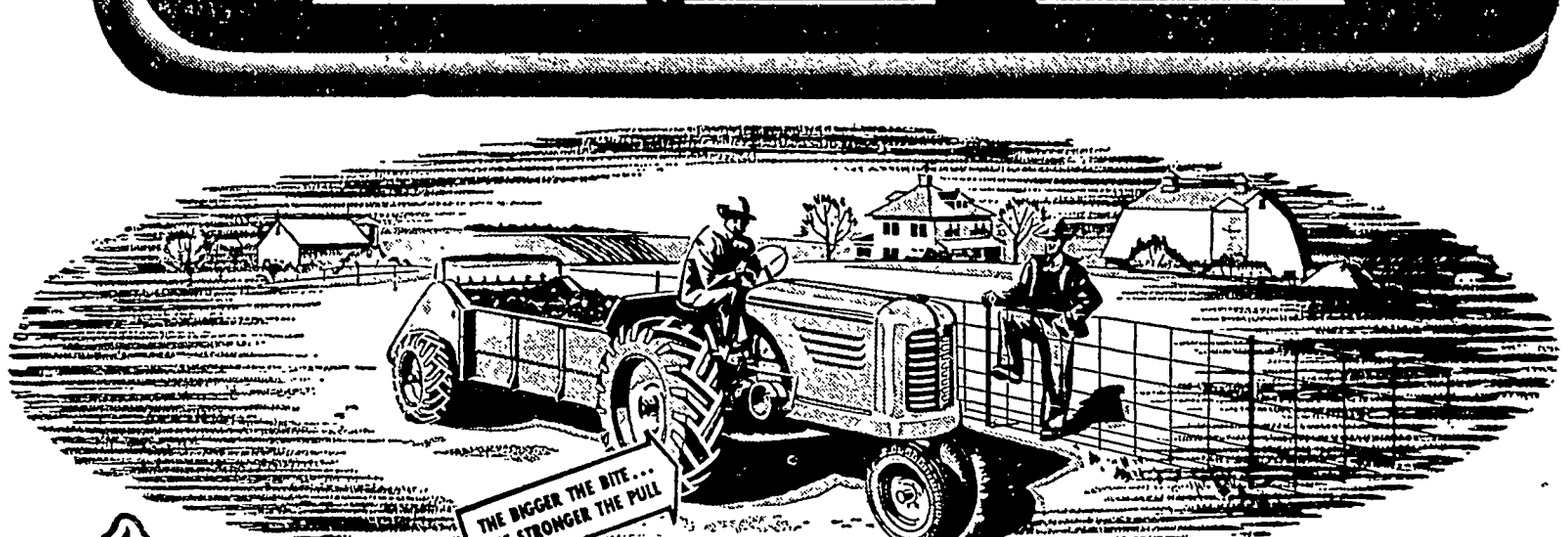
MINOR SPRAINS

MONEY BACK — IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

Get EXTRA TRACTION AT No Extra Cost
and BETTER CLEANING, LONGER LIFE and EXTRA QUALITY TOO!



WITH food production one of our most important war production programs, you need the tractor tire which gives—*Extra Pulling Power In All Soil Conditions.*

That tire is the Firestone Ground Grip. Here's why:

The Firestone Ground Grip is the *only tractor tire* that has a patented tread design which provides up to 215 extra inches of traction bar length per tractor, providing a full traction bite, greater drawbar pull—and less fuel is used.

The Firestone Ground Grip is the *only tractor tire* that has the triple-braced tread design. There are no broken bars in the tread to cause traction leaks which make the tire slip and spin.

The Firestone Ground Grip is the *only tractor tire* that has a scientifically designed tread with tapered bars at just the right angle for the tread to clean automatically as it pulls. And Vitamic Rubber provides longer life by resisting the action of the sun and the weather.

No wonder Firestone Ground Grip tires are first choice of farmers everywhere! No other tire has these *exclusive extra values*—and they cost no more than ordinary tires. See your nearby Firestone Dealer or Firestone Store today and get the tires that give you most for your money.

Listen to the Voice of Firestone with Richard Crooks and the Firestone Symphony Orchestra, under the direction of Howard Barlow, Monday evenings, over N. B. C.

1ST ADJOURNED JANUARY MEETING

Garner, Iowa, January 10, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J Schoun, Penn Eckels and John A Chambers present

The minutes of the last meeting were read and approved as read

WHEREAS, the Hancock County, Iowa Farm Bureau has requested the Board of Supervisors of Hancock County, Iowa, to appropriate the sum of $3000 00 to the Hancock County Farm Bureau for the year 1944, and

WHEREAS, the certificate of membership of the Hancock County Farm Bureau and Financial report have been filed as by law directed and they have qualified for said appropriation under section 2930, Code of Iowa, 1939, and amendments thereto.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa, that there be and is hereby appropriated the sum of $3000.00 from the General Fund of Hancock County, Iowa to the Hancock County Farm Bureau for the year 1944 to be paid in four equal installments: February 1, April 1, July 1, and October 1 1944.

The County Auditor be and he is hereby directed to draw warrants on the General County Fund in payment of said appropriation to the Hancock County Farm Bureau all in accordance with and as directed by Chapter 138, Code of Iowa, 1939 and amendments thereto.

On motion and second the bond of Wm Henschen County Engineer is approved

On motion and second the quarterly reports of H D Schroeder and John D Welsh, Justices of the Peace are approved

In the matter of the claim filed by the Hancock County Auditor in the C N Anderson, Estate, No. 2193, for hospitalization of Leo Bailey at the State Hospital at Cherokee said claim being in the sum of $87.38 and was filed in the office of the Clerk of the District Court on December 27, 1941.

BE AND IT IS HEREBY RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the claim referred to in the preamble hereof filed by the Hancock County Auditor in the C. N Anderson, Estate No. 2493 against Leo Bailey in the sum of $87 38 is hereby released and waived.

On motion and second the Board adjourned to January 17, at 9 o'clock A M

F J Schoun, Chairman

Attest: Fred C. Missal, County Auditor

2ND ADJOURNED JANUARY MEETING

Garner, Iowa, January 17, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J Schoun, Penn Eckels and John Chambers, present.

The minutes of the last meeting were read and approved as read.

WHEREAS, cost of insane patients will henceforth be paid from the State Institution Account and there is a balance of $8,584 78 in the State Insane Fund in the hands of the County Treasurer

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the sum of $8 584 78 in the State Insane Fund be and the same is hereby ordered transferred to the State Institution Fund Account and the County Treasurer is hereby ordered to make said transfer as by law directed

Supervisor F. J. Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 7.

On motion and second the bonds of Myrtle White, Deputy County Auditor, and Marian Weiland, Second Deputy County Auditor, are approved.

WHEREAS, Wm. Henschen was appointed Engineer to classify additional lands draining into Drainage District No. 14, Hancock County, Iowa, on November 9, 1943, in accordance with section 7549, Code of Iowa, 1939, and amendments thereto and whereas said Wm. Henschen did file his report on December 20 1943, which report was approved by the Hancock County Board of Supervisors acting for and in behalf of D D No. 14, on January 17, 1944.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of D. D. No. 14, that a hearing on the inclusion of added lands as defined in section 7549 be and the same is hereby ordered held at the Courthouse in Garner, Iowa, on the 7th day of March, 1944, at 1:30 o'clock P M. and the County Auditor be and he is hereby directed to cause notice of hearing to be published in the Klemme Times, a newspaper published at Klemme, Iowa, setting forth the time and place of hearing on the report, original map, plats and profile of the lands to be included, the favorable report of the Engineer thereon and that said report has been tentatively approved. All as provided for in Chapter 353, Code of Iowa, and amendments thereto. The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption, seconded by Supervisor Penn Eckels, whereupon the Chairman F J Schoun, placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, Penn Eckels and John Chambers aye Nays, none

WHEREAS, Wm Henschen, Charles A Frisbie and H. C Armstrong were appointed a commission to examine claims for damage occasioned by the cleanout of open ditches of the main and lateral No. 1 of D. D. No. 14, and the inclusion of additional lands as defined in section No. 7549, Code of Iowa, 1939, and amendments thereto on Dec 7, 1943, and

WHEREAS, said commission did qualify and act in accordance with instructions and did examine claims for damages and did file their report on January 17, 1944.

BE IT THEREFORE RESOLVED that the final hearing on the report of the commissioners will be held at the Courthouse in Garner, Iowa, at 1 30 P M on the 7th day of March, 1944 all as provided for in Chapter 353, Code of Iowa, 1939, and amendments thereto.

The County Auditor is hereby directed to cause notice of such hearing to be published in the Klemme Times, a newspaper published at Klemme, Iowa, setting forth the time and place of hearing thereon

The foregoing resolution was offered and read by Supervisor Chambers who moved its adoption, was seconded by Supervisor Eckels, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, aye, Nays, none

WHEREAS, Wm. Henschen, Charles A Frisbie and H. C Armstrong, were appointed a committee to classify lands in the watershed of D D No. 14, Hancock County, Iowa in accordance with section 7562, Code of Iowa, 1939, and amendments thereto, on November 8 1943, and whereas said commission did classify the lands in said district as commanded and did file their report on January 17, 1944, designating the "Tax Per Cent" each tract and parcel of land highway and railroads should pay toward the repair of the main ditch and laterals separately under the provision of section 562, Chapter 353, Code of Iowa, 1939, and amendments thereto.

BE IT THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of D. D. No. 14, Hancock County, Iowa that the report of the Commissioners appointed to reclassify the lands in D. D. No. 4 is tentatively approved and a notice of hearing thereon will be had at the Courthouse in Garner, Iowa, on March 7, 1944 at the hour of 1:30 P M at which time Taxpayers in said district will appear and show cause why the "Tax Per Cent" designated shall not be fixed for all future assessments in said district

The County Auditor be and he is hereby directed to cause notice of such hearing to be published in the Klemme Times, a newspaper published at Klemme, Iowa, setting forth the time and place of hearing thereon

The foregoing resolution was offered and read by Supervisor Penn Eckels seconded by John A. Chambers whereupon the chairman placed the motion of its adoption upon roll call, the vote thereon is F. J. Schoun, Penn Eckels and John A Chambers Aye. Nays—None.

On motion and second the County Auditor for aid to the blind for the year 1944 hereby approved at $535 45 all in accordance with section 3684.20, Chapter 249 Code of Iowa.

On motion and second the Board adjourned to February 3, 1944, at 9 o'clock

F. J. Schoun, Chairman

Attest: Fred C. Missal,
County Auditor.

Wm. Henschen is hereby appointed Engineer to supervise the construction and his bond as such Engineer is fixed at $500.00.

The County Auditor is hereby directed to cause notice of said letting to be published in the Britt News Tribune, a newspaper published at Britt, Iowa, which notice shall be for bids on both labor and material for construction individually and combined, time for commencement and completion, approximate amount of work to be done all in accordance with Iowa Laws governing such action.

The Board reserves the right to reject any or all bids on technicalities

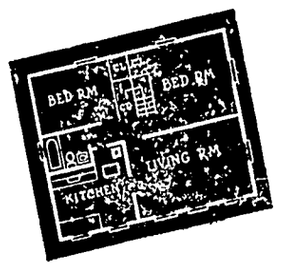
The foregoing resolution was offered and read by Supervisor Penn Eckels seconded by John A. Chambers whereupon the chairman placed the motion of its adoption upon roll call, the vote thereon is F. J. Schoun, Penn Eckels and John A Chambers Aye, Nays—None.

On motion and second the County Auditor for aid to the blind for the year 1944 hereby approved at $535 45 all in accordance with section 3684.20, Chapter 249 Code of Iowa.

On motion and second the Board adjourned to February 3, 1944, at 9 o'clock

F. J. Schoun, Chairman

Attest: Fred C. Missal,
County Auditor.



Sure, you're going to build a new home just as soon as the war is over! What do you mean, you can't afford it? You are buying it right now and don't know it, absolutely. How about those Victory Bonds you are salting away every pay day? Every one is a payment on a new home and when the time comes you'll have enough put away to plunk down an initial payment that will make paying the balance a cinch. Start planning now; we'll help you, if we may.

Northern Lumber Co.

Keith Albertson, Manager — Klemme, Iowa

THIS is what we've been working for all along. This is the year to hit and *hurt* the enemy. This is the time when everything you do counts double. If we all get together and do *all* we can, we'll be over this hurdle and well on our way to complete and crushing victory.

No question about the men in uniform—they'll go "all out." But can we count on *you* to back them *all the way?* Your quota is where you work—you've got to buy your War Bonds and then buy more, until every last loose cent you have is *fighting*. Tough? Of course, it's tough—unless it *is* a sacrifice you're simply not doing your share!

Make the sacrifice now—buy *more* than the extra $100 Bond your country counts on you for—winning the war is worth *any* sacrifice you make. Besides, you aren't *giving*, you're *lending to America!* You'll get back every dollar you invest in War Bonds, with interest.

An extra $100 War Bond now is the minimum for everybody—can't we count on *you* for *more?*

WE BOUGHT EXTRA WAR BONDS 4TH WAR LOAN

This sticker in your window means you have bought 4th War Loan securities.

Let's All BACK THE ATTACK!

DRAINAGE NOTICE

HEARING ON RE-CLASSIFICATION OF LANDS IN D D NO 14, HANCOCK COUNTY, IOWA -

To All Owners of Real Estate in Drainage District No. 14, Hancock County Iowa as Named Herein, and to all Persons in Actual Occupancy of any lands described Herein

Public notice is hereby given that the Commissioners heretofore appointed to re-classify the lands in Drainage District No 14 Hancock County, Iowa, as a basis for future assessments, did, on the 17th day of January 1944, file their report in the office of the County Auditor as follows

To The Board Of Supervisors, Hancock County, Iowa.

Gentlemen

In the Matter of Drainage District No 14 Hancock County, Iowa

We, your commissioners, Wm. Henschen, Chas. A Frisbee, and H. C. Armstrong appointed for the purpose of re-classifying the lands in the said Drainage District

Under Sec 7562—Chapter 353 of the Drainage Laws of the State of Iowa, we have re-classified all the lands included in the said Drainage District No. 14 as well as other lands benefited by the construction of the improvement and have apportioned and designated separately the "Tax Per Cent" each tract of land and highway should pay for repair on the Main Ditch and the "Tax Per Cent" each tract of land and highway should pay for repair of the Laterals, and set out the Main Ditch and the Laterals consecutively and report as follows.

Dated at Garner, Iowa this 10th day of January 1944.

WM. HENSCHEN Engineer.
H C ARMSTRONG, Commissioner
CHARLES A. FRISBEE, Commissioner

MRS. ART KUDJE HOSTESS AT BRIDGE PARTY

Mrs. Art Kudje entertained a group of ladies at her home last Wednesday afternoon at 3 tables of bridge.

Mrs. Leo Esbeck won the highest score, with Mrs. Fred J. Arnold second high.

Lunch was served by the hostess.

Wedding Stationery printed and engraved at The Times Office.

LOT OF SCRAP

The Jolly Jackson 4-H club in Bremer county collected over 1,600 pounds of scrap paper and tin in five hours recently. The junk was sold and the proceeds went into the club treasury.

If equipment can be obtained for electric fencing it will be an important aid to food production, say agricultural engineers at Iowa State College.

WEEKLY NEWS ANALYSIS

Red Army Forges Deeper Into Poland As Southwest Drive Perils Nazi Troops; Allied Bombers Plaster Western Europe; Strikes Show Marked Increase in 1943

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union

"War Is Hell"—Nowhere better is this expression indicated than in this Italian town of Castel Di Sangro, lying in rubble.

SOUTHWEST PACIFIC:
Jungle Fighting

Like the story of every other island in the South Pacific, U. S. troops have had to fight for every inch of ground on tropical New Guinea, where landings have placed doughboys in possession of the air strip on Cape Gloucester and a beachhead at Arawe.

With the enemy dug well in the jungle, U. S. dive bombers and artillery helped clear the way for the infantry as it edged forward through the dense brush about Cape Gloucester. In similar terrain at Arawe, the enemy also fell back grudgingly.

While doughboys clawed forward in New Britain, other elements of the U. S. Sixth army beat southeastward along the New Guinea coastline toward a juncture with Australian troops driving northward. In this sector, the Allies aimed for the big Jap shipping base of Madang, supply point for their coastal positions.

Ace Lost

Only hours after a dispatch from Guadalcanal had announced that pudgy, 30-year-old Maj. Gregory ("Pappy") Boyington had shot down his 26th Jap to enter the selective list of U. S. air aces, his mother received word in Okanogan, Wash., that he was missing.

With a mother's faith she said: "I am confident he is all right and he will show up somehow, somewhere."

Called "Pappy" because of his comparatively older age among the younger marine fliers, Boyington was a picturesque daredevil. Once, "Pappy" purposely led a squadron over a Jap airdrome, circling the field slowly and daring the enemy to come up and fight. When they did, "Pappy" nailed three.

STRIKES:
Increase in '43

Almost 14 million working days were lost through strikes in 1943 compared with 4 million in 1942, records of the bureau of labor statistics indicated.

Approximately 3,337,091 workers were involved in the estimated 3,737 walkouts, which topped the 1942 total of 839,961 men idle because of 2,968 strikes.

Last year's strikes doubled the 1927-'41 average of 1,945, but it was pointed out that the depression prevailed during that period, and because of scarce employment walkouts were less frequent.

EUROPE:
Plaster Defenses

Flying over an 800-mile front, Allied bombers rapped hard at German defenses and industries in western Europe preparatory to the heralded invasion.

But in Italy, bad weather restricted Allied progress over the mountainous terrain, and equally bitter resistance in the future loomed with the discovery that the Germans were constructing another "Siegfried line" of concrete and steel several miles in depth, and just to the north of their present positions.

Continuing the softening up process of western Europe, swarms of U. S. and British bombers and fighters lashed at German factories, the important naval base of Kiel, air fields strung over northern, and the channel coast, along which the Nazis reportedly have erected rocket guns.

AGRICULTURE:
Hogs Pour In

Shipment of 476,500 hogs within a 3-day span recently in comparison with 278,400 for the same period a year ago, reflected crowded conditions in 12 leading middlewestern markets, with only choice 200 to 300 pound pigs attracting $13.75 per hundredweight.

Many hogs were left unsold as daily trading closed, and fearful that animals might contract pneumonia with snow and colder weather, some packers urged farmers to curtail shipments, while embargoes were imposed at other centers.

Tight labor conditions restricted packers' capacities, and in Chicago, at least 200 soldiers from the labor pool of a nearby camp were sent into the packing houses to help out.

RUSSIA:
Tangle in Poland

Russian armies forged deeper into pre-war Poland in flaming action on the eastern front, overrunning territory the Reds claimed as their own, but the Polish government-in-exile insisted must remain part of the country.

As the Russ surged forward into pre-war Poland, Gen. Nicholas Vatutin threw out a spearhead to the southwest, aiming toward the entrapment of 500,000 Nazis from the rear in the big Dnieper river bend.

The Reds entered pre-war Poland at a time of heightening tension over their claims that the White Russian and Ukrainian provinces of the old state were racially related to Russia. Reportedly headed for Washington, D. C., to seek U. S. support for the Polish government in exile's case for retention of the territory was Premier Stanislaw Mikolajzyk.

WAR PROFITS:
Want Strict Control

Recommendations to change the present government procedure of recapturing excessive profits on war material by rewriting old contracts, were bitterly opposed by Senators Walsh (Mass.), LaFollette (Wis.), Lucas (Ill.) and Connally (Texas).

Two recommendations particularly opposed would exempt from pres-

Senators LaFollette and Walsh

ent repricing all contracts for standard commercial articles, and products not actually a part of goods delivered.

In the first case, the senators said, one company with orders for a standard commercial article did six times the business of the 1935-'39 period, yet would be exempt from repricing.

In the second case, the senators said, one machine tool company whose product, of course, does not actually appear in finished war goods, did six times its normal business, yet would not be forced to reprice its contracts.

HIGHLIGHTS . . . *in the week's news*

RIVER: Vagaries of the White river in Indiana have shifted the boundary line between Decatur and Perry townships in Marion county. Two schools operated by the Decatur township authorities will have to be closed because of lack of funds. Property of the power company is no longer within the township's tax limits to provide revenue, it was pointed out.

FARM HANDS: Several organizations in New York state, working in collaboration, filled 210,000 farm jobs last year. Only 3 per cent of the workers were normally farm hands.

TYPHUS: Eleven "public" delousing stations have been set up in Naples, Italy, by Allied military health officers to combat typhus, which is spreading in the city.

PROHIBITION:
Before Congress

Prohibitionists lined up in support of Rep. Joseph R. Bryson's bill forbidding sale or manufacture of all beverages containing more than ½ of 1 per cent of alcohol for the duration as a congressional committee prepared for hearings on the measure.

As prohibitionists organized support, Rep. Emmanuel Celler said it was rumored that they had raised $10,000,000 for lobbying in Washington.

Meanwhile, it was reported that the Anti-Saloon league would remain on the sidelines during consideration of the bill, devoting its efforts to persuading President Roosevelt to declare prohibition as a war measure under his present vast powers.

COLLEGE FOOTBALL:
No Deaths

For the second time in the 12 years he has compiled statistics on college football deaths, Dr. Floyd R. Eastwood of Purdue U. announced no fatalities due to football in 1943.

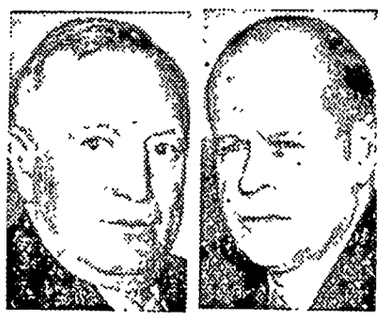
Possibly because of a lack of sufficient amounts and quality of equipment, nine deaths were recorded in high school football, Dr. Eastwood said.

Fatalities in the sport have gradually decreased since he started his survey in 1931, when 31 deaths were announced, Dr. Eastwood said. Since most deaths have been due to head injuries, he suggested that grid leaders look into possible use of new crash helmets designed for military use during the present war.

'44 CONVENTIONS:
Chicago Bids

With 10,000 visitors expected at both the Democratic and Republican national conventions this year, Big Business in Chicago bid to have the conclaves held there, with New York also reportedly interested.

In Chicago alone, representatives of hotels, restaurants, realty and financial concerns, banks and utili-



Chairmen Spangler and Walker

ties agreed to raise $75,000 to help defray hall expenses, etc., for either party, or $150,000 for both, if they met in the Windy City.

As the national committees under Frank Walker of the Democrats and Harrison Spangler of the Republicans studied convention sites, the Office of Defense Transportation declared Chicago was the city least likely to upset train schedules, since regular line sleeping cars with 11,368 beds terminate there, compared to 7,129 in New York.

CANADIAN WHEAT:
To Increase Imports

With approximately 350,000,000 bushels of U. S. wheat expected to be fed to livestock during the current feeding season, an additional 100,000,000 to 150,000,000 bushels will be brought in from Canada, according to government sources.

Because U. S. railroad cars will be sent into the interior of Canada this winter, from 25,000,000 to 50,000,000 more bushels of wheat will be imported than otherwise possible, due to the freezing of the Great Lakes.

Although the heavy dairy and poultry producing areas of the Northeast have bettered their feed situation, feed grains are needed in the drouthy south central regions, and protein meals are scarce in the southwest range districts. The total supply of feed concentrates was estimated at 169,000,000 tons.

SOLDIERS' VOTE:
Urge Uniformity

While congress wrangled over whether the federal government or the individual states should control soldier voting in 1944, the war and navy departments recommended that applications for absentee ballots be distributed by the services and local officials accept such applications any time before election.

Other recommendations made by the army and navy were that voting material be designed for air carriage, and that a serviceman's vote be acknowledged by an officer no lower in rank than sergeant.

Ballots must be distributed to the servicemen by mail, the departments said, and although it is the army and navy policy to assist soldiers and sailors in voting, "nothing must interfere with the . . . primary obligation to wage a victorious war."

RAIL TRAFFIC

The nation's railroads broke all transportation records last year, both for passengers and freight. Volume of freight hauled was 14 per cent above 1942, the previous high, and passenger traffic shot up 58 per cent over the preceding year.

Average load of freight per train was 1,116 tons, another record. Per car load was 41 tons. Average volume of passengers per car was greater than ever before. An increase of about 20 per cent in gross revenue is expected.

Washington, D. C.

WASHINGTON AND WAR'S END

Washington officials who watch the trend of the war admit now privately that "things will happen very fast" in the next few months. If pressed, they even make flat predictions that Germany will fold before summer.

Publicly, they stick to the line that it will be a long war. This is the only sound position to take, as an official line, since no war can be successfully waged if the people spend their time peeping around the corner for the approach of peace.

But the facts allow a hopeful expectation. Unquestionably the invasion of Europe will be a winter invasion. For many reasons, spring will be too late. February is the likeliest month. The exact time will be no secret to the Nazis, because we will be pounding the French coast well in advance.

The offensive will be a tremendous operation, combining a cross-channel invasion with heavy drives from Russia and Italy, plus all-out air attacks everywhere. (The Balkan invasion urged by Churchill is doubtful.)

Some experts go as far as to name the length of time—in days—which this big operation will require, before the end. One highly placed official says it will take three months and twenty days. Thus, if the invasion starts by mid-February, this would mean the end by early June.

But military experts won't say such things out loud, because they fear the U. S. public will overlook the fact that the days between February and June will be the bloodiest days in the history of all the world's wars.

ARMY POSTAL SERVICE

On a recent visit to the front lines, Lieut. Gen. Mark Clark found a soldier busy scribbling a V-mail letter on his mess-kit. The soldier looked as though he had lost his last friend, so General Clark asked him what was wrong.

"Oh, I'm getting a little weary of this life, sir," replied the soldier.

"What's your trouble?" asked General Clark.

"Why, I haven't received a letter in five days, General," replied the soldier. "What does the post office department think we are over here—a bunch of archeologists?"

"Personally, I think five days is pretty good service from the United States to the front lines, son," replied Clark. "But I'll talk to the postal service officials and see if you can't get your love letters quicker. I see your point, soldier."

* * *

VETERANS EXPAND

The Ramspeck committee investigating civil service has spent most of its time trimming the numbers of government workers. But it has now stumbled into a situation requiring a complete change of policy.

The Veterans administration, instead of submitting to a reduction of personnel, is asking for more—thousands more. Men are being discharged from military service so fast that the task of Veterans administration is going up like a skyrocket. Now employing 45,000 workers all over the country, V. A. will soon have to double its staff.

* * *

BACK TO PEACETIME INDUSTRY

Donald Nelson is engaged in a behind-the-scenes race with Elder Statesman Bernie Baruch to work out plans for the reconversion of American industry and see who can get it done first. This was behind the war production board meeting last week when Nelson called in his top aides and outlined a big post-war program of civilian production.

Nelson wants plans for the change-over of industry to begin at once. This does not mean the actual reconversion of factories, since a lot of them may be busy on war orders for some time. But it does mean full speed ahead on **plans for reconversion.**

This may provide one clue on how soon the administration expects the war to be over in Europe.

However, insiders who know something about personal rivalries of Washington, see in it also the desire of Donald Neson to grab the ball away from Baruch and "Assistant President" Jimmie Byrnes. These two long have wanted to get Nelson out, and at one time FDR actually signed a letter appointing Baruch chairman of a special committee to take over all war production.

Note: Before Nelson got busy on reconversion, Baruch had been asked by the White House to study plans for converting industry back to a peace basis.

CAPITAL CHAFF

¶ The war department is keeping a watchful eye on the labor policies of hard-working Lieut. Gen. Robert C. Richardson, commanding officer in Hawaii. He is suspected of playing in too close with the big sugar barons.

¶ The Russians plan to relieve Leningrad without firing a shot—chiefly by a drive through Latvia and Lithuania to the Baltic sea. This would cut off the Germans around Leningrad unless they could execute a Dunkirk.

THE FUEHRER AND AMERICAN MOVIES

Adolf Hitler, it develops, is a rabid movie fan and especially likes to get American films for some strange reason, and have them run off for him at Berchtesgaden. When the Drottningholm, prisoner ship, was returning from Scotland, the Nazis confiscated a batch of them for the Fuehrer. They included Disney's "Bambi," Betty Grable in "Coney Island" and the films "Crash Dive" and "Cairo."

—*—

He had better be careful how far he goes. If he goes in for our double-features he will get that breakdown, after all.

—*—

Of course it is just possible that Hitler doesn't really like American films. He may merely take them to Berchtesgaden so he can spend an evening booing.

—*—

Still, Adolf is the type who would be a movie fanatic. He likes darkness, bad air, blatant credit lines, Donald Duck, Popeye, the Dracula sort of thing and a chance to argue with ushers.

—*—

Scene in the Chancellery.

Adolf (to Goering)—Well, did we seize any American films this week?

Goering—Fuehrer, our forces to the north won another tremendous victory. They seized "I Dood It," "Lassie Comes Home" and "The Gang's All Here." On the west, we took "Buffalo Bill," "Looney Teons" and "Wintertime."

Adolf (shuddering—Ach, give 'em back that last one! It gives me the creeps. Any word from Rommel?

Goering—He almost got "Always a Bridesmaid" and "For Whom the Bell Tolls" but had to retreat at the last moment.

Adolf—How is Kesselring doing?

Goering—I have a wire from him that he has brought up reserves and is within ten miles of a new Carmen Miranda vehicle.

Adolf—Anything new on the Russian front?

Goering—The situation there is pretty clouded.

Adolf—I remember when everything on that front was in technicolor.

* * *

Goering—There are reports that in the Minsk sector we are threatening "Mission to Moscow" and "North Star."

Adolf (fiercely)—They don't even exist any more. The Warner Brothers have been exterminated, not to rise again for a thousand years.

Goering—Here's a message from our U-boats.

Adolf—Yes, yes, what is it?

Goering—They have torpedoed "Yankee Doodle," "Victory Through Air Power" and "Salute to the Marines."

* * *

The radio program of the year is the one just put on the air by Variety, the show-world magazine. What an idea! It takes outstanding performances of the week in the amusement business and puts on a Sunday night program. To us the best thing about it is that it introduces new talent, picking up able entertainers who haven't had the breaks and sweeping them into national fame overnight.

* * *

An American Railroad Maintains a Unique Museum Which Links the Present With the Historic Past of the Regions It Serves

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

IT'S only a yellowing piece of paper upon which is scrawled a single sentence, yet there's a lot of American history, past and present, bound up in that brief message. Visit the Union Pacific museum in Omaha, Neb., and there you can read for yourself this historic telegram: "You can make affidavit of completion of road to Promontory Summit."

The date was May 9, 1869. The writer was Grenville M. Dodge, who had been a general in the Union army during the Civil war and who was now chief engineer of the Union Pacific railroad. And when he penned that laconic message to President Oliver Ames of the U. P. he was writing a new chapter in the history of transportation—also a new chapter in the annals of America.

For the first time these United States, from the Atlantic to the Pacific, were bound together by twin bands of steel, never to be broken. No longer would the westward-faring pioneer have to plod along afoot or on horseback or ride in swaying, jolting stagecoach or prairie schooner in order to reach the new lands of opportunity which beckoned him in the West. The overland journey which had once been a matter of months, even years, would now be reduced to weeks, then days.

That is the Past in this scrap of paper. As for the Present—well, at the very moment you are reading Dodge's telegram there is flowing over this first transcontinental railroad, as well as the others which have been built in the last three-quarters of a century, an endless stream of men and munitions, bound for the far-flung battle lines of the greatest war in human history. Soldiers, sailors and marines; machine guns and jeeps and tanks; shells and gasoline and food—powerful locomotives are speeding them west toward their final destination: Tokyo. And these huge iron horses meet and roar past others headed east, pulling behind them the men and munitions which will break down the walls of Hitler's European fortress.

But Dodge's telegram is not the only document in the collections of this museum which links the past and the present in graphic manner. We hear a lot of talk today about the manpower shortage. Back in 1869 it was also a problem, as witness a letter, preserved in the U. P. museum, written by Brigham Young, president of the Church of the Latter Day Saints (Mormons), in which he tells of his struggle to secure enough labor to build a connecting link of railroad from Salt Lake City to the U. P. main line.

Or talk to Mrs. Ruth Hamilton, the kindly gray-haired lady who is the curator of the museum, and she will tell you how the Past frequently walks through its doors in the person of some one of the thousands of persons who visit the place annually. There was the day when a little group of dark-skinned boys came shyly into the big room and surveyed in silence the Indian relics in one of the cases. Suddenly there was an exclamation of delight—it seems that one of the boys had recognized an old-time photograph of one of his forebears—Crow Dog, a great war chief of the Sioux.

Then there was the day when two big-hatted westerners showed unusual interest in one grim relic in the museum—the shackles used on "Big Nose George," a famous outlaw, when he was brought back from Montana for an attempted hold-up of a Union Pacific train. The label on this relic says that the sheriff who captured "Big Nose George" was one Joseph Rankin. "That was your grandfather, you know," said the elder man to the younger, and he might have added that Joe Rankin was not only a famous western sheriff in the early days of Montana but he was also a renowned scout for the army and the hero of a remarkable long-distance ride during the Ute Indian war of 1879.

In fact, the collections in the Union Pacific museum constitute a veritable graphic history of the old West. The era of the fur trade is symbolized in two relics of one of its greatest figures—the watch and scissors used by Old Jim Bridger. Here is a mute symbol of the days when the buffalo roamed the western plains by the millions — a bleached, whitened skull of one of the great shaggy beasts. And, of course, there is many a memento of the man who won his fame as a slayer of bison—"Buffalo Bill" Cody—and the notables, both American and European, whom he guided on their hunting parties. Among them were James Gordon Bennett, famous publisher of the New York Herald, the Grand Duke Alexis of Russia and the English nobleman, the earl of Dunraven.

The "Wedding of the Rails" at Promontory Point, Utah, May 10, 1869, marking the completion of the first transcontinental railroad. The Central Pacific engine is on the left, the Union Pacific on the right. (From an original photograph by C. R. Savage in the Union Pacific museum.)

Over there is a memory of the epic migration of pioneers over the old Oregon Trail, a huge ox-yoke which once encircled the necks of the patient animals that dragged the covered wagons up through the Platte River valley, across the barren plains of southern Wyoming and through South Pass toward their goal beyond the Rockies—the very route over which speed the streamliners of today.

Here, too, are mementos of the day of the cattleman and the cowboy—one of them a rare old book showing the trails from Texas to Ellsworth, Kan., one of the roaring "cow towns" on the Kansas Pacific in the seventies. Then there's a collection of branding irons which once burned the insignia of famous "cow outfits" on the hides of Texas longhorns—and Mrs. Hamilton will tell you that these branding irons were of special interest to one party of visitors a short time ago. They came from Argentina where similar irons are used today to mark the cattle that roam the pampas of that country by the hundreds of thousands, and the designs of their branding irons are not unlike the Spanish designs which were used by the vaqueros in the early days of California.

Rare photograph of Col. W. F. Cody, "Buffalo Bill," autographed by him to Chief Red Shirt of the Sioux, who was one of the Indian notables in his Wild West show. This is one of the few pictures ever taken of Cody wearing the uniform of the Nebraska national guard in which he was an officer and is here reproduced for the first time. (Original in the Union Pacific museum.)

Of course, most of the exhibits in the museum relate directly to the history of the Union Pacific railroad itself, but since U. P. history is so inextricably interwoven with the history of the trans-Missouri frontier it is almost impossible to say where one leaves off and the other begins. Nor are all the relics there mementos of westerners. The East is well represented, too, for it was eastern capital that built the Union Pacific and the history of the U. P. is studded with the names of prominent easterners—Asa Whitney, Oliver Ames, George Francis Train, Thomas C. Durant and Massachusetts-born Grenville M. Dodge, who surveyed the route for the first transcontinental railroad and then was chief engineer for its building.

It may surprise you to see how many relics of Abraham Lincoln there are here, too. But it is not inappropriate that they should be, for it was the Great Emancipator who, on July 1, 1862, signed the Pacific railway bill, passed by congress, which provided for a land grant and subsidy from the government to aid in the construction of a railroad westward from the Missouri river to California and for another road eastward across California to connect with it. It was President Lincoln who designated Council Bluffs, Iowa, as the eastern terminus of the U. P. and among the most treasured documents in the museum's collections is an original Lincoln letter—an executive order, dated October, 1863, appointing Springer Harbaugh of Pennsylvania as a government director of the projected railroad.

Fortunately for posterity, photography had become a well-established art by the time the Union Pacific began building west and to that region flocked many of the daring early-day "camera men" who had won their spurs as photographers on the battlefields of the Civil war. Among them were such men as Alexander Gardner, Capt. A. J. Russell, who became official photographer for the U. P., William H. Jackson, Savage and Ottinger and others. So an important part of the collections in the U. P. museum are the photographs made by these men which comprise a priceless pictorial record of one of the most thrilling epochs in American history.

It was Savage who made some of the best pictures at the historic ceremony at Promontory Point, Utah, on May 10, 1869, when there took place the "Wedding of the Rails"—the driving of the golden and silver spikes which symbolized the joining of the Central Pacific and the Union Pacific lines and the completion of the first transcontinental railroad. And incidentally one of the most interesting of the documentary exhibits in the museum is the photostat of the diary of this same C. R. Savage from May 4, when he set out from his studio in Salt Lake City, through May 11 after his work at Promontory Point was done.

Too many museums are places of static exhibits where the whole atmosphere is that of the dead and moldering past. To visit this unique museum in Omaha (unique in that no other railroad, so far as is known, has set aside space in its headquarters to preserve materials connected with its own history and the history of the country it serves) is to have a feeling of seeing history on the march, with the past blending into the present in the continuing story of a nation still being built. It may be due to the vision of Carl R. Gray, former president of the Union Pacific, who established the museum and sponsored its early development. Then again it may be due to the galvanic influence of his successor who takes a keen personal interest in the place and is responsible for the addition of many an interesting item to its collections. His name, in case you don't happen to remember that dynamic personality who went to the national capital a year or so ago and showed Washington officialdom how to do a big job quickly and efficiently, is "Big Bill" Jeffers.

Builders of U. P.-C. P. Laid 1,775 Miles of Track in Four Years

On July 10, 1865, the first rail for the new Union Pacific railroad was laid at Omaha, Neb. Nearly 10 weeks later, only 10 miles had been completed, but there was material on hand for 100 miles more. The distance extended 30 miles by January 26, 1866, and after that the builders really went to work. By the end of that year they had laid 260 more miles of track.

The year 1867 saw 240 miles added and the line had reached Sherman hill in the Rocky mountains, the highest point on the route (8,247 feet elevation). During all this time the builders had to work heavily armed and under guard of troops because of almost daily attacks by hostile Indians. They laid 425 miles of track during 1868 and another 125 miles brought them to Promontory Point in Utah where was to take place the junction with the Central Pacific.

While the Union Pacific was building its 1,085.8 miles of track westward, the Central Pacific had been coming eastward with its 690 miles. Naturally, these two routes didn't converge perfectly. Actually, the grading gangs of the two companies passed each other and graded mile after mile of parallel route before the actual junction point was determined by officials of the two companies, because each organization was receiving a premium for the amount of track laid.

PATTERNS
SEWING CIRCLE

8562
12-42

New Edition

THE new edition of the popular shirtwaist dress has a front closing placket—ending just below the belt! It gives you all the comfort of the coat dress opening—but means fewer buttonholes to be made and fewer buttons to be sewn on.

* * *

Pattern No. 8562 is in sizes 12, 14, 16, 18, 20; 40, 42. Size 14, short sleeves, requires 3¾ yards 39-inch material.

Slip or Jumper

GOOD planning brings you in this one pattern, a clever jumper pattern for a child—which can also be used for a slip! The same pattern also includes a blouse to wear under the jumper, panties to wear under the slip.

* * *

Pattern No. 8557 is designed for sizes 2, 3, 4, 5 and 6 years. Size 3 jumper requires 1½ yards 39-inch material, blouse 1 yard; slip and panties 2¼ yards with 4 yards lace edging.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

400,000 Active Oil Wells In U. S.; Many 'Strippers'

The United States has 400,000 active oil wells, about 300,000 being "strippers" that are so exhausted they produce only from one-half to three barrels a day and account for less than 15 per cent of our total production, says Collier's. Large numbers of these are abandoned yearly because they do not pay or because their flow cannot be restarted after having been left without being pumped for too long an interval.

NONE SURER
St. Joseph ASPIRIN
World's Largest Seller at 10¢

Acid Indigestion
Relieved in 5 minutes or double money back
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. CAMELS ARE PACKED TO STAY FRESH EVERYWHERE

● Because Camels are the number one cigarette with men in *all* the services, they're following our men to every continent, on every ocean. Happily Camels are packed to *stay fresh*, cool smoking, and slow burning—anywhere, any time. The Camel pack keeps *your* Camels fresh, too—sealing in that famous extra flavor and extra mildness. For a fresh treat, try Camel.

FIRST IN THE SERVICE
With men in the Army, Navy, Marine Corps, and Coast Guard, the favorite cigarette is Camel.
(Based on actual sales records.)

Mr. and Mrs. R. Al Jorgenson attended a banquet and meeting of the Hawkeye Press Club at Mason City Saturday evening. Publisher Martin Aasgaard of the Lake Mills Graphic put on an hour's entertainment of magic tricks after the dinner. Forty-four publishers and their wives attended.

Now the devil's throat will starve Mexico's dreadful pit of horror, that has swallowed so many crime victims and suicides, will no longer feed on human morsels. Don't miss this dramatic feature by William Seabrook, the noted author, in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American. 1tc

Henry Ward, farmer living south of town, dropped into the Times ffice Monday on business, and the conversation turned to trapping. "Hank" stated that he had caught two red foxes during the season, as well as a fine catch of muskrat and mink. Furs are a good price this year and "Hank" picked up a few hundred extra dollars following his hobby this aseson.

Mr and Mrs. Lloyd Smith entertained at dinner Monday evening in honor of her brother, Pfc. Harold Christians and wife of Alabama, the following· John Christians; Duane Christians, Ed Christians and family; Wm Neuberger and family; ly; LuVerne Christians and family, and rMs. Art Tibbits. Pfc Christians will go to a camp in North Carolina after he concludes his furlough visiting here

Tips ON FARM MACHINERY

Use Soft Water

Use only soft water in the radiator of the tractor, car, or stationary engine. Never use hard water, advise Iowa State College agricultural engineers, for it contains minerals which are deposited on the inside of the transfer of heat to the water in the cooling system The scale may comes an insulator and hinders transfer of heat to the ater in the cooling system. The scale may flake off and clog radiator tubes, causing further reduction in cooling capacity. The entire process is similar to the "liming up" of a tea kettle. Soft water contains very little or no mineral and therefore causes no difficulty

rner Defeated Hayfield To n County Cage Tourney

ROCKS WIND UP IN 3RD LACE IN TOURNAMENT HELD HERE

Hancock County Annual Bas- l Tournament is now history e dopsters had it right when said the Garner Cardinals win the Championship.

Cardinals won the title the way and did not have easy against a small, but fast team whom they barely nosed start the championship trek 19. Next the Cardinals had oose of Kanawha, which turn- t to be another nip and tuck until the final quarter when r found their basket shooting nd pulled out ahead 30 to 21. high-powered Hayfield team tood between them and the pionship, and the way Hay- steam-rollered past opponents barrage of baskets from any n the floor, the money boys laying their bets on Hayfield the contest. However, the set up a stiff defense and out- Hayfield in the final game ept Hayfield's hotshots, Tay- d Formanek bottled up long to pull out in front with a table lead 29 to 16 to win the Championship title, which eld by the Klemme Sham- third place winners in the ment.

First Round

ritt 42, Goodell 6

anawha 34, Corwith 31
arner, bye

Semi-Final Round

ayfield 42, Klemme 16
arner 30, Kanawha 21

Consolation Round

lemme 20, Kanawha 14

Championship Round

arner 29, Hayfield 16.

re was a fine crowd out for game and Saturday nights trought out a capacity house. ween halves Saturday night urnament basketball was sold highest bidding school and o Klemme for $8,500 in War

er side lights on the tourna-

rtsmanship was good and the found little cause for booing players or referees.

me high school girls sold gs and pop during all games. er leaders from the several s kept yells moving and there o lack of pep at any of the

field, without question, had ot-shots in this tournament e Taylor lead the scoring by ng up 33 points during the ment, while his team-mate, rd Formanek totaled 28. awha probably had the team ow the biggest improvement the season. They have come a long way since last fall and were a real threat to upset the dope in this tournament. Kanawha and Britt had the speediest boys on the floor. The new champs had the heaviest and tallest team on the floor. Hayfield had the best shooting team and could hit the basket from any angle.

In all it was a successful tournament and well conducted.

If we were passing out medals for being good sports, we would vote one hundred per cent for the pluckly little group of boys from Goodell. With not a ghost of a chance to give any team in the county any kind of competition, the Goodell boys appeared, yes all six of them to take their turn against Britt and keep the schedule intact Yes sir, we must hand it to Goodell for coming to the tournament to face certain defeat, and they did it with a smile!

And that's sportsmanship of the highest type.

VAL STROMER CELEBRATED 4TH BIRTHDAY WITH PARTY

Sunday being the 4th birthday of their youngest son Val, Mr and Mrs. Verner Stromer invited in several little friends Sunday evening, including Suzan Ax, Gary Lenz and Marian Stromer; also their parents: Mr. and Mrs. Richard Ax and family, Mr. and Mrs Clarence Lenz, and Mr. and Mrs. Aaron Stromer and family.

The group was first entertained by the showing of moving pictures by Mr. Stromer, after which games were played by the various age groups with high and low prizes being awarded to the winners.

At a late hour lunch was served by the hostess which included a large decorated birthday cake trimmed in pink and blue and lighted with four tiny pink candles

Val received many nice gifts.

MR. GROUNDHOG SAW HIS SHADOW TODAY!

Six Weeks Of Cold And Stormy Weather Ahead For Iowa!

At the first streak of dawn Mr Groundhog yawned and stretched after his long winter nap, shook himself and came out of his den to make his annual long-range weather prediction.

He looked at the sky and the sun got in his eyes He looked back over his shoulder and saw a big shadow of himself on the ground, so he stretched once more and then lumbered back to his cozy bed in the hillside to take another long snooze during the six more weeks of blustery winter weather which was bound to come, according to his mathematics.

As Ripley says: "Believe It or Not" but the Groundhog saw his shadow on February 2nd and that means six more weeks of winter!

Miss Leona Polsdofer Bride At Liberty Church Ceremony

MISS POLSDOFER MARRIED TO ARTHUR HANSON, GARNER

Couple Will Reside On Farm Near Garner Following Honeymoon Trip In Minnesota

Miss Leona Polsdofer, daughter of Mr and Mrs. Art Polsdofer, of Liberty Township, and Mr. Arthur Hanson, son of Mr and Mrs. Wm. A Hanson of near Garner, were united in marriage at the Liberty Methodist Church Sunday afternoon, January 30th, 1944, at 2:00 o'clock Rev Herschel E. Harvey, pastor, officiated at the ceremony.

The couple were attended at the alter by Miss La Vonne Hanson, a sister of the groom, as bridesmaid, and Mr Lorence Polsdofer, brother of the bride, who was best man

Messrs. Paul Ludeke and Milvern Schoenwetter were the ushers

The bride wore a light blue floor length dress and carried a bouquet of pink roses and white snapdragons. The bridesmaid wore an aqua floor length dress and also carried a bouquet of flowers.

The wedding marches were played by Mrs J L Abele at the piano Miss Hilda Abele sang, "Because," accompanied at the piano by Mrs. Abele. The Church Choir sang, "O Love Divine and Tender," and "Oh Perfect Life Be Thou." They were accompanied by Mrs Abele

After congratulations were received by the couple at the church the bridal party, immediate relatives and close friends attended a reception at the home of Mr and Mrs. Art Polsdofer where lunch was served and the bride opened her many beautiful gifts.

Mr. and Mrs. Hanson left early Sunday evening for a few days trip and visit in Minnesota, after which they will be at home on a farm near Garner.

ELL TOWNSHIP LADIES MET AT EMORY WEAVER HOME

Thursday afternoon, January 27, the ladies of Districts No. 3 and 4 of Ell Township met at the home of Mrs Emory Weaver for a follow-up lesson on "Shopping in a Wartime Clothing Market."

Thirteen ladies were present at the meeting Mrs. Orville Stewart and Mrs Verner Stromer presided at the lesson. Mrs. Lew Weaver gave a demonstration on the burning tests of various kinds of rayon materials to distinguish the difference between acetate and viscose rayons and the laundry methods of each.

The care, labeling, characteristics, price, shrinkage and color fastness of different wartime materials were carefully explained.

As an added feature at this meeting, Mrs. Emory Weaver showed the group a large display of souvenirs and gifts she has received from her brothers and friends who are serving in the army and navy. Besides the large number of pillow-tops she has received from many camps in the U. S, she has many beautiful gifts from Panama, Australia, Hawaiian Islands, West Indies, and various other islands.

At the close of the meeting a delicious lunch was served.

Mrs. Roosevelt Among W.O.I. Speakers

WOI Going to Carry 2½ Hours Of Farm and Home Week Program, Feb. 7-11

Mrs Eleanor Roosevelt, the First Lady of the Land, will be one of the featured guests on the program for Farm and Home Week by radio at Iowa State College, Feb. 7 to 11 All parts of the week, which has as its theme "What's New in Farming and Homemaking," will be broadcast over WOI, the Iowa State College radio station.

Mrs. Roosevelt's appearance before Farm and Home Week listeners by transcription will be in the form of an interview on the subject, "Living for War and Peace." It will be heard on Monday, Feb. 7.

WOI will devote a total of 2 hours and 30 minutes each day during the week to Farm and Home Week.

Daily Preview

Starting each day will be a preview of the day's program at 8:15 a.m. In the period regularly occupied by the Homemakers program, 9 to 9:30 each morning, will be interviews conducted by Martha Duncan with homemaking leaders of national importance. These interviews by transcription were obtained by Martha Duncan recently in Washington, D. C.

The period from 12 noon to 12:15 each day will feature a series of outstanding speakers. Those include Marvin Jones, war food administrator, on Monday; Gov. Bourke B Hickenlooper and Harry Linn, state secretary of agriculture, on Tuesday; Mrs. Mark Clark, wife of the commanding general of the United States Fifth Army in Italy, on Wednesday; O. W. Johnson, farmer from Le Grand, and Mrs. Ray Fisher, farm homemaker from Grand Junction, on Thursday, and K. J McDonald, banker from Estherville, on Friday.

The period from 12.30 to 12:45 p.m. each day will be occupied by talks by Iowa State College leaders, including Dr. Charles E. Friley, Dean H H. Kildee, Dean Genevieve Fisher, Dean R. E. Buchanan and Director R. K. Bliss.

Afternoon Program

In the afternoon from 12:45 to 1:30, subject matter talks and interviews will be provided. On Monday the discussion centers around agricultural economics; on Tuesday crops; on Wednesday, livestock; or Thursday, soils and land use; or Friday, farm labor and farm machinery Two special features of this period are a remote broadcast from Tipton on Monday in which an actual farm application of 1944 food goals will be described, and a remote from Hampton on Friday in which the story of Franklin County in solving the farm labor problem will be related.

The peroid from 3:30 to 4 p.m each day will be devoted to interviews with homemaking leaders and discussions of vegetable gardens, home fruits, preserving and canning foods, and poultry.

More Funds To Fight T. B. In County

Corwith Reports

Just as The Times goes to press Corwith reports their total of $71.30 to be added to the above amount.

SURPRISED ON 30TH WEDDING ANNIVERSARY

A group of friends held a surprise party on Mr. and Mrs. Harry Gibbs on Sunday afternoon in honor of their 30th wedding anniversary.

The afternoon was spent in visiting, after which refreshments were served.

Nice gifts were presented to Mr. and Mrs. Gibbs.

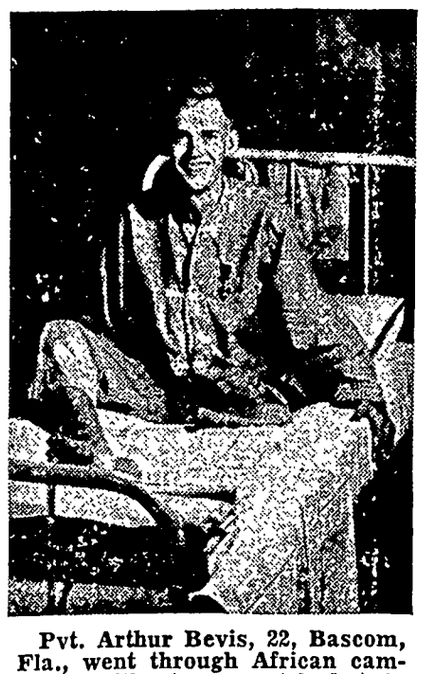
Hundreds of Iowa schools have been conducting special studies of fire prevention and making surveys of farms for fire hazards during the last few weeks.

"We Are Buying Extra War Bonds—Are You?"

Pvt. Olin W. Dennis, 25, Delmar, Md., was shot through the leg by a sniper at Alcatar, Africa. He has been in the Halloran Hospital for over six months because of a bone infection. He is buying Bonds regularly.

Sgt. Edwin Johnson, 27, Long Island, City, N. Y., suffered shrapnel wounds in throat and neck when a Stuka bombed an ammunition truck he was driving in Sicily. He couldn't speak for two months but has since appeared at Bond rallies.

Pvt. James C. McNally, 36, New York City, suffered a fractured leg when his supply truck hit a road mine in Algeria. That's all he remembers. He has a brother in the Signal Corps. His wife works, buys Bonds regularly.



Pvt. Arthur Bevis, 22, Bascom, Fla., went through African campaign without a scratch but in Sicily one of his buddies stepped on a mine. Bevis' leg was amputated, shrapnel partially paralyzed his fingers. He wears the Purple Heart, buys Bonds, too.

Pvt. Benjamin Ayscue, 26, Henderson, N. C., received compound fracture of leg and other injuries in Sicilian campaign when his truck ran over a mine. Ayscue has brother in the army, is married and has one child. Family buys Bonds regularly.

HELLO, FOLKS!

Mr. and Mrs. Keith Albertson are the proud parents of a 7 pounds, 2½ ounces baby son, born to them at the Mercy Hospital in Mason City on Thursday evening, January 27th, 1944.

Jimmie is very proud of his new brother who has been named David F.

Mr. and Mrs. Elmer Huenemann are the parents of a baby daughter born to them on Sunday, January 9, 1944. They have named their new daughter Joyce Ruth.

Mr. and Mrs. Arthur Katter are the parents of a baby boy born to them on Monday, January 24, 1944. He has been named Arthur Harold and has one brother and one sister.

Midwinter Jellies Pep Up Menus!
(See Recipes Below)

Get Your Spreads!

Are you low on brown points? Then set the jelly and jam kettles boiling with midwinter fruits and make some delicious spreads to save points.

Last summer when homemakers were putting up their fruits they discovered they did not have enough sugar for putting up all the jams and jellies they would like, but now they have probably caught up on the sugar and can boil the juices they saved into delicious, quivery jellies. Use the jellies and jams on biscuits and muffins when the butter is scarce. It spells first aid and appetite appeal to menus.

For those of you who did not put up juices for winter jelly-making, there are plenty of fruits in season now that make delightful spreads. Out with the kettles and colanders, with jelly glasses and paraffin and here we go:

Orange Marmalade.
(Makes 6 6-ounce glasses)

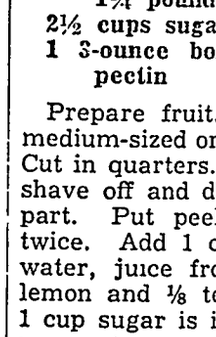
3½ cups prepared fruit (about 1¾ pounds)
2½ cups sugar
1 3-ounce box powdered fruit pectin

Prepare fruit. Use peels from 6 medium-sized oranges and 2 lemons. Cut in quarters. Lay quarters flat; shave off and discard half of white part. Put peels through chopper twice. Add 1 cup sugar, 2½ cups water, juice from 1 medium-sized lemon and ⅛ teaspoon soda. (This 1 cup sugar is in addition to measurement given above.) Cover. Heat to boiling. Simmer 30 minutes, stirring occasionally. Measure sugar into dry dish and set aside until needed. Measure prepared fruit into 3 to 4-quart kettle, filling up last cup or fraction of cup with water if necessary. Place over high heat. Add powdered pectin, mix well, and continue stirring until mixture comes to a hard boil. Pour in sugar at once, stirring constantly. Continue stirring, heat to a full, rolling boil and boil hard 2 minutes. Remove from heat, skim, pour quickly. Paraffin hot marmalade at once.

Honey Orange Jelly.
(Makes 6 6-ounce glasses)

1 cup juice
3 cups honey
½ bottle fruit pectin

To prepare juice, squeeze and strain juice from 2 medium oranges. Measure juice and honey into a large saucepan and mix well. Heat to boiling over high heat and at once add fruit pectin, stirring constantly. Then heat to a full rolling boil and boil hard ½ minute. Remove from heat, skim, pour quickly. Paraffin hot jelly at once.



Lynn Chambers' Point-Saving Menu

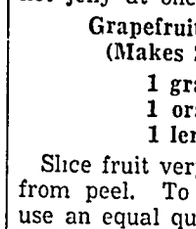
Dinner Complete
Lettuce Salad with French Dressing
Bran-Raisin Muffins Jelly
Baked Apple Oatmeal Cookies
Beverage

If you can spare a few points for the crushed pineapple called for in this recipe you can make a colorful and tart jam that will delight the family no end:

Winter Jam.

3 cups cranberries
1 cup diced apples
1½ cups water
1 cup crushed pineapple
3 cups sugar
Juice and grated rind of 1 lemon

Cook the cranberries and apples in water until they are clear and tender. Add the lemon, pineapple and sugar. Mix well and boil the mixture rapidly until it is thick and clear. Pour into sterilized glass jars and seal at once.



Colorful and spicy is this next jam with all the relish and tang that only cranberries can give:

Cranberry Jam.

8 cups cranberries
1 cup each, water and vinegar
6 cups sugar
1 tablespoon ground cinnamon
½ tablespoon ground cloves
½ tablespoon ground allspice

Mash cranberries lightly. Add vinegar and water and cook until soft. Put through a coarse strainer; add sugar and spices. Cook 8 minutes, stirring constantly. Pour into sterilized jars and seal immediately.

And now for those of you who have bottled grape juice on hand. Here is an excellent jelly that is quickly made with powdered fruit pectin:

Grape and Orange Jelly.
(Makes 7 6-ounce glasses)

3½ cups sugar
1½ cups bottled grape juice
1½ cups canned orange juice
1 box powdered fruit pectin

Measure sugar into a dry dish and set aside until needed. Measure juice into a 3- or 4-quart saucepan and place over hottest fire. Add powdered fruit pectin, mix well, and continue stirring until mixture comes to a hard boil. Pour in sugar at once, stirring constantly. Bring to a full rolling boil and boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once.

Lynn Says

Jelly Hints: Consistency and flavor are the most important points in making jelly. Careful cooking can give you a high score on both.

To jell, fruit juices must contain pectin or must have it added from a commercial product. Pectin must be combined with the correct proportion of sugar in the presence of acids and mineral salts to form jelly.

Prolonged cooking destroys the power of pectin, especially in the very acid fruits. This is the reason that no more water than necessary should be used in cooking the fruit.

Best jellies are tender and quivery and translucent. They should cut easily but break with a clean, sharp line.

Save Used Fats

If you want sugar-saving suggestions, write to Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

COMMANDO GIRL

("Young women are being trained as commandos. They are taught to scale walls, batter down doors, break through heavy obstacles, wrestle, fight and do ranger work." —News item.)

"I have come to ask for your daughter's hand," announced the young man.

"This is rather surprising," said the girl's father. "Are you sure you love her?"

"I loved her the first time I saw her go over an 18-foot wall!"

—*—

"And are you sure she returns this love?"

"Yes, sir. Yesterday as she was about to dive headfirst through a sheet of plate glass I asked her if she would marry me, and I heard her answer distinctly above the crash."

"How long has this been going on?"

"Diving through plate glass?"

"No, no. This romance!"

"Not very long, sir. I met your daughter while I was bracing some oak trees. She came tearing along in that effective way of hers and felled them with a quick shoulder movement. I complimented her and one word led to another. I saw her again a few days later ripping planks out of a drawbridge."

"And then?"

"Well, we had lunch a few nights later, just after she had won three stars for shoeing a horse standing on one leg."

"The horse?"

"No, your daughter. That night she told me all about herself . . . the time she went through three barbed wire fences in two minutes, eleven seconds . . . the day she swam the Hudson towing a coal barge . . . and the occasion when she and another little girl knocked a hole in an armored car with bare fists. She's so wonderful, sir!"

—*—

"It's strange that she hasn't told her mother or me of this attachment."

"Well, she's been awfully preoccupied lately. She's concentrating on a new technique for scaling cliffs in wet clothes, carrying 150 pounds of unnecessary luggage."

"Ahem. I see. Now suppose I consent. Do you think this will make a happy marriage?"

"Oh, yes, sir; yes, indeed. What a wife she will make! Imagine just being able to tell her during a real cold spell to go down to the dealer and really GET SOME COAL!"

—*—

(That does it. The wedding takes place six weeks later, with the minister asking the groom, "Do you take this commando?" And with the choir singing not only "Here Comes the Bride," but "Here comes the judo expert, the all-round ranger, the pill-box basher and the best mountain climber of her weight in the East.")

* * *

THE GWIBIT

("Rep. Karl E. Mundt of South Dakota proposes the organization of a Guild of Washington Incompetent Bureaucratic Idea Throat-cutters to be known as 'Gwibits.'")

A Gwibit loves his desk so grand
To hold things he can't understand;
He must have clips and spikes and files
And wire-baskets in all styles;
And as he fills 'em, one by one
He blithely chirps, "Well, now that's done!"
When anything has gone astray
"We're looking into that," he'll say.

A Gwibit thinks it is such fun
When ten words do the work of one.
He thinks long letters are a gem—
That is if he is writing them!
He loves ideas, however slim,
Provided they're thought up by him.
This is the phrase that makes him glow:
"We'll check on that and let you know."

A Gwibit is a fellow who
Resents ideas that come from you;
He sees no good in plans by gents
Who've had a wide experience;
It fills him full of deepest doubt
If you know what you talk about;
These words he worships, boy, and how! . . .
"It's under our advisement now."

If he suspects you know your stuff
A Gwibit's way is extra rough;
He loves to take a plan that's sound
And see it get the run-around;
Great satisfaction does he get
From saying, "File this . . . and forget!"
When Gwibits die they tell Saint Pete,
"You'll have to wait; just take a seat."

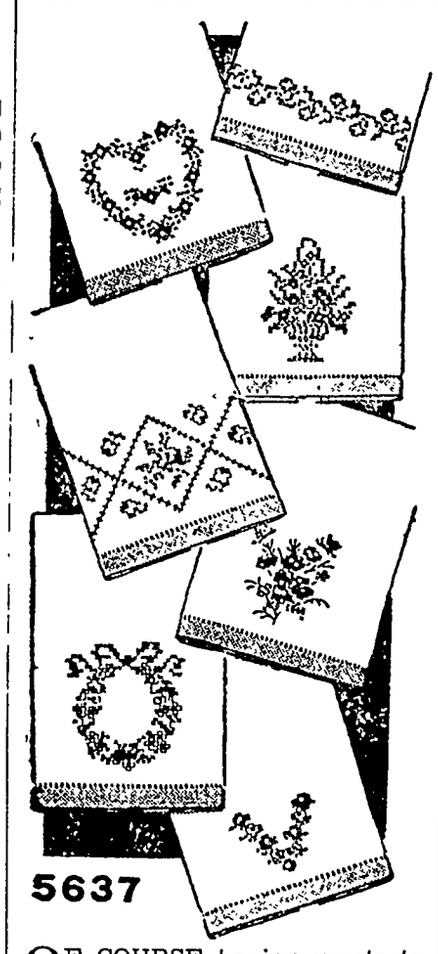
For you to make



Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:
HOME NEEDLEWORK
530 South Wells St. Chicago.

OF COURSE having guests today means that you'll have to be lucky to have enough red points to feed them but you don't need any points at all to have these seven handsome designs to embroider on your guest towels! Do the lovely cross stitch in your spare time in the afternoons—while you are mentally planning the next day's menus. Each design is about 4¾ by 5 inches.

* * *

To obtain seven transfer designs for the Lucky Seven Towels (Pattern No. 5637) color chart for working, send 16 cents in coin, your name and address and the pattern number.

Household Hints

Dickies for various frocks and sweaters can be made from a man's old shirt tails. Fine poplin and striped shirtings are excellent for this purpose.

* * *

Never use a coarse, gritty scouring powder on any enameled part of a stove. It is likely to destroy the surface glaze.

* * *

Frayed carpet edges can be prevented from further fraying by applying binding tape.

* * *

Small children can be prevented from removing shoe laces from their shoes and losing them if a knot is tied in each lace between the bottom two eyelets.

* * *

When sewing something that requires a good bit of thread, fill several bobbins before you begin. Then all you will have to do is replace the empty bobbin with a full one. This saves time and patience, and one can sew steadily for a long time.

* * *

Water rings on varnished furniture can often be removed by rubbing them with a cloth dipped in camphor. Work quickly and wipe dry with a clean, soft cloth. When dry, rub with furniture polish, applied on a soft cloth.

* * *

Save half on tablecloth laundry by turning over the cloth when one side is surface soiled.

* * *

Scorch stains are sometimes hard to remove. Fine sandpaper will sometimes do the trick. Bleaching is often effective on white wool. Place a white cloth dampened with peroxide on the stain. Cover with a dry cloth and press with a warm iron.

* * *

Odorous foods like sauerkraut, fish, strong cheese, or broccoli should always be covered before they are placed in the refrigerator to prevent their tainting other foods.

Ink Spots and Spatters

By Jergie

NORTH IOWA'S UNUSUAL WINTER WEATHER

Next to the war, the main topic of conversation around here is in regard to the unusually mild and snow-free winter weather we have enjoyed in North Iowa this year.

As this is being written Tuesday afternoon the thermometer records the temperature at 66 degrees The sky is somewhat overcast after a light rain last night, and it appears that the weather might change.

North Iowa had a snow storm in the fall which delayed corn-picking for a week, but since then we have had only a trace of snow at times

Many farmers have taken advantage of the nice weather to clean up fallen wood in their groves and to clean up around the farm yards

Some of our farmers friends deserve special praise for burning the dead leaves and grass along their fence lines. Not only does it make their fields look much neater, but in case of a heavy snow it will help to prevent the roads from drifting shut with snow Weed seeds are also destroyed and there should be less weeds along the fences next summer.

A number of farmers have taken advantage of the nice weather and have hauled away manure from the barns and spread it on the fields This is a job many usually let wait until spring So some farmers are "jumping the gun" and getting this spring job done now.

Tuesday Carl Wille brought to the Times Office a sprig from a maple tree growing in the shelter of his cattle barn. The mild weather and the protected area where the tree grows has induced it to start budding. The buds are fairly well formed and appear ready to open up in a couple of weeks.

Even nature is being fooled by the mild weather.

Editor's Note: The above item was scheduled for last week's issue but do to a shortage of space, was left out. However, the weather continues nice. We even had a rain last Wednesday night and Thursday morning. And a bit of cooler weather.

SOMEBODY LOAN ART A LADDER

Sure, Art Wellemeyer knows it is a long way past Christmas, and that the big evergreen wreath and colored lights still adorn the front of his store

We panned Art for "rushing the season" And he asked what we meant by that, so we informed him we thought it a bit early for decorating for Christmas 1944, but he said the decoration we referred to was not for next Christmas, but was put up for last Christmas, and that the reason it was still there was because somebody had borowed his long ladder, and had forgotten to return it, and Art had also forgotten who borrowed it.

So we are making an appeal in behalf of Art Bring back his ladder so he can get the decorations down before the birds start building their nests there!

Editor's note. Here's another article crowded out of the paper last week Art must have "smelled a rat" because he took down the decorations Tuesday (But had to borow a ladder) Art's ladder is still missing Maybe this will get it back to him.

YOUR OLD FURS ARE STILL USEFUL

Don't threw away that old fur coat, fur scarf, muff or other piece of fur just because it is worn out. It is still very useful and can help someone in the merchant marine to keep warm at sea.

There is an urgent need for old fur of any kind, to be made into vests for the men in our merchant marine, so don't throw away that old fur coat, that discarded sheepskin or old muff.

The Klemme Legion Auxiliary is cooperating with the War Emergency Board to salvage old fur. If you have an old fur that you want to donate, you can leave it at the J. C Thomas Barber Shop.

OBJECT: MATRIMONY

The Cedar Rapids Gazette tells the following want ad yarn:-

"Wanted: Single man wishes to correspond with single lady with two boxes of 12 guage shells. Object: matrimony."

RATTLERS IN IOWA!

Don't let anybody tell you there are no rattle snakes in Iowa. The Allamakee county auditor reports that he paid out $68 in bounties on 136 rattlesnakes!

Our Men In The Service

"BING" REESE PROMOTED TO FIRST CLASS RATING

January 28, 1944

Hello Folks:

I couldn't resist the temptation to write you and enclose a copy of the BULL HORN, announcing my advancement to 1st class. It is the first rate that I have held that really means anything, and naturally I'm quite proud to have it.

I was a bit disappointed about the last issue of the KLEMME TIMES. I scanned it from cover to cover and couldn't find any reference as to what happened to the final outcome of the incident at Clear Lake. Evidently the old settlers over there couldn't come through with anything further. Will be expecting something about the ice going out or down later on. I did get a kick out of the write up. Hope it doesn't hurt the fishing. Might get back there sometime to do some more of that.

Have not made contact with Donald Schaeffer as yet. There has been such a lot of work around here that things like that don't get done when you want to do them. He will be here quite a while so may be able to contact him later on. Have failed to contact the Wicks, as yet. Would like to see them while they are down here.

Have contacted several fellows from around central and north Iowa here. One of our WAVE Corpsmen is a former school teacher from Hampton and we have several officers here from that section Swift of the Marshall and Swift Company is here I haven't seen him but Maxine has become acquainted with him at the store. There are several others from around that locality.

When you get your light plane after this fracas clears up you can take it to the SCHAEFFER AUTOMOBILE AND AIRCRAFT REPAIR SHOP for servicing and repairs If Donnie goes through mech school here he will know plenty about planes and their operation They run good schools here and they really put these fellows through a lot before they turn them out to repair the planes off the lines. They must be doing a good job for a lot of our boys have been shipped out to fighting fronts and the planes in those sections are making it plenty hot for the Japanese.

Will stop now and return to the job. Enjoy reading the paper very much It sure helps to keep in contact with old friends and what they are doing From the way they are drafting skilled labor and technicians it makes you wonder what some of those husky young farm boys are doing still hanging around there I'm not a bit jealous of their position now, for I feel sure they will be jealous of ours after this fracas is over Enough of that.

Best of luck and keep your flies dry.

Bing

Editor's Note Sorry Bing, but there is nothing new to report about the lake. The "California" weather we have enjoyed probably kept the ice from pushing the town of Clear Lake entirely off the map

We doubt if the unusual action of the ice will damage the fishing, so come up and whip a fly with us!

MRS. H. D. RAMSAY HOSTESS AT AFTERNOON PARTY

Mrs. H D. Ramsay entertained a group of ladies at her home Friday afternoon at two tables of bridge.

Lunch was served after the games and the ladies enjoyed a nice afternoon.

Mrs. Art Kudje won high score, with Mrs. C G. Waterman, second.

LARGE ALLOTMENT

The family of Halsey McCain of near Rippey will receive a monthly allotment from the government of $300 under the new arrangements. Mr. McCain who enlisted in the seabees three months ago leaves at home a wife and twelve children. Eight of the children are of school age.

Wedding Stationery printed and engraved at The Times Office.

CLEAN AND TREAT SMALL GRAIN SEED

Cleaning and treating flax, oats and other small grain seeds now before spring work begins wil be a definite step toward maximum production in Iowa this year.

E. .P Sylwester, Iowa State College plant pathologist, says many seed stocks are badly diseased. Weed seed production was heavy last year.

Cleaning and treating may be done at a local cleaning and treating establishment or at home, if a good farm-sized fanning mill and homemade seed treating machine are available.

Seed cleaned to remove weed seed, chaff, dirt, and light and diseased kernels can be conveniently treated 1 to 60 days before seeding, by using a simple wooden gravity treater. This consists of a trough big enought to hold 2 bushels, one end of which is hinged and dumps into a vertical baffled mixing chute. Seed should be treated with New Improved Ceresan applied at the rate of half an ounce per bushel.

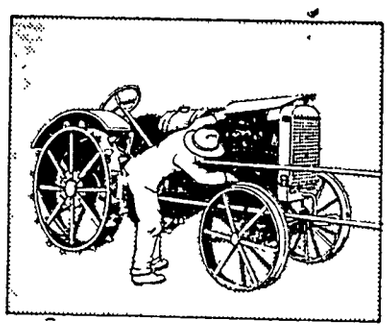
Treating seed kills disease organism which may be on the seed. It protects germinating seeds and seedlings against attacks of disease organisms in the soils. Sylwester recommends it for new, disease-resistant varieties.

Plans for a simple home treater may be sacured free from the County Extension Director or from the Extension Service, Iowa State College.

MADE TO ORDER

The hens on Mrs. Harold Schultz farm must be particularly fond of their owner. One day recently, Mrs. Schultz found an eggs with a perfect letter "S" on the end. The letter was about half an inch high and one-fourth inch wide.

Tips ON FARM MACHINERY



AVOID SUCH RISKS

Never reach through a running belt or chain on a farm tractor or farm machine, caution Iowa State College extension agricultural engineers. The little time that is saved by reaching through is not worth the risk of losing a hand or an arm.

The tractor or machine should always be stopped whenever an adjustment must be made. This is especially important in the wintertime, when tractors are used for feed grinding, corn shelling and other belt work The danger of accidents is even greater when heavy clothing is worn.

IOWA'S 44th FARM HOME WEEK FEBRUARY 7-11

This is the second year for Iowa's Farm and Home week to be given by radio from Iowa State College Turn to 640 on your radio dial each morning at 8:15 from Monday through Friday, February 7-11, for the days program.

National, state and local leaders will be heard from day to day on subjects pertaining to homemaking, crops, livestock, soil and land use, economics, labor, and machinery.

Homemakers who listen to the Martha Duncan program will be interested in her interviews by transcription with homemaking leaders of national importance. There interviews were obtained by Martha Duncan recently in Washington, D C. One of the featured guests on the program will be Mrs. Eleanor Rocsevelt.

MOST FARMERS TO MAKE FINAL INCOME ACCOUNTING SOON

Final accounting for 1942 and 1943 income, under the "pay-as-you-go" plan, will be made prior to March 15 by nearly all Iowa farmers, according ct Carl Malone, Iowa State College farm management extension specialist

Most of them filed, before December 15, 1943, declarations of estimated income. Now they will figure their actual income Future payments will be made on that basis, after deduction of previous payments including an adjustment between the 1942 and 1943 tax.

Federal laws require that single persons with a year's minimum gross income of $500 and married persons with a minimum income of $1,200 make returns

Returns may eb filed on a cash or accrual (inventory) basis However, the method used in 1942 must be continued unless permission has been secured to change Forms to be used are 1040 and 1040F. If they have not been received, they may be secured at a bank or the nearest federal income tax office.

Gross income figured by the farmer must include all income including that from his farm and other sources such as AAA checks or receipts from work done for others

The accrual or inventory method of filing requires the keeping of complete records, including inventories of livestock, feed supplies and other farm products on hand at the beginning of the year.

Exemptions include $1,200 for married persons and $500 for those who are single. Credit for dependents is $350 for each one.

Income tax returns must be filed with the collector of internal revenue in the district in which the person lives. Iowa has offices in Des Moines, Dubuque and Sioux City.

WISE FOR FARMERS TO BUY WAR BONDS

It Will Provide Assets for Improving Farms and Equipment Later

Surplus farm income, if invested in war bonds to meet part of Iowa's $177,000,000 goal in the Fourth War Loan Drive, will help families build up liquid assets to improve their farms and equipment after the war. At the same time, the investment will hlep hold down national inflation, W. G. Murray, acting head of the Iowa State College Agricultural Economics Department,states.

"More farmers had greater income in 1943 than ever before. The use they make of this and the current year's income may well mean financial success or failure for rural families during the next 25 years," the economist says.

Part of Financial Plan

The building up of a financial reserve through purchase of war bonds is part of a financial plan recommended by Murray. He also advocates paying off short term debts or adjusting them to a schedule of annual interest and low principal payments through the anticipated post-war period of lower prices. Heavy debts should be reduced to a safe level. Establishment of the financial reserve will help meet post-war interest and principal payments and may be the means of avoiding future borrowing.

Murray arms against speculation as an inflation igniter. Additional farm land should not be purchased unless it contributes to efficient operation of the farm business.

Provide Ready Cash

As an aid to budgeting, a simplified farm and home accounting system is suggested.

War bonds provide the best form of financial reserve for farm families because they have a redemption value of 100 cents on the dollar invested and bear interest at 2.9 percent if kept to maturity. Furthermore, if there is need for cash, war bonds can be redeemed any time following 60 days from the date of issue.

75TH ANNIVERSARY OF IMMANUEL CHURCH

An event of interesting historical significance not only to the members of the church, but all of this vicinity as well, is the 75th anniversary, to be celebrated by Immanuel Lutheran Church of Forest City, this year.

This congregation was organized in 1869 by Scandinavian immigrants and it's early membership was made up of Norwegians, Swedish, and Danish pioneers, who wished to carry on their Faith. None of the Founders are alive today, but a roll call brings forth names that are still familiar to many of our citizens, as their sons and daughters have continued with the work they started.

The plan for the seventy-fifth anniversary celebration includes a special service or program each month of the anniversary year. On January 30th, the opening service was held, and pastor Reinertson preached the festival program.

One Sunday of each month thru the year will be set aside for the observance of this event.

FAREWELL PARTY HELD FOR MR. AND MRS. EMIL BEIER

About seventy neighbors and old friends of Mr. and Mrs. Emil Beier gathered at their home in Liberty township Friday evening, Jan. 21 for a farewell party.

The evening was spent in a social way and visiting was enjoyed, and at a late hour a fine lunch was served by the visitors.

Mr. and Mrs. Beier were presented with a beautiful electric table lamp, which they remarked was a most cherished remembrance of the pleasant times they have enjoyed in Liberty. Mr. and Mrs. Beier express their thanks for the wonderful time their neighbors gave them during the closing days of residence in Liberty township.

The Beiers are now comfortably settled in their home in Klemme.

NO OVERSEER

Hamburg Moyor Woods has granted Chief of Police William Stacy a 30-day leave of absence. While on his vacation, Police Chief Stacy is preparing to open a cafe in Sidney.

The Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No 14, Hancock County Iowa, have fixed the 7th day of March A D, 1944, at the hour of 1 30 P M of said day as a date for hearing thereon, said hearing to be held at the Courthouse in Garner, Iowa.

All objections to said report must be in writing and filed with the County Auditor at Garner Iowa, at or before the time set for such hearing.

Said hearing and proceedings will be conducted in accordance with Chapter 353, Code of Iowa, 1939, and amendments thereto.

Please take notice and govern yourselves accordingly.

Published by orders of the Board of Supervisors, Hancock County, Iowa.

Witness my hand and seal this 19th day of January, A. D. 1944.

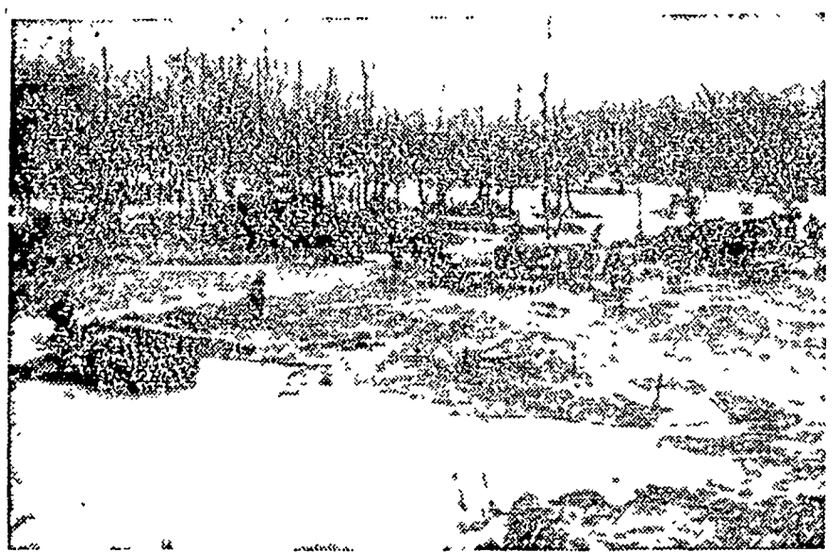
WEEKLY NEWS ANALYSIS

Congress Debates Labor Draft Issue; Red Army Forges Deeper Into Poland; FDR Asks 100 Billion Wartime Budget; House Group Studies Prohibition Bill

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Released by Western Newspaper Union.



Italy—Torrential rains have turned Italian battlefront into goo, slowing Allied drive. (See: Europe.)

WAR BUDGET:
100 Billion Asked

Assuming that fighting will continue throughout the fiscal year ending in June, 1945, President Roosevelt asked congress for an appropriation of $100,000,000,000 to cover the period.

At the same time, the President asked congress to prepare for demobilization by (1) planning public works; (2) providing mustering-out pay to servicemen; (3) expansion of the social security program to tide over the labor force during the reconversion period, and (4) study ways of boosting foreign trade.

Declaring that war spending since 1940 will have swelled to $397,000,000,000 by 1945, the President forecast a national debt of $258,000,000,000 by next year. Such a debt, the President said, would require annual interest charges of $5,000,000,000, which could best be paid with a national income of $125,000,000,000 annually, far over the pre-war level.

To help whittle the debt, the President urged a minimum of $10,000,000,000 in new taxes this year, coupled with present collections of $40,000,000,000.

Ask Labor Draft

No sooner had President Roosevelt's message to congress calling for a labor draft been read, than Sen. Warren Austin (Vt.) and Rep. James Wadsworth (N. Y.) introduced legislation making all men between 18 and 65 and all women between 18 to 50 subject to compulsory service.

As congress moved toward consideration of the controversial labor draft issue, the senate went toward approval of most of its new $2,000,000,000 tax bill, far below the administration's demand for $10,000,000,000 of new revenue. The senate also voted to keep the present social security tax rate at 1 per cent each for employer and employee, instead of doubling the rates as automatically provided by the original law.

In introducing his labor draft bill which would enable the government to place people in employment, Senator Austin said approximately 6,000,000 4-F's, all men over 38, and an estimated 21,000,000 women would form a huge workers pool which could be channeled where needed into industry.

EUROPE:
Biggest Loss

Fighting through swarms of Nazi fighter planes which pressed home their attacks in close ranks, and running into new rocket antiaircraft fire that threw up shells "as big as a house," 700 U. S. Liberators and Flying Fortresses protected by almost 500 light combat escorts smashed hard at German airplane factories in southwestern Germany.

As the big U. S. aerial fleet fired the machine shops and assembly plants with a record loss of 64 planes, other Allied bombers struck at the big Greek port of Piraeus outside of Athens, supply center for German strongpoints in the Aegean sea, guarding the near eastern water route to the Balkans.

Although heavy weather turned the ground into goo, U. S. doughboys beat down Nazi mountain posts in southern Italy in their advance on Cassino, key to the 70-mile road to Rome. In bearing down on Cassino, doughboys were overrunning hill positions to the north, west and south, giving them a commanding view of the town which lies in a plain astride the prized highway.

RUSSIA:
Advance in Poland

Gen. Nikolai Vatutin's First Ukrainian army bit deeper into prewar Poland in hard fighting as other Red units maintained heavy pressure on the embattled Nazis in other sectors of the Russian front.

Gen. Vatutin

The Reds continued bearing down on the Nazis in the great Dnieper bend, where their persistent attacks gradually whittled down a long stretch of country which the Germans held to prevent the Russ from cutting through it and trapping 650,000 of their troops to the south.

As General Vatutin's forces pushed forward in prewar Poland, the Polish government-in-exile considered Russia's proposal for a postwar adjustment of the old eastern border between the two states. Under the proposal, Russia would keep the former Polish provinces of White Russia and the Ukraine, while Poland would be compensated by taking over Eastern Prussia.

"Use Your Bible to Battle the Bottle."

"Two Resolutions: I Will Keep Sweet and I Will Not Drink Alcohol."

As leaflets containing these slogans were passed out by ardent prohibitionists, a house judiciary subcommittee opened hearings on a bill by Rep Joseph Bryson (S. C.), for limiting alcoholic content of beverages to 1½ per cent for the duration.

Heading the Dry delegation was Mrs. Ida B. Wise Smith, president of the Women's Christian Temperance Union. Mrs. Smith asserted that hangovers from week-end drinking sprees result in war plant absenteeism, and she further said that liquor manufacture channels grains, sugar and other products from food uses.

Opposing the prohibitionists, Representative Forand (R. I.) described himself as a teetotaler. But, said he, that "does not give me license to tell my neighbors what they should eat and drink."

SOUTHWEST PACIFIC:
Batter Forward

As U. S. doughboys battered their way slowly through Jap jungle defenses in New Britain, other Yankee units pushed southward for a junction with Australian troops fighting up the eastern coast of New Guinea.

While Yank and Aussie alike ploughed through the Japs' strong brush and mountain cover, U. S. bombers continued their raids on the enemy's central Pacific Marshall islands, guarding the ocean highway to the orient. Airdromes and shipping in the cluster of coral islets were battered by roaring Liberators.

Following strengthening of their beachhead at Arawe in southwestern New Guinea, doughboys moved inland against the Japs after heavy artillery bombardment, while to the north, other U. S. elements gradually were pushing the enemy back from around the captured airdrome at Cape Gloucester. In eastern New Guinea, Jap bases behind U. S. positions were bombed heavily to slow movements against doughboys fighting to join hands with the advancing Aussies to the south.

HIGHLIGHTS . . . *in the week's news*

PICKLES: In the midst of an all-time-high demand for pickles by the armed forces and civilian sources, directors of the National Pickle Packers association, at a wartime meeting in Chicago, forecast a shortage of pickles for civilians unless farmers increase cucumber acreage in 1944. Available pickle stocks are reported to be 1½ million bushels less than a year ago.

CHINCH BUGS: The prolonged drouth is adding a new danger in the corn belt—the threat of a much larger number of chinch bugs next season. Dry fall weather is favorable to the pests, as they can go into hibernation with small losses. An open winter also preserves many of the insects, who would ordinarily be killed by cold, it was said by entomologists.

CIVILIAN GOODS:
Hold Back Steel

Although curtailment of orders has resulted in a reduction of steel operations, the War Production board refused to lift its ban on use of the metal in 646 civilian items, except in special instances to improve substitutes.

WPB's decision, it was said, was based on:

1. The army and navy's position that limitations on the use of materials should not be removed until war needs are clear;
2. WPB's conclusion that expanded civilian production would result in shortages of coal, petroleum, lumber for crating, packaging paper and transportation, all of which are not sufficient to even meet war requirements.

Because of a typographical error by the OPA, Monnett, Mo.—population 4,099—became the corn capital of the U. S. A.

While the corn top was set at $1.16 for Chicago, it stood at $1.19½ in Monnett, so the latter town had no difficulty getting 25 carloads of the grain, or 2,000,000 bushels.

HIGHWAYS:
Urges U. S. Network

Construction and improvement of 34,000 miles of roads which would provide employment for 2,000,000 workers, was recommended to congress by President Roosevelt after more than two years of study by a national interregional highway committee.

To cost about $750,000,000 annually over a period of years, the plan embraces creation of a system of country and urban roads that would connect every part of the nation.

In general, the new system would follow routes of existing federal aid highways, with costs shared equally by local, state and U. S. government agencies. Quick congressional action was asked to help acquire land, draft detailed plans and accomplish other preliminary work.

FATS AND OILS:
Output Larger

Keeping up with increased demands, fats and oils output in the U. S. for 1943-'44 will approximate 11,200,000 pounds to top last year's production of 10,600,000 pounds.

Despite an easing of the supply situation for the current year, it was pointed out that stocks might be severely drained to fill needs abroad in case of an Allied victory in Europe in 1944.

Soybean production for the 1943 season was set at 187,000,000 bushels, for peanuts 2,500,000 pounds, and for cottonseed 5,500,000 tons.

Because of decreases in lard and grease output, overall fat and oils production for the 1944-'45 season should drop below this year's figures.

STRANGE LETTER:
Hopkins Involved

While Harry Hopkins was recuperating in the Bethseda naval hospital, C. Nelson Sparks appeared before a Washington, D C, grand jury and turned over a letter which he alleged proved that the President's No. 1 advisor was in close contact with Wendell Willkie, G. O. P. leader.

C. Nelson Sparks

Former mayor of Akron, Ohio, when Willkie was a utility lawyer there, and manager of Frank Gannett's campaign for the Republican presidential nomination in 1940, Sparks first published the letter in a book, in which he assailed Willkie's methods in the G. O. P. national convention.

In the alleged letter, Hopkins was to have written to a prospective Democratic senatorial candidate in Texas, promising that he could get Willkie to swing Republican support over to him in the primary election. Claiming the letter was a forgery, Hopkins asked the FBI to investigate the matter.

NAZI PRISONERS:
Suicides Reported

In the Nazi war prison compound at Concordia, Kan., four stern-faced German officers escorted one Capt. Felix Tropschuh to a room with a bed, a chair, a table and a rope. While two of them stood outside for 30 minutes, Tropschuh hanged himself.

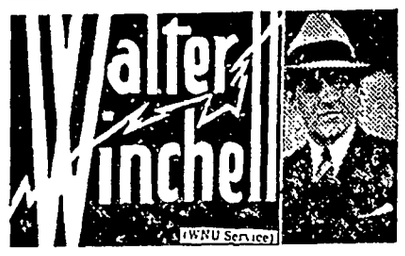
Investigation revealed that the prisoners had set up their own court to try Tropschuh for anti-Hitler talk and exposing a plot for escape, and, having found him guilty of disgraceful conduct for a German officer, left him with the traditional Prussian alternative of killing himself.

Another Nazi suicide at the camp was 39-year-old Franz Kettner, who took his own life when he feared violence because of the discovery of his belief in a free Austria.

READY FOR VETS

The veterans' administration is expanding its facilities to take care of the soldiers of this war. Hospital capacity is being increased to 300,000 beds. Six months ago it was around 80,000. The financial departments are also being reorganized to handle the immense volume of disbursements of all sorts that will be necessary.

The department is still paying pensions to the widow of a War of 1812 militiaman, and to 81 widows of Mexican war veterans.



George MacDonald, who just sold the Roney-Plaza Hotel, says he read it here, but we don't recall it. The difference between Palm Beach and Miami Beach—is the difference between the social register and the cash register.

At the Newspaper Guild Canteen a hostess was dancing with a Coast Guardsman. When the music stopped, he pulled out routine 77B and said: "Now let's sit down and talk about you." They sat and he put an arm around her.

"I get it," she said, "I see you talk with your hands."

"Honey," he grinned, "I'm only whispering now."

Mrs. Albert Einstein visited the astronomical observatory atop Mt. Wilson and asked about the giant telescope. "We use it," she was told, "to discover the shape of the universe."

"My husband," said the famed scientist's wife, "does the same thing on the back of an envelope."

A Major told this one to the cadets at Yale the other day. He said General Giraud and Lt. Gen. Clark were discussing the best possible places for setting up staff headquarters in combat zones . . . The youthful Clark recommended a certain distance from the firing lines, but the older Giraud shook his head and said: "Too far back. I like to be right up there on the line."

"But, sir," said Clark, "you were captured twice."

Shortly after the Sullivan parents of Waterloo (Iowa) learned of the loss of their five sons aboard the cruiser "Juneau," they visited Washington, where they volunteered to do anything to complete the job their boys had started. A tour of defense plants was arranged.

"Mom" Sullivan (after a lifetime in Waterloo) suddenly found herself a lady of leisure. There was plenty to keep her busy (with ten and twelve defense plants scheduled), yet she missed the little tasks of cleaning the house, getting breakfast, etc.

One morning when the Navy Lieutenant (who accompanied them) called at her hotel room in Chicago he found Mom making the beds. She confessed she had been tipping chambermaids (throughout the country) for permitting her to make the beds herself. "I just wanted to keep my hand in," she said.

My favorite gag dealt with funny man Tait (Tait's motoring act) who dreaded coming to the U. S. from London where he was always a riot. Martin Beck persuaded Tait to come here—assuring him he'd click. To get Tait used to American audiences they booked him first at Yonkers, N. Y., where he laid a frightful omelet at his first appearance.

Next afternoon (sauntering along the main street there) Tait paused at a fish store window. As he studied a huge dead mackerel, with eyes staring blankly and mouth wide open, Tait exclaimed: "'Eaven's above! Thet reminds meh! Hi 'ave a matinee!"

Will Rogers in 1927: The best way to describe Russia is, Russian men wear their shirts hanging outside their pants. Well, any nation that don't know enough to stick their shirt-tail in will never get anywhere. I am the only person that ever wrote on Russia that admits he don't know a thing about it. On the other hand, I know as much about Russia as anybody that ever wrote about it.

Raymond Paige relays it via a pal in London. It's about the Air Corps officer assigned to a desk job. He objected to fliers getting extra pay for flying time. "Why should you get more?" he barked at a Texas pilot. "We're all in this war together!"

"I know," drawled the Texan, "but who ever heard of two desks crashing head-on?"

Variety, discussing the chilly reception given actors in Pittsburgh, recalls when Katharine Cornell appeared there in "Three Sisters." Some in the audience complained that they couldn't hear much of the dialog. Told this (between acts) by the stage manager, Miss Cornell retorted: "Tell the audience we can't hear them either!"

Much the same thing happened recently when "Blithe Spirit" played there. Night before it opened, some of the troupe put on a show for wounded soldiers at an army hospital. After the premiere, Clifton Webb wired his agent: "Last night we played to the wounded; tonight we played to the dead!"

Van Boven, one of the funnier comics (always a riot at the Palace on Broadway), used to warn others about the opening matinee audience at North Adams, Mass. "They sit down front," Van used to scream, "and devour their young!"

Autobiography: A Broadway booking agent (noted for his rodent-like past) was asked why he hired an assistant noted for being even rattier.

"Oh," was the reply, "he's the heel I used to be."

Washington, D. C.

PLENTY OF TRAINED PILOTS

General Arnold did not say so in his report to the secretary of war, but the tremendous job of expanding air forces personnel is almost finished. He might have penned a little footnote, saying, "We have pilots running out of our ears."

No cadet training bases have been closed as yet, but the army will close approximately one dozen schools for training pilots between now and April. Air forces officials find that the elaborate program has now produced enough competent navigators and pilots to finish the job in both theaters of war.

The tip-off to this is found in recent changes in policy of the transport command.

Army transport command, which does non-combat flying all over the world, has always preferred to take pilots from the open market, usually from the airlines. These pilots are specially trained in safe, efficient transport flying, as distinguished from the combat type of training in the army air forces.

Recently, however, transport command has been forbidden to take on civilian pilots, and has been forced to accept combat-trained pilots from the air forces.

* * *

MIRACLE WORKERS

Miracles happen, even in Washington. Farm Security administration, heir to all the grief of Rex Tugwell, and long confined to the Capitol Hill dog house, is now emerging into the warm sunlight of congressional favor. A simple matter of southern friendship did it.

The miracle resulted from the fact that Frank Hancock and Harold Cooley were a couple of congressmen from North Carolina. Hancock, now out of congress, has just been appointed head of Farm Security. Hence, Congressman Cooley, formerly FSA's deadliest critic, is now a supporter and friend.

All during the past year, FSA operated on a shoestring. Its funds were cut, and congress frowned on almost everything it tried to do. But now, a report of a house agriculture subcommittee which Cooley heads is about to give FSA a clean bill of health and recommend that it be continued as a permanent agency.

The report will not whitewash Mr. Tugwell or any of his works. In fact, it will sharply criticize all the old resettlement projects (already in process of liquidation). But it will give strong approval to two other FSA programs—rehabilitation and tenant purchase.

Also, there will be a proposal for combining the lending programs of Farm Security with two types of Farm Credit administration loans, with a new corporation to handle the joint lending activity.

* * *

EXIT BOMBSIGHT

There is every indication that the U. S. bombing to which the Japs will be subjected in 1944 will be without benefit of bombsight.

The Norden bombsight has been publicized as the great secret appliance which will help us win the war. It has been highly successful in the European theater, but in the Pacific it has actually become excess baggage.

Supply officers in Washington are still assigning bombsights to planes for Pacific action, but fliers are urging that the device be left at home. They have found that the most successful air attack in the Pacific is the low-level tree-top bombing, in which medium bombers sweep in on the target and let the bombs drop when they are so close they can't miss. This is better than any precision instrument ever invented.

Also, it is less dangerous than high-altitude bombing. Coming in low, the planes avoid detection by the enemy, whereas the high-altitude planes are caught both by instruments and vision.

The tree-top flying requires greater pilot skill, also the use of delayed-action bombs so that the plane can get away from the target before it blows up under the plane.

This is the kind of work that was done in the famous battle of the Bismarck sea, in which every Jap ship was destroyed. It was also how the Nazis sneaked up on Bori and wreaked havoc with Allied shipping.

* * *

MERRY-GO-ROUND

¶ The budget bureau several times has offered Cordell Hull all the money he needs for the state department if he will only clean house and get in some good men.

¶ The A. F. L. executive committee will finally vote John L. Lewis' mine workers into the A. F. L. at this month's meeting in Florida.

¶ Harold Ickes and Henry Wallace, who didn't love each other too much when Wallace was secretary of agriculture, have made up. Jesse Jones (not love for him) brought them together.

¶ Instead of cutting down red tape, the war department is increasing it. It opened the new year by requiring reception clerks at all entrances of the giant Pentagon building to ask no less than 14 questions of each visitor, and write down all answers on a pink, blue or yellow filing card. Guess the army thinks we are losing the war, not winning it.

Plenty of Milkweed

There are approximately 1,9[illegible] varieties of milkweed.

HARSH LAXATIVES UNNECESSARY?

Millions Find Simple *Fresh Fruit Drink* Gives Them All the Laxative Aid They Need

Don't form the habit of depending on harsh, griping laxatives until you've tried this easy, healthful way millions now use to keep regular.

It's fresh lemon juice and water taken *first thing* in the morning—just as soon as you get up. The juice of one Sunkist Lemon in a glass of water. Taken thus, on an empty stomach, it stimulates *normal* bowel action, day after day, for most people.

And lemons are actively *good* for you. They're among the richest sources of Vitamin C, which combats fatigue, helps resist colds and infections. They supply vitamins B_1 and P, aid digestion and help alkalinize the system.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

NEGLECTED COLDS INVITE SERIOUS DISEASE

Don't just ignore a cold! They're treacherous—tricky. Rest—avoid exposure. And for prompt, decisive relief from usual cold miseries, take Grove's Cold Tablets. They contain eight active ingredients—a multiple medicine. Work on all these symptoms of a cold at the same time. . headache—body aches—fever—nasal stuffiness. Take Grove's Cold Tablets exactly as directed. Accept no substitutes. Get Grove's Cold Tablets—for fifty years known to millions as "Bromo Quinine" Cold Tablets.

Save Money—Get Large Economy Size

GROVE'S COLD TABLETS

SNAPPY FACTS ABOUT RUBBER

Inflatable rubber barges for the U. S. Navy are "cured" at B. F. Goodrich in a steam vulcanizer that is 42 feet long, 10½ feet in diameter, weighs 35 tons and has a door that alone weighs 10 tons. It's a record for size and turns out the 25-foot barges at a rate of one every 50 minutes.

Synthetic rubber plants already completed and those scheduled for construction will have an annual rated capacity of 850,000 long tons. Before the war the United States consumed about 600,000 long tons of rubber annually. Now, however, our supplies must be shared with the United Nations.

owerful Allies Aid Farmer in Battle Against Bugs, Infection and Erosion

periment Stations, ounty Agents Fight Crop Destroyers.

ow the farmer fares in his r-ending battle against in- pests, weather, disease, ion and the thousand and other hazards farm life is to, will largely determine well he succeeds in meeting le Sam's ever-increasing for more production of ls, dairy products, fibers and

uckily, the farmer has his own y, navy, marine corps, coast rd, and air force to battle and quish his enemies. Who com- e these armed forces? The agri- ural experiment stations and the ension services of his state land nt colleges.

he way these services help the mer to combat any production ubles old or new that come his y, is described by M. N. Beeler, the current issue of Capper's rmer.

"The trouble which meets a man any dawn or in the dead of night y be as old as Bang's disease rought to America by Cortez in 1) or Hessian fly (introduced into colonies by German hirelings ring the Revolution)," writes Mr. eler. "It may be as new as late ato blight in the Red river val- , or the attack of European corn rer in Illinois. Trouble may be as rsistent as bindweed, smut, codling oth or boll weevil, as complicat- as malnutrition originating in poor soil, as evident as a grass-hopper scourge, as mysterious as baby pig disease, as commonplace as labor shortage, as rare as foot and mouth disease, as little as ants in the kitchen, as big as a complete management and production program."

Assistance Is at Hand.

But whatever the difficulty, help in most cases is no farther away than the county extension agent, or the land grant college, Mr. Beeler points out. Potentialities for trouble can be appreciated when such an every-day animal as the hog is subject to more than 60 afflictions. Poultry may succumb to any one or a combination of 89. The Indiana experiment station lists 18 common enemies of corn within that state in the category of diseases. And an Ohio report credits these same diseases with a 19,000,000-bushel yield reduction in a single year. This damage is in addition to losses from borers, chinch bugs, ear worms, grasshoppers, aphids, root lice and a host of other insects.

Continuing experimental projects are reported by the Arkansas station in combat with a few enemies of cotton, such as wilt, boll weevil, seed-destroying diseases, aphids, leaf worms, boll worms, red spider, flea hopper, root rot and just plain soil poverty. Any sheepman, says Mr. Beeler, can count a dozen profit and life-taking afflictions of his flock, but there are at least 36 miscellaneous diseases and 40 internal parasites besides foot rot, sore mouth, scab, ticks, pregnancy and lung diseases.

Furthermore, the U. S. department of agriculture year book for 1942 devotes 172 pages to diseases and pests of cattle and explains there are 70 or more species of bovine infesting tapeworms and roundworms. Books have been written about the ailments of horses and mules. The insect, fungous, virus and nutritional troubles of crops, plants and foods are legion.

How the army of scientists from the land grant colleges has fought and won battles for the farmer against these and other adversaries forms a fascinating tale.

Make Seed Germinate.

When Iowa farmers reported sweet clover seed didn't germinate properly, the state agricultural experiment station discovered the cause was hard seed and made a scarifier that corrected the trouble. That was 30 years ago and was the forerunner of many more modern devices and methods, the most recent of which is a process by the Fort Hays, Kan., station for "waking" buffalo grass seed.

Then there was that matter of "Laryngot racheitis" down in New Jersey. Sounds professorish, doesn't it? But it has an earthy connotation to any poultryman who has lost 20 to 60 per cent of his flock. The New Jersey station found an inoculation that protects the birds from this disease.

A shortage of spraying machinery threatened the crop of certain Pennsylvania potato growers in 1942. The state college extension service met that threat by organizing 50 spray rings to serve 1,500 farms and protect 10,000 acres. An average of 30 farmers used each machine. Increased production was estimated at 1,376,000 bushels.

So the story goes. One of the troubles that plagues farmers on the plains is "poisoning" of cattle by wheat pasture. The Oklahoma station investigated and recommended a remedy which included feeding a little dry roughage. The Kansas college not only discovered a successful treatment for black-leg in calves, in 1914, but through extension it so increased the use that dosage costs declined from 50 to 10 cents. This station likewise introduced copper carbonate treatment of bunt smut of wheat, sorghums and millet.

When the New England coastal hurricane damaged 10 to 75 per cent of trees in farm orchards, the extension service of Rhode Island, Connecticut and Massachusetts worked out a rehabilitation program that saved thousands of trees.

Control Fever Tick.

Colorado potato growers were faced with an infestation of bacterial ring in 1938. The station found a remedy. Cattle fever tick had prevented development of cattle raising in Louisiana up to 1936. Extension workers and animal husbandry researchers led the fight to stamp it out. Missouri had inaugurated in 1888 the investigation in cooperation with Texas which made control of Texas fever tick possible. A mysterious livestock disease, observed by Marco Polo in China more than 600 years ago, which afflicted army horses at Fort Randall, Neb., was explained only in 1931. The trouble is caused by feed grown on soil containing selenium The South Dakota station has announced control and remedies

The list of achievements is almost endless Substitutes for pyrethrum have been produced by the Delaware station. Beginning in 1900 the West Virginia station worked out the fly-free date for controlling Hessian fly. Tennessee discovered and introduced cryolite to replace scarce arsenicals as an insecticide. Montana instituted the feeding of iodized salt during pregnancy to prevent goiter losses of new-born pigs, lambs, calves and colts. Nebraska checked the potency of commercial serums offered in control of swine erysipelas, with resultant standardization of effective protection.

By breeding a wilt-resistant cotton strain, the Alabama station saved the cotton-growing industry of the southern part of the state. Purdue experiment station in Indiana has produced a new Hessian-fly resistant wheat. New York has announced a new organic spray which kills late fruit blooms, materially reduces the hand labor of thinning, and induces annual bearing in varieties which normally produce fruit every other year.

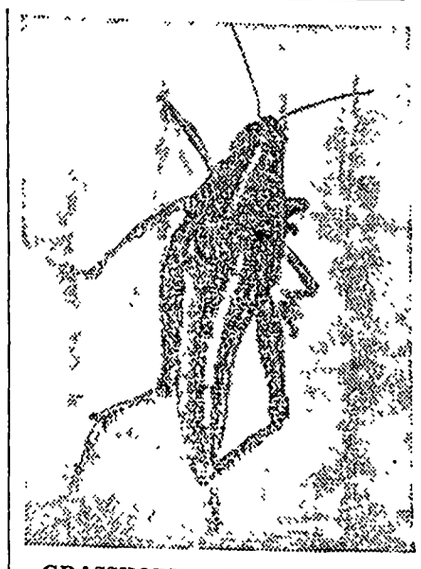
Develop Borer-Resistant Corn.

The Ohio station has demonstrated that milk fever can be greatly reduced by feeding four ounces of irradiated yeast daily to cows for four weeks before and one week after freshening. Another Ohio station project was the development of borer-resistant corn hybrids.

Experiments at Pennsylvania and elsewhere disclose that fowl paralysis, which caused a $43,000,000 loss in 10 poultry states one year, can be controlled by selective breeding and culling.

But lest any farmer get the notion that the scientific research job has been completed and that he can get along without it, Mr. Beeler suggests that he remember just one menace—wheat rust.

"Ceres was a stem rust resistant variety distributed by North Dakota in 1926," he points out. "By 1933 it occupied 5,000,000 acres. But certain physiologic races of rust increased and laid it low. Then the Minnesota station brought out Thatcher in 1934. It spread to 14,500,000 acres in the United States and Canada by 1940. Now Thatcher is on the way out, because of susceptibility to leaf rust. But the Minnesota station announces New-hatch, outyielding Thatcher by 36 per cent for three years, to be released in 1944."



GRASSHOPPERS and locusts are among the worst scourges in many farming regions.

EROSION, though slow and unspectacular, lowers land productivity tremendously. This Kansas field, too steep to terrace, was planted with corn in 1942. There was no protective covering sown on it. Wind and rain scraped another layer off the already thin topsoil in the spring of 1943. Land like this should be in pasture.

CHINCH BUGS ruin millions of bushels of corn every year, as do cutworms, army worms, and other pests, many of which are difficult to control.

Floods and Drouth Destroyed Crops on 13½ Million Acres Last Year

Latest reports from the U. S. department of agriculture show that growing conditions during the past year were probably a little better than average, despite floods throughout the Mississippi basin in May and June and severe drouth in Arkansas and the surrounding states during the summer, and in the region extending from New Jersey into Virginia.

Total crop area lost was about 13,500,000 acres, government figures show, nearly 2,000,000 more acres than were lost in 1942.

Pastures and most late crops suffered from the hot, dry weather during July and August, although June produced enough dry weather east of the Mississippi to permit farmers in most areas to catch up with late planting and haying.

Showers in the corn belt and the eastern half of the cotton belt prevented serious damage from the drouth there, and reports show that the warm weather enabled nearly all of the threatened corn and soybean acreage to mature before frost. The dry summer and fall also helped most farmers to complete their gigantic harvesting job.

The 1943 harvest totaled about 347,500,000 acres, exceeding 1942 by nearly 3 per cent or more than 9,000,000 acres despite wet weather that prevented planting of some acreage, losses from drouth, and flooded acreage that could not be replanted.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

JESUS FEEDS THE MULTITUDES

LESSON TEXT—Mark 6:35-44; 8:1-9.
GOLDEN TEXT—I am the bread of life: he that cometh to me shall never hunger; and he that believeth on me shall never thirst.—John 6:35.

Hungry! That word describes the crying need of the greater part of the world's population. Men who have vaunted themselves because of their ability and ingenuity have brought the nations of the earth into such awful confusion that even God's abundant provision cannot reach the needy ones.

God is concerned about man's physical need just as truly as He is about spiritual needs. This story brings Christianity into action on a level that all will appreciate—the need of food for the body. It works there as it does everywhere.

The supply of every need of man is God. "My God shall supply all your need according to his riches in glory by Christ Jesus" (Phil. 4:19). Countless Christians have found it to be true that we may trust God—completely—and for everything.

The stories of the feeding of the two groups of people show the wrong and the right attitude toward man's need. In two approaches to the problem the disciples were wrong. Then Christ showed them the right way.

I. They Can Take Care of Their Own Need (6:35, 36).

"Send them away"—that was the plea of the disciples when the multitude of those who had followed Him became hungry. The people were there because they were interested in Christ. They had come in a hurry (v. 33) and had not brought food. The problem was on the disciples' hands, and they sought the easiest way out. Let them shift for themselves—"Send them away."

The church has followed their example in dealing with the social problems of the people down through the years. The result is that being denied fellowship, comfort, and help by a church which was too busy building up a vast organization or a beautiful order of worship, the common people have responded to the appeal of political leaders who have provided a substitute for what the church should have given them.

When Jesus put upon them the direct responsibility to feed the people, the disciples changed their "slogan" and said:

II. We Should Like to Help, but We Cannot (6:37).

Reckoning hastily on what a small boy had brought for his lunch (trust an alert boy to be ready!), the disciples soon demonstrated that it was impossible to feed this great throng. (See similar reasoning in Mark 8:4).

Logic is such a devastating thing when it operates apart from faith in God. They were absolutely right in their reasoning and in their calculations, but they had forgotten the one factor that really counted. Jesus was there, and Jesus is God, and God is omnipotent.

As we face the need of the world now and after the war, we wonder how the peoples of other lands can be fed without depriving our own land of what it needs. It is a great problem, and we ought to pray for those who must work with it.

But let us not forget that all that we have comes from God, and that He is able to do "exceeding abundantly above all that we ask or think" (Eph. 3:20). The Christ who multiplied the loaves and fishes is our Living Lord today, and ready and able to do it again.

III. Jesus Said, "I Have Compassion on the Multitude" (6:38-44; 8:1-9).

He started right. Instead of shutting His heart against the tender desire to help, He let His love for the people control. Then instead of magnifying the difficulties, He multiplied the provisions. And lo, there was enough for all, and to spare.

"He commanded . . and they did all eat" (vv. 39, 42). When God speaks, all the limitations of the finite disappear, and the needs of men are fully met—with "twelve baskets full of fragments" left over!

Note the orderly manner in which our Lord met this situation. Five thousand men, with women and children to swell the throng, were seated on the grass. Jesus took the loaves and fishes and blessed them. You who forget to return thanks at the table, notice that quiet and meaningful act. Then He broke the loaves and divided the fishes. No doubt they were multiplied as the disciples passed them out to the people.

God is able to do that very thing even in our day. Perhaps not in just the same manner, but surely those who serve Him have marveled as they have seen that "little is much when God is in it." Let those who labor in difficult places with limited resources take heart—and trust God.

Note the care with which the fragments were collected for future use. It took this war to teach America how shamefully wasteful it has been.

SEWING CIRCLE

Two Pretty Blouses

BLOUSES worthy of your finest hand touches are presented. They have the new touches—ruffles, interesting necklines, drawstrings and bows!

* * *

Barbara Bell Pattern No. 1908 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Corresponding bust measurements 30, 32, 34, 36, 38, 40 and 42. Size 14 (32) ruffled neck blouse with long sleeves requires 2¼ yards 39-inch material. 1¾ yards eyelet embroidery. Drawstring neckline blouse, short sleeves, requires 1¾ yards.

For Warmth, Comfort

GET the greatest good from this pajama pattern by making it twice—once in flannel or broadcloth as a sleeping suit, once in flannel or corduroy as a lounging suit. Both ways it will help keep you warm this winter.

Barbara Bell Pattern No. 1903 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Corresponding bust measurements 30, 32, 34, 36, 38, 40 and 42. Size 14 (32), with long sleeves, requires 5⅜ yards 35 or 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

5 WARS

Smith Bros. has served the public since 1847. In that period America has fought five wars. Only during wartime has there ever been any shortage of Smith Bros. Cough Drops. Our production now is war-reduced but we're distributing it fairly to all. Still only 5¢. *A nickel checks that tickle!*

SMITH BROS. COUGH DROPS
BLACK OR MENTHOL—5¢

TRADE MARK

SORETONE
soothes fast with
COLD HEAT* ACTION
in cases of
MUSCULAR LUMBAGO OR BACKACHE
due to fatigue or exposure
MUSCULAR PAINS
due to colds
SORE MUSCLES
due to overwork
MINOR SPRAINS

YOU BET you show it when those cruel pains shoot through arms, neck, back or legs. *Do something.* Rub on SORETONE Liniment. Get the blessed relief of Soretone's *cold heat* action. Quickly Soretone acts to:

1. *Dilate surface capillary blood vessels.*
2. *Check muscular cramps.*
3. *Enhance local circulation.*
4. *Help reduce local swelling.*

Developed by the famous McKesson Laboratories, Soretone is a unique formula. Soretone contains methyl salicylate, a most effective pain-relieving agent. For fastest action, *let dry, rub in again.* There's only one Soretone—insist on it for Soretone results. 50¢. Big, long-lasting bottle, $1.

MONEY BACK—
IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

KLEMME LOCALS

The Ben Ridder and Ben Riemer families spent Sunday at the parental Fred Gates home at Clear Lake.

Sgt. and Mrs. Asa Arnold left Saturday for a visit with her folks at Traer. Sgt Arnold left Monday from Ames for his duties at Fort Dix, New Jersey, after enjoying a furlough visiting with his parents, Mr and Mrs Fred A. Arnold and other relatives in this community Mrs Asa Arnold returned to her teaching position at Ames.

A large portion of Clear Lake was open Monday morning following the mild weather of the past week. Clear Lake people are beginning to wonder if a second opening up is to occur this year. The lake froze over last Nov. 15 and, in the early part of December, opened up again, an unusual phenomenon.

Mrs. Perry Masterson of Des Moines came the latter part of the week for a short visit at the Henry Jost home. Sunday she returned to Des Moines, taking her daughter Diane, who had been visiting here for several weeks, with her. She was also accompanied by Mrs. Fred Nagel who went to Des Moines for a visit with her daughter, Mrs. Wooten.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

E. F. Jacobs was at Mason City on business Monday afternoon.

W. C. Keraus was at Mason City Thursday and Friday attending an Insurance underwriters convention.

Ernest "Stub" Lewis was absent from his shop several days the past week because of illness.

Mr. and Mrs. Verner Stromer and Mrs. Aaron Stromer were Mason City visitors Wednesday.

Joe Hejlik of Garner, was in Klemme on business Saturday afternoon.

Mrs. F. C. Byrnes of Dayton, Ohio, came Saturday morning for a few weeks visit with her parents, Mr. and Mrs. Ira Overholt.

Mr and Mrs F A. Arnold and Sgt. and Mrs. Asa Arnold were guests for dinner on Friday evening at the Harry Gibbs home.

Mr. and Mrs. Clair West and son Peter of Des Moines, came Sunday and visited until Tuesday at the Sumner Trumbell home.

Pfc Clarence Kluckhohn, who is home on a furlough, went to Des Moines Monday for a few days visit with friends.

Verner McLaughlin and family of near Belmond were dinner guests Sunday at the parental Mrs Daisy Lemke home.

Mrs. John Lemke returned home from the hospital last week and is greatly improved in health and is feeling fine.

Miss Emma Cutshall returned home Wednesday from the hospital and is making a good recovery from her illness.

Mrs. Emil Blumer came home Friday from the hospital and is reported to be making a good recovery from a major operation.

Dick Pannhoff of near Forest City, was in Klemme on business Tuesday forenoon and while in our fair city called at The Times office to renew his subscription.

Miss Thelma Chambers, who teaches at Britt, spent the week end with her parents, Mr. and Mrs. J. A. Chambers and took in the basketball tournament.

Pvt. Melvin Coobs of Lake Forest, Illinois, came Sunday morning to spend his furlough visiting with his parents Mr. and Mrs. Benn J. Coobs and family.

Pfc. Clarence Kluckhohn of Fort Bliss, Texas, arrived in Klemme Saturday morning to spend a furlough visiting with his parents, Mr. and Mrs. C. E. Kluckhohn.

Mr. and Mrs. Lester Stille drove to Des Moines Sunday afternoon to bring their daughter Ruth home for a short vacation while she is recuperating from illness

Ewald Grosshuesch, who has assisted at the Wilson Drug Store for several years, Saturday resigned his position to work at the Swanson Hatchery.

Sunday dinner guests at the home of Mr .and Mrs. John Pannhoff were Mrs. Grace Pannhoff and son Dick, of Forest City; and Bill Pannhoff and family of Miller.

Mr. and Mrs. Ira Overholt returned home Saturday morning from Los Angeles, California where they had visited with their daughter and family

Mrs. Arthur Wellemeyer went to Wesley Saturday for a couple of days visit with her son-in-law and daughter, Mr. and Mrs. Burton Hanson.

Mr. and Mrs. H. R. Gibbs had a birthday dinner Sunday in honor of their daughter, Miss Harriett Gibbs of Mason City, who spent the week end here. Guests were Mrs. C. A. Arnold and Mrs. Adolph Ridder.

Mr. and Mrs. John Lemke visited with Lew Griffen at the Mercy hospital Saturday. They found Mr. Griffen making a good recovery from his accident and was sitting up in a wheel chair.

Mrs. Verner Lewis went to Des Moines Thursday for a visit with her daughter, Cadet Luella Lewis, who is taking Army Nurses Training at the Methodist Hospital. Mrs. Lewis returned home Sunday evening.

Matt Smith and his son, Kermit, who is home from an army camp enjoying a furlough, went to Waterloo over the week end for a visit with relatives and friends. Ruth Smith accompanied them as far as Iowa Falls where she visited.

Mr. and Mrs. Henry Keeper had as their guests at a goose dinner Sunday in honor of their son, Sgt. Raymond Keeper, Mr. and Mrs. Paul Grange of Mason City. Sgt. Keeper expects to leave in about a week for Mississippi to begin training as an A. A. F. pilot.

Miss Doris Reuben, daughter of Mr. and Mrs. Wm. Reuben, who live on a farm five miles west of Goodell, is now employed to assist with work at the Wilson Drug Store. Miss Reuben is staying at the home of her grand parents, Mr. and Mrs. George Albers.

Guests at the Elmer Arnold home on Thursday evening for a six-thirty o'clock dinner were Sgt. and Mrs. Asa Arnold; Mr and Mrs. F A. Arnold; Mrs. Emilie Arnold and Mrs. Martha Bredbenner. After dinner Bruce Arnold showed moving pictures which he had taken himself.

Mr. and Mrs. R. A. Jorgenson entertained at a dinner Sunday in honor of their nephew, Robt. Liebendorfer, wife and son of Davenport. Others present were Mr. and Mrs. Lyle Liebendorfer of Forest City; Mr. and Mrs. Joe Liebendorfer and son Dick; and Mrs. Bessie Starboard of Hampton. Robert has enlisted in the U. S. Army and is awaiting his call for cadet training in the air corps.

Mr. and Mrs. Earl Ruka moved from their farm west fo Goodell Tuesday to the Herman Stille house in the south part of Klemme. Mr. Ruka is the new bookkeeper at the Klemme Cooperative Creamery.

Mrs. A. A. Ridder, of Watertown, South Dakota, who has been visiting relatives here for several weeks, left Monday evening for Oslo for a visit with Mr and Mrs. Fredin and family.

There's War Power in that Barn of Yours

• KEEP IT PRODUCING MORE FOOD FOR FREEDOM

There's power, death and destruction in a French 75 on the battle front. There is Victory in every hand grenade thrown by one of our men. But, did you ever consider the war power of every foot of space in your barn. War power is right—feed, implements, livestock, poultry, grain—just think what this all means. Everything you house in your barn is helping produce more and more food for freedom. The Food for Freedom is the WAR POWER ON YOUR FARM.

The point we want to put across is this. Keep that barn of yours in GOOD CONDITION—NEW ROOF, NEW PAINT are IMPORTANT! Loose boards should be fastened down at once. If new lumber is needed, consider it a good investment. It will make you money in the long run. YOU NEVER SEE AN AIRPLANE HANGAR RUN DOWN. Government sees to it that all repairs are made. They house the planes that are America. Just like the hangar, your barn houses that which is America. Take care of it!

YOU CAN DO YOUR PART BY INCREASING YOUR FARM FACILITIES. REPAIR OR BUILD POULTRY HOUSES AND BROODER HOUSES. COW SHEDS ARE CONSIDERED IMPORTANT. DON'T OVERLOOK ANYTHING THAT MIGHT INCREASE FOOD PRODUCTION!

Northern Lumber Co.

Keith Albertson, Manager Klemme, Iowa

Have you done your part in the 4th WAR LOAN?

YOUR gallant fighting men are giving all they've got to put over the knockout blow. But you must do *your* share to back them up.

Your share in this all-out drive means investing in War Bonds until it hurts. The very least you can do is invest in at least one *extra hundred* dollar Bond (costs $75.) . . . and as *many more* as possible.

Help your company meet its quota. Display the 4th War Loan emblem at home. Do this and you'll help your country . . . help yourself.

Let's All BACK THE ATTACK!

This is an official U. S. Treasury advertisement—prepared under the auspices of Treasury Department and War Advertising Council.

See his large display advertisement in this issue of The Times for full particulars.

Pin-up for Those Not Buying Bonds

Army Signal Corps Photo

This American soldier took refuge under a truck during a Jap bombing raid of our positions on Rendova. A Nipponese bomb, however, had his number on it. Here you see his comrades gently removing his body from under the engine. When you are asked to buy War Bonds think of this picture. *From U. S. Treasury*

LOCAL HARDWARE DEALER TO BE HONORED AT CONVENTION

Mr and Mrs E. F Jacobs left Tuesday afternoon for Des Moines to attend the annual convention and hardware show of the Iowa Retail Hardware Association at the Hotel Fort Des Moines.

Mr Jacobs has been a member of the association for twenty-five years and a few weeks ago received a certificate as a member of the Twenty-five Year Club. At the convention he will be given special recognition and honors and will be presented with a Twenty-five Year Club medal

Mr Jacobs has served as a member of the board of directors of the Association, and has always been active in promoting the growth of the association in the state.

The attendance is expected to reach 2,500, according to reports. The convention will run through Thursday

SHAMROCKS WON CONFERENCE GAME TUESDAY NIGHT

The Shamrocks journeyed to Crystal Lake Tuesday night and returned with two games tucked under their belts.

In the opener the Little Shamrocks had hard going against the Lakers but came up with a 13 to 12 victory.

The Shamrock varsity squad, paced by Greiman who connected for 19 points, won their game 34 to 22. The Shamrocks displayed good tactics and the guard work by Lau and Grosshuesch was outstanding. Besides taking care of the opposing team Grosshuesch scored 8 points and Lau looped in 6 counters.

The Shamrocks go to Ventura on Tuesday night. Ventura has a fast, hard-shooting team and are likely to tax the Shamrocks ability to the limit It should be one of the best games of the season.

AARON WILLE ENLISTS AS AVIATION CADET

Klemme Youth Has Completed All Qualifications

The Des Moines Army Aviation Cadet Examining Board in a special news release to The Klemme Times announced that Aaron D. Wille, 19, son of Mr. and Mrs. C. J. Wille of Klemme, has successfully qualified for training as an aviation cadet with the Army Air Forces.

When called, he will be given 5 months' training in a leading college and will also get dual-control flying instruction. After this he will go on to eight months of full flight training. When graduated as a pilot, bombadier or navigator, he will receive the coveted "wings" of the air corps.

Aaron is a graduate of the Klemme high school and was prominent in athletics and won his letter in baseball

Hancock County Bond Drive Approaches Quota Goal

FLYING INSTRUCTOR

LT. DORANCE S. GRANGE

2nd Lt Dorance S Grange, son of Mr. and Mrs Paul Grange, 216 South Vermont, S. E., Mason City, recently was transferred to Majors Army Air Field, basic pilot school near Greenville, Texas, with duties as flying instructor, according to word received from that field.

Lt. Grange, a former Klemme youth and graduate of the Klemme High School, attended Mason City Junior College and later was a student at State Teachers College, Cedar Falls. He was graduated from the advanced flying school at Aloe Field, Victoria, Texas, and commissioned a 2nd lieutenant last December.

HEMP PLANT AT BRITT WILL SOON BEGIN OPERATING

Roy Schaeer, who is a mechanic at the Britt hemp plant, informs us that the plant will soon be put into operation, and that much of the machinery has been installed

Roy also told of a number of interesting facts about the plant The amount of hemp stacked up around the plant's forty acres is enormous 5,100 loads have been hauled in and stacked, or roughly 12,000 tons That amount of hemp will keep the plant running for at least a year.

Thirteen tons of waterproof paper has been purchased to cover the hemp stacks to preserve the hemp during processing. Woven wire is placed over the paper on the stack tops to protect them against wind and storms.

Three large steam boilers provide steam for power, for the dryers and for heating the building Hurd, the by-product from hemp is used for fuel and is blown into the boilers. Coal is used only for starting. A chief engineer and three assistants look after the maintenance of the plant. About one hundred people will be employed at the plant during processing.

Mr. Schaefer has an all year around job as mechanic and says he enjoys the work and that it is very interesting.

ABOUT THREE-FOURTHS OF QUOTA NOW PURCHASED

Will Go Over The Top If All Pledges Are Fullfilled In County

Chairman H. C. Armstrong late Monday afternoon had reports from all precincts except Klemme and Goodell in his office and was expecting those reports in soon. The pledges in the county are now sufficient, providing the people who signed pledges buy the bonds. If they do, Hancock County will go over the top. Their quota is $772,000.00.

The last report mailed out from the Federal Reserve Bank of Chicago Friday night indicated sales already turned in of $502,666.00. This would leave about $270,000 yet to be purchased. Folks are urged to buy their bonds this week so that the reports will be in Chicago before February 15th.

The following table gives pledges already tabulated by Mr. Armstrong at Britt:

Township or Town	Quota	Signed Pledges
Erin	$40,000	$40,920.00
Magor	$40,000	42,762.50
Britt	$40,000	42,091.25
Orthel	$40,000	43856.25
Crystal	$40,000	38,862 50
Boone	$40,000	42,362.75
Bingham	$40,000	43,225.00
Amsterdam	$40,000	42,150.00
Kanawha	$27,500	30,625.00
Britt	$40,000	53,250 00
Crystal Lake	$8,000	9,368 00
Corwith	$15,000	15,687.50
Woden	$15,000	16,278.00
Garner	$40,000	49,972.75
Klemme	(not reported)	
Goodell	(not reported)	
Twin Lake	$40,000	45,600 00
Liberty	$40,00c	42,250.00
Ellington	$40,000	31,008.75
Avery	$40,000	29,744.00
Garfield	$40,000	42,143 75
Concord	$40,000	40,406.25
Madison	$40,000	38,675.00
Ell	$40,000	40,000.00
Total		**$821,239.25**

TOKEN SYSTEM GOES INTO EFFECT FEBRUARY 27

Effective February 27, 1944, 3 important changes will be made in the two major food rationing programs: Processed Foods and Meats, Fats and Oils.

The Changes:

(1) Each Stamp will have a point value of 10 points.

(2) Tokens will be given as 'change"

(3) Stamps will have a longer validity period, i. e. 12 weeks.

Under the new simplied plan 5 Blue stamps become valid Feb. 27: 3A, 8B, 8C and 8E.

Three Red stamps become valid beginning Feb. 27: 8A, 8B and 8C.

New stamps become valid every 2 weeks. Each stamp worth 10 points.

Allotment: Total of 50 Blue stamp points each month.

Total of 60 Red Stamp points each 4-week period.

Processed Foods will use Blue stamps; Meats, Fats, Cheeses, Canned Fish, Canned Milk, will use Red Stamps. Thus, when marketing for food, the consumer will need only one ration book.

When a consumer pays a marketing bill, she will no longer have to tear out the exact number of stamps to meet her purchase requirements. Instead, she will use as many 10-point stamps as necessary and take the difference, if any, in the new token "change."

Tokens have a value of 1 point, and have no expiration date. They are small coin-like disks.

There will be a change-over period when Brown stamps, Y and Z, in Book No. 3 and Green stamps, K, L, and M, in Book No. 4, remain valid through March 20, 1944. Point values of Brown and Green stamps are not changed. Tokens will be given in change for these stamps.

OBITUARY OF MRS. EMMA WENIG

MRS EMMA WENIG, for 56 years a resident of this community, passed away Friday noon, February 4, 1944, at her farm home in Twin Lake township, after a short illness from a heart ailment

Mrs Wenig was born on a farm near Eitzen, Minnesota, Sept. 4, 1871, the sixth of a family of eight children born to her parents Mr and Mrs William Schoper. Her mother died when Emma was 7 years old, after which the daughters of the household took over the duties of house keeping for their father.

On April 12, 1885, at the age of 14 years, Mrs. Wenig became a member of the German Lutheran Church at Eitzen, Minn, by confirmation, where she retained her membership throughout her lifetime.

In 1887 the family moved to Hancock County, Iowa, where they continued to farm for several years.

On July 4, 1890, Emma Schoper and John Wenig were married and commenced housekeeping on the Twin Lake township farm where the family now lives. They were the parents of seven children They are:

Jessie, who died at the age of 8 years.
An infant son, who died
Hattie (Mrs John Bitker) who died in 1928.
Ada (Mrs Fred Kothenbeutel) who died in 1942.
Oscar, of Sheboygan, Wisconsin.
Gladys and Harry, at home.

Her husband, John Wenig, died in 1917 at the age of 53 years Since then, for the past 27 years, Mrs Emma Wenig has continued to operate the farm

Mrs Wenig was a capable farmer, a good housekeeper, a good neighbor, and a good mother to her children

She reached the age of 72 years and 5 months, and leaves of her immediate family, Three children Oscar, Gladys and Harry.
Eight grand children.
Eight great grand children

Two sisters Mrs Fred Schwartz, Clear Lake, and Mrs Henry Schwartz, Garner, Iowa

Two brothers Henry Schoper, Milwaukee, Wis, and William Schoper, Spokane, Wash., and other more distant relatives, and friends.

"We Are Buying Extra War Bonds—Are You?"

Sgt. Samuel Jones, Jr., Wilkes-Barre, Pa., has been a doughboy for four years. He was wounded during the North African campaign by enemy machine gun fire. Since his return he has aided greatly in the sale of War Bonds and buys plenty himself.

Sgt. Nicholas Miller, Paterson, N. J., won the Silver Star for rescuing two comrades under fire at El Guita. His knee cap was broken and the cartilage torn out and at present cannot move his knee. Halloran Hospital doctors are trying to correct this. He buys Bonds.

Pvt. Louis Bielmeier, 32, of New York, was wounded by arterial shell during the Sicilian campaign. He has a brother in the Marines, Private Bielmeier and his wife and brother are buying War Bonds regularly. Are you doing the same?

Pvt. Clarence Clark, 21, Swampers, La., has two brothers in the service, one in the Army and the other in the Navy. He was wounded in the right leg and both feet in the North African campaign and is now at Halloran General Hospital. He buys War Bonds.

Pvt. Pasquale Galella, New York, went through the North African campaign without a scratch but was wounded during the invasion of Sicily and is now in traction at Halloran Hospital. He has a brother in the Navy and has War Bonds and is buying more.

Kidneys Must Work Well

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of *why* the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*? You will be using a medicine recommended the country over. *Doan's* stimulate the function of the kidneys and help them flush out poisonous waste from the blood. They contain nothing harmful. Get *Doan's* today. Use with confidence. At all drug stores.

DOAN'S PILLS

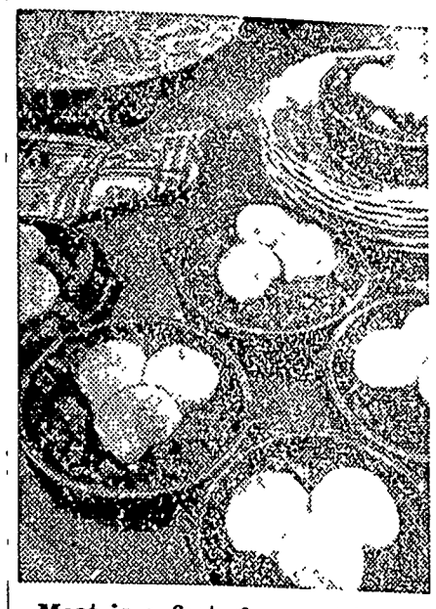
Eating Guide Assures Health For Your Family



Meat is a first class protein food and deserves a high place in your diet. It's used to build and repair body tissues and is necessary for both children and adults.

Nutritionally speaking, we aren't exactly on our toes. Doctors tell us that nutritional diseases constitute our greatest medical problem, not from the point of view of deaths, but from disability and economic loss.

You as homemakers can do much to give the doctors a big helping hand in this matter if you firmly resolve to feed the family according to the rules laid down by the National Nutrition Council. The rules are few, easy to follow, and flexible enough to fit any food budget So, how about it, homemakers, are you willing to give out a big heaping plate of health to your family? Your reward will be happier, healthier and better people to live with.

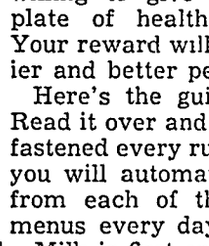
Here's the guide to good eating. Read it over and over until you have fastened every rule in your mind and you will automatically include food from each of the classes in your menus every day.

Milk is first on the list for it's the most nearly perfect food. See that the grownups get two or more glasses daily and the children have three to four glasses.

Vegetables and fruits regulate and protect the body. They should not ever be skipped for they are easily worked into the diet. Of the vegetables you should have two besides potato, preferably one green and one yellow, and one of these raw.

Of fruits you should have two a day and one of these should be a citrus fruit or tomato. This is a way of guaranteeing enough vitamin C to the system. Vitamin C is easily lost if cooked; that's why a citrus fruit or tomato is required as they are usually eaten raw.

Eggs are expensive right now but you should provide each person with 3 to 5 per week. When the price goes down and we have more on hand give them at least one a day as that's preferred. It doesn't matter how you have them—as eggs or incorporated into food.



Cereals and bread should be enriched or whole grain; they're necessary every day.

The butter requirement is about 2 tablespoons daily. Other foods may be included in the diet to satisfy the appetite and complete growth and activity needs. This, of course, includes sweets and candies or extra quantities of the above depending upon the activity of the body.

One of the most important classes of foods which must be included in the diet are the protein foods including meat, cheese, fish, poultry or legumes. Although placed last on the list, they are one of the most important and I want to talk particularly about them in today's column because two of the most important of protein foods are rationed.

Proteins are part of every living cell. The body must have them if it is to grow or build or repair itself. You can see the necessity for giving plenty of protein-rich foods to children. Adults need them, too—although their bodies have been built, they are torn down with the work they do, and the tissues must build and repair themselves.

Fish, poultry, cheese and meat are "first class" protein foods. Legumes, in which class we include, roughly speaking, those plants that grow in pods, and consist of navy beans, black-eyed beans, pinto beans, kidney beans, black beans, lima beans and soy beans; dried split peas, peanuts and lentils, are what we call "second class" protein foods and that means they do an excellent job of body building but can't take the place of meat entirely. Possible exceptions to this are peanuts and soybeans, both of which are now being considered complete proteins.

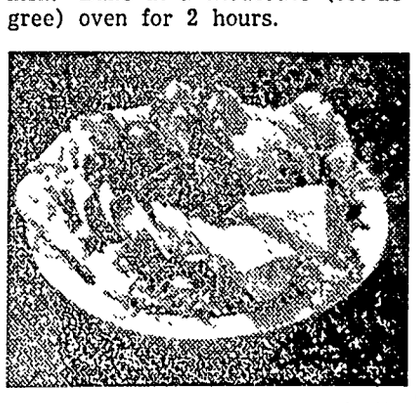
While meat is rationed and point values high, we will have to include plenty of all the proteins in our diet. Meats with lower prices and lower point values are just as good for you, nutritionally speaking.

Here's our round-up of recipes today. They'll stretch meat and points and show you delicious ways of fixing the second-class proteins:

Dinner Complete.
(Serves 6)

- 2 cups sliced raw potatoes
- 2 cups chopped celery
- 2 cups ground beef (1 pound)
- 1 cup sliced raw onions
- 1 cup finely cut green pepper
- 2 cups cooked tomatoes
- 2 teaspoons salt
- ¼ teaspoon pepper

Place meat and vegetables in layers in greased baking dish. Season layers with salt and pepper. Place green pepper slices on top for garnish. Bake in a moderate (350-degree) oven for 2 hours.



Vegetables and fruits belong in the dietary daily. If possible have one of each raw so that you can get all the vitamins possible. Long cooking will destroy many precious vitamins.

Country Baked Limas.
(Serves 8)

- 2 cups lima beans
- ¼ pound bacon, cut small
- 1 medium onion, sliced

Place lima beans, bacon and onion in layers in pot. Combine the following:

- ¼ cup light molasses
- 1½ tablespoons brown sugar
- 2 teaspoons salt
- 1 teaspoon dry mustard
- 2 tablespoons chili sauce
- 1 cup tomato juice

Pour the mixture over beans. Bake 4 to 6 hours in a slow (250-degree) oven. Uncover for last ½ hour.

***Cherry Cake.**

- ½ cup shortening
- 1½ cups sugar
- ½ teaspoon vanilla
- ¼ teaspoon lemon flavoring
- ½ cup finely chopped, drained maraschino cherries
- 1 cup milk
- 3 cups sifted cake flour
- 3 teaspoons baking powder
- ¼ teaspoon salt
- 4 egg whites

Cream the shortening and sugar. Add the flavoring and chopped cherries, then mix. Add sifted dry ingredients alternately with milk. Beat only until smooth, then fold in egg whites beaten stiff. Place in a greased, shallow, floured pan and bake 45 minutes in a moderate oven (350-375 degrees). Cool and ice with boiled icing.

If you want sugar-saving suggestions, write to Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Lynn Says

The Score Card: The vital problem of saving used fats so they can be utilized for explosives falls to the homemaker. Save them in tin cans; when you have a pound take them to your butcher, who will weigh them, pay for them in both points and money.

You can save on foods if you refrigerate them properly. Eggs, for example, belong in the coldest spot in the refrigerator. If you want to separate them, do it as soon as you take them from the refrigerator. Whites beat more quickly at room temperature.

Cheese should be well refrigerated. To keep any of it and the precious points on it from wasting, cover cut surface with melted paraffin. Wrap well before storing.

Milk should go to the coldest spot in the refrigerator and should stay out only when being poured. Bacteria develop 10 times faster at 55 degrees than at 40.

Save Used Fats

TELEVISION NEWSPAPERS

General Electric published a newspaper by television the other day. Fifty editors saw the demonstration. None rushed out and sold his paper, but all agreed the stunt had bewildering possibilities. For one thing, for the first time in history newspaper men may have to be well dressed and handsome.

—*—

The test of the city editor of the future may not be whether he has a great nose for news but whether he has the right eyes for screening. And a telegraph editor may be unable to get a job unless he has a winning personality.

—*—

If the television newspaper is perfected a bulb may become as important as a managing editor and a little knob on a radio set may replace the pressroom. Whether you get your paper may depend on radio reception rather than on the newsboy.

—*—

General Electric gave the demonstration in cooperation with the Albany Times Union. The printed pages came hurtling through the ozone so clearly you would have thought Sinatra was publisher.

—*—

Cartoons, columns, classified ads and department store ads came out of the atmosphere, with real live models in the cloak and suit ads. Anybody present could see the possibilities; beer ads with real suds, fuel ads showing real lumps of coal and delicatessen store ads showing just how the clerk uses a razor to slice meat for those sandwiches.

—*—

Television ads will bring right into your home the goat which that fellow has been trying to sell for $16 all these years. And when you see the left-my-bed-and-board personals you will see the actual bed.

—*—

When there is a murder mystery you will see a reporter enacting the crime and the editor's stenographer posing as the victim, if she has the right personality for murder cases.

—*—

However, we are not scared by the threat of a television press. Not many people who listen to the radio can read anyhow. And nothing can destroy the average American's determination to sit over in a quiet corner and read his newspapers. Well, maybe they're not reading, but it's an established way of avoiding conversation.

'BUTCH' O'HARE

("Butch's lights went out, and then he was gone."—From a fellow flier's story of the death of Lieut. Com. Eddie O'Hare.)

"Then he was gone." . . .
The kid who in that day
When fright was in our eyes
So clearly showed the way!
This Irish lad
Who in those first dark hours
Of our new war
So stirred these hearts of ours!

"Then he was gone." . . .
This lad with deep-set eyes
Who, when the chips were down,
So terrorized far skies;
Who in green days
When none of us could tell
How brave our youngsters were,
Had flashed the "All is well!"

This "Butch" O'Hare,
Whose name could stir your soul
And speed your pulse
And make your past unroll! . . .
"Then he was gone" . . .
A red gull in the dark—
The bucko with the stuff—
The courage red and stark.

"Then he was gone" . . .
This ripping, tearing ace,
The silent one
Who "put 'em in their place";
Whose feat of five-a-day
In war's first hour
Had symbolized our guts
And socking pow'r.

"Then he was gone" . . .
The slashing, slamming guy—
"The Socko Kid"—
"The King Hawk of the sky"—
The kind we have,
Thank God, in days of dread
To take the torch
For our heroic dead!

Peace to you, "Butch" . . .
There in some distant blue
With all who kept our faith,
The Christian and the Jew . . .
Now have you joined
Our hosts who knew no fear:
Paul Jones and Nathan Hale
And Lawrence and Revere!

AUTHENTIC EARLY AMERICAN HOBBY HORSE HEAD
MAKE A BROOMSTICK HORSE OR A TODDLE BIKE
MAY BE CUT FROM A 1" BOARD
WOODEN WHEELS
USE ACTUAL SIZE PATTERN TO CUT AND STENCIL ALSO AS A GUIDE FOR ASSEMBLING

THIS horse head is a copy of an Early American hobbyhorse. It is full of dash and spirit yet it is so simple that the original craftsman probably cut it out with an ordinary handsaw and a pocket knife.

A toddle bike is more up-to-date than a hobbyhorse because we know now that it is better for tiny tots to learn to use their legs than to get a sense of motion by rocking. The bike is easy to make of scraps of lumber; or when you have cut out the head and stenciled it you may decide to mount it on a broomstick as shown at the upper left.

NOTE—Mrs. Spears has prepared an actual size pattern (No. 257) for this authentic Early American hobbyhorse head and also all the parts of the toddle bike. The pattern includes stencil designs for painting, a color guide, and complete directions. Pattern is 15 cents postpaid. Address:

MRS. RUTH WYETH SPEARS
Bedford Hills New York
Drawer 10

Enclose 15 cents for Pattern No. 257.

ASK ME ANOTHER?
A General Quiz

1. When was the American Red Cross originated?
2. What new cargo is being delivered abroad by our oil tankers?
3. Who was the first man to hold the post of secretary of agriculture in a President's cabinet?
4. Who is usually recognized as the builder of the first American automobile that ran?
5. How long has the castle been the insigne of the United States engineers?
6. Which was the first planet discovered in historical times?
7. How much time elapsed after the end of the last war before complete demobilization of the 4,000,000 men under arms took place?
8. What is the largest lake in Europe?

The Answers

1. In 1866.
2. Special devices now permit tankers to carry as deck cargo almost all types of fighter planes and torpedo boats requiring shipment by sea.
3. Norman J. Colman under Cleveland.
4. Charles E. Duryea.
5. Since 1840.
6. Uranus (in 1781).
7. One and a half years.
8. Lake Ladoga (in Finland and Russia).

Bombers Have Numbers

The maps of Berlin used by the Royal Canadian air force when bombing that city show the strategic buildings by their street addresses, which the R. C. A. F. obtained from a Berlin classified telephone directory, borrowed from the New York Public library.

DISCOVERY OF THIS COLDS' RELIEF

(homo medicated mutton suet)—which grandma used for coughing—nasal congestion, muscle aches of colds—teaches modern mothers to follow her example. So their families get relief from these colds' miseries with Penetro, the salve with modern medication in a base containing old fashioned mutton suet. 25c, double supply 35c. Demand Penetro.

"NO MORE TROUBLE WITH CONSTIPATION!"

Says Long-Time Sufferer Who Tried Laxative Cereal!

If you, too, are disappointed with pills and purgatives, be sure to read this unsolicited letter!

"For several years I was afflicted with common constipation. I tried various remedies, but got only temporary relief. Several months ago, I started eating KELLOGG'S ALL-BRAN each morning, drinking water freely through the day. I have since never had the slightest trouble with constipation. My gratitude to KELLOGG'S ALL-BRAN." Mr. H. M. Riley, 11 E. Division Street, Chicago, Ill.

Scientists say KELLOGG'S ALL-BRAN can really "get at" a common cause of constipation—lack of sufficient "cellulosic" elements in the diet — because it is one of Nature's most *effective* sources of these elements! They work by helping the friendly colonic flora fluff up and prepare the colonic wastes for easy, natural elimination. KELLOGG'S ALL-BRAN is *not* a purgative. *Doesn't* "sweep you out"! It's a gentle-acting, "regulating" food.

If you have constipation of this type, eat KELLOGG'S ALL-BRAN or several ALL-BRAN muffins regularly. Drink plenty of water. See if you, too, don't cheer its welcome relief! Insist on *genuine* ALL-BRAN, made *only* by Kellogg's in Battle Creek.

YOU CAN LAUGH, TALK AND EAT, FREE OF PLATE EMBARRASSMENT

It's so easy to enjoy all-day confidence when your plates are held firmly and safely in place by this "comfort-cushion"—a dentist's formula.

1. Dr. Wernet's Powder lets you enjoy solid foods, avoid embarrassment of loose plates. Helps prevent sore gums.
2. Recommended by dentists for 30 years.
3. Economical; small amount lasts longer.
4. Pure and harmless—pleasant tasting.

All druggists—30¢. Money back if not delighted.

Dr. Wernet's Powder
LARGEST SELLING PLATE POWDER IN THE WORLD

IN THE NAVY AIR CORPS *they say:*

"PICKLE LUGGER" for torpedo bomber
"DUCK" for an amphibian plane
"FLYING THE WET" for following a river
"CAMEL" for the favorite cigarette with men in the Navy

FIRST IN THE SERVICE
With men in the Army, Navy, Marine Corps, and Coast Guard, the favorite cigarette is Camel. (Based on actual sales records.)

Our Men In The Service

BLIZZARDS COMMON IN THE ALEUTIANS, SAYS ARNOLD

January 27, 1944

Dear Jergies:

I liked your cheery card and letter very much. The Times helps me keep up on changing conditions back home, but there will be many different things to become accustomed to when I get back, anyway

Probably one of the main differences I'll notice will be the absence of old friends who have passed on Another will be the many youngesters born and grown (almost) since I left. And I couldn't keep track of the younger generation even when I was there.

Here in the Aleutians we're just digging out of another blizzard Pack home I used to think it could snow and blow pretty nastily But here if the weather makes up its mind to be bad, it can be very bad, indeed Every week or so we have an Armistice Day, 1940, storm. Of course, we're well supplied with clothes, and we live in huts, so it isn't as rough as it could be.

Times have changed a lot since we came here Now we have a cleaning and pressing plant, a shoe repair shop, a post theater and other smaller ones, as well as a main PX and numerous branch stores.

Some of the boys who have had 30 to 40 months in Alaska and the Aleutians have been given furloughs I have 21 months in the islands now, but that still leaves quite a stretch to put in, if that length of service is required, before I could get back .

Well, I hope everything is going all right with you folks. Give my best regards to Ray, Jr.

Sincerely, Roy Arnold

DENNY RIDDER HAD BIRTHDAY DINNER SUNDAY EVE

Mr and Mrs. L. A Ridder entertained at dinner Sunday evening in honor of their son Denny's eighth birthday anniversary the following: Mr and Mrs A. G Koerner and Mrs Fred Ridder, his grandparents; Orville Stokesbary and family; Gerald Koerner and family; Graydon Barz and Allen Neuberger.

COUNTY ENGINEER GIVES A SUMMARY OF 1943 ROAD WORK

The year 1943 was essentially a road graveling era. Most of the construction expenditures were for new gravel and resurfacing of present roads. Twenty-two miles of newly graded roads were surfaced and forty miles resurfaced. Only three miles of road were graded. Five small maintenance grading projects were completed. The highway commission has asked us to do only such grading as is deemed necessary, until after the war.

Five wooden bridges were rebuilt during the year. It being difficult to get lumber, we were compelled to use much second hand material. The concrete arch bridge south of Section 35, Orthel Township was extended 8 feet, thus making the roadway 24 feet wide.

The Road construction Fund spent $39,159 54 on graveling, grading, bridge construction, right of way and tiling. Of the above amount 37,556 10 was spent on local roads and $1,603 44 on truck roads.

The Maintenance Fund Expenditures were as follows:

Bridge Maintenance	
Trunk roads	$94.59
Local roads	$4,462.84
General Maintenance (Dragging, repairing, etc.)	
Trunk roads	9,204.06
Local roads	35,229.57
Resurfacing	
Trunk roads	4,010.06
Local roads	14,005.26
Snow Removal	
Trunk roads	2,237.84
Local roads	5,756.21
Tiling and Drainage	
Trunk roads	350.00
Local roads	1,797.26

Of the above amounts the costs were as listed below:

Labor	$32,725.65
Gasoline	10,408 33
Diesel Fuel	1,115.06
Oil and Grease	2,434.32
Repairs and Tools	9,500.72
New Equipment	None

The total cost of Highway Engineering for the year, including engineer, rodmen, office girl and expenses, was $3,211.20. This amount is lower both in dollars and percentage (2.76%) of money spent, than at any other time during the last ten years. Due to shortage of help it was impossible to make plans for any future grading.

Our Road Construction balance was increased $6,174.84 even though our gas tax receipts decreased $14,395 70.

The Road Maintenance balance increased $17,411.34. This increase in the balance will be used up as soon as the new equipment ordered becomes available.

The county now owns 11 power maintainers, 20 trucks, 6 tractors, 1 gravel loader, 1 rock crusher, a number of pickups, graders, scrapers, scoops and other road tools.

Our County Roads on January 1 1944, were as follows:

Pavement	5.5 miles
Graveled	863.3 miles
Dirt	116.1 miles

PIONEER HANCOCK COUNTY WOMAN DIES AT GARNER

Mrs. Schoenwetter's Funeral Was Friday

Mrs Chas. A. Schoenwetter, 88 died last week Tuesday at her home at Garner. Funeral services were held at the home at 1:30 p.m. and at the Methodist church at 2 p.m. Friday, with the Rev. E. F. Broberg in charge. Interment was made in Concord township cemetery.

Mrs. Schoenwetter was born Jan. 31, 1856, near Columbus, Wis., daughter of Anna and John Holtz.

She lived there until her marriage Feb. 12, 1880, to C. A. Schoenwetter when the couple set up housekeeping on a farm in Liberty township. In 1908 they retired from the farm and moved to Garner.

The couple had 9 children, 2 of whom preceded her in death. The survivors are: Arthur, George, Edward and Victor Schoenwetter and Mrs. Emil Prignitz, all living southwest of Klemme; Mrs. Ray Yeager of Hugo, Colo., and Myrle at home. On Feb. 12, the couple would have been married 64 years.

Mrs. Schoenwetter was a member of the Methodist church since she was 14 years old and attended services regulary until her health failed in 1937 She was a charter member of the Liberty township church and recently a member of the Garner Methodist church. She has been active in Women's Foreign Missionary society.

Surviving besides her aged husband and children are 2 brothers, Fred and George Holtz of Columbus, Wis.; 24 grandchildren and 14 great grandchildren.

MRS. JOHN CLEMENTS HONORED AT SHOWER WEDNESDAY

A pink and blue shower was held at the home of Mrs. Francis Buseman in Liberty township last Wednesday afternoon in honor of Mrs. John Clements.

A series of games, directed by Mrs. Gerald Koerner, were enjoyed by the ladies after which a two-course lunch was served by the hostess, assisted by Mrs. W. F. Pavey.

Mrs. Clements was presented with a variety of beautiful gifts by the ladies.

Strawberries are an easy fruit to grow. Plants are cheap and they produce the second year after the bed is set.

ELECTIC PIG BROODER ECONOMICAL, EFFICIENT

Electric pig brooders, which may be made on the farm are superior to stoves or hot air furnaces as heating devices for farrowing pens.

E. L. Quaife, Iowa State College extension swine specialist says the electric brooder furnishes a safe, uniform type of heat down in the nest where the pig lives, thus playing a big part in preventing loss at farrowing time. Part of the value of the brooder lies in its service as a guard rail, thus preventing the crushing of pigs.

A brooder may be constructed from lumber, a reflector and an electric bulb. Operating cost of such brooders is extremely low. By using electricity, fire danger is eliminated.

Sows should be placed in the pens a day or so before farrowing and the heat turned on in the brooder several hours before the pigs arrive. Ordinarily, the heat is kept on continously for 10 days, but if the weather is cold it should be left for 2 weeks. A temperature of 55 to 70 degrees is satisfactory for little pigs, while 45 to 55 is warm enough for older hogs, Quaife said.

Pigs can be placed under the brooder by hand until they learn to go under voluntarily. Keeping the pigs under the brooder by blocking the brooder entrance for several hours after they are born is generally helpful.

Where brooders cannot be provided for every pen, Quaife suggests use of a portable electric lamp with a large reflector. Such a lamp could be moved from pen to pen as the farrowings occur.

Detailed plans for construction of a homemade pig brooder are available without charge at the county extension director's office.

4-H BOYS & LEADERS ATTEND DISTRICT SHORT COURSE

Ten Hancock 4-H boys and leaders attended the District 4-H Short Course at Mason City January 31 and February 1. Those attending were: Jack Greiman, County President; Ronald Bredlow, County Vice President; Leo Blumer, County Secretary-Treasurer; Gene Severson, Maynard Dorow, Curtis Greiman, Co. Boys' Club Chairman; Raymond Wille, Avery Leader; Le-Roy Bredlow, Liberty leader; Verlyn Friedow, Amsterdam leader and H. H. Stoltenberg, Madison leader.

A number of 4-H members had special parts on the program of the Short Course. Hancock Boys' having special assignments were: Ronald Bredlow, A demonstration on innoculating soybeans; Jack Greiman, A campaign speech for one of the nominees for State 4-H Club officer for 1944.

County Extension Director, Paul Henderson, was in charge of the group.

The two day session was a training school for the boys and leaders. It was deciede at the conference that the best way to get the information back to the leaders and 4-H members in the county was to hold a meeting of local club officers and leaders with the county delegates demonstrating the things learned at the short course. This meeting is being planned for Friday, February 25.

THERE'S RIGHT WAY TO THAW OUT FROZEN PIPES

To help the emergency plumber at the season when the family may wake up to find pipes frozen, C. H. Van Vlack, extension agricultural engineer at Iowa State College, offers several tips.

In thawing a frozen water pipe, begin at the faucet and work back, or start at the other end of the frozen section. Have the faucets open so the water can flow out as the ice melts. The simplest and safest way to warm pipes is to wrap them with cloth, set a pail underneath and pour boiling water from a teakettle on the cloth. In thawing a waste or sewer pipe, work upward from the lower end to permit water to drain away.

For protection, at spots likely to be frozen, pipes may be boxed and surrounded with dry shavings, sawdust, leaves or straw and chaff. A teacup of common salt solution poured into the sink will give protection at a moderate temperature But for severe weather, and if the house is to be vacated for a few days, drain the trap or fill with other anti-freeze.

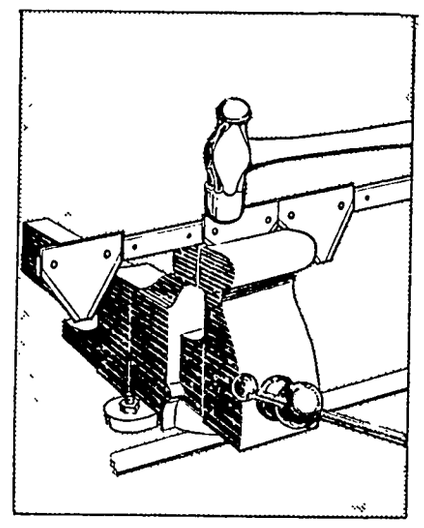
COOK PORK THOROUGHLY

Pork roasts should always be cooked "well done" for health's sake. Miss Conie Foote, extension nutritionist at Iowa State College, reports that no pink juice will show if the meat has been properly cooked A chunky piece, like a shoulder roast, needs a longer, thinner cut like the loin. Shallow, open pans with racks in the bottom are preferable to the deep roaster for pork. Don't add water, for that makes steam in the oven and draws juice from the meat

Tips ON FARM MACHINERY

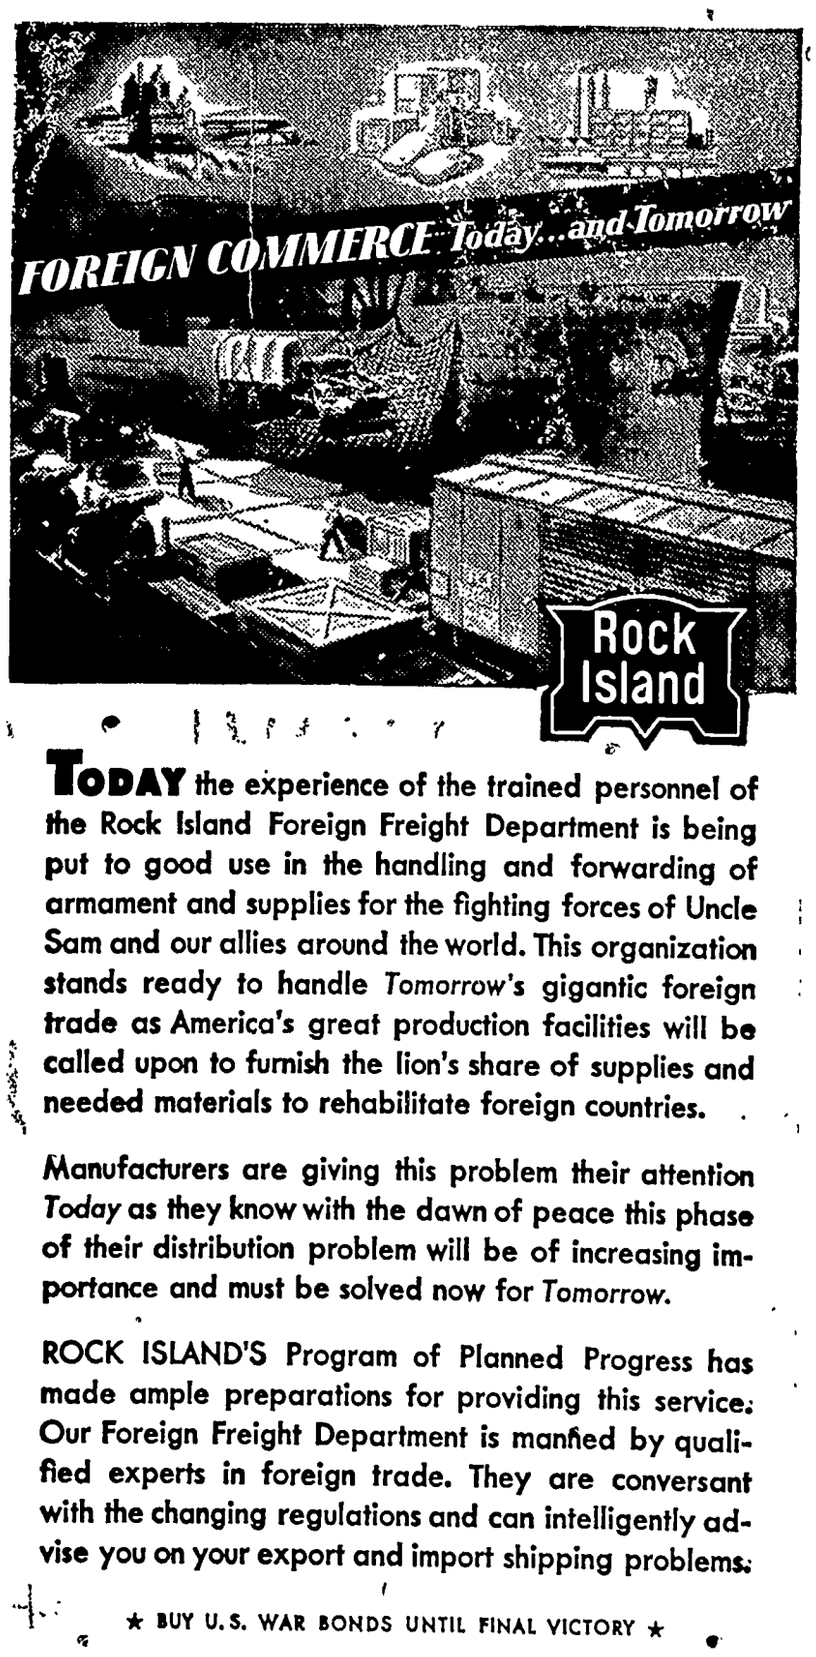


SECTIONS REMOVED EASILY

Here's a method for removing the corner of a square edge anvil binder, or combine sickle quickly and safely. Iowa State College agricultural engineers recommend that the sections be clamped, point down, in a vise. The sickle bar should rest firmly on the vise jaws. Strike the back of the section directly above the rivet with a heavy hammer If no vise is available the sickle bar may be laid on the coner of a squareedge anvil or piece of railroad iron.

Never turn the section points upward when removing them. There is danger of severe cuts to the hands and wrists if the hammer or sickle should slip.

Northern
LUMBER IMPLEMENT STORE
Ira Overholt, Manager



TODAY the experience of the trained personnel of the Rock Island Foreign Freight Department is being put to good use in the handling and forwarding of armament and supplies for the fighting forces of Uncle Sam and our allies around the world. This organization stands ready to handle *Tomorrow's* gigantic foreign trade as America's great production facilities will be called upon to furnish the lion's share of supplies and needed materials to rehabilitate foreign countries.

Manufacturers are giving this problem their attention *Today* as they know with the dawn of peace this phase of their distribution problem will be of increasing importance and must be solved now for *Tomorrow.*

ROCK ISLAND'S Program of Planned Progress has made ample preparations for providing this service: Our Foreign Freight Department is manned by qualified experts in foreign trade. They are conversant with the changing regulations and can intelligently advise you on your export and import shipping problems.

★ BUY U.S. WAR BONDS UNTIL FINAL VICTORY ★

ROCK ISLAND LINES

ONE OF AMERICA'S RAILROADS — ALL UNITED FOR VICTORY

WEEKLY NEWS ANALYSIS

House Votes $300 Discharge Bonus; U. S. Bombers Rip Nazi Supply Lines; Red Army Continues Push on Baltic; Peace Rumors Spiked by British Press

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union.

DISCHARGE PAY:
House Votes $300

Arguing that higher payments would represent a soldier's bonus which should be left for later discussion, the house passed a bill providing for mustering-out pay of $300 to discharged vets with 60 days' service and $100 to those released before 60 days.

With 15,000,000 vets including those already discharged standing to benefit from the measure, total cost of payments was estimated at 3½ billion dollars.

After passage by the house, the bill was sent for approval to the senate, which previously enacted legislation providing for maximum payments ranging from $500 to vets overseas for 18 months or more, to $200 to those with less than 12 months' service in the U. S. Unless the senate okayed the house bill, parliamentary procedure required the two chambers to get together to work out new legislation.

EUROPE:
Pound Supply Lines

U. S. bombers ripped rail lines supplying German troops in southern Italy as American and British forces pressed against the Nazis' winter-line centered on Cassino, key to the road to Rome.

With two of three main rail lines temporarily put out of use, the enemy was forced to route supplies over bomb-pocked highways, some of which were snarled by the wreckage of bridges.

As U. S. artillery laid down a curtain of thunderous fire over German defense emplacements before Cassino preparatory to the infantry's charge forward, British units to the west engaged Nazi troops along the Garigliano river.

Along the Adriatic coast to the east, Canadian forces were held to short gains in hard, close-in fighting.

U. S. HEMP:
Cut Production

Because of the improvement in imports from the Caribbean and Mediterranean areas, the government's hemp-growing program in the Middle West will be cut to one-third of 1943 production, and only 14 of 42 processing plants will be kept in operation.

Raised on contract to the government, farmers found hemp profitable last year, their net yield per acre being larger than from any other crop in the nation, in some cases reaching $200, it was said.

In seeking to relieve a threatened hemp shortage after the outbreak of war, the government undertook construction of processing plants in 42 communities, and arranged for farmers to grow 4,000 acres of the fiber in each of the districts. The plants were erected at an estimated cost of $100,000 each.

LABOR DRAFT:
Pro and Con

While Secretary of War Henry Stimson told a senate committee that a labor draft would equalize soldier and civilian sacrifices, the executive council of the American Federation of Labor, headed by William Green, said that the organization would never surrender the basic freedom of the country's workers.

Stimson and Green

Likening a labor draft as a shot in the arm for the nation's patriotism, Stimson said the first flush of enterprise excited by the Pearl Harbor attack has worn off, and now "the stern voice of law" is needed to "keep up the patriotic emotion."

Declaring that in freedom there is strength, the AFL council asserted that the "amazing speed with which free American workers have won the battle of war production against the enemy within two years upholds the truth of that principle."

Chance for passage of the labor draft dwindled with the house's pigeon-holing of the measure.

New Britain—Marines wade through swampland on New Britain front. (See: Pacific Front.)

PACIFIC FRONT:
MacArthur to Stay

U. S. medium and heavy bombers ranged widely over the Pacific, blasting Jap bases supplying hard pressed enemy troops, and hitting installations and airfields in the strategic Marshall islands.

As U S. armies were pinning the foe back in the South Pacific area, Secretary of War Henry Stimson announced in Washington, D. C., that General MacArthur would not be retired when he reached the age of 64 on January 29. Retired at his own request in 1937, MacArthur was recalled to active duty following the outbreak of World War II.

In New Guinea, U. S. bombers smashed at the Jap base of Wewak, above American positions at Saidor; and in New Britain, explosives were dropped on the big feeder center of Rabaul, and on barges carrying supplies along the coasts.

RUSSIA:
Baltic Push

Preceded by a thunderous barrage of heavy artillery, Russ infantry pushed into German lines below Leningrad, and cut the enemy's rail communications farther to the south, 70 miles from the Latvian border.

The Reds were reported to have thrown 250,000 men into the battle on a 250 mile front, and units of Russia's Baltic fleet stationed near Leningrad were said to have participated in the bombardment of German positions prior to the big push.

Stiffening German resistance slowed the Reds' progress on other fronts, with the Nazis reporting continuance of Russ efforts to break through in the prewar Polish area of White Russia.

Peace Rumors

With the Allied world still wondering over Russia's semi-official publication of a rumor that two former British statesmen had discussed a separate peace with German Foreign Minister Von Ribbentrop, Stalin permitted reproduction of a London newspaper's story that Britain had received specific peace terms from Hitler under which the Nazis would withdraw to their 1939 prewar boundaries.

Although Britain remained indignant over the Reds' implication that she was double-dealing, and the U. S. continued puzzled over why Stalin should have allowed publication of the rumor, Russia's man in the street was led to suspect British intentions.

AIRPLANE PROGRAM:
Bigger Types

No. 1 industry of the U. S. today, aircraft plants will set their sights on production of more than 100,000 planes of heavier weight in 1944.

More than 50 per cent of production will be of combat-type planes, with a decrease in output of trainer and obsolete craft. Facilities now being used to turn out the latter two types will be converted to manufacturing parts for other models.

The swing toward heavier planes marks a trend toward production of craft carrying bigger guns and bomb loads. Total weight of planes is expected to approximate 1 billion pounds, compared with 750 million pounds in 1943.

AGRICULTURE:
Hog Permits

With thousands of hogs remaining unsold after marketings, a permit system for shipments was imposed at the Chicago stockyards. Under the procedure, commission firms were allotted weekly quotas based on a percentage of the total volume they handled during the first 11 months of 1943, and farmers were to be advised when to sell.

Through the permit system already in operation in other centers, it is hoped to limit shipments to packers' capacities, cut feed bills, and reduce shrinkage, bruises and death losses.

Drouth

Producer of winter wheat, the great plains area of the Midwest has been suffering from an unheard of seasonal drouth.

Centered in Nebraska, the drouth has extended to the Rocky Mountain and western states, where the storage of snowfall for spring and summer irrigation is much less promising than at this time last year.

Good rains in the late winter and early spring could largely offset the effects of the drouth.

STRONG U. S. A.:
After War

". . . Proposing . . . a realistic point of view, that the tendency to war is inevitable, just as the human tendency to disease is inevitable," War Production Board Vice Chairman Charles E. Wilson called on government and industry to cooperate in promoting a strong armament program after the present conflict.

Said Wilson: "I am convinced that we must begin now to set the machinery in motion, while it is still possible for us to measure the cost of any other course."

Wilson suggested (1) the program should be the government's responsibility; (2) congress must support it; (3) industry's role should be to cooperate; (4) some government-owned plants should be held in reserve, with equipment kept to date.

Outwits Hoodlums

When four 17-year-old hoodlums attempted to rob Seaman Fred Stark of Saginaw, Mich., of his money, he talked them into handing over their gun and letting him join the gang in holding up a tavern. But after they had entered the tavern, Seaman Stark held the hoodlums at bay with the pistol and ordered the bartender to call police to arrest the gang.

MILK SALES:
Bottles or Containers

Chicago's big battle to determine whether milk shall be sold in paper containers as well as glass bottles still has not gotten out of the courts, even though the state Supreme court ruled that paper containers could not be used under the wording of the city's disputed ordinance governing distribution of the product.

At present, Chicago dairies will continue to package the milk in paper containers pending filing of a motion for a state Supreme court rehearing of the case. Since the courts have declared no interest in the sanitary aspects of the question of bottling, but have merely confined themselves to the wording of the city ordinance, a rewriting of the law would permit legal use of paper containers.

BURMA:
Allies Attack

With U. S. bombers blasting a path, American trained Chinese troops under Lieut. Gen. Joseph Stilwell gained ground in mountainous western Burma, while farther to the south units of the British Fourteenth army fought Jap counter-attacks to stall their own offensive.

The Chinese were fighting to clear the way for engineers constructing a new supply route to China, since Jap conquest had closed off the Burma road. To hamper enemy operations, U. S. bombers dropped 20 tons of explosives on a Jap troop encampment in the rear of the battlefront.

DRIED MILK

Army quartermaster corps laboratories have developed a method of drying and preserving whole milk so that it will keep for a year even under tropical conditions. Dried milk made by methods now in use will become rancid in the tropics.

In the army formula, the water content of the milk is reduced to 2.25 per cent, and an inert gas is introduced into the airtight container as a preservative. The new method could become a profitable industry, it is said.

HIGHLIGHTS . . . *in the week's news*

SPRINGS: Now that the government has released a quantity of steel wire for springs, it is expected that furniture with coils can be coming out of the factories within two or three months.

DEBT: National debt of Great Britain amounted to 77 billion dollars on December 31, the chancellor of the exchequer has reported to the house of commons.

PLASMA: Use of blood plasma has reduced deaths among wounded men to three-tenths of 1 per cent in the Pacific area, a naval surgeon recently returned from the front said.

HOUSING: War ravaged Europe will require construction of at least 100 million homes, it is said. In the United States from 15 to 20 million new housing units will be needed in the next 10 years.

Battle Courage

Capt. De Foney, U.S.N.

(WNU Feature—Through special arrangement with The American Magazine.)

One of the first things to understand about military courage is that you cannot apply a yardstick to it in advance of action. Human fortitude cannot be measured like the tensile strength of a bar of steel. Only battle can write the answers. Often as not, a lion turns out to be a lamb in combat, or a lamb a lion.

For several months I served on one of the biggest aircraft carriers in the Pacific. On this ship was a downy-faced 18-year-old kid whom we called Babe. He was a timid, introspective sort of boy who read books in his bunk at night, stammered when you spoke to him, and, while he was a member of a 50-caliber gun crew, he appeared to be just about everything a fighting man shouldn't be.

Then, one azure morning, we were attacked by enemy dive-bombers. Down they came, peeling off one by one and lancing straight at the carrier. We had fighters up, and our heavy antiaircraft slammed at the Japs like a hundred doors, but the kids back of the long file of 50-calibers just waited. During long, desperate seconds they simply had to stand and take it.

I was watching Babe anxiously. He looked sick with fear. I wouldn't have been surprised to see him collapse at his post.

But he didn't collapse. As the bombers screamed into range and the 50-calibers blazed into action, the scared kid suddenly became a man—a cool, efficient, and entirely deadly man. He never faltered for an instant in the performance of his duties.

Wartime Emotions.

When the attack was beaten off, Babe was transformed. His face was flushed, his eyes bright, and he danced up and down on deck in a kind of unholy ecstasy. "We got one of 'em," he shouted jubilantly.

That illustrates a point which many noncombatants do not understand about war. It was largely discipline and training, of course, which enabled Babe and his comrades to stand fast during the terrible seconds when the Japs dived straight at them, but, once they were able to strike back, they were immensely strengthened by an emotion which old-time writers used to refer to as "the fierce joy of battle."

There comes a time, however, when the mental and nervous fatigue which results from constant risk-taking can, if continued long enough, sap the fortitude of the bravest.

The case of Johnny Allen was like that. Razor-keen, spunky, a blue-eyed kid with a triangle of ginger hair on his forehead, Johnny had everything a fighter pilot needs. There wasn't anything in the air he was afraid of, and on the ground he was invariably good-natured, happy-go-lucky, always up to some amusing deviltry.

After his arrival in the Solomons, Johnny went on hazardous operational missions day after day. Often he would be in combat two or three times in 24 hours.

After a few weeks of this, Johnny's personality underwent a marked change. In an airplane he seemed just as daring as ever, but he stopped enjoying life. Instead of horsing around with fellow pilots after a flight he would go off in a corner and read. He groused a lot. One night he flew into a rage and took a poke at his best friend merely because he had scattered some equipment on his cot.

Rest Cure.

The squadron's flight surgeon had a quiet talk with Johnny. He broke down and bawled in the middle of it. The flight surgeon knew the symptoms. What really ailed Johnny was fatigue. He wouldn't admit it even to himself, but his nerve was gone. The surgeon sent him back to a hospital for rest, followed by leave.

When he returned to the squadron he was himself again, as brave and cheerful as ever, but if the doctor had not acted promptly Johnny might have suffered a nervous crack-up which would have cost his life, and possibly those of some of the men who flew with him.

Modern Improvements.

In the amphibious warfare of the Pacific, one of the chief dangers to a flier is that of running out of gasoline and being forced down at sea or over jungle, and, in the first months after Pearl Harbor, many a kid lay awake nights thinking about these hazards. Today they worry less about them. They have been taught how to survive in the jungle, and they know that they have 7 out of 10 chances of being rescued if they are forced down at sea in the vicinity of the group of islands where fighting is now going on.

ARMY DOCTORS

It was lost in the news shuffle, but Dr. John H. Musser of the Tulane university medical school, a member of a special committee named by Secretary of War Henry Stimson to study medical conditions in the army, made some startling admissions recently at a senate committee hearing on the utilization of doctors by the war department.

Testifying before the Pepper subcommittee on wartime health and education at a hearing in Pascagoula, Miss., Musser was asked if the army had too many doctors.

"Yes," he replied. "There has been too much indiscriminate recruiting of medical men without due regard for civilian needs."

"Do you think that the army has utilized its doctors properly?" he was asked.

"Definitely no," replied the Tulane professor. "The present system of medical service in the army is based on a procedure that dates back to the Spanish-American war and calls for the recruiting of a disproportionate number of physicians from civilian life."

To illustrate his point, Doctor Musser pointed out that Tulane university's unit of doctors in the army medical corps had spent more than a year "twiddling their thumbs" at Camp Benning, Georgia, while awaiting a call for overseas duty. At this time, Doctor Musser said, there was a crying need for doctors by civilians.

Doctor Musser said he realized that the need for doctors was far greater than in the last war, but that the army medical corps wasn't making the fullest use of its personnel.

* * *

WILD ANIMALS' HOLIDAY

Since the army has a priority on guns and shells, there hasn't been much hunting for two years, with the result that wild animals are creeping up on civilization. Both farmers and state officials are demanding cartridges to drive off this invasion.

War production board has received urgent messages from state officials in every part of the country. Pennsylvania is alarmed at the boldness of bears and deer. New York says rabbits eat Victory gardens. Louisiana needs shotguns to drive off the flocks of rice birds.

This explosive situation was the last task handled by Maury Maverick before he left WPB's government division, to become WPB vice chairman in charge of the small plants division.

He tried to raise the civilian cartridge quota from 12 per cent of normal to 50 per cent. At first, the army was willing. But that was before Cairo-Teheran. After the Big Three powwow the army hinted that it would need everything for the invasion, and declined to pass the ammunition.

When the news reached the backwoods, says Maverick, the deer did a dance, and bears celebrated with big bear hugs.

* * *

COSMOPOLITAN CONGRESS

The farm bloc is all-powerful in the house of representatives, but you'd never guess it to judge by the number of members who are real, active farmers. There are only 30.

Lawyers, because of their natural bent for politics, continue to dominate the house membership by an overwhelming majority. Out of a total 435 members, 234 are lawyers. Business men rank next, with a delegation of 60.

There are 27 teachers and professors, 23 writers and newspaper men, 9 former government officials, 9 insurance agents, 4 doctors, 2 engineers, 2 dentists, and 2 certified public accountants.

Only one minister holds a congressional seat, Rep. Charles A. Eaton of New Jersey, former rector of the Madison Avenue Baptist church in New York city, although Rep. Walter H. Judd of Minnesota was a medical missionary in China for several years.

The sports world is represented chiefly by Congressmen Joseph O'Brien of New York, former professional wrestler and football player; Samuel Weiss of Pennsylvania, a football referee who still officiates in National Pro league games; and La Vern R. Dilweg of Wisconsin, former All-America footballer at Marquette university.

The rest of the membership hails from a miscellany of trades and professions, including a number of laboring men, miners and mill workers, two druggists—Representatives Carl Durham of North Carolina and Harve Tibbott of Pennsylvania—and a veterinarian, Congressman George W. Gillie of Indiana.

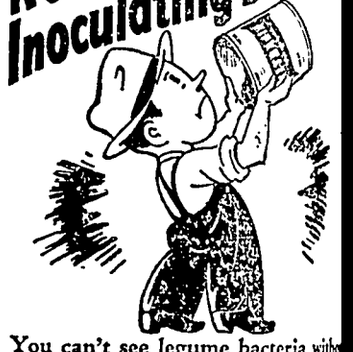
NO! You can't see Inoculating Bacteria



You can't see legume bacteria without a powerful microscope. If you could you wouldn't know whether they were good bacteria or bad. There *is* one sure way to get plenty of effective inoculation . . . just ask for NITRAGIN when you buy. NITRAGIN is the oldest, most widely used inoculant. For 60 years farmers have used it to get bigger yields of alfalfa, clover, soybeans, etc., to build soil fertility. It costs only a few cents an acre; but frequently boosts yields up to 50% and more. It pays to inoculate every planting of legumes. Get NITRAGIN where you buy your seed. Look for the yellow can.

The Nitragin Co., Inc., 3899 N. Booth St., Milwaukee, Wis.

FREE Booklet
How to get better legume crops. Write today. Look for the trademark NITRAGIN on the yellow can when you buy.

SNAPPY FACTS ABOUT RUBBER

A Wisconsin truck driver recently received a tribute from the Office of the Rubber Director because he risked his life to save the tires on the trailer of a tractor-trailer unit he was driving. The trailer caught fire, but the driver jacked it up and removed the tires while it was ablaze.

The far-reaching influence of the rubber situation will be appreciated when it is known that close to 40% of the motor vehicles ever made in this country were still in service in December, 1941. More than half of them were owned by families with incomes of less than $30 a week.

The elec- power company is located there. g a county seat, there is con- rable legal and clerical activity. eeping all these matters in mind, local economic development mittee began its survey of war business and employment sibilities. Its first step was to up two questions, the answers to ch were to be the solution of problem. Beginning with the mise that "Somehow there would a job paying a living wage for ry worker who wanted one aft- he war."

irst thing, said the committee, is nd out how many workers would t jobs, and how many jobs busi- s thought it could provide after war. It took the number loyed in 1940 as a base, this g the last full year before the ntry entered the war. Then it ed the number unemployed and king work in that year. These res were:

mployed in 1940	4,266
employed in 1940	721
tal prewar labor force	4,987

hen the committee obtained the loyment figures for 1943, recog- ng that they were abnormally h, with many women and high- ool students working who ordi- ily would not be in industry. ne people had moved into town who were not expected to stay

HAPPY STEEL WORKERS, lined up before the pay windows of a huge Pittsburgh plant now operating at capacity, are representative of the millions of factory people now earning good wages. But how many will be working when the war orders end?

after the war boom. The figures settled upon were:

Employed in 1943	5,455
Unemployed in 1943	200
Wartime labor force	5,655

The next step was more difficult. It was to try to estimate how many persons would want work after the war, when the servicemen had returned, and other changes had come about. A survey among employers gave these figures:

Returning from armed forces	1,012
Returning from farms	125
Returning from other regions	250
Growth and maturity of population (1943-46)	428
Total	1,815

This total was then added to the wartime labor force:

Wartime labor force (1943)	5,655
Number returning after war	1,815
Total	7,470

Subtracted from this, however, was a sizable group who would not be in the labor market after the war. These were:

Returning to farms	125
Returning to other regions	50
Not seeking postwar jobs	734
Total	909

Taking this number from the 7,470 previous total left 6,561, which the committee called the net postwar labor force. In other words, between six and seven thousand people would be expecting to find steady work in Albert Lea after the war. Obviously, the next move was to find out how many jobs the city's employers could provide. When returns came in from every employer, from smallest shop to largest factory, the results were:

Postwar labor force (as before)	6,561
Number that can be employed after war, as estimated	5,968
Albert Lea's unemployed in, say, 1946, on this basis	593

So, about 600 people would be out of work, or nearly 10 per cent.

Local Business Prospects.

The committee then turned to finding out whether business activity could not be stimulated a bit. Every business man answered a confidential questionnaire. Tabulated responses gave this salient information:

The 11 big industries gave this reply, as summarized:

Volume of business done in 1933 (gross sales)	$ 9,040,000
Volume of business done in 1940	22,795,000
Volume of business done in 1943	51,443,000
Volume of business you expect to do in the first postwar year	49,660,000

Then the 442 secondary businesses were told that these 11 major industries expected to employ about 60 per cent more workers in the postwar period than in 1940, and 1 per cent more than in 1943, the peak year to date. With this in mind, the secondary business men guessed that their volume of sales would run about 15 per cent higher, in the years immediately following the war, than in 1943.

While the survey among business men was being made, a second one was being conducted among a selected cross-section of the city's population to find out their buying intentions, after normal conditions returned. A similar survey was made by mail among the farmers of Freeborn county, asking them what goods they expected to buy for their farms as well as for their homes and families. Some of the things that people hoped to buy were:

New automobiles:					
City residents	1,156	cars at	$1,053	average cost	$1,217,268
Farmers	1,140	cars at	970	" "	1,105,800
New housing:					
City houses	412	at	4,068	" "	1,798,056
Farm houses	150	at	3,150	" "	472,500
Repairs to housing:					
City houses	714	at	514	" "	366,996
Farm houses	540	at	900	" "	486,000
Farm barns	360	at	1,473	" "	530,280
Farm silos	360	at	539	" "	194,040
Other farm purchases:					
Tractors	780	at	926	" "	722,280
Pre-fabricated small buildings	810	at	566	" "	458,460
Electrical installations	810	at	325	" "	263,250
Other city purchases:					
Refrigerators	646	at	163	" "	105,298
Furniture	578	at	199	" "	115,022
Vacation travel	986	at	176	" "	173,536

How to Pay for It.

Another question put was, "How do you intend to pay for these purchases?" City people with incomes between $1,770 and $3,000 replied that they would pay in this manner:

From current income	38.2%
Borrowings	41.2%
War bonds	8.9%
No report	11.7%

Farm families with incomes ranging from $1,500 to $2,000 a year expected to pay for things thus:

Current income	64%
Borrowings	4%
War bonds	32%

In general, people with large incomes proposed to buy with cash rather than to borrow, as people of smaller means planned to do.

How Much Farm Income?

The Albert Lea committee realized fully how dependent the city was on the prosperity of the surrounding farmers. A sub-committee was working on farm income prospects while the other investigations were going on. Total income for Freeborn county was set down as follows:

Farm income, 1939	$ 7,316,000
Farm income, 1943	20,164,000
Farm income, first postwar year	19,416,000

The postwar figure was established after analyzing the possibilities of changes in crops and livestock. Aside from maintaining hemp raising, and an increase in soybeans and some vegetable crops, the committee did not anticipate any important changes. The members did recommend establishing a soybean processing plant and a cannery.

To find out how much the city and county construction projects could be depended upon to provide employment, a survey of public works programs was made. When this sub-committee reported, it was shown that some $15,000 worth of work had to be deferred because of war, representing about 14,000 man-hours. New projects might amount to $390,000 of expenditures. The committee did not consider the possibility of state and federal projects. It was the committee's conclusion that little reliance could be placed on public works as a means of relieving unemployment.

After weighing all the information gleaned by the sub-committees, the general committee of Albert Lea had a sound starting point for its postwar employment plans.

Albert Lea is only one city, but it is representative of thousands of communities in the United States. Its problems are the nation's problems. It is the Committee for Economic Development's intention to help solve these problems by accurate information.

cal Investigation May Reveal Opportunities for Sales and Jobs

mblem of the amittee for Eco- ic Development.

Findings of the community economic development survey may very possibly stimulate postwar business and employment, merely by showing merchants and contractors w large a market is waiting for ir products.

Bill Bopp, a contractor, may have underestimated the buying power of the people and not realized that 592 families in the city and rural areas expect to have new homes in the first two years after the war. He may decide he can use four more men after the war to handle this construction.

Thus each employer will be "chipping away" at the total of potential unemployed. A new job may be found for one man here, another there, three more there, and 15 more there.

Whether the total is whittled down to zero will depend entirely upon the cooperation of each individual employer and of all other groups in society, both local and national. In short, the survey figures, based in part on fact and part on estimate, only indicate possible postwar conditions. Subsequent developments and further investigations may alter the results.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

JESUS ON THE MOUNTAIN AND IN THE VALLEY

LESSON TEXT—Mark 9:2-8, 17-27.
GOLDEN TEXT—I believe; help thou mine unbelief.—Mark 9:24.

The vision of the mountain top prepares the believer for service down in the valley. "Where there is no vision the people perish," said the wise man of old (Prov. 29:18). For want of a true vision of God, a knowledge of His truth, and the God-given constraint which makes men give themselves in sacrificial service, the people will perish in their sins.

But let men come to know the truth as it is in Christ, learn to know Him as the Son of God glorious and powerful, and then let them translate their knowledge of Christian truth and their personal spiritual experiences into the daily ministry to the needs of their fellow men, and there will be songs of salvation and joy.

I. Knowing (vv. 2-7).

The transfiguration of Christ doubtless meant much to Him in preparation for His coming death and resurrection. It was a foregleam of His kingdom glory.

In this lesson we are concerned with the experience of the disciples rather than the feelings of our Lord. Fundamental in both Christian life and service is a clear understanding of the person and work of Christ. One may come to Christ knowing little more than that He is the divine Saviour, and one may enter into Christian living with a meager knowledge of the doctrines of the Bible. But the Christian who fails to grow in knowledge will not grow in grace as he should.

God sets no premium on ignorance, in fact it is quite evident that the great blight on the Christian church today is the appalling lack of understanding of God's Word.

The disciples came to a fuller conviction that He was the Son of God as they saw Him transfigured and heard the Father say, "This is my beloved Son." They learned more plainly the truth of His coming death for the sins of all mankind. They saw in the indescribable beauty of that moment the foregleam of His coming glory. What important truths these are—His deity—His redemption—His coming kingship. Do we have a clear grasp of these truths? If not, let us search the Scriptures.

II. Growing (v. 8).

"Jesus only." He filled their vision and their hearts. They had made spiritual progress as they had seen His glory and heard the commending voice of the Father.

Great experiences of spiritual renewing and power are necessary to effective life and testimony. They may not be in outward manifestation, in fact they are more often in the inner recesses of the soul; but they transform men and send them forth to magnificent living for God. One wonders if much of the dearth of power in the Christian church is not to be attributed directly to the lack of such experiences with God.

The disciples had an unforgettable mountaintop experience. Even so have many others found the secret of power.

Let us remember that such privileges are not reserved for a few, they are the birthright of every Christian. Power without knowledge is a dangerous and destructive thing, but knowledge without power is a dead thing.

Let us study God's Word, but let the truth be baptized in the overflowing spiritual power of a personal experience with God.

In regeneration all that Christ is and has for us is made available. If we have not taken out our inheritance let us do it at once.

III. Serving (vv. 17-27).

One of the lessons that seems hard to learn and to keep constantly effective in the life of a Christian is that mountaintop experiences of spiritual uplift are not an end in themselves, but a preparation for service. All too often we come to regard such times of peculiar blessing, whether in the privacy of our own room or in the great conference of Christian workers, as something which should glow warmly in our own hearts, making us glad in the Lord, and not as a preparation for ministry to others.

Jesus and the disciples went up to the place of prayer, into the place of glory, and down to the place of service. How fitting is that sequence.

Much confusion exists in the church because those who have foolishly abandoned God's Word and substituted the energy of the flesh for spiritual power have been most diligent in service to humanity; while those who know and accept the truth about Christ, and who profess to believe in the power of the Spirit-filled life, have failed to serve their needy neighbors.

"But Jesus took him by the hand and lifted him up" (v. 27). Verses 28 and 29 indicate that the disciples might have done the same by believing prayer.

PATTERNS SEWING CIRCLE

Versatile

HERE'S a jumper and jacket to play many roles in your wardrobe! The jumper with a blouse makes a smart office costume. The jumper with jacket is smart for shopping, travel and office, too.

* * *

Barbara Bell Pattern No. 1918 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Corresponding bust measurements 30, 32, 34, 36, 38, 40 and 42. Size 14 (32) ensemble requires, with short sleeves, 4¾ yards 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Did you burn something in a favorite pan? Here's an easy remedy which does wonders. Simply boil apple peelings in it—then wash thoroughly in hot soapsuds.

* * *

Here's a time and patience saver when stringing beads. Instead of using a needle, make a "stringing tip" on the thread by coating with nail polish—then work without a needle.

* * *

If every housewife in the nation saves as little as 2 tin cans each week, it would mean enough scrap steel to make the steel used in the hulls of 3 heavy cruisers, and the tin used in 20 submarines.

* * *

Shelled hard cooked eggs sometimes darken if they stand for any length of time. This discoloration can be prevented by storing the eggs in their shells in the refrigerator until you are ready to use them.

* * *

Place a flat dish under the ashtray and if a cigarette should fall off the tray it merely drops to the dish instead of on the tablecloth.

Automatic Oxygen Masks Cut Worry, Guesswork

Unlike all other oxygen masks which must be regulated by the wearer, the latest type, now being made for United States military airmen, works automatically and eliminates a great deal of worry and guesswork, says Collier's.

At all altitudes up to 38,000 feet, it supplies the flier with the proper mixture of air and oxygen, the flow of both being regulated by valves which, in turn, are controlled by atmospheric pressure.

RELIEVE BED SORES Ease and soothe chafe. Form medicated coat of protection between skin and chafing bedclothes with Mexsana, the soothing, medicated powder.

Bee's Appetite

It takes a bee a month to eat its weight in food.

Happy Relief When You're Sluggish, Upset

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

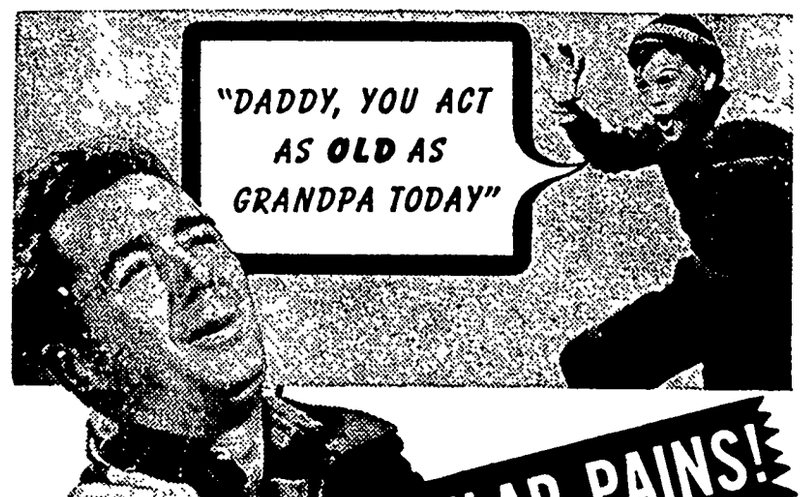
MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

DR. CALDWELL'S SENNA LAXATIVE CONTAINED IN **SYRUP PEPSIN**

NOSE MUST DRAIN
To Relieve Head Cold Miseries
When head colds strike, help nose drain, clear the way for freer breathing comfort with KONDON'S NASAL JELLY. *At druggists.*



MANY MEN are persecuted by lumbago or other nagging muscle pains—especially after exposure to cold or dampness. If every sufferer could only know about SORETONE Liniment! In addition to methyl salicylate—a most effective pain-relieving agent. Soretone acts like *cold heat* to speed relief:—

1. *Quickly Soretone acts to enhance local circulation.*
2. *Check muscular cramps.*
3. *Help reduce local swelling.*
4. *Dilate surface capillary blood vessels.*

For fastest action, *let dry, rub in again.* There's only one Soretone—insist on it for Soretone results. 50¢. Big bottle, only $1.

SORETONE
soothes fast with
COLD HEAT* ACTION
in cases of
MUSCULAR LUMBAGO OR BACKACHE
due to fatigue or exposure
MUSCULAR PAINS
due to colds
SORE MUSCLES
due to overwork
MINOR SPRAINS

MONEY BACK—IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

Mr. and Mrs. Emil Beier and Mrs. Daisy Lemke went to Goodell Thursday afternoon for a visit with Mrs. Wm. Beier who has been ill.

MRS. BARZ AND MRS. NUEHRING HOSTESSES AT PARTY

Mrs. Evert Barz and Mrs. Ervin Nuehring were hostesses at a pink and blue party given at the home of Mrs. Clara Barz Friday in honor of Mrs Raymond Barz.

The afternoon was spent in playing games after which refreshments were served by the hostesses.

Mrs. Raymond Barz was presented with a variety of nice gifts.

ENTERTAINED AT COURT WHIST PARTY

Mr and Mrs. Albert Priebe entertained a number of young people at a court whist party at their home last Thursday evening.

High and low prizes for ladies was won by Mrs. John Albers and Mrs. Francis Buseman. High and low prizes for men went to Francis Buseman and Sumner Fuller.

Lunch was served after the games were played.

MRS. C. KLUCKHOHN HOSTESS AT SHOWER TUESDAY

Mrs C. E. Kluckhohn entertained a large number of ladies at a pink and blue party Tuesday afternoon at her home in Klemme, honoring Mrs. Eugene Kluckhohn.

The afternoon was spent in playing games and visiting, after which Mrs. Kluckhohn served a delicious lunch.

Mrs. Eugene Kluckhohn received a variety of beautiful gifts from her many friends and relatives.

AUXILIARY UNIT PURCHASED FIFTY DOLLAR BOND

The Klemme American Legion Auxiliary unit met at the hall Tuesday evening for their reglular monthly meeting.

The group voted to purchase a $50.00 War Bond. About 10 pounds of carpet rags have been sewn and sent to the Veterans Hospital at Knoxville.

After the meeting several of the Legionaires served lunch.

Thank You

I want to thank all who came to visit me in the hospital, and also thanking all who sent me cards. It was all greatly appreciated.—Miss Emma Cutshall. 1tp

There's likely to be a plentiful supply of low grade cattle on the market next spring, economists at Iowa State College predict.

...o the People ...f this Community

YOU ARE IMPORTANT

There is no such thing as a ...ttle" investment in the Fourth ...ar Loan.

Your $25 or $50 or $100 Extra ...ar Bond may not have great im... portance in your mind in making up a 5½ billion dollar total for individuals.

But multiply yourself by 130,000,000 and then you see in real perspective how truly great each citizen becomes in massing national strength against the Nazis and the Japs.

Capt. Maurice Witherspoon, Navy chaplain aboard the Carrier **Wasp** when she sank, tells of a rescued wounded sailor, who, as he regained consciousness, asked: "Did I do my best?"

That's the only question you, too, have to ask yourself when you decide the extent of your personal participation in the Fourth War Loan.

There undoubtedly will be large single purchases of War Bonds in this community, but yours—if it is "your best" will deserve equally the red, white and blue shield you are privileged to display in the window of your home.

Say "Let's *All* Back the Attack."

THE EDITOR.

MCINTOSH WOODS NAME FOR STATE PARK APPROVED

The State Conservation Commission said Wednesday it had decided to name the recently acquired park on the north shore of Clear Lake, McIntosh Woods in honor of a pioneer family by that name from whom the land was purchased.

The new park is about a half mile east of Ventura and takes in a sizable piece of t mber, lake-shore, and the well known sandbar, favorite fishing grounds of many fishermen.

A road may be built into the park next summer so it can be opened to the public.

FREEZEUP OF LAKE IS 3rd FOR SEASON

Clear Lake—The waters of Clear Lake were frozen over Saturday morning after having been mostly open the past 3 weeks The low temperatures of Thursday night started the freeze-up and Friday night's sub-zero readings completed the work.

This is the 3rd freezeup this season. The first was Nov. 15 when a cold snap covered the lake with ice. Later warm weather opened it again the latter part of December, the ice being practically all out at Christmas time.

Ice harvest was halted about 3 weeks ago because of the unseasonable m ldness Not all icehouses had been filled but the new crop may alow completion of the job.

RELEASE MATERIALS FOR CIVILIAN AMMUNITION

Washington, —The army has released materials and facilities for manufacture of large quantities of ammunition for civilians, chiefly for use in protection of livestock and crops from predatory animals and some extent in the coming hunting season, it was learned Monday. An informed government official said supplies should begin reaching midwest retailers within 60 days and that they would be distributed under strict controls to make certain they reach more essential users first.

AVERY AND TWIN LAKE HOME PROJECT MEETING

At the home of Mrs. A. G. McMullen in Goodell on February 11, Avery and Twin Lake Home Project leaders discussed and studied, "Shopping in a Wartime Clothing Market."

Mrs. V. A. Cook and Mrs. J. A. Chambers, t o w n s h i p chairmen, made plans for the next training school which will be held March 3 at the home of Mrs. M. C. James.

Mi d Weather Ended, Snow And Sub-Zero Temperature Here

The mild winter weather came to a halt when about four inches of snow fell here Thursday and the thermometer dipped to 13 degrees below zero Friday morning, and 14 below Saturday morning, but skies were clear and sunny.

Couple Observes Valentine Day By Getting Married Here

MARRIAGE CEREMONY AT JOST HOME MONDAY EVENING

Mrs Waneta Wessels and Mr Heiko Brass were united in marriage Monday evening, February 14, at 7:30 o'clock at the home of Mr. and Mrs. Henry Jost in Klemme. Rev. Calvin Grosshuesch, pastor of the Evangelical a n d Reformed Church of Klemme, officiated, using the single-ring ritual.

The ceremony was attend only by close friends of the contracting parties.

The bride wore a floor-length gown of royal blue taffeta Her ornaments included a five-strand string of pearls. The couple were attended by Mr and Mrs Jost

Phyllis Kirkwood sang, " I Love You Truly," and was accompanied at the p ano by Miss Eloise Etchen

After the ceremony a 3-course dinner was served to the wedding party and guests at the Jost home. A wedding cake, baked and decorated by Mrs. Jost, served as a center-piece on the table which was decorated in the Valentine theme.

The dinner was served by the Misses Lydia Beck and Eloise Etchen

Both Mr. and Mrs. Brass are well known in this community. They will make their home on the farm owned by Mr Brass, which he has operated for a number of years.

THROWING KEROSENE ON FIRE MIGHTY DANGEROUS

Starting a fire in the furnace, stove or fireplace by throwing on kerosene or gasoline is asking for trouble, warns Harold Beaty, Iowa State Colege extension agricultural engineer.

A better method, he says, is to use asbestos pad. A piece of asbestos paper is wadded up and wound with a piece of wire. The pad then is soaked in kerosene and s placed so that the fuel will ignite easily. The pad is ignited and can be pulled out before it becomes too hot. It can be used over and over again.

Kerosene may be used safely by soaking corncobs or other kindling, allowing them to dry on the outside, and placing a few in proper position in the fuel. This method does not carry the danger of a sudden explosion such as often occurs when liquid gasoline or kerosene is thrown on a blaze.

RESIGNS

Herbert C. Rowe of Hesper has resigned as township clerk. Mr. Rowe has held the position for the past 52 years.

MR. AND MRS. PAUL GOLL MARRIED TWENTY YEARS

Sunday, February 13th, was the twentieth wedding anniversary of Mr. and Mrs. Paul Goll of near Klemme and was observed when a large group of relatives arrived at the Goll home heavily laden with baskets of good food for a big dinner.

Those present to honor Mr. and Mrs. Goll were Rev. and Mrs. Calvin Grosshuesch; Mr. and Mrs. G A Goll and Elizabeth; Mr. and Mrs Carl Wille and family; Mr. and Mrs. Alvin Goll and family; Mr. and Mrs. Herman Schmidt and Lu Verne; Mr. Erwin Priebe and Arlene and Irene Schmidt.

After the bountiful dinner the afternoon was enjoyed in visiting.

In the evening eleven neighboring families arrived to continue the celebration and the evening was spent in visiting and playing games after which lunch was served.

Mr and Mrs. Goll were presented with beautiful and useful gifts by their relatives and neighbors, and Mrs. Goll is quite proud of the n ce set of dishes she received.

Mr. and Mrs. Goll are the parents of one daughter, Beulah. They have lived their entire life in this community.

Work Circle Postponed Meeting Until Next Monday

The Work Circle of the Methodist W. S. C. S. will not meet Thursday of this week as announced, but will meet Monday afternoon at 1:00 o'clock, February 21st at the church. Mrs. Frank Shultz and Mrs. Herman Bridges are the hostesses.

The ladies will work on a quilt at this meeting.

GRAND MASTER OF MASONS TO SPEAK AT GARNER

On the evening of Thursday, February 17th, the Grand Master of Masons in Iowa, C. D. Jory, will speak at the Masonic Lodge in Garner.

Members from several neighboring lodges have been invited to attend.

PAYING PROPOSITION

M. H. Thompson, living near Hudson, has turned his spare time into profitable venture. Sometime ago, Thompson sent a shipment of 1,000 pounds of live snapping turtles to a New York firm. Last week, he sent a second 1,000 pound shipment to the same firm. Thompson, an experienced trapper, hunter and angler, found the turtles at the bottom of Black Hawk creek.

Local Cooperative Invites All Farmers To Lunch, Program

To the People of this Community

THINK IT OVER

How about doing a little cold turkey thinking after you lay aside this newspaper tonight?

You've got a good job. The chances are there is someone else in your family, perhaps two or three, working. Your son or your brother—may be away at war.

This war must end sometime. Your whole family, your neighbors, are praying it ends soon and those fighting boys of yours will come home safely.

But will you be ready for whatever happens when peace comes? Will you have something laid away? We're all hoping there'll be jobs aplenty, jobs which mean making something for somebody's happiness and not for somebody's sorrow. That's where your War Bonds come into the picture. Sure, Americans own billions of dollars of War Bonds now; and before this 4th War Loan ends they will have put away billions more. But how about you? You're the one that counts. The bigger the pile of War Bonds you have when peace comes, the bigger chance you'll have to slip right into the post-war world you're dreaming about tonight.

So "Let's *All* Back the Attack."

THE EDITOR.

KLEMME OVER THE TOP IN FOURTH WAR LOAN DRIVE

A check-up on Monday, February 7th revealed that the town of Klemme had over-subscribed the quota Klemme's quota was $22,500 and the check-up showed that over $31,000 in bonds had already been purchased

Bond sales at both the bank and post office has been br sk the past week and when the final check-up is made the figure will be much larger.

FAREWELL PARTY PLANNED FOR T. C. NELSONS

The Klemme Methodist Church will have a farewell dinner Sunday for Mr. and Mrs. T. C. Nelson who are moving away. The dinner will also be a reception for the new members.

It will be a pot-luck dinner and every family is invited to come.

MASON CITY MAN BUYS TEAM HORSES FOR $415

At an auction sale at the Wilbur Coe farm near Ventura, Tuesday, 10 horses were sold for good prices.

One team of strawberry roans sold for $415 to Jim Rhodes of Mason City.

A Palamino riding stallion was sold to Dale Hill of Central Heights for $326.

Cattle and other merchandise also brought good prices.

STUDY GROUP HELD MEETING AT HENRY BUSSE HOME

The Study Group of the Methodist W. S. C S. met at the home of Mrs. Henry Busse on Thursday afternoon, February 10th.

The Devotional Topic was the "Church at the Center," with Mrs Martha Bredbenner as leader. Mrs. J. A. Chambers gave Chapter II of "We Who Are America."

In spite of the stormy weather, 16 members were present. A delicious lunch was served by Mrs Busse.

Young Married Group Met at Britt

52 Hancock County Young Marrieds met at the I.O.O.F. Hall in Britt on Friday evening, February 11. The group discussed the subject "What Should Be Our Future Land Policy." Paul Henderson, County Extension Director, led the discussion and showed moving pictures.

LOCAL CREAMERY COMPANY PLANS ANNUAL MEETING FOR WED., FEB. 23

Paul Mueller, manager of the Klemme Cooperative Creamery Co. announces that the annual meeting will be held on Wednesday, February 23rd, beginning at 11:30 a. m.

The meeting will be held at the Community Hall with a free lunch followed by a business meeting and a good program. A special speaker has been engaged. V. A. Stromer, local farmer, will show his home movies, which will be a very interesting feature.

During the business session three directors will be elected, and other business attended to.

The manager and the board urge all farmers to attend this meeting.

HEMP PAYMENT CHECKS FOR HANCOCK FARMERS ARRIVE

Farmers Like To Grow Hemp, But Acreage Will Be Rationed

J. M. Townsend, manager of the Britt hemp mill, reports that checks in payment of the 1943 crop of hemp grown for the mill, are beginning to arrive in the county. The first group of checks to be received were 20 in number and totaled $13,106 96.

In a recent survey conducted by the management of the plant it was found that growers are asking for a larger acreage in 1944 Replies received thus far indicate that growers would like to increase their plantings of hemp in 1944 by about 64 percent.

With an acreage allotment for the Britt plant of 4,250 in 1944, it appears that the acreage for the growing of hemp for the Britt mill will have to be rationed in 1944 to allow all who grew hemp in 1943 to participate in 1944.

HANCOCK COUNTY COOPERATIVE NOW SERVES 1,312

Rural Electric System Has Added 60 Miles To The Circuit

The annual meeting of the Hancock County Rural Electric CVooperative was held in the basement of St. Boniface Church at Garner Thursday with a good attendance despite a blizzard

Reports of the president, secretary, treasurer and the superintendent were approved. The report of the superintendent, H. L. Bush, disclosed that a total of 60 miles of new contruction servicing 150 rural families was effected at a cost of a little less than $400 per mile.

Andy Wolfries, popular radio annouucer from Cedar Rapids, told of his experiences in England during the 5 months he spent abroad doing special research work for the British navy.

Three directors were re-elected and at the board meeting immediately following the annual meeting M. C James of Goodell was re-elected presdent; I. V. Rasmus of Garner, secretary, and C. J. Wille of Klemme, treasurer. The personnel of the board has remained the same since the co-op was first organized in 1937. Other directors are: Earl Ruka, Klemme; Victor Loebig, Wesley; J. A. Huisinga, Woden; William E. Haes, Garner; Omar J. Maland, Kanawha; E. G. Gaskill, Corwith. The co-op now has a total of 1,312 members.

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the kidneys. Often of the kidneys. They are apt to become over-taxed and fail to filter excess acids and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess waste. They have had more than a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS TEACHES TRUE GREATNESS

LESSON TEXT—Mark 9:33-39; 10.13-16, 42-45.

GOLDEN TEXT—The Son of man came not to be ministered unto, but to minister, and to give his life a ransom for many.—Mark 10:45.

Ambition to be great is not wrong—provided one has a proper conception of greatness, and seeks it in a right way. Every one of us should be our very best, not for selfish reasons, but for God's glory.

The disciples were earnest and eager to have a place of honor with the Lord in glory, but even in that holy purpose they became selfish and argumentative. Jesus gives several marks of a truly great man.

Greatness Means Being—

I. Not First, but Last (9.33-35).

The way of the world is to seek the place of "No. 1 man"—to be looked up to, honored, and served by all. True greatness takes the last place, the place of a servant; and lo, God regards that as the first place.

It is not a question of timid diffidence, or self-effacement, but a willingness to take the humble place in order to serve all.

II. Not Proud, but Humble (9.36, 37).

"Great" people of this world have no time for children. Let them be cared for by servants, teachers, anyone at all, but not by their "distinguished" parents.

But Jesus said that the one who set aside human pride and received a child with humility of heart and mind—and in His name—received the Lord who gave them life—spiritual as well as physical—and is interested in them; in fact, He is with them and hence when we receive them in His name, He is there!

III. Not Exclusive, but Co-operative (9:38, 39).

John, quick to apprehend spiritual truth, saw in the teaching of Christ concerning the little child the condemnation of something he had done.

The man who casts out demons, or who gives the disciple of Jesus a cup of water, in His name—that is, with true faith in Christ, and in His power, and for His glory—must be a believer. He may not belong to our group or circle, he may not speak our language, he may not use our methods, but if he is serving Christ we should not forbid him or speak evil of him. You and I may not like one another's appearance, or voice, or methods, but let us love and co-operate with one another for Christ's sake!

IV. Not Important, but Approachable (10:13-16).

Some who think they are great, pride themselves on being hard to reach—protected from the rabble and their problems by secretaries and servants.

The disciples had built up such an idea of the importance of Christ in their own minds. He had never given them any ground for it either by word or deed.

So the man who is truly great follows in the Master's footsteps. He is approachable, kind, has time for simple folk and little children. If that isn't true of a man he is not great—no matter what he may think of himself or what others may say about him.

V. Not a Supervisor, but a Servant (10:42-44).

Christianity is not organized after the manner of secular government (v. 42). Much of the mischief that has come to pass in the church is the result of "running the church" as an organization, when it should be allowed to develop as a living organism.

The way up is down. That is always true in the spiritual realm. The Son of man came not to be ministered unto but to minister, yea, to give His very life (v. 45). Shall not those who bear His name walk the same path of humble self-denial?

Anyone who observes with even a little care knows that the church of Jesus Christ is hindered most seriously by the presence of pride and selfish ambition. Some people will not work unless they can rule.

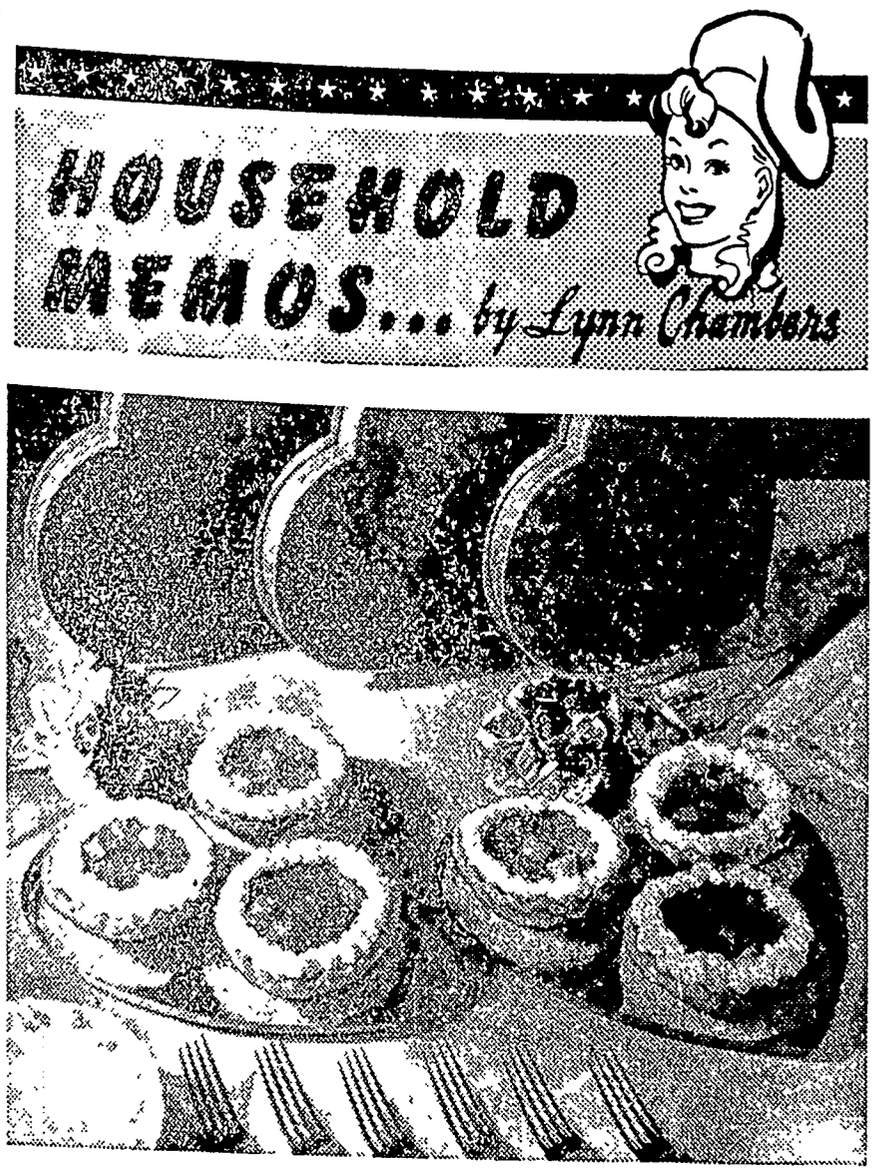
Are there then no Christians who humbly serve the Lord? Yes, praise His name, there are many, and wherever they are found they are the salt of the earth.

VI. Not Unselfish, but Sacrificial (10:45).

The world is full of people who want to be served. Their little personalities swell with pride and pleasure if someone else cringes and bows, and serves.

There is nothing commendable about being served. The great and good thing is to serve.

The Son of man—Himself the Lord of glory, the One who might have called legions of angels to do His will—came "not to be ministered unto but to minister." That service meant going about doing good even when He was exhausted and worn. But it meant far more than that, for it took Him to the cross where He gave "his life a ransom" for us. Are we ready to learn of Him?



Let Hearts Be Gay on Valentine's Day!
(See Recipes Below)

Cupid's Share

Hold on to your heart! Here comes Cupid ready to do tricks to your heart on Valentine's Day! It's time for a party with cute Dan Cupid reigning on a mighty throne.

February's a short, short month but with plenty of opportunity for party-giving. You can have a Lincoln's or Washington's Birthday party, or you can be extra gay and colorful with a Valentine's party. These should be extra popular this year with the pepped-up pace of romance. If anyone in your crowd is about ready for a shower or wedding you might take the cue from Valentine's day and make Cupid's decorations your theme.

Pink-and-white or red-and-white are the gay color schemes and you can carry these out in both food and decorations. A simple but dramatic table picture is seen in the picture in today's column. Three large, red valentine boxes are set on their side in a row to form the main interest for the table. If you want to enlarge on this, get other pink-and-white or red-and-white decorations such as nosegays of roses and tie with a swirl of ribbon.

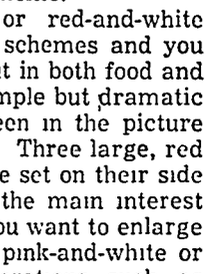
If you would rather carry this out in flowers, get a nice centerpiece of red-and-white flowers. But have a heart, somewhere along the way. If you have a valentine mold make a valentine cake or jelly mold and work out an arrow with a pastry tube or, if the cake is iced you might even put on an arrow made out of red paper.

Here is a luscious salad that takes it easy on rationed foods:

***Molded Raw Cranberry Salad.**
(Serves 6 to 8)

2 cups raw cranberries, ground
1 envelope orange gelatine
1 cup chopped celery
½ cup chopped nuts
1 cup granulated sugar
2 cups water
Juice of 1 lemon

Pour ½ cup water in a bowl. Add gelatine to water. Add 1½ cups water and sugar and stir until dissolved. Add lemon juice. Set aside to cool. Grind raw cranberries, chop nuts and celery fine. Add these ingredients to gelatine. Place salad in one large or several individual molds and let jell until firm. Serve with lettuce or greens.



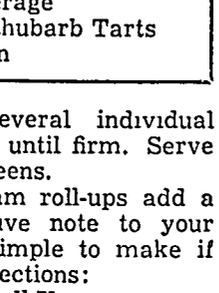
These clever ham roll-ups add a colorful and festive note to your menu. They're simple to make if you just follow directions:

Ham Roll-Ups.
(Makes 4 Roll-ups)

2 tablespoons fat
2½ tablespoons flour
¼ teaspoon salt
Pepper
1 cup milk
¼ cup grated American cheese
4 slices leftover boiled or baked ham, sliced thin
8 asparagus tips

Blend fat, flour and seasonings. Gradually add the milk. Stir until thick and smooth. Add cheese and stir until it has melted. Cut ham in thin slices 4 x 6 inches. Roll two asparagus tips in each slice. Secure with toothpick, place in a shallow pan and surround with cheese sauce. Sprinkle with paprika. Bake in a moderate oven (350 degrees) 15 minutes. Insert sprigs of parsley at end of each ham roll. Serve at once.

Get out your heart-shaped cutter if you want to make sandwiches. For a simple children's supper party or for valentine refreshments for grown-ups, serve heart shaped sandwiches filled with chicken salad and garnish the platter with buttered beets cut in heart shapes. Strawberry and vanilla ice cream with little sugar cookies—a tiny motto candy heart placed in the center of each cookie—is effective.



This chicken sandwich spread may be prepared the day before it is used to fit in the day's schedule:

***Chicken Sandwich Spread.**
4 cups finely minced chicken
1 can pimientos, finely minced
½ cup pickle relish
¼ cup grated onion, if desired
Salt and pepper to taste
Mayonnaise to moisten

Thoroughly mix all ingredients and store in refrigerator until ready to use.

Cherries can make food decorative for any Valentine party whether they are used in cake or pie:

Champion Cherry Pie.

Crust:
1½ cups bread flour
10 tablespoons lard
1 teaspoon salt
5 to 6 tablespoons ice water

Sift flour and salt together, add lard and blend. Add ice water gradually and cool.

Filling:
2½ cups pitted sour cherries, drained
⅓ cup cherry juice
2½ tablespoons fine tapioca
⅛ teaspoon salt
1 cup sugar
1 teaspoon butter

Soak tapioca, sugar and salt in cherry juice and let stand while pastry is being made. Then mix well with cherries, add butter and put in pie tin. Bake pie for 10 minutes at 450 degrees then reduce temperature to moderate or 350 degrees and bake for 20 minutes. Turn off oven and let stand at oven temperature for 20 minutes before removing from oven.

If you want sugar-saving suggestions, write to Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Chambers' Point-Saving Valentine Party Menu

*Molded Raw Cranberry Salad
*Heart-Shaped Chicken Sandwiches
Beverage
Strawberry-Rhubarb Tarts
*Recipes Given

Lynn Says

Play Games, Too! Nothing's nicer than having fortunes told at a Valentine party. If you can't afford a professional, have someone dressed as a gypsy, arm her with a heavy glass crystal and booth, and let her go to town.

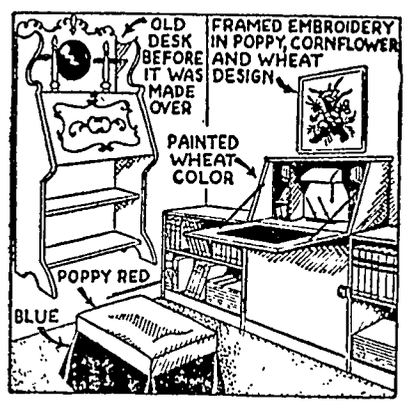
Letter games are fine for starting off a party. Give each guest a letter to tie around his neck as he enters, and as others appear, let each one dash around to others to make up words. When words are formed, guests appear in front of a person who takes down their names. Prize goes to person appearing in most words.

Novel idea for a scavenger hunt which needn't take you outdoors. Select about 10 guests and make them have something unusual. For example, have a man with two unmatched socks, a girl with two different colored hair bows, someone who wears his watch on the left arm, a girl with two different colored earrings, etc. Everyone is provided with a list of above so he knows what to look for. As he finds the person, he writes down the name. The one finished first gets the prize.

Save Used Fats

Applique Is Keynote Of Remodeled Room

COLOR is important in making harmonious rooms from odds and ends, and nature is the best source for color inspiration. The soft golden color of wheat, the orange-red of poppies and the blue



OLD DESK BEFORE IT WAS MADE OVER
FRAMED EMBROIDERY IN POPPY, CORNFLOWER AND WHEAT DESIGN
PAINTED WHEAT COLOR
POPPY RED
BLUE

of cornflowers were worked into the charming applique design you see here over the desk. This needlework picture was made in a few hours with scraps of gingham and bits of embroidery thread.

Stretched over a piece of cardboard to fit an unused picture frame this piece of applique work became the keynote for the interesting furniture group you see here. The top of the old desk was cut away and it was boxed in between book shelves. The padded stool was made of a box. The sketch shows how the applique colors were repeated in paint and fabric. The desk accessories also repeat these colors.

* * *

NOTE—Now is the time to start a really interesting piece of hand work that will fit into that room that you expect to remodel next spring. A stamping pattern, color guide and directions for all the stitches in the graceful applique design shown here may be obtained for 15 cents. Address.

MRS. RUTH WYETH SPEARS
Bedford Hills New York
Drawer 10

Enclose 15 cents for applique design pattern.

Household Hints

Watch your electric cords for wear. Have them repaired at once to prevent accidents.

* * *

Rayon fabrics must be handled carefully when wet. When dry, rayon regains its strength.

* * *

You can add a cute note to your skirt by cutting out musical notes from odd pieces of felt and sewing them around the hem. Or one appliqued on your sweater will make a nice conversation piece too.

* * *

Why not a spice bag to flavor that soup or stew? To make one, mix three sprigs parsley, six whole cloves, one bay leaf and a little thyme and tie them loosely in a small square of white cheesecloth. Drop the bag into the cooking mixture.

* * *

If it is difficult to make wallpaper stick to chimney, ceilings or walls, apply a coat of aluminum paint before papering. Then the wallpaper will not crack or come loose.

* * *

Continual opening of the oven door changes the temperature and is a common cause of baking failures.

Might Have Been Different Had the Lady but Said

Before the bar of justice on wife-brought charges of desertion, Mose Brown meekly admitted his guilt and offered nothing in extenuation except that the lady talked too much.

"That's no excuse for desertion, Mose," the court said. "The constitution guarantees every woman the right to talk all she wants to."

"Jedge, I knows it do. Only Lucy she never stop talkin'. She keep it up, mo'nin', noon, and night, till I just cain't stan' it no mo', jedge."

His mournful earnestness impressed the court. "She does? What does she talk about?"

"Jedge, suh," he said, "she don't say."

Our Men In The Service

LT. B. E. MISSMAN TELLS OF LIFE IN THE PACIFIC

United States Marines,
25 January, 1944.

Dear Dad:

Just a few lines to let you know that I am well—plenty glad to be especially after what I have just witnessed. Maybe God does look after people at all. Tell Mrs. M. she has'nt penetrated in the slightest of the horrors of war. The American boys are plenty rugged.

Guess maybe I'm not as young as I used to be. This sleeping in mud and rain . . . I have spent cold very, very uncomfortable nights, but I just can't complain At any rate we ran the "sneaking yellow bastards" off this particular God foresaken spot. HOT—we just sit and sweat. Have no idea how long we will be in these parts, but I have given up hope of going home very soon. So it goes.

You undoubtedly have read of our action in the Des Moines Register. If you only know what part I then you would know where I am. Understand that I am SAFE and WELL, so don't worry at all. I expect we will hit another island or so on this blitz maybe not. You see I have long since ceased to be my own boss. In this "lash-up" it isn't what you know, its WHO you know.

How have you been Dad? I often lay awake (as usual) and believe many of the fine times we used to have together. Wait until we take off for Wisconsin. We'll get a couple of jungle hamstrocks, complete with mosquito net and we will go up to those tamarack swamps and give the bugs a "bit of a fair go" (A new language I've picked up, a bit "Henglish", eh!)

Have received no mail for almost a month, but understand there is some due to come in via L. S. T. (Landing Ship Transport)

Give my very best regards to all, and you folks take it easy.

When are you going to send us some of those Arm-chair state-side locked Army out here? Ain't that a $64 question?

Love,
Byrnes.

SWEPT CLEAN

Two Tama boys were required, as a punishment for breaking glass bottles on the highway, to sweep the pavement, place the glass in a bucket and dispose of it at the city dump The glass was cleaned up in ample time to prevent any punctured tires. The boys were given the the punishment instead of being bound over to the juvenile court.

Mrs. P. M. Wilson Hostess At Meeting Of Bridge Club

Mrs P M Wilson entertained the U-Deit-Em bridge club at her home Thursday afternoon.

High scores were won by Mrs. G Lawhorn, Mrs. Art Kudje and Mrs. R. A. Jorgenson.

Mrs. H. D. Ramsay was a guest.

BOARD PROCEEDINGS

3rd ADJOURNED JANUARY MEETING

Garner, Iowa, Feb. 3, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers, present.

The minutes of the last meeting were read and approved as read.

On motion and second the inventory and the annual report of the Hancock County Home is approved.

4th ADJOURNED JANUARY MEETING

Garner, Iowa, February 7, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with John A. Chambers, F. J. Schoun and Penn Eckles present.

The minutes of the last meeting were read and approved as read.

This being the 7th day of February, A. D. 1944, a date heretofore set for a letting on the labor and material for the construction of D D No. 137, a sub-district of D. D. No. 1 and 2, Hancock County, Iowa, the hour for said letting having arrived, the proof of Publication being on file and the Board being fully advised, said letting was held as scheduled The chairman proceeded to open all bids on file and after duly considering all bids on file, the Board finds the bid of Concrete Products Corporation of Humboldt, Iowa, to be the low and best bid for material and the bid of Charles A. Anderson of Britt to be the lowest and best bid for labor for the construction of D D. No. 137 as petitioned for by Frank J. A. Hejlik and approved by this Board

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 137, Hancock County, Iowa, that the bids of the Concrete Products Corporation of Humboldt, Iowa, for material and the bid of Charles A Anderson of Britt for labor be accepted as the lowest and best bids for the Construction of said district and the Chairman, F J Schoun, be and he is hereby directed and authorized to execute contracts in behalf of Hancock County, Iowa, to Concrete Products Corporation of Humboldt and Charles A. Anderson of Britt.

BE IT FURTHER RESOLVED that Wm. Henschen, Wm Boehnke and Walter Kahl be and the same are hereby appointed a commission to estimate and classify damages the same are also appointed a commission to classify and assess benefits in the construction of D D No. 137 Hancock County, Iowa. BE IT FURTHER RESOLVED that Wm Henschen be and he is hereby appointed Engineer to supervise the construction of D D No 137 and his bond as such Engineer is hereby fixed at $250 00.

The foregoing resolution was offered and read by Supervisor Eckels, who moved its adoption, was seconded by Supervisor John Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun Penn Eckels and John Chambers, Aye, and Nays none. Whereupon the chairman declared the resolution duly adopted

On motion and second the Semi-annual report of Roy L. McMillin, County Treasurer, is approved

FRANK J. SCHOUN, Chairman

Hancock County Spelling Contest

The Hancock County spelling contest will be held in the Garner high school gymnasium, Saturday afternoon, April 1, beginning at 2 o'clock.

Pupils who have not completed the eighth grade are eligible to enter the county contest.

Eaton's True Blue Contest Speller, 1941 edition, will be used.

Old board piles, scrap piles and straw stack bottoms may harbor rats. Get rid of them and patch cement foundations and holes in the sides of cribs.

We can print anything the Times Office.

Food for Victory
PROGRAM
On Hagan Bros. Farm
★ Chester and Kenneth Hagan are typical of the more than 50,000 Iowa farmers now being helped to produce more food for freedom by low-cost electric power supplied by business-managed companies. The foresight and pioneering of these companies in bringing electricity to the farms of Iowa have aided greatly in the Food for Victory Program.
Electricity works 168 hours a week for the Hagan Brothers for only a few cents an hour. It can do some 200 farm jobs at the snap of a switch. On the Hagan farm electricity mixes feed, operates a rip-saw, separates milk, cooks, heats water, washes clothes, provides refrigeration — to mention just a few. Farming 400 acres without it would make reaching their production goals all but impossible, say the Hagens.
Present government regulations still permit us to make extensions from highlines to farms. Call or write today for details.
The Hagan home is equipped with an electric range, refrigerator, water heater, washing machine and many other electrical appliances. Mrs. Hagan regularly feeds eight people, and sometimes as many as thirteen.
Central States Electric Company
A self-supporting, tax paying, privately owned business.

NEW HOME BUTCHERING BULLETIN

A new bulletin on home butchering, prepared by the extension service of Iowa State Colege has just arrived at the Farm Bureau office A copy of this may be obtained from Miss Hazel Grimes or Mr. Paul Henderson.

In addition to directions or drying, brining, smoking, freezing, and canning of meats, a excellent chart is included on pork and beef cutting.

FOR GOVERNMENT

Some government workmen are cutting down a row of cottonwood trees on the Kirby farm near Greenville. The row is a mile long and was set cut a number of years ago The trees are from two to three feet in diameter, and are being cut into lengths suitable for transporting. The lumber will be used for various purposes.

WEEKLY NEWS ANALYSIS

Allied Nations Are Stunned by Stories Of Jap Atrocities to War Prisoners; Reds Surge Forward Below Leningrad; Fifth Army Continues March to Rome

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union

Beauty Parlor—Just like that, T-4 Joseph Drescher of Leavittsburg, Ohio, dropped into this chic little salon on Bougainville in the Solomons for a haircut, shine and manicure.

JAP ATROCITIES:
'Death March'

"Death March on Bataan."

In these four ghastly words, the late Lieut Col. William Dyess, who led a party of officers and men in escaping from Jap imprisonment, told a still more ghastly story of horror and atrocity committed against the heroic U. S. and Philippine defenders of Bataan by the enemy.

On 85 miles of road leading from Bataan to San Fernando, Colonel Dyess related in a war and navy department release, U. S. and Filipino troops plodded along from dawn to dusk for six days, thirsting under a piercing sun. Sick and delirious were dragged from the straggling columns and cruelly put to death. In one instance, prisoners were forced to bury three Americans and Filipinos alive at bayonet point.

Conditions in prison camps were equally atrocious, the army and navy report revealed At one camp, the death rate was 20 Americans and 150 Filipinos a day in the first week. In the second week the rate jumped to 50 Americans and 500 Filipinos through starving and overwork.

Strike at Supplies

To make sure that there will not be another Tarawa when doughboys land in the Marshalls astride our supply lines in the mid-Pacific, U. S. bombers continued pounding defense installations in the islands.

On New Britain, Allied bombers struck hard at shipping in the port of Rabaul, which feeds barges supplying Jap troops through coastal depots.

With their bombers striking at enemy supply lines, U. S. troops drove farther inland, both on New Guinea and on Bougainville.

RUSSIA:
Form Trap

Fighting raged on two widely separated sectors of the 800-mile Russian front, with the Reds fanning out below Leningrad in the north, and the Nazis counterattacking to strengthen their position 80 miles from the Rumanian border in the south.

As the Reds surged forward below Leningrad, they chewed two big holes in the Germans' positions on the northern and southern ends of this front, threatening to swing toward each other and throw a loop around the enemy's rear.

Far to the south, the Germans pushed slowly into Russian lines above the Rumanian border, keeping massed Red armies off balance, more than attempting any real breakthrough. In Poland, Nazi resistance stiffened.

Reject Mediation

The U S offer to mediate Russia's claim to one-third of prewar Poland was rejected by the Reds, and the situation became even more complicated with Foreign Secretary Anthony Eden's declaration that Great Britain could not recognize any territorial changes made during the war without consent of the parties concerned.

Russia's rejection of the U. S. mediation bid emphasized Stalin's disposition not to deal with the present Polish government - in - exile, which he has accused of strengthening Germany by its requests that an impartial commission investigate Nazi charges that the Reds slew 10,000 Polish officers near Smolensk.

ITALY:
At Nazis' Rear

With their supply lines leading to Cassino under fire of the Fifth army advancing inland from their invasion beachheads below Rome, the Germans launched a series of counter-attacks in the new battle region while their long-range artillery sought to break up Allied troop concentrations.

Near Cassino U. S. and French forces moved through rugged Nazi fortifications to ring that key to the broad highway to Rome on two sides, while farther to the south, British units battered against the right flank of the enemy defense line.

By surging inland after their landings on the sandy beaches below Rome, the Fifth army threatened to cut off an estimated 100,000 German troops in the Cassino area, some of whom were being withdrawn back to counter the new Allied thrust. As the Germans moved back to meet the threat, Allied bombers roared in to machine-gun the columns.

ARGENTINA:
Breaks With Axis

Declaring that a huge Axis spy ring within Argentina was working to overthrow the country's self - rule which previously had deemed relations with Germany and Japan to its best interests, President General Pedro Ramirez signed a decree breaking off diplomatic ties with Berlin and Tokyo.

Gen. Ramirez

Argentina's action followed U. S. refusal to recognize the revolutionary government of Bolivia on grounds that the new regime was linked with a subversive movement in South America designed to disturb Allied relations.

Obviously delighted by the turn of events, U. S. Secretary of State Cordell Hull declared: "It must be assumed . . . that Argentina will now proceed . . . to adopt other measures which all of the American countries have concerted for the security of the continent."

SOLDIER VOTE:
Big Issue

Already a big issue of the present congressional session, the question of soldier voting in 1944 became a bigger issue when President Roosevelt directly appealed to the legislators to provide for federal supervision over service balloting.

Declaring that a system of absentee voting in which states would determine eligibility and print complete ballots would involve too much shipping and time, the President asked that the federal government be allowed to distribute blank ballots on which soldiers would then write in the names of their election choices or merely the name of the political party they favored.

Champions of states rights assailed the President's recommendations, standing firmly for state supervision over registration to assure that each ballot is cast by the registrant himself, and objecting to the services' power to decide the voting time because permission might be given just before or in the midst of a great battle, when soldiers might feel that the country should pull together behind directing leadership.

FARM PRICES:
Supports Announced

Subject to congressional approval, the War Food administration announced support prices for 34 principal farm products, with the only big decrease being the $1 per hundredweight for hogs effective October 1.

Loans for corn and wheat would be made at 85 per cent of parity, and for cotton, rice and tobacco at 90 per cent of parity. Potato supports would be pegged at 90 per cent of parity compared with 92 in 1943.

On a per bushel basis, support prices would be higher on soybeans by 14 cents, flaxseed 10 cents, barley and grain sorghums 10 cents and sweet potatoes 10 to 20 cents.

Peanut supports would be raised by $10 a ton, sugar beets $1.50 a ton, and sugar cane 30 cents a ton.

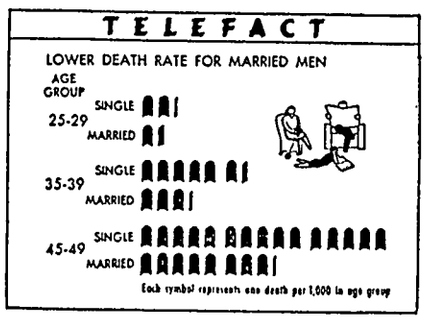
NEW TAXES:
Only Hope Chest Spared

Only the hopeful young misses stocking their hope chests got any kind of a break from senators and congressmen drawing up a compromise $2,000,000,000 tax bill.

With over $1,000,000,000 in so-called luxury levies agreed upon, only silver plated flatware (knives, forks, etc.) escaped taxation. Otherwise, the lawmakers decided upon a 20 per cent tax on jewelry.

In raising $1,000,000,000, the legislators recommended a 25 per cent tax on cosmetics and toilet articles; 1 cent tax on every 5 cents of amusement admissions; 30 per cent tax on cabaret or night club bills, and $20 annual tax on pool tables and bowling alleys.

It was also recommended that air mail postage be boosted to 8 cents and locally delivered mail to 3 cents.



CIVILIAN TIRES:
Less Predicted

Because chemical difficulties have been encountered in processing oil into synthetic rubber ingredients and military requirements have increased, a cutback in civilian tire production from 30 to 20 million casings for 1944 loomed.

Production of heavy duty tires for busses and trucks also was expected to fall below expectations, since a mixture of natural rubber is required for manufacture of these casings and the natural rubber stockpile has dropped to a low level, partly because of the failure of South American growing programs to fully develop.

The rubber pinch also has affected recapping plans, with the government again specifying reclaimed scrap for retreads.

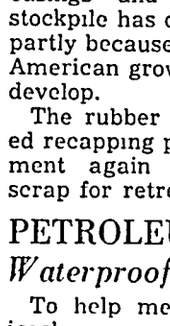
PETROLEUM WAXES:
Waterproofers

To help meet the military services' crying need for water and other proofing, the petroleum industry produced 390,000 tons of waxes in 1943, a notable achievement since certain crudes have a wax content of only three-fourths of 1 per cent.

In 1944, emphasis will be placed on production of micro-crystalline waxes, which have proven especially useful in packaging food rations because thin coatings resist moisture and the substance retains its flexibility in low temperatures. Micro-crystallines are further useful in proofing army shoes against mustard gases and protecting metal parts from the elements.

WHISKY:
None to Be Made

Because industrial requirements for alcohol in 1944 will approximate 632,000,000 gallons and keep distilleries operating at 150 per cent of their rated capacity, no whisky will be manufactured this year, War Production Czar Donald Nelson declared.



Donald Nelson

Alcohol reserves had dropped to 80,000,000 gallons by December, 1943, a dangerous level, Nelson said, because synthetic rubber plants, arsenals, powder plants and tank terminals for lend-lease require a working inventory of 30,000,000 gallons.

To assure 1944 supplies, Nelson said the War Production board was seeking to secure sufficient molasses and corn for distilleries, to persuade the British to meet their own requirements by processing molasses from the Caribbean, and rushing new grain alcohol plants to completion.

TELEPHONE RATES

Interstate telephone rates will be reduced March 1, by agreement between the Bell Telephone system and the Federal Communications commission. Subscribers will be saved about eight million dollars a year, it is estimated. Putting night long distance telephone rates into effect at 6 p. m. instead of 7 p. m. will account for most of the reduction, or about 5½ million dollars.

The remainder is accounted for by a lowering of the overtime rate on interstate teletypewriter service.

HIGHLIGHTS . . . *in the week's news*

FOXHUNT: Since sporting Englishmen have been too busy with war to conduct the usual foxhunts, with horse and hound, the little animals have increased in boldness and have become a menace to poultry, lambs and game. A party of 500 soldiers and citizens, setting aside sportsmanship for the duration, killed 50 of the little red beasts in a great drive in Kent

FEATHERS: The war has opened a new market for a domestic product—chicken feathers. They are now used for stuffing pillows and cushions. Before the war, 80 per cent of down feathers came from Europe and China. These were mostly from ducks and geese. New methods of preparing chicken feathers make them more sanitary, and softer than formerly.

SIGNIFICANCE OF RUSSIAN BLAST

Members of the diplomatic corps who have lived beside Russia and dealt with her diplomats for years point to some significant things about the Pravda report which set the world on its ear about the British negotiating a separate peace with Nazi Foreign Minister Ribbentrop.

In the first place, diplomats point out that, had the report been published in Izvestia, it would have been much more serious. Izvestia is the organ of the Soviet government, and anything appearing therein can be considered the gospel views of the Kremlin itself.

However, Pravda, organ of the Communist party, is one step removed, and anything published in it can be interpreted as close to but not necessarily representing the views of Stalin.

Thus, it was Pravda which dropped a ton of editorial bricks on the unsuspecting, well-intentioned head of Wendell Willkie, hitherto considered Russia's best friend. That editorial rebuke came after Willkie had discussed the Polish boundary question—in a manner quite sympathetic to Russia.

However, the Russians chose to rebuke their best friend as a warning to President Roosevelt and Secretary Hull that they did not want the Polish question discussed at all—not even by their friends. They could not very well come out and rebuke Hull and Roosevelt, so they chose a prominent American, one step removed, figuring Hull and Roosevelt would take the hint.

Therefore, remembering that Russian diplomatic moves are usually aimed obliquely at something on the other side of the billiard table, here is the diplomatic corps' explanation of the latest Pravda thrust against the British.

For about two years, it has been no secret that the British have hung back regarding a second front in western Europe. It is also no secret that, right down to the Teheran conference, Churchill pulled for a Balkan front or almost any other front except a western front.

* * *

PUTTING BRITISH ON SPOT

Stalin is a man who never forgets and, even if no friction had occurred at Teheran, he would have continued to be suspicious about British intentions of a second front, in view of the two years of second front debate And on top of Teheran, plus Churchill's long stay in Africa, Stalin's suspicions may be boiling again.

Therefore, point out the diplomats, what could be more adroit than to put the British squarely on the spot by subtly accusing them of talking to the Nazis about a separate peace? In other words, after the Pravda article, the British now have to prove they want no separate peace by pushing ahead with the second front. If they delay it, then the Russians can point to the suspicion—no matter how untrue—that perhaps the British were talking to Ribbentrop after all — which, of course, they weren't.

The Pravda publication fits in, especially at this time, when there actually have been some hints in official circles that the Russians are doing so well that the Nazis will surrender soon, then we wouldn't need a second front.

It's complicated, but the Russian mind is complicated, and Russian diplomacy even more so.

* * *

SOFTENING CASUALTY MESSAGES

The war department has received many letters recently from ministers and private families, suggesting that, instead of sending casualty messages by telegram to bereaved families, they be sent to a committee of pastors in each community, one of whom would then deliver the message and seek to soften the blow of the tragic news.

So far, however, the war department has taken the position that it should continue delivery of the casualty messages by Western Union messenger boy. Army officials argue that delivery by a clergyman would cause confusion and delay, and that a clergyman might not be available at the time, or he might lack proper and immediate transportation.

Also, the army argues that a casualty message has a high priority, which means that its transmission is expedited, and this might be offset by delay at the receiving end if the message had to pass through the hands of a clergyman.

* * *

CAPITAL CHAFF

¶ When diplomats run out of liquor, that's a story. Carlos Campbell of the Chilean embassy burst into the office of Chilean Ambassador Michels, saying, "Don Rodolfo, please lend me a case of wine for tonight; I'm having a party!" "I can't do it," replied the ambassador. "I have no wine myself!"

¶ In the Library of Congress, back numbers of Esquire are kept in the Delta Collection, a special collection of sex books and other erotica available to adults, not to adolescents.

Cairo Conference

By Frank Gervasi

(WNU Feature—Through special arrangement with Collier's Weekly)

Long before the great Cairo conferences opened, knowledge of the forthcoming meetings was general.

The conferees met behind barbed-wire barricades, minefields, antiaircraft batteries, cordons of troops and secret police. Even more formidable was the protective barrier of censorship.

Madame Chiang, fragile and lovely as a lotus blossom, shopped for silk stockings, visited mosques and Saladin's Citadel and had her hair done.

Roosevelt and Churchill went to the Pyramids and listened to a half-hour condensation of their aeonic history by the No. 1 Dragoman, Haji Ali el Robeishi, who declined a large Roosevelt tip and made a fortune selling "exclusive" interviews to 70 war correspondents, and will have all the "Freedom from Want" a man could wish for.

The Generalissimo wasn't impressed by the Pyramids, which he saw with Madame. The Great Wall of China, he said, gets less publicity but is a better job. The Sphinx, however, got him. "He emanates majesty," said Chiang.

Churchill, described by Roosevelt as the writer of the group, wrote the communique. It was edited by the President, who changed the phrase "territories Japan has taken from China" to "territories Japan has stolen."

Madame Chiang, who witnessed the signatures, clapped hands and blurted happily, "That's great!" Then everybody posed for pictures. The original of what became known as the "China Communique" was presented to Chiang as a souvenir.

Stalin and Inonu.

The subsequent meetings with Premier Joseph Stalin in Teheran and with Turkish President Ismet Inonu, were covered for the correspondents by proxy—by two British civil servants and two American ex-newspapermen employed by the Office of War Information. They did as well as could have been expected.

The plans—as made long before they started remodeling Mena House from a comfortable hotel into an office building and wiring it with 400 miles of cable connections with 47 villas where the bigger shots were housed with their staffs in the vicinity—didn't include Stalin's presence in Cairo. Arrangements were being made for the Mahomets of Anglo-American democracy to come to the mountains of Sovietism in Teheran.

When, after five days of political and military talking, planning, lunching, wining and dining in Mena House, the scene shifted to Teheran for Act Two, the China Conference in Cairo had lost its interest for reporters and perhaps for the world.

Stalin had propagandistically dominated the Cairo Conference in absentia. In Teheran, he dominated it in person. But all we learned directly in Cairo was that the Russian uniforms are of excellent material, that the Soviet Secret Police is efficient and omnipresent, and that all carried gats, including servants. We covered Act One with periscopes, and Act Two by remote control. Stalin returned to Moscow, and Roosevelt and Churchill to Cairo to meet the Turkish delegation headed by Inonu for Act Three.

Turkey Leans Toward War.

All three conferences were of acute importance, but in some ways, the most significant was the one involving Turkey. The very fact that Inonu, cleverest knife-edge walker in the diplomacy of neutrality, came to see Roosevelt and Churchill was a slap in the teeth for Hitler, who, poor fellow, simply hasn't anyone with whom to hold conferences now. Inonu's presence in Cairo strongly indicated that Turkey's balancing act was about over, and that the country would enter the war at 11:59½ p. m. before the fateful midnight hour of victory, to secure a reservation at the peace conference. It was apparent that Turkey had at last decided that continued neutrality might be unprofitable, and Inonu's arrival gave point to the statement of the Teheran Communique warning Germany of great offensives "from east, west and south."

'Great Revolution.'

Final chapter in the series of conferences, was a speech by Premier Jan Christiaan Smuts.

"We are passing," he said, "through one of the great revolutions of history. The significance of this war is that it is the first step to that greater world which is coming. The war of arms will pass, and the greater battle of the human spirit remains before us. A higher level of human destiny lies before us, for the elements are gathering for something much bigger than ever we conceived.

FOR PLATE WEARERS THE WORLD

Tradition Gives Lincoln Three 'Birthplaces' But Historical Research Establishes the Fact There Was Only One; It's Near Hodgenville, Ky.

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

ONE of the most famous of all newspaper cartoons, appropriate to the annual observance of Lincoln's birthday, was drawn by H. T. Webster while he was on the staff of the old New York World. It has become a Newspaper Classic, i. e., annually it is "reprinted by request." It is:

HARDIN COUNTY, KY., 1809

"ANY NEWS DOWN T' TH VILLAGE, CZRY?"
"WELL, SQUIRE MCLEAN'S GONE T' WASHINGTON T' SEE MADISON SWORE IN AN OL' SPEL MAN TELLS ME THIS BONAPARTE FELLA HAS CAPTURED MOST O' SPAIN. WHAT'S NEW OUT HERE, NEIGHBOR?"
"NUTHIN' A TALL, NUTHIN' A TALL, 'CEPT FER A NEW BABY DOWN T' TOM LINCOLN'S. NUTHIN' EVER HAPPENS OUT HERE"
REPRINTED BY REQUEST
Courtesy Press Pub Co (N Y World)

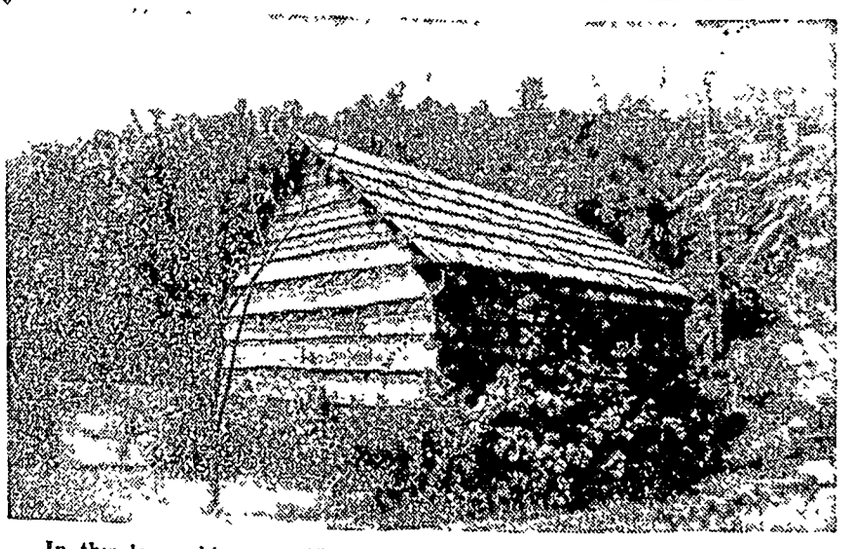
If you go down into Hardin county, Kentucky, today expecting to see the place where the new baby was born "down t' Tom Lincoln's," you'll be disappointed. For you won't find there the log cabin in which that historic event took place. But if you drive east into Larue county to the little town of Hodgenville, the county seat, then go 2½ miles south, you will see, enshrined in a temple of stone, this rude little structure and you will be told that it stands on the very spot where it stood when Abraham Lincoln was born within its log walls on February 12, 1809.

Why this apparent discrepancy in the geography of Lincoln's birthplace? Well, the explanation is simple. When Tom and Nancy Hanks Lincoln became the parents of a son, their home stood within the boundaries of Hardin county. Years later Hardin was divided into two counties and the eastern part of it, including "Tom Lincoln's place" on Nolin creek, became Larue county. So there's some truth in the statement that "Abraham Lincoln was born in two counties," paradoxical though that statement may sound.

Other Inconsistencies.

Nor is that the only apparent inconsistency in regard to the site of Lincoln's birth. Several years ago, Rev. William E. Barton, one of the leading biographers of the Great Emancipator and the man who, perhaps more than any other historian, has cleared up many of the mysteries surrounding the name of Abraham Lincoln, wrote an article under the title of "Three Places Claim Honor of Being Birthplace of Lincoln." It reads, in part:

> Homer had seven birthplaces; Lincoln had at least three—according to divergent Kentucky traditions.
>
> First of the houses in which Abraham Lincoln is said to have been born is the Berry house at Beechland, Washington county, Kentucky.
>
> If we should go to Beechland, we will find the house is not there. It has been moved to Harrodsburg, where it stands as a kind of museum, not very intimately associated with Lincoln, who never in his life was in Harrodsburg
>
> The house today bears little resemblance to its former self Fortunately, however, it was photographed while on its original site. In this house, the home of Richard Berry, the President's parents, Thomas Lincoln and Nancy Hanks, were married by Rev. Jesse Head, June 12, 1806.
>
> Washington county people have a formidable group of affidavits from old and truthful people who declared that Abraham Lincoln was born there, that his people did not remove to Hardin county till he was a lad several years of age, and certain witnesses affirmed on oath that they saw him as a child playing about the door of the Berry house
>
> My own impression is that these people were truthful and that they may have seen the little lad, Abraham Lincoln, playing about this house. The parents of Abraham Lincoln were married in this house; he doubtless visited it in his early childhood and may have lived several months beneath its roof, but we must look elsewhere for his birthplace.
>
> So we go to Elizabethtown. The house we wish to see is not standing, but we can find people who will assure us that Lincoln was born there and who will show us the unattractive location. What they are showing us is the place where Thomas and Nancy Lincoln spent their honeymoon, and lived from June, 1806, till the spring of 1808. Here Abraham's little sister, Sarah, was born
>
> The cabin that stood here was the first house advertised as the birthplace of Abraham Lincoln and the picture is still frequently shown as such. This house was standing at the end of the Civil war It was first photographed, apparently, for "The Campaign Document," in which William M Thayer, in 1864 told of the "Character and Public Services of Abraham Lincoln" But Thomas Lincoln did not build this cabin, and Abraham was not born there and never lived there The last vestige of this cabin has disappeared
>
> The actual birthplace of Abraham Lincoln was a log cabin which, after many removals, now stands not far from its original site on Rock Spring farm on Nolin creek, 2½ miles south from where the village of Hodgenville now is, in what was then Hardin and now is Larue county, Kentucky



In this log cabin near Hodgenville, Ky., Abraham Lincoln was born on February 12, 1809.

A Romantic History.

This cabin, which was the true birthplace of Lincoln, has a romantic history It stood on a tract of 300 acres, known as the Sinking Spring farm, which Thomas Lincoln bought in December, 1808, for 66⅔ cents per acre. Here little Abe Lincoln lived until he was four years old. Then his father abandoned the place because of litigation involving a flaw in the title and moved his family 10 miles northeastward to another farm of 30 acres on Knob creek, which he had previously purchased

Several years later (two different dates, 1827 and 1835, are given for this event) a certain Henry Brother bought the Sinking Spring farm and lived in the Lincoln birthplace cabin for several years. Then, according to Beveridge, who quotes J. T. Hobson's "Footprints of Abraham Lincoln" as his authority for the statement, Brother tore down the cabin and used the logs for firewood. The accuracy of this statement, however, is doubtful and, as will be seen later in this article, it has been refuted.

There seems to be good reason to believe that the cabin was still standing on its original site in 1860 when Lincoln was elected President. Soon afterwards it was purchased from the man who then owned the farm by George Rodman who moved it to another farm about a mile and a half from the Sinking Spring farm. There it remained during the turmoil of the Civil war and after being used a number of years as a shelter for Negro families and as a tenant house, it was used as a school house in 1872 and 1873.

A certain John Davenport married the school-teacher and they lived in the cabin from 1875 to 1894, when it was bought by A. W. Dennett and moved back to its original site on the Sinking Spring farm.

The cabin was not destined to remain on its original site long, however. Soon afterwards it was bought by Rev. J W. Bingham who took it down and shipped the 143 logs in it to Nashville, Tenn , for a centennial celebration there. Next it was moved to Central park in New York city where it was on exhibition for a time and in 1901 it was exhibited at the Buffalo exposition. The next owner was David Greer, who stored it in the old Poffenhausen mansion in Long Island City, N. Y.

Bought by Collier.

In 1906 Robert J. Collier bought the Sinking Spring farm and presented it to the Lincoln Farm association, "a patriotic organization formed by American citizens for the purpose of preserving as a national park the farm on which Abraham Lincoln was born." The president of this association was Joseph W. Folk, governor of Missouri, and its trustees were a group of distinguished citizens, including Mr. Collier, who also bought the Lincoln cabin. The logs were shipped to Kentucky, accompanied by a guard of honor sent by the state, for a homecoming celebration in Louisville and then taken to the Lincoln farm.

"The cabin, I am reliably informed, originally stood near to the spring," writes Barton. "After its first removal, it was reerected on the top of the slope leading up from the spring. When it was taken down for exhibition purposes, this site was marked by a post; and when the cabin was purchased and rebuilt, it was erected around the post which still stands in the middle of the cabin floor."

The Lincoln Farm association, by popular subscription, not only raised an endowment of $50,000 to maintain the homestead but provided an impressive memorial at a cost of nearly $225,000 to house the little log cabin. In 1916 the title to the farm was transferred to the United States government which, in accepting the property and the administration of the endowment, agreed to maintain the farm, preserve the cabin and never charge an entrance fee to the public. Thus the farm became a national park.

In September, 1916, President Woodrow Wilson journeyed to Hodgenville to accept the new national shrine on behalf of the nation and on that occasion declared that it was "an altar upon which we may forever keep alive the vestal fire of democracy as upon a shrine at which some of the deepest and most sacred hopes of mankind may from age to age be rekindled." Unfortunately, however, the government did not keep its promise so far as maintaining the farm properly was concerned. During the next 10 years the place was permitted to fall into disrepair, owing to a lack of maintenance funds. Then in 1928 Rep. M. H. Thatcher of Kentucky reported as a "national disgrace" the fact that "the Lincoln memorial farm is now grown up in bushes and briars, gullies are being washed across the land and at times the approach to the memorial is covered with several inches of silt. The spring where Lincoln drank as a boy and which supplied water for the household is flooded in rainy weather so as to foul the water . . . Yet, this is one of the greatest shrines in the country, and the government of the United States, having taken over this property, is under at least a moral obligation to provide for its maintenance."

As a result of this disclosure congress passed a bill providing $100,000 for the rehabilitation of the farm and authorizing future appropriations as may become necessary for its preservation. One of President Coolidge's last official acts before leaving the White House was to sign this bill.

The Legend Lives On.

In the meantime the legend that the logs in the rebuilt cabin in the stately memorial were not the original logs, would not die down. In 1920 the Kansas City Star published a story about the Lincoln memorial at Hodgenville which brought from Judson S. West, justice of the Supreme court of Kansas, this statement:

> In August, 1879, I visited the scene of Lincoln's birthplace a few miles from Hodgenville, Ky., and drank from the beautiful stream which flows off the ledge of rocks. The cabin in which Mr. Lincoln was born had then been burned for some time and from the ashes of the debris where the fire occurred, I gathered up some relics to take home. No one has seen and no one will ever see the original cabin in which Abraham Lincoln was born.

In reply the Star declared it "has no correction to offer on the story published. The log cabin in which Lincoln was born stands on the spot where it was originally built, enshrined in an imposing building of granite." It then tells of the work of the Lincoln Farm association, mentions some of the men who were trustees and declares "It is hardly possible that citizens of their standing would allow an imposition in the matter of Lincoln's birthplace." The statements of such a careful and conscientious historian as Rev. William E Barton seem to be sufficient verification of that assertion and Americans who visit this "shrine of democracy" at Hodgenville today can feel certain that they are gazing upon the veritable logs of the cabin in which Abraham Lincoln was born.

Here Is a Complete Record of the Homes of Abraham Lincoln

What is believed to be a complete record of the dwelling places of Abraham Lincoln and the length of time spent at each has been compiled by Dr. Louis A. Warren, director of the Lincoln National Life foundation of Fort Wayne, Ind. Dr. Warren, former Kentucky newspaper editor, has devoted his life to Lincoln research.

The residences in succession, according to Dr. Warren, are: Hodgenville, Ky., February, 1809, to May, 1811; Knob creek, Ky., May, 1811, to November, 1816; Spencer county, Ind., November, 1816, to March, 1830; Macon county, Ill., March, 1830, to July, 1831; New Salem, Ill., July, 1831, to April, 1837; Speed's store, Springfield, April, 1837, to January, 1841; William Butler home, Springfield, January, 1841, to November, 1842; Globe tavern, Springfield, November, 1842, to August, 1843; Monroe street home, Springfield, August, 1843, to May, 1844; Eighth street home, Springfield, May, 1844, to March, 1847; Sprigg's boarding house, Washington, March, 1847, to March, 1849; Eighth street home, Springfield, March, 1849, to February, 1861; Chenery house, Springfield, February, 1861; Willard's hotel, Washington, February and March, 1861; White House, Washington, March, 1861, to April, 1865; Anderson cottage, Washington, summers of 1861 and 1864.

Tower of Justice

Although a leaning pagoda of Indo-China leans more than its famous counterpart at Pisa, Italy, it was built to lean as a "barometer of justice." As the administration of justice becomes less equitable, the tower, in native fancy, leans lower and lower. The remarkable tower is 80 feet high and was built 200 years ago.

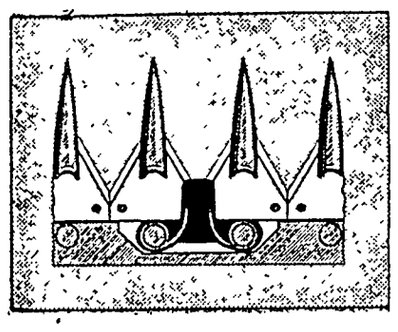
Iowa farmers who have tried bromegrass say that an acre of pasture of this crop will feed twice as much livestock as an acre of bluegrass.

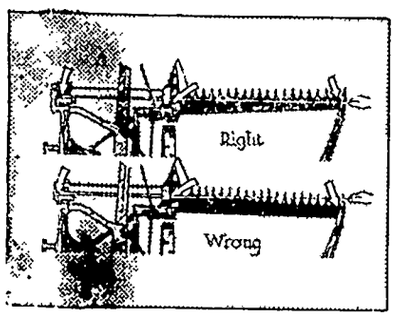
Tips ON FARM MACHINERY



CORRECT REGISTER

The mower, binder or combine sickle must be in correct register if it is to do a clean, easy job of cutting The sickle is in correct register when the point of each section travels from the center of one guard to the center of the next guard and back again, in one complete revolution of the crank or pitman flywheel.

Don Struthers, Iowa State College extension agricultural engineer, states that when the sickle does not register correctly, either the pitman rod is not of the correct length, or else the sickle bar itself is not in correct position The latter condition is often common on mowers when the king pins on the inner shoe are badly worn so that the cutter bar can sag backward. Worn king pin holes on the inner shoe should be reamed out and over-sized pins installed.



CHECK LEAD

The mower sickle bar must have some "lead" to compensate for the strain and drag on the bar when it is cutting. Iowa State College agricultural engineers state that a 5-foot mower has the proper amount of lead when the outer end of bar is 1¼ inches ahead of the inner end. On a 6-foot mower, the lead should be 1½ inches, and on a 7-foot mower, the proper lead is 1 3-4 to 2 inches.

To check the lead, block up the tongue to 32 inches height, pull the outer end of the bar back to take up the slack, and then stretch a string from the center of the pitman boxing, over the center of the sickle head ball, to the outer end of the bar. Measure from the taut string to the back of the sickle, at both the inner and outer ends of the bar.

Mr. and Mrs. Francis Buseman Liberty township, entertained to dinner Saturday noon Seaman Eugene Kluckhohn and wife.

The office rooms at the Northern Lumber Company have been brightened up the past week with new paint.

Mr. and Mrs. Martin Brinkman were at Mason City Monday to visit Mrs Brinkman's brother, Mr. Wm Baack, who is seriously ill in the hospital.

Mrs. Ira Overholt and daughter, Mrs F. C. Byrnes, returned home Saturday from Ames where they visited with relatives for several days.

Mr and Mrs. Dale Schlei entertained to dinner Sunday Mr. and Mrs Irving Haupt, Herman Schuldt and daughter Mabel of Garner; Mrs Bertha Schlei and Margaret Haupt

Mr and Mrs. P. M Wilson were dinner guests Sunday at the home of Dr and Mrs. W. F. Missman The dinner was in honor of the doctor's birthday which was Monday, St. Valentine's day.

John Chambers, accompanied by Harry Caldwell, of near Corwith went to Ames Sunday to attend the funeral of Mr. George Godrey, an old neighbor who formerly lived between Corwith and Luverne.

The vicinity of Garner is experiencing a siege of mumps and many students have been absent from the school there during the past ten days No cases have been reported around Klemme.

Seaman Eugene Kluckhohn left Sunday for the Coast Guard Station at Sandy Hook, New Jersey, after spending a week's furlough here visiting with his wife, the former Miss Marie Schmidt, and his parents, Mr and Mrs. C. E. Kluckhohn

Mr and Mrs. Verner Lewis have received word that their son Staff Sergeant Glenn V Lewis of the U S. Marines has arrived at San Diego, California. Sgt. Lewis has been with the Marines in the South Pacific for several months.

Mrs. W. L. De Merritt and Junior spent last week visiting at the parental Wm. Ax home while Mr De Merritt was taking treatments at a Mason City hospital. Sunday Mr and Mrs. Ax and Ervin took them back to Thornton.

Troop 56, Klemme Boy Scouts and adult leaders, attended the morning services at the Methodist Church Sunday as a part of their observance of National Boy Scout week. The Klemme Scouts had a nice display in Wellemeyer's show window the past week. Klemme Boy Scouts are doing their part to help win the war by salvaging old paper. Don't burn your paper, give it the the Scouts.

Rev. Calvin Grosshuesch returned Sunday morning from Sheboygan, Wisconsin, where he spent a few days visiting with his parents. Rev. Grosshuesch also visited with his sons, Reuben and Calvin Jr. at the Mission House College, at Plymouth, Wisconsin.

Mr. and Mrs. H. F. Jost entertained to dinner and supper Sunday Mr. and Mrs. Albert Etchen and family, Miss Lydia Bock, Mr Charles Bielefeld and Fred Nagel The occasion was in honor of the birthdays of Mrs Jost and Mr. Etchen.

Mrs. Leo Esbeck taught in the Klemme high school all of last week for morning classes, substituting for Mrs. Wayne Gifford, who before her marriage last week was Miss Phillys Sherrill. Mrs. Gifford took up her teaching duties again Monday.

Pfc. Charles Bock of Camp Stomen, California, arrived home Saturday to spend a two weeks furlough in Klemme, visiting with his parents, Mr and Mrs Phillip Bock Charles has been in the army for ten months and has been on the West Coast all of that time. His work is clerk in a supply depot.

Mrs. Bert Jones has resigned her position as operator at the Central Iowa Telephone Co office here, effective March 15th Mr Jones will continue, however, as lineman and manager of the company both at Klemme and Corwith The Jones family will move into the Ira Overholt house in the south part of town

Mrs. F C. Byrnes left Tuesday night for her home at Dayton, Ohio, after visiting with her parents, Mr and Mrs Ira Overholt for the past couple of weeks. Mrs. Byrnes' husband is a Major in the army, stationed at Dayton. He has been given the task of writing the script for the radio broadcast for The Army Hour, to be broadcast Feb 20 on the national hook-up.

Mr. and Mrs. Elmer Arnold and Evelyn; Mrs. Albert Koerner, and Mrs. Glenn Bridges were Mason City visitors Saturday.

Mr. and Mrs. Wm. Waddingham moved their household goods in from their farm Tuesday to their home in Klemme, which they purchased several months ago from Einar Salling

Sgt. Homer Schoenweter from Albuquerque, New Mexico; Cpl Lyle Schoenweter from Manchester, Conn; and T Sgt Melvin Schlei from Great Bend, Kansas, were all home, being called here to attend the funeral services of their grandmother, Mrs. Charles Schoenwetter at Garner Homer and Lyle returned Friday to their stations and Melvin left Monday. The young men all enjoyed their furlough visiting with their parents and relatives in this community

Mr. and Mrs. Vic Perkins and Miss Jean Perkins of Estherville came Saturday evening and visited until Sunday evening at the parental Louis V. Perkins home. Other Sunday guests at the Perkins home were Mrs. Perkins' mother, Mrs. Bert Hinton, and her brother-in-law and sister, Mr. and Mrs. Lee Stewart, of Webster City. All came at this time to visit Miss Darlene Perkins who is leaving this week for Los Angeles, California.

Miss Novella Bredbenner, daughter of Mrs. Martha Bredbenner, and who is atending Iowa State Teachers College this year, was the representative of the Wesley Foundation of Cedar Falls at a committee meeting of the Iowa Methodist Student Movement held in Des Moines last week end. Representatives from six of the Iowa Colleges attended the meeting. While in Des Moines, Miss Bredbenner visited at the home of Mrs. Leonard Sampson and Irma, former Klemme residents.

NEW WATER PUMP

The Tama water pump station has been modernized with the installation of a new air-tight head and propeler blade on one of the old pumps. The new pump was also brought up to the surface of the ground. The other pump was made more sanitary some years ago. The two pumps have now increased the amount of water pumped per minute from 260 gallons to 400 gallons. The installation of the air-tight head also makes it impossible for germs to get in the water mains through the pistons.

"E" Bond sales are over the ... with a total of 137%.

To the People of this Community

KILL OR BE KILLED

United States Marines paid the stiffest price in human life per square yard for the capture of Tarawa, vital Pacific outpost.

It was kill or be killed Your boys did not flinch when they ran into the deadliest fire-power along the beaches of this important Gilbert Island stronghold This assault, bloody and costly, is one of the many which must be made before Tokyo and Berlin are pounded into dust and ashes.

What are you doing to back up the boys? Remember these are boys from this very community, perhaps from your very home Any home in your neighborhood which today does not display the treasury's red, white and blue 4th War Loan Shield proclaiming "We bought Extra War Bonds" is not backing the attack. Every Extra War Bond you buy becomes a direct fighter against Japan and Germany. If you could but see one man die on the battlefield, you would not count the cost of your slight sacrifices to buy Extra War Bonds to make each succeeding assault less costly in the lives of our boys.

You can't afford NOT to buy Extra Bonds in the 4th War Loan if you would help these boys.

THE EDITOR.

MR. AND MRS. C. J. WILLE OBSERVE ANNIVERSARY

February 18th was the 30th wedd...ng anniversary of Mr and Mrs C. J Wille, but relatives and friends waited until Sunday when they surprised Mr. and Mrs Wille by arriving before noon at the Wille home with well filled baskets for a big dinner.

Those who came for the dinner were Mr. and Mrs Raymond Wille Rev. and Mrs Grosshuesch and family; Mrs. Gretchen Schlawin Mrs. Naska Bock; Mr. Fred Bell and daughters, Julia and Ruth; Mr and Mrs. Carl Wille; Grandma Wille Mr. and Mrs Werner Schlawin and La Vahn; and Mr and Mrs. Arthur Schlawin.

Other guests came to pay their compliments in the afternoon and included Mr. and Mrs Heiko Janssen; Mr. and Mrs Simon Fisher; Mr. and Mrs. Fred Barz; Mr and Mrs. Les Hartbeck and family; and Mrs. Esther Barz, Milvern and Edward.

Another group arrived in the evening to wish Mr. and Mrs. Wille many happy returns of the day and were Mr and Mrs Raymond Wille Mr and Mrs. Harold Reckow and family; Mr and Mrs Henry Jahnke; Mr and Mrs George Thiemann Mr. and Mrs H J. Thiemann, Mr and Mrs H H Thieman; Mrs Fred Osterkamp; Paul Jahnke; Miss Eva Copeland; Mr. and Mrs. Raymond Barz; Mr. and Mrs. Curtis Waddingham and Mr. and Mrs. Alvin Thiemann and family.

WEDDING ANNIVERSARIES CELEBRATED

A six o'clock dinner was held Sunday evening at the Newgaard home in Goodell honoring the wedding anniversaries of the following families who were present Mr and Mrs. Matt Smith and Ruth of Klemme; Mr. and Mrs. J. J. Cook and Delores of Klemme; Mr and Mrs. Amos Hanson and Roger of Goodell; Mr. and Mrs. Wilmer Burk of Belmond, and Mrs. Newgaard. This was the 19th consecutive time that they had met for the annual celebration.

W. S. C. S. MEETS MARCH 2

The Methodist W. S C. S. will meet at the church on Thursday afternoon March 2nd with Mrs. C. C. Kilgore as the leader.

The hostesses are Mesdames A. G. Koerner, Fred Ridder, and L. A. Ridder.

There will be a quilt to work on.

Save your kitchen fats and oils.

So You Can't Buy Another Bond

Army Signal Corps Photo

Take a good look at this American soldier as he lies in the mud of Rendova Island in the Southwest Pacific, victim of a Jap air raid. It is not a pleasant scene, is it? When you are asked to buy an extra War Bond to Back the Attack think of this picture of your fellow American blasted by the concussion of a Jap bomb thousands of miles from home. Then brother, don't you think you will want to dig a little deeper to back up his comrades? *From U. S. Treasury*

Local Creamery Report Shows Increased Business In 1943

ANNUAL CREAMERY MEETING HELD TODAY AT COMMUNITY HALL WELL ATTENDED

Local Creamery Shows Increase Of $28,643.67 Over Last Year

The annual meeting of the stockholders and directors of the Klemme Cooperative Creamery Company was held today, Wednesday at the Community Hall beginning with a free lunch at noon, followed by a program and business session

The total income of the creamery for 1943 totaled $216,486 40, which was an increase of $28,643 67 over the previous year

A total of 433,270 pounds of butter was manufactured as compared with 476,225 pounds for the previous year, or 12,955 pounds less But this was greatly offset by the higher prices the farmer received for his product The average price the creamery paid for butterfat this past year was 5400 cents, compared with 4616 cents the previous year Operating costs were also reduced the past year over the previous year

The slight decrease in the total amount of butter made can probably be attributed to the war effort as some farmers are doing less dairying due to the shortage of help and have increased production along other lines.

The Klemme Creamery is doing a nice business and is helping the war effort by providing a necessary food for both our armed forces and the civilian trade A large part of the butter manufactured the past year found its way into army and navy camps all over the U. S. as well as foreign countries through lend-lease.

HANCOCK COUNTY FARMS SELL AT OVER $100 AN ACRE

Deeds were recorded in the office of the Hancock county recorder this week showing sales of Hancock county farms as follows:

Clarence Lundgren sold his 160-acre farm in Section 28, Orthel township, to Frank V. and Ella T. Kelly at a consideration listed at $21,500.

The Equitable Life Assurance Society of New York sold a 160-acre tract in Sections 19 and 20, Britt township, to Henry Egts at a consideration listed at $21,000 and the Aetna Life Insurance company sold the east half section of Section 1, Boone township, to Earl and Faye Luster with revenue stamps indicating a sale price of approximately $54,000.

These farms are all well improved farms in a high state of cultivation.

The 1944 support price for soybeans has been announced as $1.94 a bushel. This is a 14 percent boost over the 1943 support level.

ETCHEN QUALIFIES FOR ARMY AIR FORCES

Des Moines Army Aivation Cadet Examining Board today announced that Winton Etchen, age 20 son of Mr and Mrs. Albert Etchen of Goodell, Iowa, has successfully qualified for training as an aviation cadet with the Army Air Forces He is a graduate of Klemme High School.

An official letter has been furnished him requesting his assignment to the Army Air Forces When called, he'll be given five months study in a leading college and will also get dual-control flying instruction. After this he will go on to eight months of full flight training When graduated as a pilot, bombardier, or navigator, and his winning of the coveted "wings," his pay and allowance will be from $246 to $327 per month.

The entire training coarse lasts well over 14 months and is valued at $30,000 Only the finest planes, the best and safest that money and engineering skill can build, are used. This training will qualify him for leadership in the world's newest industry — aviation.

WILL OBSERVE WORLD DAY OF PRAYER HERE

The World Day of Prayer will be observed in the Klemme Methodist Church, Friday, February 25, beginning at 2.00 P M. The growing list of men and women in service creates new ties with the ends of the earth, and these ties must not be just war interests or victory hopes; but that basic prayer for a world in which God rules. The World Day of Prayer is kept every year in fifty countries on this globe on each first Friday in Lent the first service of the morning is held as the sun reaches the Fiji Islands, the last in the evening on St. Lawrence Island, thirty miles from the Arctic Circle. Those with loved ones in the service will welcome this opportunity to pray for them and their neighbors. A cordial invitation is extended to each and every one to share in this day of intercession.

Klemme Youth Home From The South Pacific Area

Marine Glenn V. Lewis, who has been stationed in the South Pacific combat area for the past year and a half, arrived home Friday from the west coast on a short furlough to visit his parents, Mr. and Mrs. Verner Lewis.

Marine Lewis will leave after his furlough for Seattle, Washington to take a 16 months college course under the Navy V-12 program, after which he expects to go to an officers training school. Lewis has been in the Marine Corps about three years.

Change In Rationing Program Goes Into Effect Sunday

LIBERTY TOWNSHIP GIRL BRIDE OF SOLDIER

Miss Gladys Griffen, daughter of Mr and Mrs Louis Griffen of Liberty township, and Private Fred Olthoff, son of Mr. and Mrs. Erick Olthoff, were united in marriage at the Klemme Evangelical and Reformed Church on Friday afternoon, February 18, 1944 at one o'clock Rev. Calvin Grosshuesch officiated, using the double ring ceremony

Mrs Galen Berhow, sister of the groom was bridesmaid and. Mrs John Eenhuis, sister of the bride was the matron of honor. John Eenhuis, brother-in-law, and Raymond Olthoff, brother of the groom were the attendants.

The bride wore a power blue crepe dress with matching blue accessories. Mrs. Berhow wore a light blue dress and Mrs. Eenhuis wore a pink rayon flannel dress.

A seven o'clock wedding dinner was served at the home of the bride's parents, Mr. and Mrs. Louis Griffen and was prepared and served by Mrs. Griffen and daughter, Mabel.

A heart-shaped cake, topped with a minature bride and groom, centered the table The cake was baked and decorated by Miss Mabel Griffen

After a short honey-moon trip visiting with relatives and friends the bride will make her home with her parents for the duration of the war, while Pvt. Olthoff will resume his duties at a camp in Colorado.

SHAMROCKS DROPPED TWO GAMES LAST WEEK

Lost Non-Conference Games To Ventura And Garner

Last Tuesday night Coach Curley Hintzman's Ventura cagers downed the Klemme Shamrocks on the Ventura court 32 to 25, pulling away in the final two periods after the count was deadlocked 14-14 at the half.

Hyde led the lakers attack with 14 points, while Lau was out in front with 8 for the Shamrocks.

The Little Shamrocks also came out second best with a 34-27 dfeeat

Throw Scare Into Garner

Friday night the Shamrocks went to Garner in another non-conference game with the Cardinals.

The Shamrocks jumped into an early lead and were out in front 10 to 6 at the half, when Garner staged a last quarter rally to nose out the Shamrocks 24 to 19

Greiman led the Shamrock scoring with 7 points and Schneider had a like number for the Cards.

The Garner reserves nosed out the little Shamrocks 20-17, after Klemme led 11-7 at the half.

Last Game Friday Night

The Shamrocks close the season here Friday night when the fast Hayfield team comes to do battle

Following that game the Shamrocks will prepare for the first round of sectional competition in the annual state tournament.

SHAMROCKS WIN OVER MESERVEY QUINTET

The Klemme Shamrocks added another scalp to their string of victories when they defeated the Meservey high school basketball squad here Tuesday night 34 to 21, after taking a half time lead of 16 to 7 "Red" Buntenbach led the Shamrock attack with 11 points.

The Shamrock Midgets, grade team kept their record perfect with no defeats this season by trouncing the Meservey graders 14 to 7.

CHURCHES REMEMBERED

Four Pottawattamie county churches were mentioned in the will of the late Emanuel A. Fehr of Oakland. Each received $400. The churches plan to make some special use of the money given them.

DISKS GO INTO USE FEB. 27 AS STAMP CHANGE

To Be Used With 10 Point Red And Blue Stamps In Book No. 4

Thousands of rations tokens, those little red and blue cardboard like disks about the size of a dime, will go into use on Feb. 27.

On Feb. 27 merchants will be permitted to start making change with the colored disks for the 10-point coupons in Ration Book No. 4.

The red tokens will be used for meat and the blue for processed foods and the tokens will be worth a point apiece. From there on you don't have to have Prof. Einstein's assistance but it might help you get through the first 3 weeks after Feb. 27.

During that period, consumers, many groggy form tussling with U. S Treasury Tax Form 1040, will be using food ration stamps in 4 different colors, with 2 different sets of values, plus ration brown stamps for "change."

Summarizing a new OPA announcement Thursday, the outlook shapes up like this:

1—One-point green stamps for processed food will be used as "change" for the first and last time between Feb 27 and March 20 Brown meat and fat stamps of one-point value have already been authorized as stamp change The use of one-point stamps as "change" will continue until March 20, OPA said, just in case some stores have not received sufficient quantities of tokens to give them in change to all customers.

2.—Green stamps K, L, and M, and brown stamps Y and Z, all of which will be in use before Feb. 27, will retain their present face value ranging from one to 8 points. They will not have the 10-point value that all red and blue stamps will have when they go into use with tokens Feb. 27. The green and brown stamps will expire March 21.

3—Five blue stamps for processed foods—A-8, B-8, C-8, D-8 and E-8— will become valid Feb. 27 and may be used through May 20. Each of these stamps will be worth 10 points Additional blue stamps will be validated at the rate of 5 every calendar month, and each of them will be good for 10 points regardless of the numbers on them.

4.—Three 10-point red stamps —A-8, B-8 and C-8—will be good for buying oils on Feb. 27 and will remain valid through May 20 More red stamps will be validated in blocks of 3 every 2 weeks after Feb 27.

5.—Tokens will be both red and blue and will be worth one-point each. They will be given in change for the 10-point stamps only when purchases are made and 9 will be the limit to be given in one transaction.

6.—Green stamps N and Z will not be used for. anything until when and if OPA designates them for a specific purpose in a rationing emergency.

Under the present stamp dates, the OPA explained the token system would not be in effect completely until March 21, when all validated green and brown stamps have expired.

However the agency suggested, individual consumers may graduate quickly to the complete token system by simply using the old greens and browns before starting on the reds and blues.

Attended Funeral Of Brother At Wellsburg, Monday

Mr. and Mrs. Charles Fritzel went to Wellesburg Sunday where they were called by the death of Mrs. Fritzel's brother, Mr. Floyd Bausman. Funeral services were held on Monday.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. *Doan's* have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

DOAN'S PILLS

HOUSEHOLD MEMOS
by Lynn Chambers

A Little Sugar, but a Lot of Sweetness
(See Recipes Below.)

Short on Sugar

Requests continue to pour in for sugar-saving recipes. This leads me to believe that there are many who want home-baked goodies in quantity greater than their sugar supply will allow. That means they want recipes that are short on sugar and long on sweetness.

Most baked goodies taste best when only part of the sugar is replaced by other sweetening agents. Try in plain muffins, bread and rolls is an exception made to this rule. Richer doughs have only one-third to three-fourths of their sugar replaced by corn syrups or honey.

It's best to use only tested recipes from your sugar-savers. You will find the proportion of liquid has been sliced—and if you are trying to change over a recipe you might forget this very important step.

Foundation Sweet Dough.
(Makes 2 coffee cakes or 3½ dozen sweet rolls)

2 cakes yeast
½ cup lukewarm water
1 cup milk
½ cup butter or substitute
½ cup sugar
1 cup light corn syrup or honey
2 teaspoon salt
2 eggs
6 cups sifted enriched flour (about)

Soften yeast in lukewarm water. Scald milk. Add butter, sugar, syrup and salt. Cool to lukewarm. Add 2 cups flour and beat well. Add softened yeast. Beat eggs and add. Mix thoroughly. Add the remaining flour to make a soft dough. Turn out on lightly floured board and knead until satiny. Place in a greased bowl, cover, let rise until doubled in bulk. Punch down. Shape into tea rings, rolls or coffee cake. Place on greased baking sheets or in greased pans. Cover and let rise again until doubled in bulk. Bake in a moderate oven (375 degrees) 25 to 30 minutes for coffee cakes, 15 to 20 minutes for rolls.

Honey Orange Rolls.

1 recipe Foundation Sweet Dough
2 tablespoons grated orange rind
½ cup honey

When dough is light, punch down. Let rest 10 minutes. Roll into a rectangular sheet ¼ inch thick and about 9 inches wide. Spread with honey and sprinkle with orange rind. Roll in jelly-roll fashion, sealing edges. Cut into 1-inch squares. Cover and let rise until doubled in bulk. Bake in moderate oven (375 degrees) 20 to 25 minutes.

***Caramel Rolls.**

1 recipe Foundation Sweet Dough
¼ cup melted butter or substitute
1 cup dark corn syrup or honey

Into each muffin cup, put ½ teaspoon butter and 1 teaspoon syrup or honey.

When dough is light, punch down. Let rest 10 minutes. Roll into rectangle, ¼ inch thick and about 9 inches wide. Brush lightly with melted butter. Roll jelly-roll fashion, sealing edges. Cut into 1-inch pieces and place cut side down in muffin tins. Cover and let rise until doubled in bulk. Bake in a moderate oven (375 degrees) 20 to 25 minutes. Let stand 1 minute before turning out.

Applesauce can go into muffins too! It's as delicious as the cake which has made it famous:

Applesauce Muffins.
(Makes 2½ dozen 2-inch muffins)

½ cup shortening
¼ cup sugar
¾ cup light corn syrup
2 eggs
¾ cup sweetened applesauce
2 cups enriched flour
3 teaspoons baking powder
1 teaspoon salt
1 cup chopped nuts

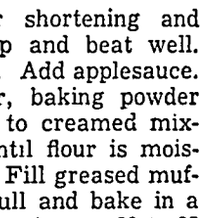
Cream together shortening and sugar. Add syrup and beat well. Beat eggs and add. Add applesauce. Sift together flour, baking powder and salt and add to creamed mixture. Stir only until flour is moistened. Add nuts. Fill greased muffin tins about ⅔ full and bake in a moderate (375-degree) oven 20 to 25 minutes.

Give yourself health as well as appetite appeal in these cup cakes made with iron-rich molasses:

***Gingerbread Cup Cakes.**
(Makes 18 cup cakes)

½ cup melted shortening
1¼ cups pure dark molasses
1 egg, beaten
2½ cups sifted flour
1½ teaspoons soda
1 teaspoon cinnamon
1 teaspoon ginger
½ teaspoon cloves
½ teaspoon salt
¾ cup hot water

Combine shortening and molasses and add egg. Stir until well blended. Mix and sift dry ingredients and add alternately with the hot water. Turn into greased muffin pans and bake in a moderate oven (375 degrees) about 25 minutes.



Here's an unusual dessert with that well-liked apple-cinnamon flavor:

Apple Cinnamon Snow.

1 package lemon flavored gelatin
½ cup sugar
¼ teaspoon salt
4 tablespoons red cinnamon candy drops
1 cup boiling water
½ cup cold water
1 cup applesauce
2 egg whites, stiffly beaten

Dissolve gelatin, sugar, salt and cinnamon drops in boiling water. Add cold water and applesauce. Cool, then chill to consistency of thick syrup. Add egg whites and beat until mixture is light in color, thick and holds a small peak. Pour into sherbet glasses. Chill until firm. Garnish with a few extra cinnamon candies.

Lynn Says

The Score Card: You can save pennies and points if you watch the markets closely and plan your menus accordingly. Right now you can use more eggs, pork cuts, citrus fruit, and winter vegetables such as turnips, broccoli, green beans and spinach to perk up your menus.

Be sure to turn in those used fats. Your butcher will pay you for them in both points and pennies.

Use fresh vegetables and fruits whenever possible and save your canned foods for quick or emergency meals.

February is the birthday month for enriched bread and flour. It was estimated that before the war the per capita consumption of the flour was 6½ ounces daily, but it probably is more now because bread and flours are carrying much of the load of other foods such as meat.

Save Those Used Fats;
Take Them to Your Butcher.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

JESUS PRESENTS HIMSELF AS THE MESSIAH

LESSON TEXT Mark 11 1-10, 15-18.
GOLDEN TEXT Again the high priest asked him, and said unto him Art thou the Christ, the Son of the Blessed? And Jesus said, I am.—Mark 14.61, 62.

As our Lord entered upon the last week of His earthly ministry, the time had come for Him to present Himself officially to His people as their Messiah. As He did so, we observe that He then had and now has a right to claim all that we have and are, as well as to exercise judgment over us.

I. His Right to Property (vv. 1-7).

We are so prone to call our possessions our own, and to hold them for our selfish purposes. Just a moment's reflection makes us aware that we are but stewards holding our things, as we hold ourselves, for the use of God.

That means that the Lord need only send for what we have, and we should gladly yield it to Him. "The Lord hath need" is the only requisition we need. He has absolute priority. And yet the very fact that He has need of us and what we have, dignifies our service or sacrifice on His behalf.

How surprising it was that the One who made and upholds all things (Col. 1:16, 17) should have to say, "The Lord hath need of him," in sending for a humble beast of burden. Yet therein lies a marvelous truth. He has graciously so ordered the universe that He has need of us and of our possessions.

Let us also learn the important lesson of unquestioning obedience taught in verse 4. "They went their way" to do what the Lord told them to do. How greatly simplified and glorified would be the lives of Christian people if they would thus obey Christ.

As He came riding into the city, we observe

II. His Right to Praise (vv. 7-10).

God says, "Him that offereth praise glorifieth me" (Ps. 50:23), and the believer recognizes that "praise is comely for the upright" (Ps. 33.1). Jesus is entirely worthy of the praise of every heart and voice.

Presenting Himself as their Messiah, Jesus received the enthusiastic acclaim of His disciples and friends, who were probably joined by others who were drawn by the excitement.

The Pharisees did not join in (see Luke 19.39, 40) nor did the city, not even knowing who He was (Matt. 21.10, 11). So it is today; some love and praise Him, some hate Him, others just ignore Him. Of which class are you?

He gave Jerusalem and the nation a final opportunity to receive Him. It was not yet too late, but it was their last chance. Such a time comes in the life of everyone of us. They rejected Him. Do we?

But even though some did reject, let us not forget that there were those who shouted, "Hosanna," who cast their garments down before Him and waved palms of victory and joy. Thank God for their holy enthusiasm. Pray God that we may have a little more of it.

III. His Right to Punish (vv. 15-18).

People like to hear about a God of love, one who knows their weakness, and is kind toward their infirmities. But we must not forget that God shows His love by a great and holy hatred of sin, and a desire to deliver us from that sin. This means that He must and will deal in drastic fashion with those who persist in their sin.

A second time He drove out from His Father's house those who had made it a place of merchandise, of commercialized thievery.

This is a majestic picture. The Son of God and Son of Man steps into the center of this unholy traffic and with mighty, holy indignation (not anger) drives it out. The people who had suffered long because of this religious racket, which paid a nice "cut" to the priests themselves (probably as a "gift" even as such things are managed now), were jubilant.

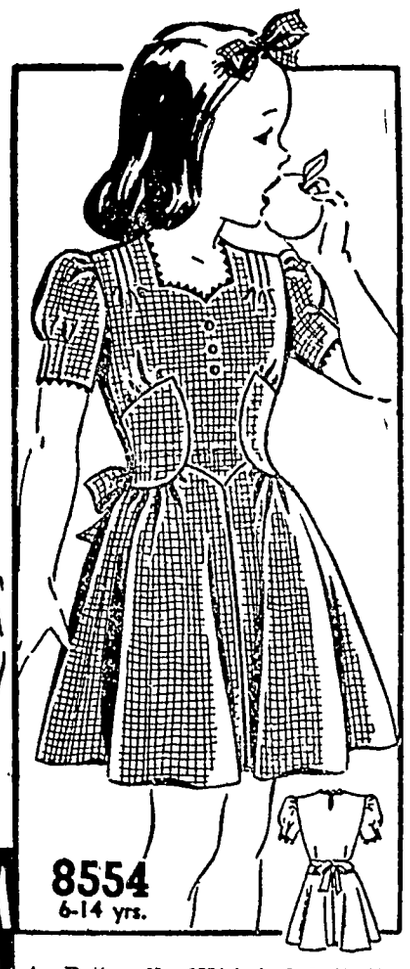
We read in the same story in Matthew 21:12-22 that the boys who were in the temple (for such is doubtless the meaning of "children" in verse 15) were so delighted at this magnificent exercise of His divine authority that they broke out into "Hosannas," which really amounted to a holy "Hurrah."

Well, why not? Hurrah for our Lord! He will not tolerate iniquity even though it hides under the cloak of religion. He is not afraid to speak out and to act against sin and corruption.

Possibly the church would reach a good many more men and boys in our day if it would step out in faith to fight the wrong and support the right. Then maybe the young men would shout, "Hurrah for the church."

The chief priests and scribes were afraid and displeased and began to plot against Him. The passage in Matthew indicates that their anger was aroused both by the acts of Jesus and the praise of the boys.

PATTERNS
SEWING CIRCLE



Princess Panel.

IF YOU want lines which tend to slim a too-heavy figure, a Princess panel frock with well-fitted wide belt section, this frock will do the trick!

* * *

Pattern No. 8558 is in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36, short sleeves, requires 3¾ yards 39-inch material, ⅝ yard contrast.

The Right Dress!

INDEED, it is very much the right dress when any special occasion comes along and you want to look particularly nice. The midriff treatment gives it its festive air!

Pattern No. 8554 is in 6, 8, 10, 12 and 14 years Size 8 takes 2⅛ yards 35-inch material

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

ASK ME ANOTHER?
A General Quiz

The Questions

1. Are the redwood trees of California the oldest in the world?
2. What is the largest city in Canada?
3. At the beginning of World War I, how many airplanes did our armed forces have?
4. Who wrote: "He prayeth best who loveth best all things both great and small"?
5. When a broom is carried atop a submarine, what does it mean?
6. Was there such a person as the Wandering Jew?

The Answers

1. The junipers of the Sierra Nevadas are still older.
2. Montreal, 50 square miles, with a population of 818,577.
3. But 55, with 35 flying officers.
4. Samuel Coleridge.
5. When subs come in from a patrol they carry a broom to indicate a clean sweep of the area patrolled.
6. No. He was a legendary person of the Middle ages. One story is that he insulted Christ as He bore His cross to Calvary, and Christ told him that he must remain on earth until He should come again.

"I WAS CONSTIPATED FOR MANY YEARS!

Now I'm 'Regular' Every Morning!"

Constipated? Then here's an unsolicited letter you'll want to read: "I'd been troubled with common constipation for many years. Was taking laxatives and pills all the time, and feeling very weak and run down 3 months ago, I began eating KELLOGG'S ALL-BRAN daily. Now, I have a regular, natural movement every morning, which helps me feel my best!" Mr Samuel D. Blank, 292 Kings Highway, Brooklyn, New York.

What is this seeming magic of KELLOGG'S ALL-BRAN? Scientists say it's because KELLOGG'S ALL-BRAN can really "get at" a common cause of constipation — namely, lack of sufficient "cellulosic" elements in the diet. KELLOGG'S ALL-BRAN is one of Nature's most *effective* sources of these elements, which help the friendly colonic flora fluff up and prepare the colonic wastes for easy, natural elimination. KELLOGG'S ALL-BRAN is *not* a purgative! *Doesn't* work by "sweeping out." It's a gentle-acting, "regulating" food!

If you have constipation of this type, eat KELLOGG'S ALL-BRAN or several ALL-BRAN muffins regularly. Drink plenty of water. See if you don't find *lasting* relief! Insist on *genuine* ALL-BRAN, made *only* by Kellogg's in Battle Creek.

HOW LOW, discouraged, they can make you feel—those nagging muscle aches. In Soretone Liniment you get the benefit of methyl salicylate, a most effective pain-relieving agent. And Soretone's *cold heat* action brings you fast, so-o-o-thing relief. Soretone Liniment acts to:—

1. *Dilate surface capillary blood vessels.*
2. *Check muscular cramps.*
3. *Enhance local circulation.*
4. *Help reduce local swelling.*

For fastest action, *let dry, rub in again.* There's only one Soretone—insist on it for Soretone results. 50¢. A big bottle, only $1.

SORETONE
soothes fast with
COLD HEAT* ACTION
in cases of
MUSCULAR LUMBAGO OR BACKACHE
due to fatigue or exposure
MUSCULAR PAINS
due to colds
SORE MUSCLES
due to overwork
MINOR SPRAINS

MONEY BACK — IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

To the People of this Community

YOU CAN AFFORD IT

You can afford to buy Extra War Bonds during this Fourth War Loan Drive

Everyone in this community knows incomes are higher than ever before—that both workers and farmers have more cash than ever before Everyone knows that more than one member of hundreds of families are income earners—and everyone knows that increases in wages and salaries have far outstripped rising prices, and increased taxes You can afford to buy Extra War Bonds.

As a matter of fact, you can't afford NOT to Buy Extra War Bonds If you spend your money for needless, scarce goods, you are increasing prices . if you want to help win the war you can't afford NOT to buy War Bonds If you want to help that boy in the service you can't afford NOT to buy Extra Bonds and if you want a gilt-edged investment for your own future security, you can't afford NOT to buy Extra War Bonds.

Don't just do the expected—buy All the Bonds you can

THE EDITOR

BRAISING MEAT BRINGS OUT THE BEST FLAVORS

Braising meat has gained prominence with the frequent appearance of less tender cuts on wartime menus

Clare C Foote, extension specialist Iowa State College says that braising is a slow process using moist heat It brings out the best meat flavors in less tender cuts It is an excellent way to cook tender cuts of lamb and veal, too, because they are too lean for broiling or roasting in an open pan Chops also are best braised

Seasoned meat is browned in a little fat on top of the stove and then cooked in a tightly covered pan Enough moisture in meat water or tomatoes may be added The braising may be done in the oven or on top of the stove as the homemaker wishes

BEHEADED

Harry Evatt of Strawberry Point was sawing some wood with a buzz saw when he saw some blood on his hand He didn't believe that he had injured himself so did some investigating He found that one of the logs he had sawed into stove lengths was hollow and had a opossum He had been too engrossed with the saw

it's more than just a LETTERHEAD!

It's your representative. It speaks for you in places you cannot go. You want your letterhead to give your prospect assurance that it represents a firm of high standing.

HAMMERMILL BOND

The Best Known Name In Paper

HOME PROJECT POULTRY MEETINGS

Care and Feeding of Poultry will be the subject studied and discussed by Home Project women and their husbands during the month of February

Mr Wm R Whitfield, Iowa State College poultry specialist, will be present for two of these meetings. Paul Henderson, county extension director, and Miss Hazel Grimes, county home economist, will assist Mr Whitfield and will conduct the other township meetings in Hancock County

GET QUICKEST RESULTS FROM FINE LIMESTONE

Iowa farmers are finding that finely ground limestone boosts their wartime acre yield from 5 to 100 percent acording to B J Firmins of Iowa State College

In a series of acre comparisons with unlimited soils, limed soils produced up to 5 more bushel of corn, 3 7 bushels oats, 3 4 bushels of wheat and 1 5 more tons of alfalfa hay

Limestone is applied to corn belt soils to neutralize soil acidity, to supply the plants with calcium and to stimulate biological activities When ground finely and of the proper purity, it does the job rapidly and efficiently But coarsely ground material cannot be distributed as uniformly through the soil, and neither can it become soluble as rapidly as finer limstone

Average quarry - run limestone, based on the analysis of 148 samples selected from stockpiles throughout the Midwest, becomes about 46 percent available at the end of 3 months and 55 percent after a period of 2 years

On the basis of these studies, Professor Firkins recommends that when immediate results are desired from quarry-run limestone, heavier applications be made When applied in regular quantities, limstone gives maximum results if it is spread and disked in at least 6 months before seeding

SHOOTIN' COAL

A 20-calibre pistol was discovered by a mechanic in a Waverly garage as he was shoveling some coal recently The gun was discovered on the floor of the coal bin No one knows where the gun came from, but it had apparently been in the coal for some time It was still in good condition

PROTECT ALL RUBBER FROM DAMAGE BY GREASE

Grease and oil are enemies of all kinds of rubber, and Iowa State College agricultural engineers recommend that special care be taken to protect tractor, truck and automobile tires against them If a tire-mounted machine is kept in a shed with a concrete or wooden floor, it may be necessary to provide a plank runway on each side so that no grease or oil which drops from the engine can flow to the tires All grease or oil should be wiped from the tires as soon as it is discovered

LUCKY

Dr P H Veserberg of Forest City must have had all his lucky charms with him at the time the car he was driving went off an 18-ft grade, turned over and landed on all four wheels The car was badly damaged, but Dr Veserberg escaped uninjured

HUGE QUANTITY

Knoxville officials report that with the closing of the salvaging of silk and nylon hose, 1,600 pounds of discarded articles had been shipped According to Henry Heinz, secretary of the Community Club, this would be approximately 25,000 pairs of hose.

FROM EGGS TO BONDS

Mrs Ross Wallace of Beaman has made a good profit in "egg money" this past year She recently purchased $1000 worth of government bonds in the current 4th War Loan drive She reported she has saved the money from the sale of eggs during 1943, after deducting household grocery bills.

NO WRAPPING NEEDED

Mrs Wm Reid, of Harlan received a large cocoanut from her son, Pvt. Delbert Reid, stationed in the Hawaiin islands No wrapping was around the cocoanut. The address was printed in ink on the hull of the cocoanut.

Science Develops Superior Pickle Seed

When scientifically developed seed is used, the pickle crop is of superior quality.

DEVELOPMENT of a standard pickle seed has been of major importance in assuring first-time as well as regular growers of a successful revenue-producing crop, a representative of the National Pickle Packers Association said today.

This "National Strain" seed was bred and cross bred on experimental plots at Michigan State Agricultural College during the course of a three-year research program sponsored by the pickle packers and directed by Prof. Starr of the agronomy staff. The finest seed strains were selected after each crop. Thus a superior seed stock was developed, insuring a pickle crop of good color, size, shape, texture, crispness and freedom from coarse seed.

This work, plus the research of seed companies, has led to the development of strains of high quality "pickle" seed as distinguished from ordinary cucumber seed.

Pickles are one of the most economical crops to plant. One pound of cucumber seed is sufficient for an acre of ground. No expensive machinery is necessary as the crop may be planted by hand.

URGE FARMERS TO PLANT MORE PICKLES IN '44

Needs of Armed Forces Require Larger Acreage for This Year.

Responding to a request from the U. S. Department of Agriculture for increased food production, thousands of farmers throughout the United States are making plans to enlarge the acreage of pickles for the 1944 market, officials of the National Pickle Packers Association announced this week.

Veteran pickle growers are looking forward to the most successful season in history, since prices are the highest on record and demand will exceed all previous levels.

Pickles have been designated an essential food, because they possess health-giving vitamins and minerals and are needed for the diet of soldiers, sailors and marines Since the pickle packers of the nation, by voluntary action, have given the armed forces first call on all pickle supplies, the amount available for civilian consumption necessarily has had to be reduced.

Value to Armed Forces

In order to meet the increasing needs of Uncle Sam's fighting forces and to provide supplies for civilian use, it is vital that both the total acreage planted and the per acre yield of pickles be increased this year.

Farmers seeking an intensified, easy-to-grow cash crop for the coming spring have been advised that right now is an excellent time to select two or three acres of land to be used for the raising of pickles.

In answer to inquiries from every producing state, the Association points out that pickles provide one of the top-notch revenue crops. Production costs are low because no extra machinery or equipment is necessary. Pickles are a cash crop. The price per bushel is guaranteed by a contract with a local packer.

Boys and Girls Help

Particularly important during a time of farm labor shortage is the fact that the harvest is comparatively light work. Practically anyone who works in a garden is fully capable of picking pickles. Boys and girls of school age welcome an opportunity to earn spending money in the pickle fields.

Unlike many vegetable crops, pickles offer no problem regarding transportation and delivery from farm to market. Local packers in all sections of the country cooperate fully with their growers by having field representatives available at all times during the growing season and by keeping their receiving stations open for the farmers' convenience.

EASILY CUT

LeRoy "Red" McDermott of Cascade learned that his foot was much easier to cut than the wood he was splitting Red missed the piece of wood and the axe cut his foot, severing the cords and bones of two toes.

HOPED FOR SNOW

On her first visit to the northern part of the United State, Mrs Donald Goings hoped that it would snow Mrs Goings, wife of Sgt Donald Goings, formerly of Nashua has always lived in the south and had never seen snow

Smooth-seeded peas are not adapted for storage in the refrigerated locker Wrinkled seeded peas are adapted to the purpose.

Soybean Good Food When Green or Fully Matured

Soybeans may be used as food either in the immature or mature state. They are ready to be used as a green vegetable as soon as the pods have filled out but while they are still green The immature soybean is always green no matter what the color of the dry seed is to be. They are in season in Illinois from about the middle of August until the last of September

The beans can be cooked either in the pod and shelled later, and they can be shelled and then cooked. Shelling is made easier by pouring boiling water over the pods, and allowing them to stand five minutes and then cooling with cold water. Mature soybeans are usually soaked before they are cooked. An important point to remember in cooking either the immature or the mature soybeans is that they should be cooked until tender, not soft. When done they have a nut-like texture and are not soft or mushy

Soybean products are of interest and value in planning menus and in keeping them nutritious and well balanced Some of these are soybean milk, soy curd, toasted salted soys, soy sauce and bean sprouts. Then there are soybean grits, which may be cooked like the various cereal grits and are used commercially in soy crackers

Refined soybean oil is used in some salad oils, margarines and shortenings Finally, there is the flour of either high or low fat content, which is usually used in combination with wheat flour for yeast bread, muffins, cookies, griddle cakes, and as a thickening agent in sauces and soups.

Play Has Part in Child's Education and Development

Play is a necessary part of the development and education of every child For wholesome constructive play children need toys, they need a place to play, they need playmates; and they need sympathetic adults In time of war, it takes thought and careful planning by parents to see that the children's needs are met as well as conditions will allow

Good toys are toys with which the child can do things; playthings that are just looked at are of little value Many of the best toys are used by children of widely differing ages. Blocks and sand and painting materials, for example, are used in a simple way by the toddler but their use continues all through childhood.

It is good for a family to have some of these toys that interest children of different ages They help to keep the family together. They interest the children of the neighborhood and pave the way for companionship among children of different ages as well as those of the same age—companionships, which mean much in the development of children.

Grubs Hatch in Sod

White grubs, which work on a three-year rotation themselves, do the most damage the year following the one in which the adult beetles emerge They can ruin stands of timothy and other grasses, kill nursery stock, strawberry plants, and damage potatoes and truck crops by feeding on the roots. Modern agriculture has not effectively controlled this pest Eggs are laid largely in grass sods, and when crops are planted on sod plowed under the next year, the crop roots are attacked by the grubs. The grubs do not severely damage legume or mixed hay or pasture plantings, so that the improvement of hay-land and pasture tends to control the insects. They can not thrive in wet or clay soils, but do their damage in the drier, better-drained lands.

We want your news. Phone 12.

FIND NEW POTATO WITH CONSIDERABLE PROMISE

Still in the test stage in Iowa, Sequoya, a new seedling potato developed and introduced by the United States Department of Agricultural, appears to have a lot of resistance to injury by leaf hopper.

Tests showed that it yielded well in northern Iowa, but a serious objection now is that it matures 2 to 3 weeks later than the Cobbler. If it can be adapted satifactorily to this state, its big advantage over the present varieties will be elimination of most of the four or five sprayings now necessary to avoid hopper injury

In a field test by the Iowa Agricultural Experiment Station last year, the Sequoya, Irish Cobbler and Early Ohio were planted adjoining a bean patch to insure plenty of hoppers Except for one spray with lead arsenate to control potato bugs, the potatoes were left unsprayed throughout the season. The foliage of the Sequoya remained green with scarely a suggestion of hopper burn while the Cobblers and Ohios were severely burned.

Further crosses between the Sequoya and an earlier variety will be made this year with the hope of combining immunity to hopper burn and early maturity.

IOWA NEEDS MORE HOME GROWN LUMBER IN 1944

The big push is on for increased lumber footage in 1944 Over 60 million board feet of home grown lumber is needed to fill Iowa's local and shipping needs That's an increase of 4 million feet over last year's record of 56 818 000 board fee

According to a WPB survey 60 percent of Iowa's lumber comes from the small saw units owned and operated by farmers Most of this material will be cut and sawed during slack season on the farm and lumber for export will be shipped green Lumber that remains on the farm will give best service if it is used for 5 or 6 months before use according to Eugene Fabes, assistant area forester at Iowa State College

The bulk of Iowa lumber is made up mostly of oak cottonwood, walnut elm and basswood all of which compare favorably with Washington spruce and southern pine Reports of half a century or more have been made on properly cured cottonwood and even more for hardwood.

The time for planting cool-loving quick-maturing vegetables depends on how early the ground can be worked

Magician Runs Toy Shop To Train Army Bombardiers

A magician is running a toy shop of death here, turning out weird-looking contraptions to hasten defeat of the Axis.

His most important and impressive product is an apparatus about 15 feet long and four feet high, of plastic, metal and bright-colored wood, which looks like a cartoonist's idea of a perpetual motion machine.

No, this doesn't mean Uncle Sam has taken to Voodooism. It's a sane, sensible, scientific solution to technical problems encountered in the training of the most dangerous men in the world, army air forces bombardiers.

The "perpetual motion machine" is a giant model of the Norden bombsight. With this model, aviation cadets at this world's largest bombardier school can learn the intricacies of the sight far more rapidly and thoroughly than with a real sight, with its thousands of tiny parts.

Lieut. Joseph J. Chopp, a former professional magician, built the model and supervises a workshop in which this and similar devices are being produced for army air forces schools throughout the country.

Botulism Is Rated No. 1 Hazard in Home Canning

No 1 hazard in home canning is botulism, fatal food poisoning caused by bacterial action, according to Dr W V. Cruess, professor of fruit technology.

At a recent state-wide conference on home food preservation he cautioned the people of the western states, especially newcomers, that extreme care must be exercised in canning meats and nonacid vegetables at home.

The bacillus, Clostridium botulinum, occurs in the soil and dust in all parts of the United States. The bacillus, when present on meat or nonacid vegetables, can withstand ordinary boiling but is killed in a short time by the higher temperature of the pressure canner, he stated. It is destroyed more readily in an acid environment, therefore fruits and tomatoes may be safely processed in the boiling water bath.

People may eat the bacteria on fresh vegetables without harm but its toxin is the most potent bacterial poison known. This toxin is produced when the bacillus grows without air in the environment of a can of inadequately processed meat or nonacid vegetables.

State Owns Finnish Utilities

All but 160 miles of Finland's 3,600 miles of railways are state owned Public ownership also includes the 24,000 miles of telegraph lines, and most of the 118,000 miles of telephone lines. Airways link Finland with Estonia and with Sweden Key road in the highway grid is the motor route linking Petsamo, northern port, with the south A day's peacetime traffic count totaled 2,500 trucks, buses and motor cars Winter temperatures pave the road with a tough upper crust that stands up to the pounding of truck traffic. Because of the Gulf Stream, Petsamo is ice free—a sea-door "spare" that can be used even though the Baltic ports should be closed by ice or enemy action.

National Holidays

Strictly speaking there are no national holidays although many of them, such as Christmas, New Year's day, Fourth of July, Labor day and Thanksgiving day, are nationally observed.

Such holidays have been designated as public holidays by both the federal government and all the state governments, but the federal government is without constitutional authority to enforce such an edict in the various states. All congressional acts fixing legal holidays have been limited to the District of Columbia, federal territories and federal government offices. Otherwise holidays are established by separate state legislation.

Cassie Chadwick

Cassie Chadwick, born Elizabeth Bigley in Eastwood, Ont., in 1857, for a time practiced clairvoyance, but soon turned to forgery and was first arrested and tried at the age of 16 Of little education, plain, and decidedly "queer," she nevertheless was able to dupe otherwise sensible business men into believing she was a kind of ward of Andrew Carnegie and secure unlimited credit on documents forged with his name. She was finally exposed when a small bank failed because it had loaned her so much money, was tried and convicted in 1905 Sentenced to 10 years in prison, Mrs. Chadwick died after serving only three.

Yanks Set Good Example

The United States army has captured the Australian soldier's imagination with its ceremonial customs, and this has led to a revival at several large Australian army bases of customs followed by the British army for centuries. An instance is the recent ordering of the ceremonial hoisting and lowering of the colors at sunrise and sunset in the Darwin area.

Every unit in the area hoists its flag at the mounting of the guard (sunrise) and lowers it at retreat (sunset). Revival of this traditional procedure is the answer to Britain's recent restoration of the "spit and polish" tradition.

Around Iowa

LANDMARK RAZED

A building erected in 1865 by the late D W Jones and known as the Jones Woolen mill located near Manchester is being torn down The original building was 30 x 40 feet and was three stories high Wool cloth and blankets were manufactured in the plant at the time it was running

NOT A BOBCAT

An animal originally described as a bobcat in the Grinnell Herald-Register was later claimed by Game Warden Lemke to be a domestic cat turned wild The animal is known as a "Timber cat", sometimes called a tiger cat, striped black and gray with apparently some Persian blood in it which made the fur very fluffy Lemke stated that many times the domestic cats revert to the wild and make their homes either in the ground or in trees The "wild cat" was killed by Warren and Merle Broders

HELP WANTED

The Fairbank city council is trying to find someone to take the place of Will Hahn who has served for the past 27 years in various municipal capacities Hahn's duties have grown until they now include full charge of the city waterworks including meter reading and repairing water mains, regulating the pumping and other odd jobs, reading electric meters and making line repairs and connections and serving as one man police force Mr Hahn is forced to retire from his duties at the present time because of ill health It is reported that he is the only man familiar with the city water system

YEAR LATE

Mrs William Bolton of Waverly received a large boxed Christmas card from her son Marshall who is now serving in the navy Upon examination Mrs Bolton discovered that the card should have arrived before Christmas in 1942 The return showed it was from the ship on which Marshall served last winter and which he left in March 1943 Mrs Bolton has had a son in the service of her country for the past 26 years, with the exception of three months Harold Bolton enlisted in the navy in April, 1917 and served until August, 1920 Marshall enlisted Dec 6, 1920 and is still serving

WAXY-MAIZE

A number of Iowa farmers this year experimented with growing of waxy-maize corn which provides a substitute for tapioca Calhoun county farmers were among the first to volunteer to grow the new corn and some have reported very good yields The waxy-maize corn will be used during the war in making munitions, mucillage, adhesives and for gummed papers pressed woods and miscellaneous articles After the war it will be used in numerous peacetime articles

NEW ASH TRAYS

Indianola high school art students have made ash trays from tin cans The cans have been pierced and bent until they look like Mexican tinware The class is under the direction of Miss Marian A Malmin.

HONESTY STILL PAYS

A student at the school for blind and nearsighted children at Vinton, was repaid for turning in an envelope containing money Donald Thiel of Reinbeck, the student found an envelope on the floor of a bus When he arrived in Waterloo, Donald turned the envelope, containing a sum of money, over to the manager of the bus station Later Donald heard from the owner The money was the pension of an elderly lady who sent the boy $2 00 reward

ASSISTED

Guthrie Center business men and citizens have donated $161 06 for a local family. The father of the family recently died, leaving a widow and several young children. Don Holmes of Guthrie Center started the collection.

NOT DEAD

The next time Walt Davis of Emmetsburg attempts to butcher an animal he will no doubt be doubly certain that it is dead before he starts to work on it Recently Davis was called out to a farm to butcher a steer Davis shot the animal Later when he thought it was dead he began to slit its throat The steer reared up throwing Davis to the ground Davis received some broken ribs and was knocked unconscious for a time

WELL REPRESENTED

Mrs Burt Henning of Decorah in her possession various articles that prove the activities of her family She has a flatiron carried by her great grandmother during the Revolutionary war, drumsticks used by her grandfather in the Civil war, large knives used as weapons by her father during World War I. Wilbur Davis Mrs Henning's brother is serving in the present war, now stationed in England

TO NEW SHIP

Dale Myers, carpenter's mate 1c, will soon be transferred to the USS Myers which is to be launched at an undisclosed date The USS Myers has been named for Bernell Myers who lost his life while on duty with the navy Dale Myers is the son of Mr and Mrs Ralph Myers of Pocahontas Bernell was a brother of Dale

NEW CORN

A grain of corn that had been in Raymond Schlichter's inner ear growing enough to root and grow fast the membrane was recently removed The 10-year-old Woodward boy is recovering but it is believed that he may lose the hearing in the ear

LOST MONEY

In a transaction recently Marvin Burbank, Hawkeye business man, got what he thought was a gallon of waste fat for 40 a pound Later when he wanted to sell some oysters he discovered that he had mistakenly sold the oysters to the collector of waste fat Ordinarily, oysters sell for 75c a pint or $6 a gallon

BLUE COAT CAMPAIGN

With the growing number of students in Grinnell high school wearing the type of blue coats his school At a recent concert Superintendent Hawk announced that a campaign to obtain blue serge would be started The broadcloth tailorings are available to suit the coats into parts of the outfit - all they lack is the coats

BACK AND FORTH

R A Sanders and son, Ferdinand, of near Chapin, reported the loss of 40 hogs from a farm tended by a hired man On the farm which the hogs disappeared they raised hogs that are a cross between Hamshire and Berkshire On their home farm the Sanders raise straight Hamshire hogs Approximately two weeks later, the "lost" hogs were located on the Sanders home farm Neither the officers called in to help in the case nor the owners are able to explain the incident

COYOTE KILLED

John Frederick of near Winterset ran down a coyote in his pickup truck recently The large animal had thick, brown fur, tipped with gray The coyote met the truck and immediately turned and ran down the road with Frederick after him, finally catching up to and running over the animal

VISIT SHORTENED

A fire at his home caused Harry Chittenden of Victor to cut short a visit with some neighbors New Year's eve A group of young people informed Chittenden that his house was on fire as they could see the blaze as they passed by The fire had started in an upholstered chair where Mr Chittenden had been sitting earlier in the evening and it is thought that ashes might have fallen from a lighted cigar or cigaret. The chair, radio and a rug were damaged

OLD HOMESTEAD

A farm in the Shultz family since 1870 recently was sold to another member of the family The farm originally owned by Frank Shultz, recently occupied by Mark Shultz and family, was sold to Claire Shultz The farm is located in Dickinson county

WEEKLY NEWS ANALYSIS

Two-Way Red Army Offensive Traps German Divisions Southeast of Kiev; 'Bitterest Battle' Wages Near Cassino; Furloughs Likely for Pacific Veterans

(EDITOR'S NOTE: When opinions are expressed in these columns they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union.

RUSSIA:
'Molotov's Cocktail'

Big international news of the month was Russia's grant of independence in foreign affairs and defense preparations to 16 republics making up the soviet government

Vycheslav Molotov

"Molotov's latest cocktail" was the way London's diplomatic circles described the move, which, to all practical purposes would still leave all 16 of the republics under Moscow's control through the Communist party, but at the same time would qualify each one to representation at the peace table

Announced by Foreign Commissar Vycheslav Molotov, the plan embraced the territories of Estonia, Latvia and Lithuania, of White Russia in old Poland, and of Karelo-Finland, all of which would be constituted as republics after their annexation by Russia, as a fulfillment of the Atlantic charter's guarantee of self-government for all small nations

Drive Continues

Driving on the heels of retreating German troops, the Reds crossed into Estonia on the Baltic battlefront, while farther to the south, other Russ forces continued their hammering along the prewar Polish border.

By smashing toward the Baltic at one end of the 250-mile northern front, and pressing their attacks along the prewar Polish border at the other, the Reds threatened a breakthrough that would trap the whole German army in this sector.

Stiffest German resistance was being met near the prewar Polish border, although the Nazis were fighting a strong rear-guard action in the Baltic. As a result of the Baltic drive, the Reds cleared the Nazis from below Leningrad, gaining control of the extensive network of railroads in the vicinity

"Attrition warfare"—that is, the wearing out of the enemy—continued in the Ukraine, where the Russians went back to the offensive after German counterattacks 80 miles from the Rumanian border.

FURLOUGH:
For Pacific Vets

If the facilities and battle conditions allow, an increasing number of veterans with two years or more service in the Pacific area will be granted furloughs, Com Gen Millard F Harmon declared.

Already a program of replacing vets with fresh troops has been initiated, General Harmon said, but on a limited scale Availability of shipping and need for troops for the increasing tempo of the Pacific warfare will determine the extent of the furlough program, General Harmon explained.

"Anyone in a responsible position in the army, from General Marshall down, appreciates the desirability of rotating men in the combat zones," General Harmon said "But they also appreciate the need for winning the war, and you cannot allow rotation of personnel to interfere unduly with that accomplishment"

PACIFIC:
Won't Fight

Again the boastful Japanese fleet refused to come out and fight, and following the heaviest naval bombardment in history which left shore defenses in smoking tatters, U. S forces overran the Marshall islands in mid-Pacific

One of the enemy's last outer defensive rims of their main holdings in the Philippine area, the Marshalls, were virtually surrendered by the enemy, without the bitter, last-ditch fight expected When marines swarmed ashore after a murderous barrage of U S naval guns, they met only scattered pillbox opposition, the enemy's own big artillery pieces have been smashed

Invasion of the Marshalls gave the U S. a springboard for the next step in the march to Tokyo, now 2,000 miles off, while reports indicated that the Japs were massing planes all through the Philippine and homeland area to meet the push of the greatest naval armada in history, when that day comes.

ITALY:
Bitterest Fighting

Bitterest battle of the bitter Italian campaign was being fought around the Nazis' mountain stronghold of Cassino, with valiant U S doughboys working their way into the town behind the rambling roar of their tanks, while German suicide squads sniped from battered buildings now in rubble

Forty miles to the north, the enemy rushed in reinforcements to counter the Fifth army operating from its beachhead below Rome, with parachutists, ant aircraft gunners, tankmen and reconnaissance units formed into regular units to fight off the U S and British troops moving on the Germans' supply roads under the heavy fire.

Although Cassino itself lay heaped in ruins, the enemy clung stubbornly to dominating heights around the town, and dug firmly into a strong web of concrete machine-gun and mortar pits on the level ground. As doughboys picked their way through the defensive maze, they closed on the main highway leading northward to Rome, over which the enemy was supplying his troops

SOLDIER VOTING:
Red-Hot Issue

Joining with the almost solid Republican bloc, southern representatives in the nation's Capitol held their ground for state control of soldier voting in opposition to the administration's plan for federal supervision of elections for the offices of President, senator and congressman by means of a blank ballot on which servicemen would write in either the names of their choices or just mark the party they favored

A compromise between the senate and house loomed, with the senate favoring a bill which would allow use of the federal ballot for soldiers whose states failed to provide for absentee voting by July 1, and the house lined up for a measure directing the distribution of applications for ballots among servicemen and prompt provision of such ballots by states if the application is accepted.

SUPREME COURT:
Changeable Opinions

Litigants and lower courts are being left without a basis for settling legal disputes as a result of the Supreme court's tendency to disregard its previous decisions, Justices Roberts and Frankfurter declared

Justice Roberts

The two justices expressed their opinion following the Supreme court's award of compensation to a seaman for injuries sustained as a result of the use of defective equipment by the employer, when better facilities were available. The court's action reversed its previous rulings in similar cases.

Said Justices Roberts and Frankfurter "The evil resulting from overruling earlier considered decisions must be evident . . Defendants will not know whether to litigate or settle, for they will have no assurance that a declared rule will be followed . . Respect for tribunals must fall when the bar and public come to understand that nothing that has been said in prior adjudication has any force in a current controversy"

WAR SPENDING:
On Rise

During the first half of the 1944 fiscal year starting last July, U. S government expenditures totaled 52½ billion dollars, compared with 41½ billion dollars for the same period in 1943, and the increased spending rate was maintained during January

More than 7½ billion dollars was spent last month, in comparison with about 6½ billion dollars for January, 1943, with the army accounting for 118 million dollars of the increase and the navy 808 million dollars.

Because of the current pay-as-you-go tax deductions from weekly wage envelopes, treasury receipts for January were above last year, thus bringing in-go and out-go into better balance Bond sales also were up more than 450 million dollars over January, 1943

FEED:
See Relief

Because of a decline in requirements of concentrates when pastures are opened and a 16 per cent drop in the 1944 spring pig crop, the nation's tight feed supply should be relieved soon, the Bureau of Agricultural Economics said.

However, overall prospects for the year are not so rosy, even though the geographical distribution of supplies has been improved by an increase in the corn price ceiling and the set-aside allocation for high protein feeds

BAE noted that with prices for laying mash this spring up 12 to 15 per cent over last year, the egg-feed price ratio will be less favorable, since returns on eggs are not likely to increase Total slaughter of chickens for 1944 should approximate the 1943 record of 3 billion 800 million pounds, despite probable decrease in the marketing of young chickens

STOCK EXCHANGE:
Shows Profit

For the first time since 1936, the New York Stock Exchange showed a profit in 1943, earnings amounting to $675 509 against a loss of $815,972 in 1942

In addition, it was revealed that the Stock Exchange collected $228,000 in initiation fees, which was not added to profit but rather was transferred to the capital account. Last year, $296,000 was collected in such fees

Reflecting the increased investment interest as a result of the war boom, 278,742,000 shares of stock were traded in 1943, compared with 125,685,000 shares in 1942 Daily trading averaged approximately 1,000,000 shares, against 450,000 throughout 1942 The brisk action has been maintained this year.

Weighs Less

Six pounds, five ounces when born, tiny Paulette Matthes of Chicago celebrated her first birthday, weighing three ounces less, in a case that has baffled physicians.

Only able to digest a little of a formula of milk and water, tiny Paulette has been in need of almost day and night care, which her mother has unselfishly given. It was a happy birthday, with Paulette, now 22 inches long, smiling for the first time. The Matthes have a thriving son, Ronald, 4.

MORE MONEY:
Circulation Up

Tax evasion by people with large incomes, and activities of "black market" operators are at least partly responsible for the huge rise in money in circulation, a current survey has revealed At the present, currency in circulation amounts to 20 billion dollars, or $150 per capita. Demand for $1,000 bills has more than doubled since the war started There were 300,000 of these floating in 1941 and there are some 700,000 now One hundred dollar bills are most in demand, their use rising from 8 million to 27 million since Pearl Harbor

"Black market" dealers in furniture, jewelry and the like, buy and sell on a strictly cash basis, keeping no accounts on which taxes might be levied, the survey explained. Similar ways of tax evasion are possible in other transactions, all requiring large amounts of paper money.

Lipstick Troublesome

Imprinting letters with lipstick might provide a thoughtful and tender touch, but when they're to be sent V-mail, they smear the equipment and blur the film, Chicago V-mail authorities say.

Other difficulties encountered in preparing V-mail film include letters written with a hard lead pencil or faulty typewriter which cannot be photographed. Because all V-mail is sent by air, delivery time averages five days. About 100,000 pieces of such mail are handled daily.

ACCIDENT TOLL

Last year 94,500 people were killed in accidents, and 9,700,000 were injured The death toll represented a decline of 1½ per cent from 1942 The death rate of 70 4 per 100,000 population was the lowest since 1922

Motor vehicles accounted for 23,300 deaths, 5,000 under 1942, and smallest since 1925 Occupational accidents took 18,000 lives, 3 per cent below the previous year. Thirty-three thousand people were killed in accidents at home, and nearly 5 000.000 were injured.

HIGHLIGHTS . . . *in the week's news*

GARTERS: Hope for synthetic rubber for garters, girdles and other garments faded with the announcement that the rubber director has forbidden the use of neoprene except for a few critical civilian items. Plans to make shoe cement, elastic yarns and fabrics had to be set aside. New military demands made the order necessary, the director said.

LITTLE STORES: Sales of independent retailers were 13 per cent higher in 1943 than in the previous year These figures do not include department stores, which had an increase of 17 per cent in the period

INVASION: Railroad shops in Britain are hard at work making special cars and locomotives for use on continental railroads for the invasion of western Europe.

The Headliners: Greta Garbo lifting the brows of the diners in a midtown Hungarian restaurant by sprinkling a thick layer of sugar on each dish—even the soup and vegetables . . . Recent handholders in the Persian Room. Gov Bricker and his wife . . . Talu Bankhead kidded by the clowns in Club 18 with their "man-overboard" routine . . . Poon Lim, the Chinese seaman (at Ripley's broadcast), sobbing while the radio actors dramatize his story—on a raft at sea 113 days—a record . . . Turhan Bey (La Hepburn's reported romance) who has been listed as a Turk. He's from Vienna . . . Choo-Choo Johnson, whose name is Violet Lynch . . . Homer Capehart, the popular radio-phonograph maker, who may be a candidate for the U S Senate from Ind . . . Bette Davis and her mater incognito at a downtown delly for hot pastrami sandwiches and celery tonic.

Midtown Vignette: Earl Carpenter's crew was playing another benefit show on which a Hollywood star appeared . . . Carpenter's music (to bring him on) was a zippy tempo'd "Who" . the actor hammed it all over the place (stayed on for what seemed forever) and laid an omelet . . . H G. Gardiner, the drummer, received a note from one of the sax tooters. It read: "We played him on with 'Who' Why not take him off with 'Why'?"

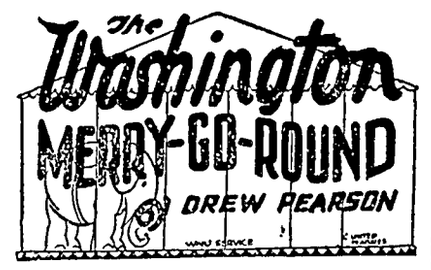
A soldier (carrying an enormous laundry bag) walked into Tiffany's. He received no attention whatever—all assumed he was in the wrong place He looked worn, his clothes didn't fit too well, an unimpressive fellow . He was shunted to the small-priced dep't, where he had difficulty convincing the salesman that he wished to buy something "more expensive" . . He finally selected a bracelet at $5,000 and wrote out a check . . The clerk was sorry—he'd have to send the check to the bank "for certification" . . Then he looked at the signature . . . Carl Laemmle Jr—who had suddenly recalled his sister's birthday!

Drama Report: A new play titled "Decision" by E Chodorov has been enjoying a run in the East. The story relates to an ostrich-like U S senator and the editor of his newspaper—who stir up disunity, prejudice and terrorize an American town, particularly a wounded American soldier just returned from Sicily. The soldier's father, a teacher, heads a citizens' group which threatens to bring charges of criminal treason against the editor and senator . . The Wilmington (Del) News critic called it "exciting drama, tense and full of dramatic moments You leave the theater feeling frustrated and angry; you cannot be unmoved . . Representative citizens endeavor to attack the subversive forces which are causing what is virtually a civil war on the home front. Winchell himself might have written the play, it is so much his theme, this faith in the American who will force treachery from under its cover"

The German Consul in Naples, Italy, had a list of American actors who appeared in pictures attacking the Nazis. Included in the list (confiscated by our troops) were Carole Landis, Myrna Loy, Norma Shearer, James Stewart, Henry Armetta, Ben Bernie, Joe E Brown and many other prominents . . . Arthur Clifford Read (accused by the FBI of being a Jap agent) threatened to go AWOL from Camp Croft if his superiors refused him a furlough . He got it and it proved to be his big boner He went to N. Y. where he was nabbed.

Quotation Marksmanship: The Oskaloosa Tribune Buyers once did business over the counter. Now they do it over the ceiling . . Ladies Home Journal· No one is entirely useless. Even the worst of us can serve as horrible examples . . . Fletcher Henderson Middle age is that time in life when you'd rather not have a good time than recover from it . . Lulu Bates Argentina's earthquake just goes to prove again what can happen when you argue with Winchell . . . M. Lincoln Schuster Warning to tyrants and dictators: Americans are famous for their sense of humor, but they cannot take a yoke . . . Geo. Santayana. A fanatic is a man who redoubles his efforts after he has lost sight of his objectives . . . D. Green The stork brought Frankie a little Son-atra.

Manhattan Murals: The 52nd Street sandwich shop sign "Breakfast served until 5 p. m." . . . The underground passageway for the models at 247 Park Avenue (en route to the photog studios at 480 Lexington, in the adjoining bldg)—it is nicknamed· "Glamour Gulch" . . . The sidewalk chalking: "This is Look-Before-You-Leap year!" . . . The little cellar restaurant (the Savoia) at 88 Mulberry St., back of Criminal Courts Bldg. Such scallopini for only 60c! The selfish set hope "Winchell doesn't hear of it."



Washington, D. C.

FOOD AND THE WAR

Assistant President Jimmy Byrnes called a meeting of the War Mobilization committee the other day to discuss the vital question of food for 1944. In preparation for the meeting, War Food Administrator Marvin Jones had his staff prepare a lengthy report on food prices, farm labor, machinery and other phases of the farm problem.

This report was distributed before the meeting so that members of the War Mobilization committee would have time to study it, but it soon became apparent that genial Judge Jones had not read carefully his own report—if at all.

When he began to talk about the drastic need of farm machinery and the restrictions on its production, WPB's Donald Nelson quickly picked him up. Obviously, Nelson had read Jones' report and had some facts of his own to refute it He pointed out that the only thing getting a higher priority than farm machinery on the war production schedule was the landing craft program, and that the President had ordered landing barges placed ahead of everything else.

"You wouldn't put farm machinery ahead of landing barges, would you?" asked Nelson.

"Well, it won't do 'em any good to land if they haven't got food," replied Jones.

Undersecretary of War Patterson also tangled briskly with Jones over farm deferments. Patterson pointed out that there were 750,000 boys between 18 and 21 with permanent draft deferments because they were farmers.

"This is greater than all the other deferments of the entire country," said the undersecretary of war, adding that, while agriculture should be in a preferred position, it should not be a "haven for draft dodgers."

"Well, the army's got to have food, doesn't it?" replied Jones.

* * *

HOG MERRY-GO-ROUND

Hog farmers all over the country are dizzy over conflicting directives from Washington. A farmer turns on his radio one morning and learns that Washington wants him to feed hogs heavy. Next, he is asked to market them lean. Next, just as he is snatching the extra corn from the pigs, a hurry call comes from Washington to feed 'em fat again.

Farmers are thinking of staging a little satire to express their feelings. Entitled "Make Up Your Mind, Washington," it has the following chorus.

"How can a man know what you mean,
Whether a hog shall be fat or lean?
Make up your mind and stick to that,
Whether a hog shall be lean or fat!"

However, the situation is not entirely the fault of the bureaucrats. In normal times, 225 pounds is a good average weight for hogs. The American market likes its bacon lean. But for lend-lease purposes, extra production was required, especially to supply lard for the Soviets. So farmers were implored to feed to heavy weights.

Came the corn shortage, and farmers were implored to stop feeding, market their hogs, and release the corn for shipment to dairy and poultry areas. Each change was implemented by shifts in the federal price supports.

But the hog run became phenomenal. January's slaughter broke all records. Hogs became a glut on the market. Farmers couldn't get near the slaughter houses. They had to keep on feeding. Hogs automatically got heavier, at the rate of 15 pounds a week.

But if they got over 300 pounds, they passed the support level, and the packers docked them. Fearing to lose money, farmers jammed their hogs into market channels, and the run became chaotic.

So now Washington has swung back again, and is inviting farmers to feed to heavier weights. The support price has been extended to 330 pounds.

Note: Probably no decision of War Food administration was made with greater reluctance, and the support price will be reduced again as soon as the hog run tapers off.

* * *

MERRY-GO-ROUND

¶ Washington real estate agents are evading price ceilings by requiring new tenants to decorate apartments at their own expense . . . To pack 'em in tighter, a Washington bus driver called out, "Push to the back, folks, and get together like you were in church."

¶ Ed Stettinius, undersecretary of state, discovered that ambassadors returning to Washington had no space in the state department building. With one phone call, he fixed up a suite of six rooms.

¶ Sen. Ralph Brewster of Maine, a dry, used to have a hard time refusing drinks at capital cocktail parties. "But now," he says, "with liquor so scarce, I'm the most popular man at the party!"

¶ British embassy officials, mindful of food and liquor shortages here, are avoiding the usual diplomatic entertaining.

SCOTT'S EMULSION

Christians and Jews Join Hands in Good Fellowship During 'Brotherhood Week' Observances, Feb. 20-26

Inter-Cult Meetings Being Organized in 3,000 Communities.

"ALL possess alike liberty of conscience and immunities of citizenship. It is now no more that toleration is spoken of, as if it was by the indulgence of one class of people, that another enjoyed the exercise of their inherent natural rights. For happily the Government of the United States, which gives to bigotry no sanction, to persecution no assistance, requires only that they who live under its protection should demean themselves as good citizens, in giving it on all occasions their effectual support."

So wrote George Washington, as first President of our republic, whose first principle is "that all men are created equal." The letter was addressed to the Hebrew Congregation of Newport, R. I.

A phrase from this letter, "to bigotry no sanction," has been seized upon as a fitting motto for the National Conference of Christians and Jews, an organization dedicated to the destruction of religious intolerance and racial prejudice. The conference sponsors the annual "Brotherhood Week" activities, a program of events designed to promote good fellowship and understanding among people differing in cult or race. The last week of February, the 20th to the 27th, was chosen for Brotherhood week, because Washington's birthday, the 22nd, is included in this period.

Pageants and musical programs are being rehearsed and roundtables and forums arranged in some 3,000 American communities this year. Churches, synagogues, army camps, naval stations, schools, fraternal and trade organizations are all planning to observe this time of special friendliness.

The Round Tables.

Headquarters for Brotherhood week is the central office of the conference in New York city. Dr. Robert Ashworth, director of the "Week," operates through 15 regional offices, which are permanently organized units of the conference. Local groups, called Round Tables, work under the direction of the regional leaders. There are now 249 Round Tables, composed of influential citizens of several religions and races.

Last year these men who believe that they are their "brother's keepers" were instrumental in having tolerance programs presented in 250 colleges, 2,800 parochial and public schools, 6,968 churches of all denominations, 1,889 women's groups and 1,333 professional and service clubs of one kind or another.

The 60 overseas directors of the USO also are now busily engaged planning various events for Brotherhood week for the armed forces abroad. Its chief of operations in the United States, Ray Johns, in his memo to the directors of the 2,300 USO units in this country, accompanying his program for Brotherhood week, said "No subject is closer to the heart of the world-wide crisis which now engulfs our civilization."

'World We Want to Live In.'

During the last 12 months committees of priests, rabbis and ministers have brought their message of brotherhood to some 400 camp centers with an estimated attendance of over two million. "The World We Want to Live In," a film made for the conference, has been shown more than 3,000 times. A documentary film detailing the various good will activities of this organization of Christians and Jews now is being made by "The March of Time." The camp program is growing all the time; in the words of the president of the conference, Rev. Everett R. Clinchy, it is "the most important new contribution of the National Conference."

Urging service men and women, and all others, to attend their churches or synagogues, the National Conference believes that "while we fight for religious liberty, it is our duty to help our churches and synagogues by our attendance and support. We must make religion increasingly vital in our lives and in the nation." Many of the major denomination religious authorities, and Protestant, Catholic and Jewish community leaders, use the material prepared by the Conference on Brotherhood week. Some 2,500,000 pieces of its literature have been given to chaplains for use and distribution.

President's Proclamation On 'Brotherhood Week'

(President Roosevelt's White House proclamation setting the week of Washington's birthday as Brotherhood week, will be beamed by short wave to the four corners of the globe by the office of war information. It reads in part.)

"The annual observance of Brotherhood week is a time both of reminder and dedication. It reminds us of the basic religious faith from which democracy has grown—that all men are children of one Father and brothers in the human family. It dedicates us to the practice of understanding and justice through which freedom and equality flourish in human society.

"While we are engaged in a mighty struggle to preserve our free institutions and to extend the boundaries of liberty in the earth, it is good for us to pledge renewed devotion to the fundamentals upon which this nation has been built. Brotherhood must prevail. Our inescapable choice is brotherhood or chaos.

"On land and sea and in the air, the sons of the United States fight as one though they come from every racial and cultural strain and though they worship at different altars. They are brothers in arms now; soon, pray God, they shall be brothers in peace. We on the home front must see that history shall not repeat itself in postwar hatred and intolerance. It is for us to make the homeland more nearly a land of brotherhood, worthy of the victory our gallant sons and daughters shall surely win."

Educational plans for observing Brotherhood week in the public and high schools were prepared by the Duluth Intercultural committee of Duluth, Minn. These cover a variety of novel events all aiming at cultivating an appreciation of the importance of tolerance and understanding of the other fellow. Robert Ruhlman, who drew the prize-winning poster for Brotherhood week soon to be displayed in schools, settlement houses, USO centers and community groups is a high school student in Cleveland, Ohio.

Education in Tolerance.

Of course, getting along amicably with people who are slightly different cannot be taught in a single week of the year. The conference realizes that their job must go on every week, every day. A spirit of toleration toward religious and cultural differences should be developed in childhood, the conference realizes. One of the most important committees of the conference is the Commission on Educational Organizations, which is composed of 28 prominent religious and public educators. The commission is concerned with (1) the elimination of biased materials from public and religious education materials, (2) the production of positive materials to promote understanding and good will and (3) the training of writers, clergymen, educators and administrators to make effective the materials and programs completed.

Much has been accomplished in a concrete way. For instance, 40 major Protestant educational and missionary boards have adopted for use at all age levels during the coming year a series of books and study manuals entitled, "The Church and America's Peoples." They treat realistically the problems of group relations in the nation and the world.

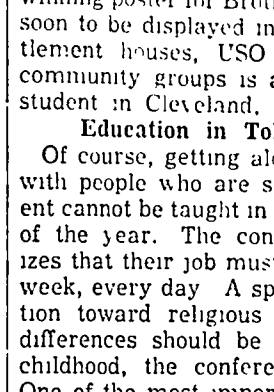
Three thousand five hundred Catholic parochial schools are using the new "Faith and Freedom" Readers of the Commission on American Citizenship established by the Catholic hierarchy. The commission includes Protestants and Jews as well as Catholics on its boards. The Readers include many sections devoted to understanding and respect among religious and racial groups.

During Brotherhood week last year, a number of Catholic bishops asked all their priests to cooperate with the conference program. Many of the major Protestant denominational leaders took a similar position with their clergy and educators. Cooperation by Jewish leaders was most generous.

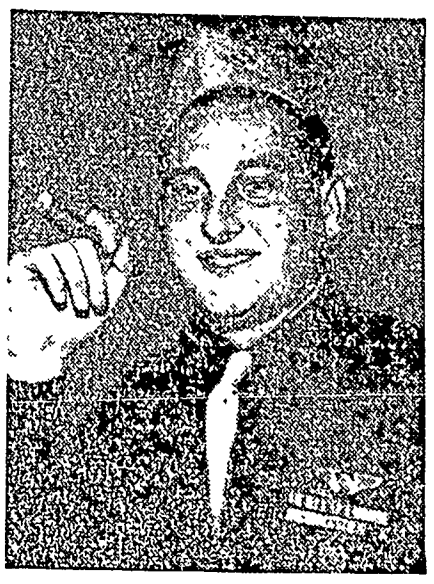
The Methodist Conference on a Just and Durable Peace at Delaware, Ohio, called on all church leaders to work with the conference in its program.

The major denominational religious education authorities are constantly using materials furnished by the conference. These materials include study units for young people and adults covering periods of several weeks discussion as well as single articles.

The conference has aided and extended the services of the Bureau for Intercultural Education to public school systems. This bureau develops and distributes educational materials on intergroup relations and works with educational bodies and regional and local school administrators in teaching human relations as an integral part of the curricula in American education.



Clergymen of three faiths, Rev. William Ryan, Rabbi Samuel Thurman, and Rev. Sidney Sweet, (front to rear) get acquainted with soldiers at Jefferson Barracks, Mo.



Back home in Brooklyn, N. Y., on furlough, Sergt. Howard Cantor relaxes with a big cigar. A Flying Fortress gunner, he is credited with shooting down nine Zeros in the South Pacific area. The medals he wears are the Distinguished Flying Cross, Silver Star, Air Medal, and the Oak Leaf Cluster. Hundreds of thousands of Jewish young men are serving in the armed forces.

After noting that the National Conference of Christians and Jews held its first meeting at Columbia university in 1928, President Clinchy said, "The National conference was established in accord with a cardinal principle in American history: respect for the dignities and rights of groups. The people of the conference believed that this country could not suffer hate breeders any more than they could afford to tolerate the carriers of contagious diseases.

"Our organization was established on the conviction that irrational antagonisms and hatreds are part of a vicious chain of which one link is tied to another. This nation, composed of a plural number of religious, racial and nationality groups, must, for the security and well being of each group, learn to face differences realistically. The members of each group must so act that the members of every other group have parity or opportunity to enjoy life, liberty and the pursuit of happiness."

'Brotherhood or Chaos.'

Dr. Ashworth said emphasis now is being placed on the community cooperation of common citizens of our one land, the important thing to remember being the intrinsic worth of the individual, and, in President Roosevelt's words, after the peace it will be either "Brotherhood or Chaos."

According to Dr. Ashworth, it was a Catholic priest who originally suggested the organization of Brotherhood week, back in 1932. He wrote to the National Conference of Christians and Jews that brotherhood was something all faiths wanted, something of which there was too little in the world, something of which there could never be too much. He suggested that a special period be designated each year by the National conference, that Catholics, Protestants and Jews be invited to consider together practical ways toward attaining it.

This idea took fire. The first national observance of Brotherhood week took place in April, 1934. President Roosevelt proclaimed the event publicly as he has done every year for the last 11 years. From the first the conference sought out the cooperation of civic bodies, Parent Teachers' associations, schools, colleges, churches and synagogues. Dr. Ashworth said: "This year, like preceding ones, a number of governors and mayors have issued formal proclamations endorsing its aims and purposes."

Traveling Speakers Carry Message of Brotherhood to Camps

The National Conference of Christians and Jews is carrying its message into the military camps, marine and naval bases.

The visit to the Seabee training center at Camp Peary, near Williamsburg, Va., is typical of the experiences of the traveling speakers. More than 3,000 of the keen, hard, construction battalion men poured into the camp theater, reports the conference man who accompanied the three clergymen on their tours.

"What kind of men?" he goes on. "Obviously, not the kind of men to whom one hands platitudes.

"They do listen with mild interest to the introductory statements. At least this show with a priest, rabbi and Protestant clergyman is a little different. And then Father Cardinal begins. He knows what to say, and says it; says it in a language they can understand. Dr. Speers follows.

"When Rabbi Rosenblum closes there has been no lagging of interest. Alert and listening, they even anticipate the speakers. With every salient point there comes applause. Everything is all right! The "Seabees" can do, but these speakers "can do" also. A waiting staff car is there with engine running. We have 10 minutes to reach the place where the next program is scheduled—and it is three miles across camp. Twenty times in three days we were to do this, and in so doing, speak to 48,000 men.

SCHOOLS FOR TAXPAYERS

"Washington, D. C.—The internal revenue department encourages collectors in major cities to establish schools for instructing accountants and other representatives of large employers in filling out the new tax blanks. These 'trainees' would in turn school individuals." — News item.

That's what we need. Schools. With pointers, chalk, blackboards, erasers and apples for the teacher. And time out for spitballs to ease the strain.

—*—

School days, school days,
Dear old raise the pool days;
Income and outgo and overhead—
Any old color as long as it's red;
You were my tutor, more or less,
You taught me to add, subtract and guess;
I wrote on my slate just "SOS"
When we were a couple of kids.

—*—

Taxpayers need instructions. And for the first time the accountants need 'em.

—*—

Schools will prove if our educational system is any good. If it can teach people to fill out those new tax blanks it's wonderful. If it gets them by the first page it's still wonderful.

—*—

Yoo hoo, teacher.
What do you want?
I want to know if we are getting anywhere?
That's funny, I was just going to ask you the same question.

—*—

What page are we on?
We have left pages and are now cutting the answers in stone.
Is it easier that way?
It ain't any harder.

—*—

Teacher!
What now?
What's the score?
Let's work it out together. I just kicked a field goal from my own 50-yard parenthesis. You tried a forward pass from Paragraph 14, Page 5 and the referee penalizes us 10 yards and $400 for double talk.
Was that for this year or last year's double talk?
It's a little of each.
I should have quit when I was even.

—*—

Hey, teacher!
Yes, yes.
Please, may I leave the room?
What for?
I'm dizzy.
That puts you in a higher bracket. Keep quiet and try to concentrate.
I concentrated last year and had to pay a concentration tax.

—*—

It will go on like that all through the school year. But think of the fun come graduation time. You get a nice cap and gown, straitjacket, ball, chain and time off for good behavior. Also a certificate proving you are still in a hole. Then a diploma with the almonds inside, and the right to stand on your head if you feel better that way. After which you plant the class ivy in the background around Section 19, Paragraph 23, where the shade from the bughouse will protect it.

—

(Note: We prefer an outdoor school. With playground attached.

Seasonal Interview Between Axis Partners (by telephone).

Hitler—Is this you, Tojo?
Tojo—How can I be sure in my present condition? Who's speaking?
Hitler—This is Adolf.
Tojo—Adolf who?
Hitler—Adolf Hitler . . . H-I-T-L-E-R . . . Remember?
Tojo—Oh, the fellow who used to be in the war in Europe! I was wondering whatever became of you.

—*—

Hitler—Listen, how are we doing?
Tojo—You're taking the question right out of my mouth.
Hitler—I was thinking of asking Japan to come in on my side.
Tojo—Japan came in on your side two years ago.
Hitler—I heard rumors but I want them verified.

—*—

Tojo—Is it true what they say about Russia?
Hitler—Izzit!
Tojo—Japan got a decision there once.
Hitler—Why don't you try it again. It would be a big help to me. Together we might do something.
Tojo—You'll have to hold those Russians alone.
Hitler—Whaddaya mean "hold"?—I would like to remind you that I counted on you to attack Russia.
Tojo—So solly!

* * *

White Meat for Sen. Byrd.

Well, that delicatessen shop that Senator Byrd accused of charging $5 a pound for turkey, all white meat, has been fined a total of $90. The corporation was fined $65 and the owner $35. That's about the profit on one turkey and we can't see how the corporation or the boss can bear up under it.

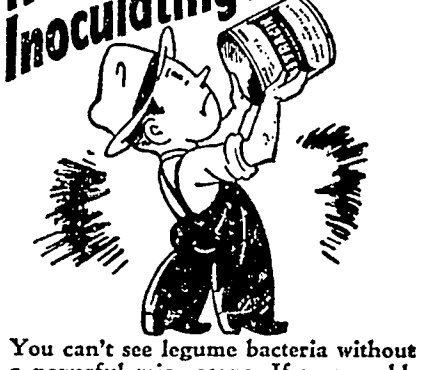
—*—

The WPB is now permitting production of razor blades. This is a good thing. A lot of Americans were losing face with those dull blades.

SOOTHES CHAFED SKIN
MOROLINE 5¢ AND 10¢
WHITE PETROLEUM JELLY

When you hear a Marine called a "Leatherneck," it has nothing to do with the epidermis of his neck. Years ago the Marine uniform was equipped with a high stiff leather collar. From that time on, "Leatherneck" has been the word for a Marine. The word for his favorite cigarette is "Camel"—the favorite cigarette also of men in the Army, Navy, and Coast Guard. (Based on actual sales records from service men's stores.) And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

NO! You can't see Inoculating Bacteria



You can't see legume bacteria without a powerful microscope. If you could, you wouldn't know whether they were good bacteria or bad. There *is* one sure way to get plenty of effective inoculation . . . just ask for NITRAGIN when you buy. NITRAGIN is the oldest most widely used inoculant. For 45 years farmers have used it to get bigger yields of alfalfa, clover, soybeans, and to build soil fertility. It costs only a few cents an acre; but frequently boosts yields up to 50% and more. It pays to inoculate every planting of legumes. Get NITRAGIN where you buy your seed. Look for the yellow can.

The Nitragin Co., Inc., 3899 N. Booth St., Milwaukee 12, Wis.

FREE Booklets
How to grow better legumes. Write today. Look for the tradename NITRAGIN on the yellow can when you buy.

Literate Chinese

Since 1930, more than 46,000,000 adult Chinese have taught themselves to read and write by studying basic Chinese, whose 1,000 characters, chosen from the 25,000 in current use, can be learned in 96 hours.

BACK IN GRANDMA'S DAY

colds often called for medicated mutton suet as a "home remedy" to comfort muscle aches, coughing. Today, it's for Penetro, modern medication in a base containing mutton suet. Penetro's double action relieves these miseries—(1) vaporizes to soothe stuffy nose (2) acts like warming plaster right where rubbed on. 25c. Double supply, 35c. Get Penetro.

Large Islands

There are six islands in the world each larger in area than Great Britain.

YOU WOMEN WHO SUFFER FROM HOT FLASHES

If you suffer from hot flashes, weak, nervous, cranky feelings, are a bit blue at times—due to the functional "middle-age" period peculiar to women—try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Taken regularly—Pinkham's Compound helps build up resistance against such distress. *It helps nature!* Also a fine stomachic tonic. Follow label directions.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

SNAPPY FACTS ABOUT RUBBER

With synthetic tires about to be in general use, experts emphasize again that speed is important in determining tire mileage. The legal limit of 35 m.p.h. has been found to be the best mileage conserver with synthetics, just as is was with tires of crude rubber.

Tire cords lose elasticity as they grow older, which accounts for many blowouts when a well-worn tire strikes a rough spot in the road.

Wartime regulations are saving nearly 200 million bus miles a year for the country's highway transportation system. Converted into tires, this conserved mileage means a lot to the rubber program.

C. H. TOMPKINS, GARNER, SPOKE AT METHODIST CHURCHES

Sunday was Laymen's Day in the Methodist Churches and Mr. C H Tompkins, principal of the Garner grade schools, gave the address in the Klemme and Liberty Methodist Churches at the morning service Mr Tompkins spoke on "The Church at its Best"

Mr Tompkins was superintendent of the Klemme Schools in 1918-19

HOME PROJECT TRAINING SCHOOLS

"Adjustments Families Can Make to Help Win the War" is the subject for the last in the series of Home Project meetings for this year Meeting emotional problems, co-operation in homes and communities, living in combined households and wholesome family life will be discussed

Recently food-conscious homemakers have been noticing increasing amounts of soya flour and grits on Hancock grocery shelves Recipes and helps with the use of these products will also be presented at these meetings

The schedule for the training schools is as follows:

March 3, Avery and Twin Lake at the home of Mrs. M C James.

March 22, Ell and Liberty at the home of Mrs Verner Stromer.

NIMROD GETS RABBIT WITH SMALL HORNS

Charles Houdek of west of Garner is exhibiting a rabbit with 14 small horns, in his brother's billiard parlor here, which he shot a short time ago

The horns are individually located all over the head and Mr Houdek, who is quite a nimrod, has never seen or heard of a wild rabbit with a similar horned condition

Mr Houdek plans to have the rabbit mounted

WAXY STAIN OF CORN TO REPLACE TAPIOCA

Iowa City,—Since the Japs cut off most of the United States supply of tapioca, the waxy strain of corn has come forward as a suitable substitute and additional needs soon will be met by this product, says Prof Walter F. Loehming, head of the University of Iowa's botany department.

He says that waxy corn long has been known in this country but until recently it was merely considered a curiosity of plant breeders

YOUR SHARE OF MEAT TO BE ABOUT 132 POUNDS IN 1944

The meat share for each civilian in 1944 should be 132 pounds, an increase of 6 pounds over the average per capita in the per-war years of 1935 to 1939 Civilians will receive about two-thirds of the total production

Half of the other third of the meat supply goes to the United States military and war services The rest, with the exception of about 4 per cent that is set aside as an emergency reserve, goes to our allies, other friendly nations, Red Cross and United States territories.

You can skimp feed with beef cattle better than with dairy cattle hogs of poultry

THE KLEMME TIMES

ME 49. KLEMME, IOWA, WEDNESDAY EVENING, MARCH 1, 1944 NUMBER 15.

ny Farmers Have Moved To w Places In Community

ERAL FARMERS HAVE CHASED LAND THE T YEAR

A Small Amount Of Mov- g Takes Place In Town

rch first again sees quite a er of people moving in the unity. There is little activity e way of moving in town, but a number of farmers are ing places this spring. We are voring to print a fairly com- list for this trade territory, ecord the following changes:

ervisor and Mrs. J. A. Cham- who held a closing out farm couple of weeks ago, are g from the farm south emme to the J. I. Overholt in south Klemme. Living in me is a fairly central location r. Chambers to look after the ts of his supervisor district. Wm. Janssen family of near en, in Dallas county, purchas- e farm where the Chambers located and moved there on lst. We welcome the Jans- to our community.

me months ago Walter Rosen- purchased the Harris farm ast of Klemme and the dahl family moved from the Larson farm at the west edge emme to their own farm last Ray Harris and family mov- a farm near Alden, Iowa.

old Larson and family, who resided in an apartment in the station located on the Lar- rm, have moved into the farm acated by the Rosendahl Mr. Larsonn will farm the ong with operating the sta- The apartment in the station e converted into office and room.

and Mrs. Tom Nelson have ed a house in the north- rt of Garner, where they oved from their farm south- f Klemme. Mr. and Mrs. Ray- Wille are beginning farming emselves and are now living Nelson farm.

e months ago Albert Kraus lifford Anderson traded farms bert Kraus has moved to his and smaller farm 3½ miles west of Klemme, and the d Anderson family have to their new and larger farm a mile north of Klemme.

other change was made short- er the first of the year when d Mrs. George Thiemann a sale and moved to town, purchased the Wayne Pavey nce, where they are now lo- in town. Their son-in-law daughter, Mr and Mrs. Maur- urray, moved over from Britt the Thiemann farm. Maur- d farmed with his father, who a sale and retired.

B. H. Peck family who have d on the Cashman farm, bet- nown as the old Joe Johnson east of Klemme, are moving rm six miles east of Klemme, rm being vacated by Heiko r, who has purchased a farm Clear Lake.

k Statlander and family, who been farming between Good d Belmond are moving to the vacated by B. H Peck.

rry Carpenter held a closing le at his farm two miles west odell, but we understand Mr. rs. Carpenter will continue de in their farm home. Mr. rs. Paul Lau, who are start- ming, have rented the Car- farm and will live in an- house on the farm.

in the Goodell vicinity d Mrs. Earl Ruka held a clos- sale at their farm three and miles west of Goodell and to Klemme and are living in rman Stille house in the part of town. The Merle family moved to the Earl farm.

ord of moving took place after the first of the new and Mrs. Emil Beier

OLD MOTHER GOOSE GETS ALL MIXED UP!

Mrs. John Kaduce, Jr., has a goose that must have gotten all mixed up because of the fine winter weather and rushed the season by laying eggs in January. Mrs. Kaduce helped the matter along by coaxing an old hen to sit on four goose eggs and Sunday, February 27th she was rewarded when all 4 eggs had hatched and there 4 fluffy goslings in the nest!

Old Mother Goose does not lay golden eggs like the goose in the fairy story, but she does alright by laying an egg every other day.

Soon there will be more goslings for Mr. Kaduce to care for as another setting will be due to hatch soon.

That is really something of a record for North Iowa in the month of February!

SHAMROCKS CLOSED SEASON HERE FRIDAY NIGHT

The Klemme Shamrocks ended the basketball season here Friday night in a double header game against Hayfield, in which the visitors took home all the honors.

The Little Shamrocks took it on the nose in the opener and lost to the Hayfield reserves 15 to 23.

In the main feature the Shamrocks jumped into an early lead and played the fast Hayfield team on even terms until the final stanza when Hayfield dumped in a few extra buckets to put the game on ice and step out with a 37 to 30 victory.

Sectional Play This Week

The Shamrocks enter the first round of the annual state tournament at the sectional held at Belmond against Rowan this Wednesday night. If they win this game they go against Goldfield Friday evening in the upper bracket. A win over Goldfield would give them the right to compete in the final for the Class B championship

Thank You

I wish to take this means of saying "Thank You" to all who sent me flowers and cards while I was a patient in the hospital.—Mrs. Clarence Swalve. 1tc

held a closing out sale and moved to Klemme, into the Mrs. Caroline Schlawin house which they purchased. Emil's brother, Elmer and family,moved to the Beier farm and the John Eenhuis family moved to the farm vacated by Elmer Beier, located about six miles west of Klemme. The Hans Schmidt family of near Britt, moved onto the farm vacated by John Eenhuis. This farm is about seven and a half miles west of Klemme.

The Theodore Nelson family from the Ventura vicinity have moved to one of the Cashman farms, the first place north of Goodell on the east side of the road. The Harvey Hopkey family, former tenants, have purchased a farm of their own and have moved over near Alexander.

L. R. Harsen and family who resided on the Ed. Buntenbach farm two miles east of Klemme, have moved to a farm near Rowan Clarence Marth and family of near Rockford moved to the Buntenbach farm vacated by Harsons. Floyd Smith of near Hutchins has moved to another Buntenbach farm near Britt.

A couple of months ago Mr. and Mrs. Fred Becker moved from their farm one and a half miles east of Klemme to their house in town, and their son-in-law and daughter, Mr. and Mrs. Cecil Katter took over the task of running the Becker farm.

MORE ABOUT MOVING
Continued on back page

PROCLAMATION

WHEREAS, the production of food is as essential to the sustaining of our armed forces, our allies, and victory in battle as the production of armaments, and

WHEREAS, the increased number of the armed forces and the increased vitality of our war effort needed to speed the day of victory demands greater food production, and

WHEREAS, our efforts on the home front in the production of food of all kinds, not alone for the armed forces and the war effort but in order to sustain high morale and health at home, is more essential now than ever before, and

WHEREAS, the State of Iowa has established outstanding records in the past through tremendous individual effort and organized cooperation and activity in all fields of food production that will stimulate us to even greater efforts this year as additional contribution to victory, and

WHEREAS, our state, through direction of our Extension Service and the organization and direction of local cooperation in every township in our state is already organized for more efficient production this year,

THEREFORE, I, B. B. Hickenlooper, Governor, do hereby proclaim the week of March 6 to 11 inclusive, as

FOOD FRONT ALERT WEEK

During this week the final plans and programs for food production in all its phases will be established. The organization machinery in all of the divisions of our state will be activated and local, district and state groups will begin to function as a coordinated unit.

I call upon all citizens to lend every cooperation, locally, for the establishment of these programs for 1944, and urge the continued cooperation and continued efforts of all citizens to make this program and the food production resulting therefrom, the greatest that we have ever undertaken or accomplished. It is a patriotic duty for all citizens to contribute every possible effort to the success of this program this year and with such contribution we can exceed all former records.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Great Seal of the State of Iowa to be affixed thereto.

Done at the Capitol, in the City of Des Moines, on this Twenty-fifth Day of February in the Year of our Lord, Nineteen Hundred Forty-four.

GOVERNOR

Hancock County Ninth In State In E Bond Sales

BOND SALES OVER MILLION DOLLARS FOR HANCOCK

Our County In Ninth Place In Iowa On Sale Of "E" Bonds

As the Times was going to press H. C. Armstrong of Britt telephoned the latest report on bond sales in Hancock County, with the good news that $1,056,691 worth of 4th War Loan Bonds had been sold, or 137% of the quota of $772,000.

"E" Bond sales were even better. With a quota of $437,370, the final figures today show that "E" Bond sales soared up to $742,957, or 170% of the quota, placing Hancock county in ninth place in the state on the sale of "E" Bonds.

And that is a mighty slap for the Jap!

PERSONNEL AT CREAMERY REMAINS THE SAME

The annual meeting of the Klemme Creamery Company held at the Community Hall last Wednesday, did not make any changes in the Board of Directors, as the old directors were re-elected

At the meeting of the directors the old officers were also re-elected with C J. Wille, President; Emil Blumer, Vice President; George Schoenwetter, Secretary and Treasurer.

The following are the directors: Carl Wille, Henry Nolte, Alvin Goll, Verner Priebe, Werner Schlawin and Clarence Lenz.

Paul Mueller was named manager and buttermaker, with Karl Huenemann assistant buttermaker and churnman. Earl Ruka is the bookkeeper and office man.

Testing for pullorum reactors and removing them from flocks producing hatching eggs have greatly reduced chick losses.

GRAND JURORS SELECTED FOR THE COMING YEAR

Elmer Raw, Clerk of Courts, reports the Grand Jurors for the year 1944 will report for duty March 21, 1944 at 10:00 a. m. at Garner.

Iowa State college extension horticulturists state that it is not wise to save seed from your planting of hybrid sweet corn for planting the following year.

$5.00 Per Family Is Goal Set For Red Cross War Fund

KLEMME COUPLE SURPRISED ON FORTIETH WEDDING ANNIVERSARY

Thursday, February 24th, 1944, was the fortieth wedding anniversary of Mr. and Mrs. Henry Josten of Klemme, and at noon relatives staged a surprise on them by coming to the Josten home with a prepared dinner which was served in their honor.

In remembrance of the happy occasion Mr. and Mrs. Josten were presented with a gift of money.

They were especially thrilled to receive a nice potted plant from their grandchildren: Calvin, Marvin, Le Roy, La Verne, La Vohn, and Le Allyn Josten.

Mr. and Mrs. Josten are the parents of two sons, Ewald and August who, with their families, are farmers in this community.

Those present for dinner at the Josten home were besides Mr. and Mrs. Henry Josten: Rev. and Mrs Calvin Grosshuesch; Mr. and Mrs George Born; Eric and John Josten; Mrs. Louise Josten; Mrs. Christian Haberkamp and Ethel; Mr. and Mrs. Julius Priebe; Mr. and Mrs Herman Priebe; Mr. and Mrs. Ewald Josten, and Marvin; and Mr and Mrs. August Josten and La Vohn.

All enjoyed a fine time.

THREE KLEMME BOYS LEAVE FOR AIR FORCE TRAINING

Three Klemme boys, John W Schwichtenberg, son of Mr. and Mrs. David Schwichtenberg; Winton Etchen, son of Mr. and Mrs. Albert Etchen, and Aaron Wille, son of Mr. and Mrs. C. J. Wille, left Friday for Des Moines to be inducted into the Air Forces of the U S Army. From Des Moines the boys will be sent to some college for several months of study and pre-flight instruction before they began flight training. The course covers about 14 months.

Allan Barz Awaiting Call

Allan K. Barz, son of Mrs. Clara Barz, has also enlisted for training as an aviation cadet, and is awaiting his call to begin training.

WORLD DAY OF PRAYER OBSERVED AT METHODIST

The World Day of Prayer was observed at the Methodist Church Friday afternoon with appropriate services and a program.

Mrs. Wilbur Haefner, Mrs Virgil Stille, Mrs. Bernard Pringnitz and Mrs. Geo. Schoenwetter, accompanied at the piano by Mrs. Lewis Abele sang "Hour of Prayer."

Mrs. Gerald Koerner, Mrs. C. G Waterman and Mrs. R. A. Jorgenson, acompanied by Mrs. Matt Smith, sang a trio.

Rev. Harvey lead the program, assisted by Mesdames H. E. Harvey, Lester Neuberger, Wilbur Haefner, and Dwight Hummell.

The service was well attended.

HANCOCK COUNTY MEETING SCHEDULE

March 2, Garden Planning-Central States building, Britt.

March 3, Britt Township Farm Bureau meeting at Schubert school, 8:00 p.m.

March 3, Avery and Twin Lake, Home Project training school at Mrs. M. C. James'.

March 4, Farm Bureau Board meeting in the afternoon at Garner.

March 7, Erin and Amsterdam, Home Project training school at Mrs. E. J. Rowley's.

March 8, Madison and Ellington, Home Project training school at Mrs. D. E. Keat's.

March 9, District Farm Bureau meeting 10:00 - 3:30 at Garner.

We can print anything. Call at the Times Office.

ANNUAL RED CROSS DRIVE ALL OF NEXT WEEK

Mrs. George Lawhorn, Chairman For Town Of Klemme

The annual Red Cross Drive for all of Hancock County begins next Monday, March 6 and runs through Saturday, March 11th.

The goal set for Hancock County is at least $5.00 per family. Larger contributions are welcome and also needed. Give liberally.

Chairmen have been appointed for each town and township, and solicitors will call on your.

For Klemme, Mrs. George Lawhorn is the Chairman and the following Co-Chairmen form the Executive Baord: C. G. Waterman, J. I. Overholt, R. A. Jorgenson and Sumner Trumbell.

Mrs. Lawhorn has appointed the following women to solicit funds:

Mrs. R. A. Jorgenson, Mrs. Sumner Trumbell, Mrs Henry Jost, Mrs. Martin Barz and Mrs. C. G. Waterman.

Remember, this is the Red Cross Annual War Fund Drive, and the only one to be made this year, so dig down deep.

ENDORSE YOUR GAS COUPONS

Beginning the week of March 6, investigators for the Office of Price Administration will begin a Nationwide spot check of gasoline coupons, it has been announced by R E. Walters, regional OPA administrator, who warned that motorists who failed to properly endorse their coupons may lose their ration books.

The investigators making the spot check will ask to see all coupons in a gasoline buyer's possession. If all are not endorsed, the investigators will hand the buyer a notice explaining the importance of endorsement and directing him to visit his local war price and rationing board within ten days to show that all coupons have been endorsed. One copy of the notice will be sent to the ration holder's board. If he fails to appear with his coupons endorsed, a hearing may be held to revoke his ration.

Gas station operators must accept only properly endorsed coupons for face losses in their inventories, Walters warned. Distributors, he said, already are refusing to accept from dealers all coupons which are not endorsed in accordance with rationing regulations.

Walters said that holders of "A", "B", and "C" books must write on the face of all coupons in their possession the license number and state of license of their cars. Truck, cab and transportation company operators, he said, must endorse each "T" coupon with the city and state of the company's main office and the official fleet number of the certificate o war necessity number, whichever applies. He suggested that company officials could help by endorsing all coupons before turning them over to their drivers.

MR. AND MRS. MARTIN BARZ ENTERTAIN AT BRIDGE

Mr. and Mrs. Martin Barz entertained friends at two tables of bridge at their home Friday evening. High score prizes were won by Mrs. Clarence Lemke and Mr. Orville Bridges.

A delicious lunch was served after the games by the hostess.

Goodell Lady Honored At Shower Last Thursday

Mrs. Henry Jost and Mrs. Harvey Harberts were hostesses at a post nuptial shower at the Harberts' home Thursday honoring Mrs. Heiko Brass, of Goodell, a recent bride. A social time was enjoyed and lunch served by the hostesses. Mrs. Brass was presented with miscellaneous gifts.

And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.

You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. It is better to rely on a medicine that has won country-wide approval than on something less favorably known. *Doan's* have been tried and tested many years. Are at all drug stores. Get *Doan's* today.

All-Bran "Honey Muffins"

3 tablespoons shortening
½ cup honey
1 egg
1½ cup buttermilk
1 cup Kellogg's All-Bran
1 cup flour
1 teaspoon baking powder
½ teaspoon salt
¼ teaspoon soda

Blend shortening and honey. Add egg and beat until creamy. Add milk and All-Bran; let soak until most of moisture is taken up. Sift dry ingredients together; add to first mixture, stirring only until flour disappears. Fill greased muffin pans ⅔ full and bake in a medium-hot oven (400° F.) about 25 minutes.

They're praise winners at *any* meal! And remember, KELLOGG'S ALL-BRAN is a rich natural source of protein, the B vitamins, phosphorus, calcium and iron! "Protective" elements urgently needed now! Make some today with

Kellogg's ALL-BRAN

TRY OVERNIGHT CARE FOR MISERABLE COLDS—

BEST SELLING PLATE POWDER IN THE WORLD

HOUSEHOLD MEMOS... by Lynn Chambers

Luscious Desserts, Springlike Salads Please Appetites

Mold the salad and give it new variety and interest. Strips of red and green pepper on the white of the cottage cheese make this mold attractive, and the fresh vegetable salad in the center gives unusual contrast.

Changes of season with their myriad of new fruits and vegetables in season bring with them delightful changes in menus and perk up appetites, but before the new season begins there's apt to be dullness in menus that puts appetites in a rut. Let's resolve there be no such menu monotony in any home when there are different combinations of old favorites available.

Frequently just a small change in the menu can bring a chorus of cheers from the family. For example, try a crusty fruit bread quickly prepared or a luscious dessert, new and different salad or an unusual way of preparing a meat dish. Don't depart too radically from what's liked by the family, but do make a small change for that desired "something different."

There's nothing especially new in the ingredients for this salad, but they're in new combination—even to the touch of watercress in place of lettuce as background:

Cottage Cheese Salad.
(Serves 8)

1 package lemon-flavored gelatin
1 cup hot water
1 cup pineapple juice
Strips of green and red pepper
1 cup cottage cheese
¼ teaspoon salt
Dash of cayenne

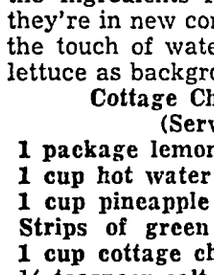
Dissolve gelatin in hot water. Add pineapple juice and water. Chill until slightly thickened. Decorate mold with strips of green and red pepper. Combine pineapple, cheese, salt and cayenne. Fold into thickened gelatin. Turn into ring mold. Chill until firm. Unmold. Fill center with mixed salad and garnish with segments of tomato and sprigs of watercress.

Here's an old favorite with a new twist:

Carrot Ring with Creamed Peas and Ham.
(Serves 6)

2 tablespoons butter or substitute
2 tablespoons flour
½ cup milk
¼ teaspoon salt
2 eggs, separated
2 cups grated carrot

Melt butter, blend in flour. Cook until slightly thickened, then add milk and salt. Stir until blended and thickened. Add beaten egg yolks and grated carrot. Fold in stiffly beaten egg whites. Pour into greased mold, set in a pan of hot water. Bake in a moderate oven (350 degrees) for an hour. Turn out on platter and fill with creamed leftover ham and peas.



***Fruited Drop Biscuits.**
(Makes 18 biscuits)

2 cups sifted flour
3 teaspoons baking powder
½ teaspoon salt
2 to 4 tablespoons shortening
6 tablespoons marmalade

Sift together flour, baking powder and salt. Cut or rub in shortening. Add enough milk to make thick batter, stirring only until flour is well moistened. Drop a spoonful of batter in greased muffin pan, add a teaspoonful of marmalade, top with another spoonful of biscuit batter and bake in a hot oven (450 degrees) 12 minutes.

***Pork Chops Supreme.**
(Serves 4)

4 thick pork chops
1 green pepper
1 slice onion
4 crackers
Pinch of poultry seasoning
1 teaspoon salt
⅛ teaspoon pepper
Milk

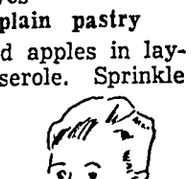
Grind together green pepper, onion, crackers and combine with other ingredients, using just enough milk to moisten. Place pork chops in baking pan and heap stuffing over top. Bake in a moderate oven (350 degrees) for an hour to an hour and a half.

Cherries make a colorful pie that will make a feast out of any meal. The pie pictured above is not just an ordinary cherry pie but one with a jellied custard filling resting underneath those cherries.

Old-Fashioned Pork Pie.
(Serves 4)

2 cups cooked pork, cubed
2 cups sliced cooking apples
3 tablespoons sugar
⅛ teaspoon nutmeg
⅛ teaspoon cloves
½ recipe of plain pastry

Arrange pork and apples in layers in greased casserole. Sprinkle with sugar, nutmeg and cloves and top with plain pastry. Slash well and bake in a hot oven 10 minutes; reduce heat to moderate and continue baking for 30 minutes until apples are cooked.



Potatoburgers.
(Serves 6)

1 pound hamburger
2 cups coarsely grated raw potato
¼ cup onion, coarsely grated
1½ teaspoons salt
¼ teaspoon pepper
½ cup fat

Combine all ingredients, mixing well. Shape into patties and fry in hot fat until well browned all over.

"Can she bake a cherry pie?" the young man would ask of his bride-to-be. That pie is still good and you'll like this variation of the original theme:

***Cherry Custard Pie.**

1 package cherry flavored gelatin
¼ teaspoon salt
1¼ cups boiling water
2 eggs, separated
½ cup sugar
2 cups cherries, canned
1 baked pie shell

Dissolve gelatin in boiling water. Add salt. Pour gradually over egg yolks which have been beaten with ½ cup of sugar. Mix well. Add 1 cup of berries to gelatin mixture. Chill until thickened, then pour into pie shell and top with remaining berries. Chill until firm. If desired top with meringue made of egg whites.

Are you looking for salad ideas? Send a stamped, self-addressed envelope to Miss Lynn Chambers at Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois.

Released by Western Newspaper Union.

Lynn Says

Good Combinations: Contrast in foods is an important factor in good menu building. Give your meat just the right vegetable and sauce and salad and the only complaint you will get is that your family doesn't have room for all they could eat.

Browned potatoes and brown gravy go with pot roast. Don't forget a tossed green salad.

Dumplings are indicated with stew. Mustard pickles and molded fruit salad are perfect accompaniments.

Delicious corned beef brisket is good with cabbage wedges, boiled potatoes and mustard sauce.

Baked sweet potatoes are a must with Boston Butt. A dish of applesauce and colorful Harvard beets do the right thing for balance.

A shoulder roast of lamb needs the lightness of new potatoes, brown gravy and fresh wisps of asparagus.

Save Those Used Fats;
Take Them to Your Butcher.

Lesson for March 5

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS URGES HIS DISCIPLES TO WATCH

LESSON TEXT: Mark 13:3-10, 31-37.
GOLDEN TEXT: Watch ye therefore: for ye know not when the master of the house cometh.—Mark 13:35.

God has a plan, and even now when men seem to have turned all order into chaos, we know that God is working out His purpose. The important crisis in that plan of God which we now await is the return of Christ, His second coming.

He will come secretly to call His own Church, the Bride, to Himself, and then He will come openly, in great glory, when every eye shall behold Him. Then His enemies shall be confounded, and His eternal kingdom be established.

We look for His coming, but while we wait (and it **may** not be long!) we are to occupy for Him until He comes. Our lesson tells men

I. What to Expect While Waiting for Christ (vv. 3-9).

First, we note that we are to **expect** the coming of false teachers and false Christs, who will claim to be the fulfillment of the prophetic Scriptures. We need only one admonition concerning them, "Take heed that no man lead you astray."

There have always been such false leaders who for the prominence or gain afforded them are willing to offer bewildered mankind all sorts of panaceas whereby it is supposed to solve its problems. It seems that these men increase in numbers when great crises, such as war, come upon the nations. Do not be misled by them. Just because a man seems to be devout and professes to be interested in Christ's return does not make him a dependable teacher. Are not these the very ones Jesus warned against? They must meet the test of all of God's Word.

Christ warns believers that before the end of the age there will be world-wide war, earthquakes in many places, and famines. These are to be expected, and will come. But here a word of caution is needed. We must not seize upon present events and rush out (or into print) and tell people that "this is it!"

We should be alert in relating world events to the teaching of Scripture, but let us "make haste slowly." But let no one assume that the need for caution justifies him in ignoring either the Word or world events. We are to be alert, well informed, spiritual and ready.

II. What to Do While Waiting for Christ (v. 10).

Preach the gospel! That is our first and most important business. Our Lord said that the whole world was to be evangelized before the end came. Please note carefully that He did not say that all nations will be saved, but that they will hear the gospel.

That is our responsibility—to see to it that every nation has a full and free opportunity to hear the blessed gospel message. We have not done it, and the failure of the Church at that point is a dark blot on its record.

There seems to be a revival of interest in the work of missions now, and there are many who believe that at the close of this war almost the entire world will be open for Christian missionaries. This will probably be true for a limited time only, and it is the urgent business of the Church now to prepare the missionaries who will then be needed.

And in the meantime we should all be busy about the all-important matter of teaching and preaching the gospel. It is the best preparation for the coming of Christ and the thing we would want to be doing when He comes.

III. How to Live While Waiting for Christ (vv. 31-37).

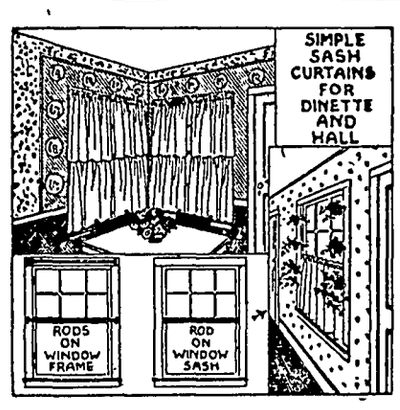
There should be an air of expectancy constantly characterizing the Christian. We are looking for Someone—yes, a very definite and glorious One—our Lord Himself.

We do not know when He will come (v. 32). That is a matter hidden in the eternal counsels of God the Father, a secret into which angels do not pry, and which even the Son did not know. Why then do foolish men attempt to learn it? Beware of any man who sets a date for Christ's return or for the end of the age. He is setting himself up as being superior to Christ, and you can be sure that he is an impostor.

We do not know the **day**, but of the **fact** we are sure. Christ is coming again! So we are to be watchful as we wait. God has not called us to stand idle, looking for the dawning of that glorious day. We are to be about His business, but everywhere and always, wide awake and looking for Him.

That kind of a believer (and all believers **should** be that kind) will pray. We are to "watch and pray." They go together. The one who prays will watch. The one who watches will pray. Possibly some of us are not praying because we have fallen asleep and no longer watch for His coming. Then too we probably fell asleep because we did **not** pray.

ON THE HOME FRONT with RUTH WYETH SPEARS



WHEN we think of the type of curtains used in Early Colonial cottages, crisp frills and ruffles usually come to mind. It is true that ruffled curtains were used in Colonial times but the curtains of the first homes in the New World were of the casement or sash variety. We must remember that as late as the discovery of America glass windows were rare. They were of the casement type with tiny diamond-shaped pieces held together with lead. Simple straight curtains to keep out the glare and give privacy were the next logical development.

Frills and larger panes of glass came later but sash curtains were also used with these new windows. They are also being used with good effect today for rooms where an informal atmosphere is needed. In the dinette shown here the sash curtained windows are bordered with a set of colorful plates.

NOTE—This is the first of a series on modern adaptations of period curtain fashions. There is another interesting treatment of a sash-curtained window in BOOK 1; and the method of lining casement draw curtains is illustrated in BOOK 8 of the series of 10 booklets on sewing for the home. Price of booklets is 15 cents each. Order direct from:

Household Hints

Remove all stains from table linens before putting them into the wash. This prevents their becoming permanent.

* * *

All new cooking utensils (if you find any) should be thoroughly greased and heated before using for the first time.

* * *

Preserve your metal costume jewelry with a quilted folder. This will prevent tarnishing and scratching and save time when you're hurrying to find your favorite piece.

* * *

When you break off a length of thread, always tuck the end in the notch provided on the spool. If the notch has become broken, a new one can easily be made with a razor blade.

* * *

Before discarding articles of clothing look at the zippers, buttons and snaps. If they are still good, cut them off and put them away to use again.

* * *

Don't make dust cloths out of that old sheet. Cut it down to make a cot sheet, crib sheet, or a pillowcase.

* * *

Stocking runs that are repaired on the sewing machine are often neater than those done by hand. To do this, turn the stocking wrong side out and fold so the run is on the fold. Pin the fold to a piece of paper, stretching while pinning. Using matching thread, sew on the machine close to the edge. Pull away the paper and tie and clip the ends of thread. You'll be proud of the result.

At Last John Got Chance To Be Side-Seat Driver

The wife was busily engaged in sewing an apron when her husband drew his chair up beside her sewing machine.

"Don't you think you are running too fast?" he said. "Look out! You'll sew the wrong seam! Mind that corner, now! Slow down, watch your fingers! Steady, now. I tell you you're going *too* fast!"

"What's the matter with you, John?" said his wife, alarmed. "I've been running this machine for years and don't need you to tell me how now!"

"Well, dear," replied the husband, "I thought you might like me to help you since you help me drive the car."

Ink Spots And Spatters

By Jergie

WELCOME, OUR NEW NEIGHBORS

March first is moving time in Iowa and especially among the farmers. This year there seems to be more moving than usual and the Editor has endeavored to get a complete list of moving activity in this territory, which is published this week.

There will be a lot of new faces to us in the community, and the newcomers will see hundreds of more new faces to them, and for a short time they may feel like strangers in a strange land.

Klemme is a friendly town, this is a friendly community and we extend a sincere welcome to the newcomes in the community and want them to feel that they are a part of our fine little town and this community.We give them a most cordial welcome and Klemme will try to make them feel right at home.

We are sure the new comers will like us after once getting acquainted with the people here.

IT MUST BE A THRILL TO MOVE

The writer and his wife were talking about all the moving activity in the community this spring and it got us to thinking what it would be like, for we have never moved.

Mrs J. said that sometime she would like to have a public sale sell everything and then move even if we moved right back into our same home, just to see what moving was like.

And that got us to thinking about the people who move from one community to another. Moving no doubt has its hardships, but it should also have its advantages such as broadening one's acquaintences, making new friends, meeting new people, getting a change of scenery. Sometimes a move is advantageous in that the children will get better schooling in newer and modern schools with larger teaching staffs and a larger selection of subjects.

And sometimes there is the advantage of moving into a community with fine churches, modern stores and better markets.

But then, too, there are disadvantages. As one farmer remarked to the writer the other day, "Two moves is as good as a fire." He was referring to the damage caused to household goods and equipment during the process of moving. Sometimes the weather is extremely bad and moving is no fun, but is a big job.

But just the same the writer and Mrs. J. would like to try moving sometime. Maybe one move would be all we would care for and would be content to settle down in the same place for another twenty-five years. It makes a good subject to think about.

"Skeet" Albertson's dog "Jiggers" navigates along at an angle these days since an "argument" with a car one day last week when he came out of the fracas with a broken hind leg. Dr. Anderson fixed a splint on "Jigger's" leg and the pooch is getting along fine. He still has difficulty, however, in assuming the proper stance when along side of a fire hydrant or an unsuspecting tree.

Our Men In The Service

EGGS 20c EACH SAYS SGT. KERMIT KOERNER

In a recent letter to his parents Sgt. Kermit Koerner states they he likes Italy much better than Africa.

In telling something about the country he says that the Italian towns are much more attractive and much cleaner.

Eggs are 20 cents apiece, but he can get a shave and a haircut for approximately 12 cents.

He sent his mother some souvenirs, including a handkerchief, some lace and other trinkets.

Pfc. Charles Bock left Sunday for Camp Stoneman, California after spending a fifteen day furlough here visiting with his parents, Mr and Mrs. Phillip Bock and family. and other relatives.

Mr. and Mrs. C. C. Kilgore received word that their son, Second Lt. Lyndon Kilgore had been promoted to a First Lieutenant. Lt Kilgore is stationed at Tyler, Tex.

Marine Sgt. Glenn V. Lewis left last Wednesday for Seattle, Wash., after spending a few days furlough here visiting with his parents, Mr and Mrs Verner Lewis and family After being over-seas in the Pacific area, Sgt. Lewis was returned to the states to take special work at a college, preliminary to taking officers training.

LETTER TO AILEEN HOWELL FROM SOLDIER OVER-SEAS

(The following letter was received by Aileen Howell, daughter of Mr and Mrs. Dewey Howell, Ventura, Route 2. The Howell family live on their farm about 8 miles northeast of Klemme.)

1304 Queer Avenue,
Crazyville

Dear Aileen:

I sit myself down, pencil in hand to type you this letter. (Pardon the pen.)

I don't live where I lived before, because I moved to where I live now.

If you come down to see me, you can ask anyone where I live because no one knows.

I'm sorry we are so far together. I wish we were closer apart. We are having more weather here than we had in Colorado.

My Uncle Junior died last week and is doing fine. I hope you are doing the same.

You know, when I was home, I started up to your place. I saw a sign by the side of the road which said, "This will take you to Ventura." So I hurriedly climbed on. By golly, I sat there a good three hours and never moved an inch. I disgustedly trudged my way home

I know it is very cold back there so I'm mailing you a coat by express. I cut off the buttons to make it lighter. You'll find them in the pocket.

If by any chance you don't get this letter, just write by return mail and I'll send you another one

I've already made some acquaintances here in Pittsburg. Her little baby brother swallowed some pins but we fed him the pin cushion and he's doing O. K. now.

I would have sent you the money I owe you but I mailed this letter before I thought of it.

Sincerely,

....

P. S. I forgot my name. Also enclosed you will find a picture of my dog, but for fear of losing it, I took it out.

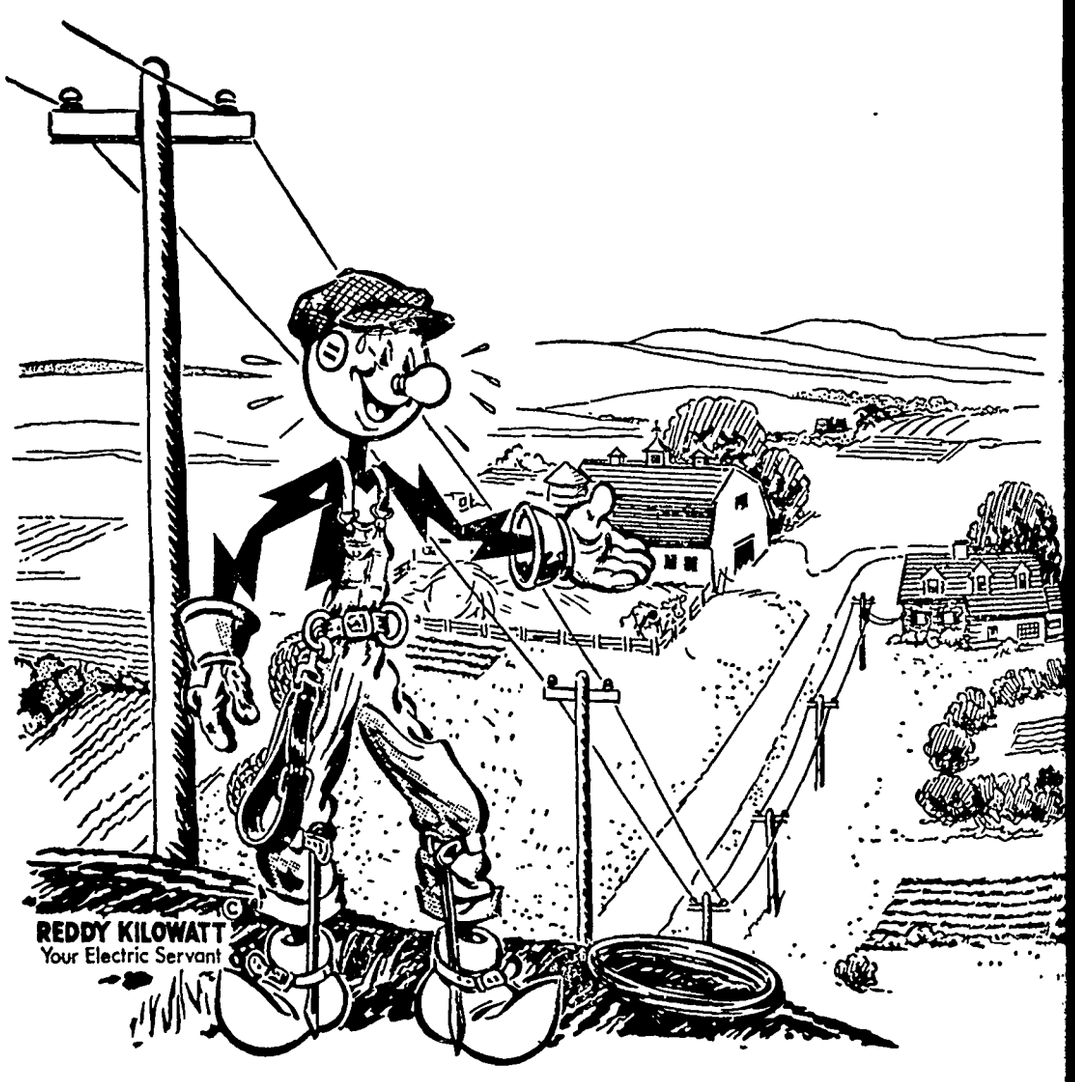
THE 1943 TAXES—BOTH REAL AND PERSONAL NOW DUE AND PAYABLE, AND THE FIRST INSTALLMENT WILL BE DELINQUENT AFTER:

March 31, 1944

Beginning with APRIL 1, a PENALTY of three fourths of one per cent per month will be charged on the first half of the regular taxes.

Roy L. McMillen

Treasurer of Hancock County, Iowa



Reddy Kilowatt Serves The Farm

We are now furnishing electric service to more than 3000 customers on almost 1000 miles of farm line.

We pay state property taxes of about $14.00 per year for every mile of farm line in addition to all of the other state and federal taxes.

Private electric companies pioneered in bringing rural electric power to Iowa and now serve more than 50,000 farms. Today these electrified farms are the backbone of our food production effort.

New extensions are being made — Inquire at our office.

Central States Electric Company

A self-supporting, tax paying, privately owned business

Hancock County Board Proceedings

5TH ADJOURNED JANUARY MEETING

Garner, Iowa,
February 21, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun Penn Eckels and John Chambers, present.

Minutes of the last meeting were read and approved as read.

On motion and second the Farm Bureau certificate of membership for Hancock County, Iowa, for 1944, is approved.

On motion and second the report of the Iowa State Department of Health on the drinking water at the County Home, is approved.

On motion and second the revocation of the appointment of J. C. Mick, George Morgan, and J M. O'Connor as special Deputy Sheriffs by Hancock County Sheriff, L. M. Brower, which appointments were made on February 3rd, 1944 is hereby approved.

In the matter of the appointment by Hancock County Sheriff, L. M. Brower of J M O'Connor, George Morgan, and J C Mick, as special Deputy Sheriffs for Civilian Defense without compensation, which appointment was approved by the Hancock County Board of Supervisors on February 3rd 1944, and revoked by Sheriff L. M. Brower, on February 14th, 1944, which revocation was approved by the Hancock County Board of Supervisors on February 21st, 1944 that

WHEREAS said appointees did file Surety Bonds, which bonds are unnecessary following the revocation of said appointees which was approved on February 21, 1944

BE IT FURTHER RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the bonds of J. C Mick George Morgan, and J. M. O'Conor are hereby cancelled and the Merchants Mutual Bonding Co. of Des Moines, Iowa, is hereby relieved from any liability on said appointees.

Foregoing resolution was offered and read by Supervisor Eckels who moved its adoption, was secnoded by Supervisor John Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun John Chambers, and Penn Eckels, aye Nays—none. Whereupon the Chairman declared the resolution duly adopted

Foregoing resolution was offered and read by Supervisor Eckels who moved its adoption, was seconded by Supervisor John Chambers, whereupon the Chairman placed the motion of it adoption and upon roll call the vote thereon is F J Schoun John Chambers, and Penn Eckels, aye. Nays—none Whereupon the Chairman declared the resolution duly adopted.

On motion and second the application of John W. Holecek for School Fund Loan is approved.

WHEREAS William Henschen, Enginer, William Boehnke and Walter Kahl, were appointed commissioners to classify lands in the watershed of Drainage District No 137, a sub-district of Drainage District No 1 and 2 Hancock County, Iowa in accordance with Section 7464, Code of Iowa, 1939, and all the laws amendatory thereon and whereas said Commissioners did qualify and classify the lands in said district as commanded and did file the report on February 16 1944, designating the amount of benefit against each tract and parcel of land, highways, and railways in said district

BE IT THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of Drainage District No. 137, Hancock County, Iowa that the report of the Commissioners appointed to classify the lands in Drainage District No 137 and the assessment of benefits for the construction of said district is hereby tenatively approved and a notice of hearing thereon will be had att he Courthouse in Garner, Iowa, on April 10th, 1944 at the hour of 10 30 A M at which time tax payers in said district will appear and show cause why said assessment designated shall not be taxed against the lands in the water shed of Drainage District 1 and 2, Hancock County, Iowa.

The County Auditor be and he is hereby directed to cause notice of such hearing to be published in the Britt News Tribune, a newspaper published in the English language at Britt, Iowa setting out the names of the owners of said lands in said district, together with the description of the real estate and the designate assessment of each tract, parcel highway ann railway in said district are charged with

The foregoing resolution was offered and read by Supervisor enn Eckels who moved its adoption, was seconded by Supervisor John Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, Penn Eckels, and John A. Chambers aye. Nays—none. Whereupon the Chairman declared the resolution duly adopted

On motion and second the Board adjourned to March 2, 1944, at 9.00 o'clock A M

ATTEST
FRED C. MISSAL, County Auditor
F J SCHOUN, Chairman.

COUNCIL PROCEEDINGS

Town of Klemme Iowa,
February 14, 1944.

Regular meeting of the Town Council held with Mayor Stille and four Councilmen present.

Minutes of the previous meeting were read and approved

On motion the following bills were allowed·

Geo Buseman, Jan salary..$	100.00
Klemme Cooperative Grain Co, Coal	10.60
Klemme Times, publishing Council Proceedings	1.48
Central States Electric Co., Light and Power	93 04

On motion meeting adjourned.
A J KUDJE Clerk.

OFFICIAL CALL OF REPUBLICAN CONVENTIONS

In compliance with authority vested in us by the Republican Central Committee and pursuant to the call of the Republican National Committee and the State Central Committee it is hereby directed that a County Convention shall be held at the Court House in Garner, Iowa, March 17, 1944 at 10:00 A. M. for the purpose of selecting 21 delegates to attend the State Convention and District conventions or caucuses.

The National Convention of the Republican Party will be held in Chicago, Illinois on the 26th day of June to nominate the next president of the United States.

The State Convention will be held at the Coliseum in the city of Des Moines Iowa, at the hour of 11·00 A. M Congressional District caucuses or conventions will be held at 10 00 A M. March 31st, in the city of Des Moines, Iowa, at rooms to be designated later

Precinct committee members are requested to call local caucuses on March 10th, at such hour as they may deem most convenient for the voters to select a delegate or delegates to the County Convention on March 17th, 1944. A schdule of delegates adopted for our county convention has been suggested of a ratio of 1 delegate for each 60 votes or major fraction thereof cast for Governor at the last General Election This gives us 46 delegates to the County Convention

The County Convention will convene promptly at the appointed time to elect 21 delegates to the State Convention and transact such other matters of business as may legally come before it.

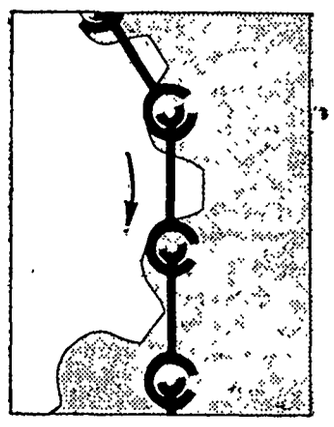
If you have any questions relative to any of the precinct caucuses or the County Convention please feel free to call on us for further information.

Lets get behind the Republican party in Iowa and make this a banner year.

Dated this 26th day of February, 1944.

FRED C MISSAL, Chairman,
MRS. H. H. BRUMMOND,
Vice Chairman.

Tips ON FARM MACHINERY



HOOK END LEADS

When a steel chain is replaced on a sprocket wheel, it should be placed so that the hook end of each link leads, according to Iowa State College Agricultural engineers. Once the chain is in place, it should be tightened only enough to prevent the links from climbing the teeth of the sprocket.

All new chains should be soaked in fresh oil before they are installed. It is also important that all sprocket wheels be lined up before the chain is installed.

Welcome

—V—

A HALF HUNDRED NEW FAMILIES are moving into the Klemme Community this spring, to operate the farms vacated by the older men who have retired.

MOST OF THE FAMILIES LIVING HERE came to this community as "New Comers" at some or other. I was a "New Comer," too, some 37 years ago and I like it here, and I hope that you who are joining us this spring will prosper and enjoy living near Klemme.

I WAS READING IN A FARM BUREAU paper that one-fourth of the Class A farm lands in the United States are located in Iowa.

THE NORTH HALF OF IOWA IS BETTER than the south half; therefore, I congratulate you on picking Klemme as your home, where we have the best agricultural lands in the United States.

YOU WILL FIND GOOD NEIGHBORS here who are mostly honest at heart; and you will find the Business and Professional People of Klemme willing to serve you to the best of their ability.

MY BUSINESS IS SELLING FURNITURE, and Floor Coverings for your Home. We also provide Ambulance Service, and now and then, when death enters the homes of men, we are called to conduct the funeral service.

STOP AT OUR STORE AND ASK US anything you want to know about this town and community. We ought to know some of the answers . . . we have been here so long.

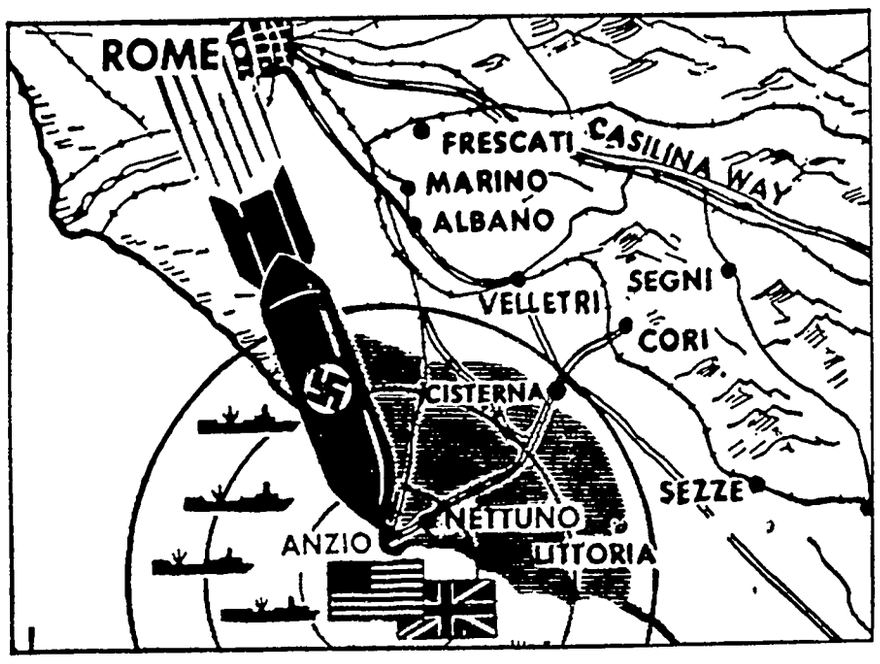
WEEKLY NEWS ANALYSIS

Nazis Pour Troops Into Anzio Region As Battle for Italy Grows in Ferocity; Senate Studies 'White-Collar' Income; Aussie-U. S. Forces Join in New Guinea

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union.



Italy—First great armored battle of Italy raged near Anzio, where Nazis strove to knock out Allied beachhead.

ITALY:
Major Battle

For the first time in the Italian campaign, major Allied and German armored forces met on level ground to slug it out, as the great battle for the Anzio beachhead below Rome raged.

To the southeast, bloody mountain fighting continued, with the entrenched Nazis stubbornly resisting advancing U. S. and French soldiers, crawling through fierce machine-gun and mortar fire to root enemy units out of deeply dug defenses.

Determined to fight a major battle in Italy far below the Po river valley in the north, the Nazis poured thousands of troops in the Anzio region, and action rose in tempo after the enemy carefully probed Allied lines for weak points.

Crowded into an area about 30 miles long and 12 miles inland, Allied forces swung into the attacking enemy at close quarters, while their air forces roamed over German positions and communication lines, blasting troop concentrations and supply deliveries.

MEAT PRODUCTION:
Record Levels

Keeping well in line with government predictions of record meat production for 1944, January slaughter of hogs, cattle and sheep set all-time marks for the month.

Partly because of liquidations due to concern over the overall feed situation for the year, 1,141,081 cattle were butchered in January, along with 7,839,352 hogs and 1,932,987 sheep.

Although the government estimated that meat production would rise 8 per cent in 1944 to a record 25,000,000,000 pounds, civilian allocations were set at the 1943 level of 131 pounds of meat per person for the year, with the services, lend-lease and other U. S. agencies obtaining the increased output. Only if the latters' needs were cut, could civilians expect more meat, it was said.

DEMOBILIZATION:
Congressional Plan

Adequate financing of industry to switch to civilian production, and orderly disposal of war material to prevent upsetting the markets, were proposed by the senate's economic policy and planning committee for postwar America.

The committee's recommendations were embodied in a bill sponsored by Senators George (Ga.) and Murray (Mont.), calling for government purchase of all raw materials or processed goods or extension of advances, partial payments or loans upon contract cancellations.

Regarding the nation's $15,000,000,000 investment in war plants, the committee proposed their sale to private interests, but not if their use should over-expand production. The number of aircraft, aluminum, rubber, magnesium, ship, steel and pipeline plants retained for postwar defense output should depend upon the scope of such a program, the committee declared.

Precaution should be taken against flooding the markets with war goods and depressing prices and production generally, the committee said, and opportunity should be sought to sell such material abroad. Organization of a demobilization board to carry out the program was recommended.

SUBSIDIES:
Opposed in Congress

Although facing an expected presidential veto, the senate moved to join the house in outlawing government subsidy payments to reduce retail food costs.

Sen. Bankhead

Senate approval of Sen. John Bankhead's anti-subsidy bill was scheduled after rejection of Sen. Francis Maloney's amendment calling for the expenditure of $1,500,000,000 for subsidies this year, and Sen. Robert Taft's compromise proposal that the program be limited to $950,000,000.

Countering administration arguments that abolition of subsidies would threaten the whole anti-inflation program by leading to demands for wage raises to meet higher retail food costs, Senator Bankhead (Ala.) said that such subsidies would only save each family an average of 11 cents a day, and this at a time when incomes and savings are at record levels.

Sen. Taft

OLD TOPIC:
White-Collar Wages

Popular as a topic ever since the days of Charles Dickens' stringy Bob Cratchit, low wages for white-collar workers now have come under the consideration of a senate labor committee.

Regardless of general salary increases of 15 to 30 per cent for clerical workers and salesmen since 1941, current earnings of many groups of non-manufacturing employees remain relatively low, A. F. Hinrichs of the U. S. department of labor said.

Although a survey in small towns showed store clerks have received boosts of 15 and 25 per cent and bank tellers increases of 5 to 10 per cent since 1941, straight time earnings of many groups remain less than 50 cents an hour, Hinrichs said. This averages less than $24 for a 48-hour week, and earnings are even lower in some other occupations, Hinrichs asserted.

SOUTHWEST PACIFIC:
Gain in New Guinea

Joining hands near Saidor after more than a month of fighting through rugged jungle, Australian and American forces prepared to lunge northward toward remaining Japanese positions on New Guinea's eastern coast.

First Allied objective was the base of Madang, feeder point for the Japs' inland positions, then Wewak, oft-pounded air base from which the enemy has sent up planes to harass Aussie and U. S. forces operating on New Guinea.

On New Britain island to the east of New Guinea, U. S. air forces continued to smack at the major Jap air and supply base of Rabaul, and at the port of Kavieng on New Ireland to the northeast, also a center of feeder operations for barges stocking enemy strongholds in the surrounding area.

HIGHLIGHTS . . . *In the week's news*

SLED: The Russian army is using an improved sledge driven by an airplane propeller for its mobile machine gun corps. A machine gun is mounted behind armor plating.

BASEBALL: The American league baseball clubs will play 78 exhibition games in their spring circuit, according to tentative schedules. Traveling difficulties may curtail the program.

TOKENS: More ration tokens will be needed than was at first thought, OPA officials indicate. About 2,000,000,000 tokens should be ready for release February 27, and the OPA is having another 200,000,000 made as a reserve. This supply may be increased to 800,000,000, it was said. A larger token, about the size of a quarter, with a value of five points, is being considered.

CIVILIAN TIRES:
More Later

Because requirements for military, bus and truck tires are expected to lessen later in the year, Rubber Director Bradley Dewey predicted an increase in supply for civilians after July 1.

Because of the restrictions on driving through gas rationing and the greater care being given to tires, the expected total supply of 18 or 24 million tires for 1944 should be sufficient to meet essential needs, Dewey said. Overall production for the year, however, is 6,000,000 below earlier estimates.

Although the synthetic rubber program utilizing alcohol and petroleum should hit peak production at a rate of 1,000,000 tons annually by August, the shortages of manufacturing equipment and high tenacity rayon cord for heavy duty tires is slowing up the whole tire program, Dewey said.

Up to July 1, there will be monthly production of 1,000,000 tires, with 750,000 available for rationing and 250,000 kept in reserve, Dewey reported.

RUSSIA:
Reduce Threat

Russian forces whittled down the Germans' toehold in the lower Ukraine and sought to remove the threat of an enemy encirclement drive in that sector in major action along the 800-mile eastern front.

Stiffening German defenses slowed the Reds' push in the Baltic, with the enemy bitterly holding the threshold into Estonia, Latvia and Lithuania. Chewing deeply into Nazi lines before these states, however, the Russ forced the Germans to withdraw in many places to prevent entrapment from the rear.

Down at the southern end of the long front, strong Russian forces were beating the Germans back from the lower Ukraine, where they have been holding a long lick of territory at the back of the Red armies surging into prewar Poland. By rolling up the Nazi lines here, the Russ were removing the threat of a possible German thrust at the rear of General Vatutin's armies.

RECONSTRUCTION:
Lumber Needed

Some idea of the tremendous demand for lumber for postwar reconstruction can be obtained from Great Britain's inquiries for 5,000,000,000 board feet in the first year after the war for rebuilding damaged towns, Dr. Wilson Compton of the National Lumber Manufacturers association told the fifty-fourth annual convention of the Illinois Lumber and Material Dealers association. Normally, Britain buys 250,000,000 board feet yearly.

Although only 7,000,000,000 board feet of lumber are to be allocated for civilian use in 1944 for farm construction, war housing and repair and maintenance work, the supply may be cut still further by increased demands for boxing, crating and dunnage.

Each soldier requires 300 feet of lumber for packaging and other similar uses when shipped overseas, Dr. Compton said, and an additional 50 feet a month for supplies.

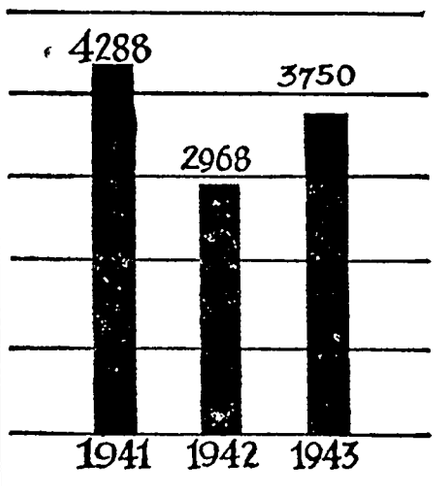
Exploiting war conditions by unscrupulously upgrading lumber is injurious to the whole trade in the long run, Dr. Compton said.

STRIKES:
Up in '43

Although 3,750 strikes were staged in 1943 involving 1,900,000 workers, their short duration resulted in only a loss of .07 of working time, the U. S. labor department reported.

Nevertheless, strikers were out an average of 7.1 days in 1943, compared with 5 days in 1942, when

Strikes in U. S. 1941-'43.



there were 2,968 walkouts. In 1941, each striker lost 9.8 days, and 4,288 walkouts were staged. In the prewar year 1939, the average striker stayed out 15.2 days.

In 1943, four coal strikes involving 400,000 miners resulted in 8,500,000 idle man days, or an average of 20 days per worker.

About 20,000 industrial disputes were settled by U. S. agencies in 1943 without work stoppages, 16,000 by the department of labor, and 3,955 by the War Labor board.

SOLES

A new oil-treating process that makes leather soles last 25 to 50 per cent longer may soon be employed in manufacture of all civilian shoes. The army has required oil-treatment of its footgear since early in 1943.

Proponents of the process point out that treated shoes, by lasting longer, would ease the shortage in the new shoe supply. It is estimated that 180,000,000 pairs with oil-treated soles would give as much service as 250,000,000 untreated pairs.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

COMPLAINTS OF 'WASTED MANPOWER'

The fathers' draft has brought on a new series of complaints about "wasted manpower" in the armed services stationed in the U. S. A.

Pending a call to action, a feeling of idleness and waste becomes a demoralizing factor. The men on the home front generally suffer most from the age-old service disease of "just waiting around."

The type of thing that happens in the waiting period is illustrated in a confidential survey made at the naval dirigible station at Lakehurst, N. J., which brought forth the following facts.

1. The navy uses 100 to 115 men to handle a blimp when it lands, whereas Goodyear handles the same blimp with 15 civilians.

2. As at many shore stations, duty usually consists of 24 hours on, then 24 hours stand-by (which means waiting around to see if anything happens), then 24 hours liberty. Then this is repeated. Many men complain that the 24 hours of loafing at stand-by could be used for some constructive type of work.

3. More than 1,000 civilians are employed to recondition ships at high rates of pay, while enlisted men who could do the job and need the training lie around idle.

4. A high wire fence, guarded by armed sailors, surrounds Lakehurst. Then, inside the fence, a marine guards the outside of each hangar. Then, inside the hangar, two civilians also stand guard.

5. The Lakehurst commissary, which handles about 100 customers per day, is staffed to handle about 1,000. It has 10 clerks, 2 commissioned officers and 1 cashier. Any civilian groceryman plus an assistant could easily handle the whole business.

Multiply Lakehurst's wasted manpower by the navy's many other shore stations and it runs into thousands of men.

Note: The men themselves are not to blame. Most of them chafe at inactivity, want to see action.

Effect on the Men.

One significant indication of how glutted the navy is with manpower is in the boot-training camps, designed to transform a civilian into a sailor. This training used to last three weeks. Now it has been running four months or more. And after finishing this boot-training, thousands of men lie around for months in OGU's (outgoing units) awaiting assignment to a school or other activity.

In the past year, also, many enlisted men come to the conclusion that navy schools are being maintained mainly for the purpose of keeping them occupied.

Slump in Draft Quotas.

Most significant fact about the manpower situation is that, all last summer, the army and navy were getting less than the quota of men they requested from the draft boards, but did not complain. Few people outside the government realized it, but even at the time the fathers' draft was under vigorous discussion on Capitol Hill, the army and navy were not complaining about the failure of draft boards to fill the quotas.

During the first months of 1943, draft boards overfilled their quotas. But in April, they began to slump off. In that month, the army-navy asked for 334,000 men but actually got only 299,000. This would not have been significant if it had occurred in one month only. But in May, the services asked Selective Service for 303,000 men, got only 264,000. However, there was no complaint from either the army or navy.

Again, in June, the services asked for 320,000 men, but got only 288,000. In July, they asked for 355,000 but got only 289,000, only slightly more than the June figure despite the fact that the quota requested by the army and navy had been increased. In August, the army-navy request dropped to 299,000, and the draft boards supplied only 221,000 men, a scant 75 per cent of the number asked for. In September, the army-navy quota was 313,000 men, but they got only 214,000 or 70 per cent of what they asked for.

However, at no time did the armed services make any protest. They seemed content to coast along with what the draft boards were giving them.

This was all during the period when the father-draft was under serious discussion and when the administration was taking a vigorous stand that fathers had to be drafted.

What the answer is, no one quite knows. Highup army-navy officers probably know but won't talk. However, the Truman committee may ask some potent questions.

MERRY-GO-ROUND

¶ New Democratic National Chairman Bob Hannegan is boosting Dan Nee, Internal Revenue collector at Kansas City, to be his successor as Commissioner of Internal Revenue. Thus the commissionership would be merely shifted from one end of Missouri, St. Louis, home town of Hannegan, to the other end of Missouri, Kansas City, home town of Nee.

¶ Tom Corcoran, the ex-Brain truster, has had a shot in his arm preparatory to going to China.

Walter Winchell

(WNU Service)

The Magic Lanterns: Tallulah Bankhead, whose cinema career was wrecked a decade ago with cheesy stories, didn't make that blunder again. She comes back in "Lifeboat," fashioned by John Steinbeck and directed by the mighty Hitchcock. It's a highly seaworthy vehicle. Its story deals with the adventures of nine in a boat through the courtesy of a Nazi sub. A Nazi gets aboard the boat, and from then on, in Steinbeck's devastating dialogue, you get a swell look at a rat. Tallulah gives her role plenty of vigor, and there are good jobs by Wm. Bendix, Gwen Anderson and Henry Hull . . . "Sherlock Holmes and the Spider Woman" puts Basil Rathbone to work at his silky gumshoeing. He prowls around to discover that all those suicides aren't what they're cracked up to be . . . "Of Thee I Sing" is to be filmed, probably hopeful of getting a free ride on the Presidential campaign.

I Remember It! Bob Dunn wonders if we ever heard about the late Jim Thornton, the vaudeville star, when he was teamed with Gentleman Jim Corbett. Mr. Thornton was an elbow-bender, and whenever he went on a spree, the act was cancelled. It happened at the Palace Theatre.

Corbett went looking for his partner and located him in a saloon with a terrible looking bum. Corbett bawled him out and refused to give him money for one more drink. To which Thornton, in regal tones, said to the bum: "Mr. Russell, this is Mr. Corbett. Throw a louse on him!"

Mail This to Someone: We saw it in Coronet. It should be handed to people who cash in their War Bonds. A man scheduled for induction the next day decided, before going to sleep, to cash in his Bond the next a. m.

That night he dreamt he was in a fox-hole fighting Japs. One Jap charged at him with a bayonet. Sighting his own rifle, our hero was about to save himself by pulling the trigger, when his sergeant tapped him on the shoulder and said, "Sorry, but the man who paid for your rifle wants it back."

The Morning Mail: "Dear Walter," writes Maurice Rocco, "It must be an oldie, but it still gets the biggest laugh wherever gamblers gather. About the wife who (going through her groom's pockets) found a slip of paper on which was memo'd 'Ruth.' She asked him: 'What's this mean?'

" 'Oh,' he oh'd, 'that's a horse I played today.' Then the phone rang. She picked up the receiver.

" 'Darling,' said the Mrs., 'your horse wants to talk to you.' "

Behind the Scenes: Grena Bennett, a New York opera critic, spends spare hours at the movies. In one film revival she saw an actor listed as "Alexander Broun." Grena wracked her memory to place a familiar mannerism of the unknown player. Then a closeup showed the trouper had oddly scarred thumbs.

It was Richard Bennett, in a meager role, who disguised himself in two critics' names, Woollcott and Broun. Miss Bennett, you see, was Richard Bennett's first wife. She remembered a boyhood accident that nearly cost him his hands.

The morning after movie director Edmund Goulding first visited Hollywood (many years ago), he was awakened by his host's valet, who stood by the bed offering him a small golden bowl filled with a clear liquid. Only half awake, Goulding stared at the bowl. Was it a finger bowl? Surely not at this hour. Was it something to drink? He finally decided to ask the valet. "What the devil is this, anyhow?"

"The temperature of your bath," intoned the lackey. "Will you kindly let me know if it is satisfactory, sir?"

Big City Vignette: Two 12-year-old boys were enthused about the newsreel—chewing their taffy and otherwise being kids—at a movie theater last week . . . Then on came Greer Garson's short—appealing for Infantile Paralysis contributions . . . The house lights went up, and the ladies with the coin boxes passed them . . . Probably thinking children had no money, a box-passer skipped the two boys . . . One got up and chased her several rows back before he could catch her. "Here lady," he kept calling, "lady, here!" . . . Limping on his braced leg to give his little bit—so that some other youngster—not so fortunate as he—could go to a movie and giggle and munch candy and also give.

Thumbnail Picture: Raymond Paige read it long go. About the diplomat from Europe, who after witnessing Congress in action the first time, observed: "Congress is strange. A man gets up to speak and says nothing. Nobody listens and then all disagree."

Heheheh: Lee Shubert, the theater magnate, was complaining of a sore throat.

"That's what you get," scolded a wag, "for counting your money out loud."

Marine Sergeant Who Was King Of 12,000 Natives on Voodoo Isle

Yank Was Believed Reincarnation of Faustin I.

By ROBERT H. MYERS
Released by Western Newspaper Union.

(Through courtesy of THE LEATHERNECK, the magazine of the U. S. Marines.)

ONE dark, gloomy night in the year 1848, on the tiny tropical voodoo isle of La Gonave, black King Faustin I suddenly and mysteriously disappeared. Years crept by and King Faustin I was never heard from again, but a legend was born that some day a descendant of his name would return to rule this West Indies island.

Some three score and ten years later, in 1920, a creaky sailboat lurched across the choppy waters of the channel from Port au Prince and scraped up on the sands of La Gonave. Bounding out was a strange collection of occupants; chattering black natives, bawling cattle—and Gunnery Sergeant Wirkus of the United States marines—whose first name was Faustin.

Thus was forged a link in one of the strangest stories that ever came out of this storied, superstition-bound island. For Faustin E. Wirkus, a blue-eyed, square-chinned Yankee from the state of Pennsylvania, who had never heard of King Faustin I or about his mysterious disappearance from La Gonave, and most certainly was no descendant of the ebony emperor, eventually was crowned King Faustin II and reigned virtually singlehanded over the 12,000 natives for nearly five years—between 1921 and 1925.

He's Asked About "Queen."

He became famous as the "White King of La Gonave," and as he goes about more commonplace duties in the marine corps today, he still gets numerous inquiries about his years in Haiti; about the broad and beaming native woman, Queen Ti Memenne, who had chosen him to rule the island.

Queen Ti Memenne, of course, was not really a queen, nor was Wirkus truly a king, because La Gonave was merely a province of Haiti and under the administration of the Haitian republic and its president. But the stormy little country had been the scene of a bloody uprising a few years before, starting in 1915. Marines had been sent in to settle it, and a picked number had remained to train and run the native Gendarmerie.

Gunnery Sergeant Wirkus was one of these men, and by congressional permission, was on detached duty with the Gendarmerie and held the rank of lieutenant in the force. Assigned to La Gonave, he was officially a subdistrict commander.

Today Wirkus is a warrant officer, in charge of the marine aviation detachment at the navy's pre-flight school at Chapel Hill, N. C. But to go back to those years of yesterday—

Soon after enlisting, he landed in Haiti with the first outfits of marines that went down to settle the trouble in that country. His was the old Twenty-second company, led by Capt. Alexander S. Williams, and his battalion commander was a man later destined for world fame, Gen. Smedley Butler.

Five Years of Bushfighting.

Off and on for five years, the marines were busy bushfighting the treacherous "cacos," knife-wielding natives whose tactics were bloody if not successful. Wirkus engaged in many scraps—he killed seven cacos in one bitter engagement—and gradually gained recognition as an efficient and straight-shooting non-com.

Once in Port au Prince he took a handful of native gendarmerie and broke up a secret voodoo ceremony and captured the ringleaders. This he accomplished with not a man injured. Voodoo meetings were often hotbeds of trouble.

During these years Wirkus kept hearing tales about the island of La Gonave, 40 miles north of Port au Prince and about 300 square miles in area. Voodooism was rampant on the island, and fearsome were some of the tales. A white man, so it was whispered, was not safe on La Gonave. No one wanted that outpost duty. Ghosts and spooks, they said, haunted the place.

But Wirkus made one visit to the island and decided he wanted it as a sub-district command. He scoffed at voodoo scare tales—and still does—and figured it would be a good place as a one-man job. Hunting and fishing were good, the climate was no barrier, and Wirkus was ambitious to make a name for himself as the key man in running the subdistrict. It was his responsibility to regulate travel and traffic, prevent smuggling, exercise control over the prison, enforce harbor and docking regulations, sanitation requirements, and see that lands were properly allotted and taxes paid.

Natives Suspicious.

When Wirkus arrived on brooding La Gonave, he found the natives suspicious of all white men, which was hardly surprising. For years they had been exploited and cheated. Their lot was a poor one, to say the least Wirkus set out to correct these conditions, and behind his success was a genuine affection for the native population. As sequester, or administrator, he not only handled his official duties, but went out of his way to help the people. He showed them better ways to till their lands, for the main industry was agriculture. He repaired their antique equipment and modernized it where possible.

Mothers were astonished but grateful when he came to their aid in bringing up their offspring. They didn't know it, but he bought a book, "The Care and Feeding of Children," to help him with such problems. He surveyed the lands and divided, eliminating bitter disputes, and he reduced taxes for some and boosted it for others, many of whom had enjoyed favoritism from corrupt local representatives of the Haitian government.

It took a full year for Wirkus to gain the trust and friendship of the islanders, and particularly Queen Ti Memenne. The "queen" was the leading figure in a group of matriarchal societies which dominated affairs of business and society on La Gonave. During his early months there, Wirkus had made it a point to humor the fat and friendly queen, and she soon began to accept his advice and help.

Summons From Queen.

One day Wirkus received a summons at his newly built home on the coast. Messengers from the queen delivered it. They were very solemn. The message asked that Wirkus hasten inland and up into the back mountain country to the queen's village of whitewashed mud huts. The queen very urgently wanted to see the young American, who was then not quite 25.

Wondering what it could be about, Wirkus accepted and started off on horseback. The trails up the mountain were crowded with natives, all heading for the queen's village. When he finally reached the village he was ushered, still somewhat mysteriously, into a dwelling especially reserved for him. It was late afternoon and the queen's emissaries informed him that his presence would not be wanted before Queen Ti Memenne until late that night. Already drums were slowly beating in the village center. Still wondering what it was all about, he calmly undressed and went to sleep.

Warrant Officer Faustin Wirkus as he looks today.

Khaki-Clad Monarch.

Later the marine sergeant, dressed in his usual khaki and puttees, entered the queen's house, stepping into a tiny room. Squatting in close array on the floor were members of the inner court. Ti Memenne, barefoot and dressed in a gaily colored robe, sat at the front in regal fashion, her black face shadowy in the sputtering, vague rays of candles. Queen Ti Memenne must have been in her forties or more, and, while a friendly woman, she had a way of commanding and getting respect.

The marine found out why he had been summoned before the queen. He was to be crowned "King Faustin II."

"At first I thought it was just a way they had of telling me they liked me, but later it developed that Ti Memenne and her people were in earnest about the matter. They had discussed the thing for days, and had agreed to name me as their 'white king.'"

The ceremony, weird in many ways, lasted nearly three hours. Outside the drums rolled and pounded, all but drowning out the bleating of a young goat scared to the tip of his tail, which was brought into the royal chamber and offered up as a blood sacrifice.

Wirkus was seated on a small, short-legged chair, and at the queen's command, an attendant came from the next room bearing a heavy, ornate crown.

"I now crown you 'King Faustin II,'" proclaimed Queen Ti Memenne, and she placed the crown—the same crown, so it was said, that once had adorned the head of King Faustin I—on Wirkus!

"Two huge blacks then picked me up and carried me outside. As soon as I appeared the drums beat out the king's salute—four ruffles and three taps. I knew that this was no empty honor they were paying me."

'White King of La Gonave.'

Thus was crowned "The White King of La Gonave," a title that was to bring Wirkus, the marine, fame in many countries. William B. Seabrook made him the featured romantic character of his book, "Magic Isle," and later Mr. Wirkus himself wrote a book which he called "The White King of La Gonave."

With the fame, however, also came envy and jealousy from certain quarters. Haiti's president a few years later, Louis Borno, hardly relished the popularity of La Gonave's subdistrict commander, or the thought that a "king," official or unofficial, was in charge of one of his provinces. So eventually Wirkus was transferred to another West Indies station.

Before that happened, though, the adventure - loving leatherneck proved himself a good and kindly administrator. The natives greeted him with "Bon soir, Roi," or "Good evening, King," and he was forever amused at the intense interest the natives took in his everyday affairs. Often they stood around his home, just to watch him dress.

As "King," of course, he had no more authority than he had before. In the eyes of his marine associates in the Gendarmerie, he was still merely subdistrict commander. He received no pay for his kingly title, and his stay on the island was as routine as before. To him, it was just a high compliment.

In 1925 Wirkus was transferred to another station in the West Indies. It was a sad occasion when "The White King of La Gonave" bade his people goodby. The natives lined the shores and cheered as Queen Ti Memenne gravely prophesied:

"Some day you will come back and rule the island of La Gonave."

How a Handful of Devildogs, Armed With One Machine Gun, Slew 125 Japanese in a Three-Hour Battle on Guadalcanal

"Warnings were issued that evening that one of our patrols would be coming through the woods after making a reconnaissance in front of the lines. Late in the evening some 50 men approached us.

"We thought it was our own patrol," said Pfc. Jack Sugarman, "but we weren't taking any chances. We hollered halt, fired a shot over their heads and no one answered. Then the attack began."

Japanese troops rushed the barbed wire defenses and attempted to scale them with a bridge made of poles and cloth. For each man that fell it seemed there were two more to take his place. The Japs threw everything at the machine gun positions, including grenades, dynamite, and flame throwers.

"Five times, when the Japs were attacking," said Sugarman, "our gun jammed and we had to work pretty fast to clear it. Then their mortars found the range. Seven times we had to move our gun position."

The battle lasted three hours, according to Sugarman. He estimated that the machine gun pumped out 4,000 rounds, and 125 dead Japs lay in front of their sector.

Air Engineers Get There First

By Robert McCormick

(WNU Feature—Through special arrangement with Collier's Weekly)

Aviation engineers in Italy are apparently just good little gremlins, scooting hither and thither, building airports where no airports should ever be built, and building them just at the time somebody needs them.

The men and equipment responsible for making the Salerno airdrome a decisive factor in the Italian landing were our aviation engineers, one of the least publicized units of the army air forces, yet one of the basic influences in every victory we've won so far in the Mediterranean.

Aviation engineers, riding their bulldozers, go right in amongst the bullets, into the front lines, or ahead of them. Their main jobs are to build new airports in conquered territory, as they did exceedingly well in Tunisia, and to repair captured airports, as they did so nobly in Sicily.

The big boss of the Aviation Engineers is Brig. Gen. Stuart C. Godfrey, a wiry little person who looks, acts and talks just the way you'd like to think all our generals do. General Godfrey describes himself simply as "General Arnold's engineer," but he is likely to end up the most important engineer in modern history. His title is Air Engineer, Army Air Forces.

As a sample of how Godfrey's men work, there is the story of how they built five airports in three days near Sbeitla, in North Africa.

Brig. Gen. Donald Davison, engineer commander in those parts, was looking for one of his companies. He started through a sector occupied by an American armored division. Officers stopped him, and asked him if he knew he was in the front lines, and headed right out into no man's land, beyond even the American's outer patrols.

'Damn Fools' Are Up Ahead.

Davison obviously did not know. The surprise on his face would have detonated a bomb. He asked the boys if they'd seen anything of a company of aviation engineers. The answer was quick and positive.

"Yes, we have," said one of the officers, "if you mean those damn fools who wouldn't pay any attention to us and took those big machines out. We think they're about 10 or 15 miles down the road."

Finally Davison found his engineers. They had put in a few defensive guns, had dug themselves slit trenches, and were at work building an airfield right under the Nazis' noses.

In three days—three days is 72 hours of work to the engineers—the men built five serviceable fields and moved north 110 miles to the area around Le Ser, to grind out more 'dromes.

The five-in-three deal was the result of careful planning and fast movement. The whole North African battlefront had been looked over from the air, and spots picked out which seemed generally favorable for landing fields. When it developed that a batch would be needed specifically around Sbeitla, the engineers again flew over the ground, choosing more definite locations.

Then the engineer troops, with their bulldozers and scrapers and shovels and all the rest of their equipment, went roaring overland, marching day and night, and they went so fast that they paid no attention to the fact that they had gone clean through the front lines. Or if they did notice it, they were too stubborn to care.

Their ability to build airports just one jump ahead of our combat airplanes is one of the big reasons we gave the Axis such a bouncing around in North Africa as well as in Sicily. By having airfields up front, we kept our air support constantly with—and ahead of—our troops.

Air Force Has to Be Near Front.

There could be no delays in bringing up our airpower. The tactical air force always had to get places ahead of our troops, to blast down enemy resistance before our troops arrived. The strategic air force had to reach deeper and deeper behind the enemy lines, hacking at the channels through which the enemy brought up food, munitions and other supplies. Both groups constantly had to be as near the Nazis as they could get.

This meant turning out airfields at an amazing rate. It meant flattening out barren mountains, filling in colossal mudholes, trying to hold down expanses of drifting, destructive sand. It meant using fumbling native labor, carrying special peewee equipment and airborne engineers hundreds of miles at a leap by air, and working night and day in bleak stretches of battlefields.

That's what the aviation engineers are up against. Yet they conjured up airports so fast that the pilots never knew, from day to day, where they'd find one next.

MORE ABOUT MOVING
Continued from front page

The Frederick Weide family, of the Meservey vicinity, have moved to the Cal Thomas farm, also in that vicinity, where they will be employed by Herman Heginger who has rented the place from George Heginger of Belmond.

Mr. and Mrs. Arthur Chelsvig and family who lived on a Cashman farm west of Goodell, moved to the McCorkle farm south of Goodell which they purchased last fall. Lars Warwick and family from the Meservey community, have moved to the farm vacated by the Chelsvigs.

Bernard Beek and family are moving from the farm at the northwest edge of Klemme to a farm east of Klemme and south of Clear Lake. Dick Baman and sons will farm the place vacated by Bernard Beek, along with their own farm where the Bamans will continue to reside.

LuVerne Christians and family moved from the Fred Blank farm to the Herman Schmidt farm southwest of Klemme. The Harry Larsons who lived there moved to the old Finn place northeast of Belmond, which they purchased. Herman Meintz and family who have lived in the tenant house on the John Larson farm 2 miles southwest of Klemme, moved to the farm vacated by LuVerne Christians.

After living for thirty-seven years continuously on their farm southeast of Klemme, Mr. and Mrs. Wm. Waddingham moved to their house in Klemme which they purchased last summer from Eniar Salling. Virgil Waddingham, their son, will farm the place.

H. J. Mourlam and family who have resided on one of the Bellamy-Kinsey farms five and one-half miles east of Klemme, moved to a farm southwest of Belmond. The Bellamy brothers will farm the place themselves this coming year along with their other farm which they operate.

A few months ago Stenus Harms held a sale and retired to Klemme to the Walter Kimball house in the northeast part of Klemme, which he had purchased last summer. B. H Peck will farm the place vacated by Harms about seven miles east and a mile north of Klemme.

Last December Wm. Thiel held a closing out sale at his farm three miles east and a half mile north of Klemme and moved to his house in town, just north of the Community Hall Mr. Thiel had sold his farm to Lawrence Block of near Garner, and the Block family has moved to the former Thiel farm.

Mrs. J. J. Stille, having purchased the Mrs. Elizabeth Smid house in Klemme, retired from farm life and moved to town. Her son, Virgil and family are operating her farm in Liberty township.

Henry Dirks and family, who resided about ten miles east and two miles south of Klemme, moved to the Reuber farm northwest of Klemme. E. W. Ewing moved from the Reuber farm to a farm two miles east of Miller, vacated by Truels Steffen and family who have moved to Ft. Atkinson, Wisconsin.

E. J. Huenemann and Clarence Lenz have switched farms. Clarence Lenz moved onto the Wes Lenz farm on the paving two miles north of Klemme and E. J. Huenemann moved onto the Lenz homestead northwest of Klemme, vacated by Clarence Lenz.

John Stuba, who has lived on the Reuben farm about seven miles west of Klemme, has moved to the Dexter farm six miles southwest of Britt. Peter Ecoff and family from southwest of Kanawha moved onto the Reuben farm.

A couple of months ago John M. Neuberger quit farming on his father's farm 6 miles east and 4 miles north of Klemme and moved with his family to Texas. Alvin Graham from north of Clear Lake has moved to the Neuberger farm vacated by John Neuberger.

Henry Smid has been hired by the Klemme Cooperative Grain Co. as their truck driver. Fred Bell, who held the position, steps up a notch as elevator man and assistant to Manager Glenn Bridges.

Mrs.Tony Ahrenkeil has returned from her visit of several weeks in California with her son Lt. Taalkeus Ahrenkeil and wife. Mrs. Ahrenkeil is spending a few days visiting at Rowan before coming to Klemme.

Miss Minnie Harms, daughter of Stenus Harms, was taken to the Mercy Hospital at Mason City where she underwent an appendix operation Sunday morning. Miss Harms is reported to be making a good recoverey.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Ben Lau has been seriously ill the past two weeks.

Mr. and Mrs. John Kaduce, Jr., were at Garner on business Monday afternoon.

Mr. and Mrs. Maurice Murray have named their twins Janet Ann and Jerry James.

Mr. and Mrs. Clarence Lemke visited at the Walter Rosendahl home Wednesday evening.

Mr. and Mrs. George Lawhorn were super guests of Mrs. Hod Lawhorn at Garner Sunday evening.

Mrs. P. M. Wilson and Miss Doris Reuben were at Fort Dodge Tuesday on business.

Mr. and Mrs. Verle Keraus and children of Garner visited at the E. C. Buntenbach home Sunday afternoon.

Mr. and Mrs. Richard Ax and family of near Ventura were 6:30 o'clock dinner guests at the Melvin Neuberger home Sunday evening.

C. K. Finders and son Dick, spent last week end visiting with friends and relatives in Iowa Falls, Marshalltown and Ferguson, Iowa.

Miss Harriett Gibbs of Mason City spent the week end visiting at the home of her parents, Mr. and Mrs. Harry Gibbs.

Mrs. E. C. Buntenbach and son, Edward Jr., and Elwood Harvey were Mason City visitors Saturday evening.

Ed. Thompson went to Iowa City Sunday for treatment and a check-up on his eye at the University hospital.

Mrs. Floyd Burnham of Pekin, Illinois, came Thursday evening for several days visit with her sister, Mrs. Calvin Grosshuesch.

Mrs. Fred Nagel returned home Wednesday from a threee weeks visit with her daughter, Mrs. Ola Thompson at Grinnell, Iowa.

Mr. and Mrs. J. A. Chambers moved Thursday from the country to the Ira Overholt house in the south part of town.

Mr. and Mrs. Verner Priebe and Carroll, were dinner guests at the home of Mr. and Mrs. August Josten, Sunday.

Rev. Paul Grosshuesch of Plymouth, Wisconsin, spent the week end visiting at the Rev. Calvin Grosshuesch home. Sunday Rev. Paul Grosshuesch preached at Garner.

Miss Thelma Chambers of Britt, was home for the week end to assist her parents, Mr. and Mrs. John A. Chambers to get settled in their new location.

Miss Novella Bredbenner of the State Teachers College at Cedar Falls, spent the week end in Klemme visiting with her mother, Mrs. Martha Bredbenner.

Mrs. Walter Drake, and two children are at Crystal Lake for a couple of weeks visit with her husband's parents, Mr. and Mrs. R. C. Drake.

Mrs. Lacy of Garner is now driving the star mail route on the trip through Klemme, from Garner to Belmond, as her husband has been inducted into the army.

Mrs. Naska Bock spent last week in Garner at the home of her son Ed, taking care of her grandchildren while Mr. and Mrs. Bock were attending a convention.

Mr. and Mrs. L. W. Wesenberg returned to their home in Goodell last week after spending several months in Califoria visiting with relatives and friends.

Mrs. Calvin Grosshuesch and her sister, Mrs. Floyd Burnham of Pekin, Ill., visited Friday evening at Mrs. Burnham went to Forest City for a couple of days visit with Mr. and Mrs. Rudy Bienert.

Mrs. Benn Coobs received word Thursday that her aunt had died in Indiana. Mrs. Coobs did not attend the funeral because of the distance and war-time travel inconvenience.

Dean Merkel, son of Mr. and Mrs. Alfred Merkel, began work at the Klemme Cooperative Grain Company Monday as bookkeeper. Dean, who has been attending Waldorf College at Forest City, took a business course there.

Miss Stella Thiemann, who is attending a beauty culture school in Des Moines, spent the week end in Klemme visiting with her parents, Mr. and Mrs. George Thieman and to see her new nephew and neice, twins of Mr. and Mrs. Maurice Murray.

Mr. and Mrs. C. K. Finders have as their guests this week Mrs. Finder's brother, Thomas J. Large, Ship's Cook, Second Class, U. S. Navy. He has a 30 day furlough after two years on submarine duty in the Pacific.

Mr. and Mrs. G E. Shirley and baby daughter, Jean Etta of Austin, Minnesota, and Mrs. Frank Woodhouse of Plymouth, stopped at the W. F. Pavey home Sunday for a brief visit on their way to visit the Wayne Pavey family at Webster City.

Mr. and Mrs. Fred Radloff, who live on their own farm south east of Garner, were Klemme visitors Saturday. Mrs. Radloff called at the Times office to renew her subscription and to chat with the Editor.

Henry Buzicky, who lives on a farm south of Duncan, was a business caller in Klemme Saturday, and was a visitor at the Times Office. Mr. Buzicky specializes in the raising of fine potatoes along with his regular farm work.

LIVESTOCK DISEASE MEETING TO BE HELD MARCH 6

Dr. Nidy is scheduled to speak on livestock diseases on Monday evening, March 6, at the C. D. of A. Hall in Garner. Patronage dividend checks from the Iowa Farm Serum Company will be distributed at this meeting.

We want your news. Phone 12.

Mrs. Fred J. Arnold Hostess To U-Delt-Em Club

Mrs. Fred J. Arnold entertained th U-Delt-Em bridge club at her home Thursday afteernoon. High scores were won in the following order by Mrs. P. M. Wilson, Mrs. R. A. Jorgenson and Mrs. Kudje.

ZONOLITE

Dry Hog House Floors

● ZONOLITE CONCRETE IS THE ANSWER TO DAMP POULTRY AND HOG HOUSES!

●

In order to raise strong, healthy hogs or poultry they must have DRY, warm and well ventilated buildings.

YOUR HOG HOUSE FLOOR can be kept DRY by putting in a ZONOLITE CONCRETE Floor. Come in and ask us about this simple, economical new way of having a dry, cozy hog house. Pigs that have a dry house in which to stay will be strong and healthy and gain faster.

INSULATE the WALLS and CEILING of your Hog and Poultry Houses with ZONOLITE and you will have a dry warm building that will increase your production.

ZONOLITE INSULATION can be easily installed in your home...conserves fuel in the winter and makes your house cooler in summer. You can easily do the work of insulating; as simple as pouring sand in a rat hole!

The Red Cross Stands Beside The Soldier

As Long As He Needs Its Help

GIVE WAR FUND

Your Generous Gift To The Red Cross

War Fund

WILL DO THESE THINGS

and many others for the service man or woman

- CHEER HIM, relieve his worries and fears for the welfare of those at home.
- GIVE HIM COMFORTS, things not expected at the time and place, and precious on that account.
- IF HE WERE TAKEN PRISONER, see that he gets extra foods, warm clothing and needed medicines.
- IF HE WERE WOUNDED, furnish the blood to save his life, and surgical dressings to bind his wounds.
- GIVE THE WOUNDED COMFORT in the hospitals.
- HELP THE CRIPPLED to adjust themselves to their new and smaller world, as will seek, for one discharged for disability, to safeguard his interests and see him and the family through any difficulty.

SOMEWHERE, EVERY MINUTE, AT HOME AND ABROAD, THE RED CROSS IS HELPING SOMEONE. THE RED CROSS WAR FUND—UNPRECEDENTED IN SIZE TO MEET THE UNPRECEDENTED NEED—

GREATLY NEEDS YOUR GIFT

The week of March 6 to 11, inclusive, has been set aside for the 1944 War Fund Appeal. Be prepared to make your contribution when the volunteer solicitor calls on you.

ELWYN JACOBS HIGH UP IN CONFERENCE SCORING

Elwyn Jacobs, freshman student at Simpson College, Indianola, son of Mr. and Mrs. Ed. Jacobs of Klemme, had the fourth highest individual scoring record for colleges in the Iowa Conference for the past basketball season. The conference is composed of Simpson, Loras, Dubuque U., Western Union, Central, Wartburg, Weslyan, St. Ambrose, Penn, Luther, Upper Iowa, Buena Vista and Parsons colleges

Oxenreider of Penn College lead the scoring with 218 points or an average of 19.8 points per game. Pender of Loras was second with 173 points for 10 games, average 17 3 points per game; Wagner of Weslyan made 147 points in 8 games or an average of 18 4 points per game, while Jacobs of Simpson made 142 points in 10 games or an average of 14.2 points per game Lamb of Simpson held seventh place with 116 points or an average of 11.6 points per game.

For the season's play, Jacobs looped 58 field goals and made good on 26 field throws. He committed 29 personal fouls during the season.

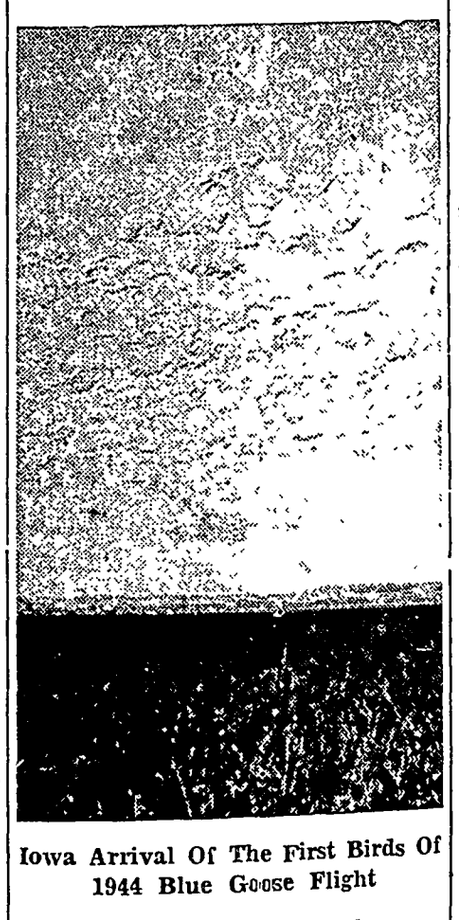
EARLY REPORTS INDICATE RED CROSS DRIVE WAS SUCCESSFUL HERE

Early reports would indicate that the Red Cross War Fund Drive in Klemme was well supported.

Mrs. George Lawhorn, chairman of the drive for Klemme, will compile the list of contributors for publication in The Times next week

Any who were not contacted for a contribution, or who wish to increase their contribution, may do so. Give your contribution to Mrs Lawhorn or leave it with Mr. Waterman at the bank, or at The Times office and you will be given credit

BLUE GOOSE FLIGHT BEGUN



Iowa Arrival Of The First Birds Of 1944 Blue Goose Flight

One of the most spectacular concentrations of birds in the United States is the annual flight of blue and snow geese through the Iowa Missouri River bottoms. Each year the first flocks of these magnificent waterfowl reach Iowa about March 1. The first flocks stop in the bottoms near Hamburg, and for several days their numbers increase by additional birds from the southern wintering grounds. The peak of the flight is reached about the 15th of March, at which time more than 500,000 birds may be found in an area of a few miles, gradually moving north up the valley In the heaviest concentration single flocks often total more than 100,000 individuals. The birds spend from two to four weeks in the broad, flat fields of the Missouri River bottoms and grow fat on waste corn before moving on through Canada to their nesting grounds immediately below the Arctic Circle.

The complete life history of these fascinating birds is told by J. Dewey Soper in "Life History of the Blue Goose," published by the Boston Society of Natural History. The blue goose is strictly a central North American bird and is extremely rare in the United States outside of the Mississippi Valley.

The blue goose in the past has not been an important game bird because in the fall during the open hunting season the birds have not stopped in Iowa but have flown directly to their southern wintering grounds non-stop. During the past three hunting seasons numerous blue geese have been killed by Iowa hunters, and it is believed by some that a change in the fall migration habits is in progress and that this change may make this bird an important game species in the Hawkeye State.

"HON. LIAR!"

"ATLANTIC CITY, N. J.—In a history-making demonstration of national unity, 16 nation-wide organizations—many commonly supposed to have conflicting interests—adopt statement of policy asserting recognition of joint responsibility for continued war production and for cooperation to preserve American democracy.

"Among those coming together to reach agreement were the National Association of Manufacturers, A F of L, CIO, National Grange, American Legion, American Farm Bureau Federation, National Council of Farmer Cooperatives." —News Item.

Boy Scouts Planning County-Wide Show March 24th

SCOUTS WILL STAGE MERIT BADGE SHOW AT GARNER FRIDAY EVE., MARCH 24

The Hancock District of Boy Scouts will stage a Merit Badge exposition at the High Schol Auditorium in Garner on Friday evening March 24, beginning at 7:45 o'clock The exposition will take the place of the Scout Circus which was staged in Klemme last year.

Don Roe of Garner is general Chairman and promises that this year's event will be of much interest to the people of Hancock county The program will include a stage show, featuring various types of entertainment, booths by the various Scout troops of the county, the Britt and Garner Cub Packs, and Girl Scouts.

The following committees have been appointed by Mr. Roe: stage show, Mel Paulsen , Lorene Stille and Co. Supt. Chas. S. Whitney; Tickets, Carl Frick of Britt; Finance, Supt. Sam Tweed of Garner; Arrangements, Orville Maben, Garner, Judging, Sumner Trumbull of Klemme; and Publicity, Fred C. Missal of Garner.

A detailed program will be announced at a later date. Admission will be by advance ticket sales by Scout Troops throughout the county and by admission at the door.

C. F. MERTEN HIRED AS COUNTY ENGINEER

The Hancock county board of supervisors hired C. F. Merten as county engineer, effective March 6. Mr. Merten was formerly county engineer and was given a leave of absence while he was on army duty. During his absence his assistant, Wm. Henschen, has served as county engineer. Mr. Merten was since retired as major in the army reserves and has just returned to Garner.

Mr. Henschen was appointed engineer on new drainage district 137, enginner on the cleanout of drainage district 14, and engineer on joint drainage district 37-39 with Winnebago county. He will complete those jobs even though not county engineer.

PROPERTY TRANSFERS KEEP RECORDER BUSY

Real estate transfers during the past few days have swamped the office of County Recorder Fern Peck Katter who Friday reported a total of 25 deeds received in a single day to be placed on record.

The Hancock County Abstract company has been forced to add additional personnel to handle the large demand for abstracts on recent real estate transfers. Many of the deals were made last fall and settlement is being made as of March 1.

ONLY ONE DIRECTOR TO BE ELECTED THIS YEAR

School Election Will Be Held Here Next Monday Afternoon

The annual election of the Klemme Independent School District will be held next Monday, March 13th at the Community Hall from 12:00 o'clock noon until 7:00 p. m.

This year only one director will be elected. E. F. Jacobs is a candidate to succeed himself on the ticket.

Boil root vegetables whole unless the skins are too stong or tough. If they must be peeled, make the peelings thin or scrape them no more than skin deep.

Many Properties Have Changed Owners In Hancock County

A FEW MORE MARCH FIRST MOVING CHANGES

Last week the Times published a fairly complete list of moving changes in this community. A few more have been reported since.

The John Chapman family of Belmond moved to the Smith place south of Goodell which they had purchased from Mehus and Lamphers. The two latter moved to the farm vacated by Chapman.

Mr. and Mrs. Carl Madison and two children, who were tenants on the Quigley place farmed by J. A. Chambers, moved to Goodell.

Herman Ahlstrom and family who lived for several years on the Bushman farm east of Goodell, moved to a farm south of that place which they had purchased. Geo. Ahlstrom and family of Belmond moved to the farm vacated by Herman Alhstrom.

Mr. and Mrs Ted Steenblock, of Thornton, moved to the Dave Finn farm east of Goodell. The E. Clark family, who lived there, moved to a farm near Dows.

Mr. and Mrs. Sven Svenson, from near Kanawha, moved to the Chas Schmalle farm south of Goodell which they had purchased.

REPUBLICAN CAUCUS WILL BE HELD IN KLEMME MAR. 10

A republican caucus has been called to be held in Klemme in the First National Bank rooms for Friday evening, March 10th at 8:00 o'clock, for the purpose of choosing delegates to the County Convention and for such other business as may properly come before this meeting.

All members of the Republican Party and welcome and urged to

J. I. Overholt,
Committeeman
Mrs. R. A. Jorgenson,
Committeewoman

MRS. HARVEY HUBBARD HAD BIRTHDAY PARTY

Mr. and Mrs. Harvey Hubbard entertained a group of friends at their home Sunday evening, the occasion being Mrs. Hubbard's birthday anniversary.

The evening was spent in playing cards, with Mrs. Martin Barz winning high score for ladies, and Clarence Lemke winning the high score for men.

After the games a delicious lunch was served, including a three-tier, decorated birthday cake with ice cream.

A FREAK OF NATURE!

Swanson's Hatchery came out with a new model in the way of baby chicks this morning when taking chicks off the incubators a three-legged chick was found!

If the new design proves satisfactory, they may go into mass production.

HELLO, FOLKS!

A son weighing 7 pounds 3 ounces was born to Mr. and Mrs. Chester Renner at the Mercy hospital at Mason City on Thursday, March 2.

The Renners live on a farm about eight miles east of Klemme.

Mr. and Mrs. Evert Barz are the parents of a daughter weighing 6 pounds, 14 ounces, born to them at the Mercy hospital, Mason City on Friday, March 3, 1944.

The new daughter has been named Joan Ovis.

The Barz have two other children in their family. Mr. Barz is in the submarine service of the U. S Navy.

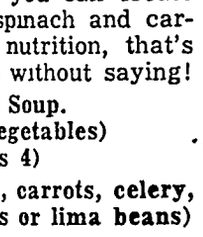
These furnish nutritious fat too, and you can take it butter for spreading:



Luncheon Suggestion

*Cream of Corn Soup
*Cream Cheese and Peanut Sandwiches on Boston Brown Bread
*Date and Orange Salad
*Recipes Given

***Cream Cheese and Peanut Sandwiches.**
(Makes 3)

½ six-ounce wedge cut of cream cheese
½ cup chopped salted peanuts
½ teaspoon lemon juice
⅛ teaspoon salt
6 slices white or whole wheat bread

Cream the cheese until soft. Add nuts, lemon juice and salt. Spread between slices of bread.

The other half of the wedge can be mixed with 2 tablespoons of lemon juice and pulp and 2 tablespoons of finely chopped nutmeats. This will give ½ cup of sandwich spread.

Devilled Cheese Sandwich Spread.
½ pound mild cream cheese
1 small onion
3 canned pimientoes
3 hard-cooked eggs, chopped
¼ teaspoon salt
½ teaspoon paprika
4 tablespoons mayonnaise

Grind the cheese, onion, and pimiento. Add chopped eggs, seasonings and mayonnaise and mix well.

Liver Sandwich Spread.
1 chopped onion
1 tablespoon butter
2 hard-cooked eggs, minced
½ pound liver
⅓ cup cream
Salt and pepper

Brown onion in melted butter. Mix well with liver, blend in cream and seasoning and mix well. Keep spread in cool place until ready to use.

Cottage Cheese Spread.
1 cup well-seasoned cottage cheese
1 cup finely chopped peanuts
1 tablespoon mayonnaise
½ teaspoon salt

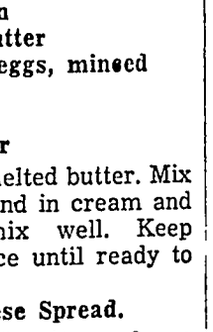
Combine all ingredients. Use either white bread or Boston brown bread.

Cheese and Dried Beef Spread.
½ pound American cheese
½ cup drained canned tomatoes
¼ cup butter or substitute
⅛ pound dried beef, chopped

Melt cheese in top of double boiler. Add tomatoes gradually, stirring occasionally. Add butter and blend thoroughly. Add dried beef and mix well. Store in refrigerator.

Chopped Meat Spread.
1 cup leftover meat, chopped
1 teaspoon mustard
2 finely chopped hard-cooked eggs
Chopped pickle or vinegar
Mayonnaise to moisten

Mix all together. Spread generously on buttered bread.



A fruit salad all quivery and delectable with fruit makes a perfect foil for a sandwich luncheon and gives your menu plenty of variety:

***Date and Orange Salad.**
(Serves 4)

1 package orange-flavored gelatin
1 cup boiling water
¾ cup cold water
1 tablespoon lemon juice
12 pitted dates, quartered
2 oranges, sectioned
Lettuce
Salad dressing

Dissolve gelatin in boiling water. Add cold water and lemon juice and chill to the consistency of thick syrup. Fold in dates and orange sections. Pour into lightly oiled mold and chill until firm. Serve on lettuce with salad dressing mixed with lemon or orange juice, or both.

t Ideas: The little things o for food are as important e big things you do for them king correctly. For exam-the bread pudding may be but it will be better with a ful of spicy apple butter on a dab of grape jelly.

e your meat casseroles in-ng by leaving the vegeta-larger pieces. When you a biscuit topping, use dif-types of cutters for bis-dough—hatchets, diamonds, treats, etc.

e slices fried in bacon add nce to your kitchen, and that hard-to-resist flavor erved with old fashioned cakes.

Those Used Fats; Them to Your Butcher.

Army Doctors Report Tick May Cause New Disease

A new disease entity heretofore undescribed, which they term Bullis fever, apparently transmitted by a tick, is reported in the Journal of the American Medical Association by Col. John C. Woodland, Maj. Mordecai M. McDowell and Capt. John T. Richards, medical corps, Army of the United States.

The disease was first recognized in the spring and summer of 1942 at the Brooke General hospital, Fort Sam Houston, Texas. It is self limited in most instances and apparently confers immunity on those contracting it, since no recurrences have been observed.

The onset of the disease usually was abrupt with an initial chill or chilly sensation ushering in the attack. Fever soon followed. A great majority of the men complained of headache. There was a pronounced lassitude, prostration, loss of appetite and general weakness during the fever stage of the disease and a few patients were nauseated and vomited The fever lasted from 4 to 14 days and in the average case the temperature was elevated for a little over five days. Convalescence was protracted, especially if the illness had been severe. There was loss of weight in a great many of the men. In the more severe forms of the disease a rash, resembling German measles and at times typhus, made its appearance early in the disease but disappeared within 48 hours. In about 10 per cent of the cases skin manifestations developed. From clinical observation, the authors report, it is apparent that the incubation period of the disease is from 7 to 10 days.

French-Canadians of Quebec Keep Tradition

Loyal to the British Crown and an integral part of the Dominion, Quebec's French-Canadians faithfully preserve the memory and customs of their ancestors. Shop signs and radio programs in Quebec are in both English and French. The Ursuline Convent (1641), the Basilica (1647), the Church of Notre Dame (1688) and Laval university (1852) are monuments to France in America.

Quebec was long the capital as well as chief port of Canada under French and British rules. Port leadership moved to Montreal, the Dominion government to Ottawa, but water power in abundance brought growing industrial might to Quebec. It is a center of Canada's enormous pulp and paper empire. Steel, gunpowder, machinery and cutlery are among its manufactured contributions to the war.

Quebec's popularity among vacationists had expanded in recent prewar years to a 12-month basis. Growing interest and participation in winter sports carnivals had added a new description of the city—the "North American St. Moritz."

Nylon Rope

One of the most interesting nylon applications is rope, a development which dates back to 1940, when it was produced for use for "on-the-fly" airmail pickup. Nylon's unusual combination of lightness, strength and elasticity made it ideal for this purpose, as it took up the sudden shock of contact between the grab-hook of the plane and the mail container.

When the army entered upon its glider program and decided to pick up gliders off the field, just as the mail plane picked up mail at the "whistle stops," it tried nylon out and found it most suitable. It combines the strength of steel cable with some of the springiness of rubber. Nylon ropes are also used when the glider and tow plane take off from the field together. The rope which recently towed the first glider across the Atlantic, from Montreal to London, was made of nylon and it is possible that some of the glider troops who spearheaded the invasion of Sicily were carried over on the end of nylon ropes.

Wide Sleeves and Back Key to House Dress

To be satisfactory a house dress must have the efficient features of any working outfit. It must have room for lots of action—reaching, walking, bending and sitting. This means that the sleeves should have sufficient width through the upper arm and fullness in the blouse is necessary, especially through the back. There must be plenty of width in the skirt with no strain on buttons and pleats. The style should be simple, yet becoming, with no fancy designing or trimming to interfere with easy laundering. Pockets are a convenience and should be well placed and sufficient in size to be useful.

Since the house dress is the garment which will be worn many hours of the day, it should be becoming and attractive, one that the family as well as the homemaker likes. While it is difficult to find exactly what we want these days, there are lots of beautiful materials still on the market. Color and design as well as comfort and durability should be considered when making the selection. Percale, seersucker, gingham and chambray are suitable and some are available in most markets.

Whether the dress is made at home or a ready-to-wear, the design should be simple, for it is not only the most serviceable but also the most beautiful.

Stews, Salads, Soups— Carrots Are Good in All

The carrot is an all-purpose vegetable. It can be used in stews, pot roasts, soups and chowders. It goes into vegetable loaves, into sandwiches, and into salads.

Raw carrot is one of the best salad joiners. You can shred the carrots or cut them—in slender sticks, in thin round slices, or in cubes.

Shredded carrots and cabbage make a simple salad that's in season throughout the year. Use a salad dressing to hold the vegetables together. You may add ground peanuts for variety. Shredded carrot in a molded gelatin salad is a great favorite, especially if you use a fruit—perhaps home canned peaches or oranges when they are in season.

For sandwiches with crunch and flavor, use grated carrot with chopped raisins, prunes, home dried peaches or apples and salad dressing. Or, just use creamed butter with carrots chopped fine.

To Control Garden Web Worms

The garden web worm is easy to identify because of the web it spins at the base of its host plant. It feeds during the night and spends the day in its web. To control garden web worms, a dust made of one part calcium arsenate or arsenate of lead to four or five parts of high grade, high calcium lime is recommended. A suitable dust may also be made with dry Bordeaux—25 pounds of calcium arsenate to 100 pounds of dry Bordeaux. If a spray is preferred, it may be made by adding three or four pounds of the arsenical to 100 gallons of liquid Bordeaux. Timeliness and thoroughness of application are important. Examining crops often and carefully so that the dust or spray may be applied just as soon as the infestation is noticed is suggested.

New Rotenone Uses

New uses are being developed for rotenone, the highly efficient insecticide that American farmers have found so helpful in increasing their production of food. Research is in progress to establish rotenone in the field of medicine. Used in skin lotions, it has revealed potentialities in combatting infectious skin diseases. Today, our armed forces and those of the British are making further experiments with the use of rotenone for this purpose. On the whole their findings are encouraging.

PATTERNS SEWING CIRCLE

New Lines

THE skirt of this dress is cut to give your figure a new midriff slenderness and to emphasize the natural bustline. Make it a gay dress in checked taffeta or surah.

* * *

Barbara Bell Pattern No. 1924 is designed for sizes 11, 13, 15, 17 and 19. Corresponding bust measurements 29, 31, 33, 35 and 37. Size 13 (31) short sleeves, requires 3⅜ yards 39-inch material.

It's Sophisticated

A SLIM two-piece afternoon or date dress has subtly curved and fitted torso lines. Wear the jacket over a long skirt for dancing!

Barbara Bell Pattern No 1900 is designed for sizes 12, 14, 16, 18 and 20. Size 14, short sleeves, requires 3⅞ yards of 39-inch material; ⅜ yard extra for pleating.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

RUB FOR COLD MISERY
Spread Penetro on throat, chest, back—cover with warm flannel—eases muscular aches, pains, coughs. Breathed in vapors comfort irritated nasal membranes. Outside, warms like plaster. Modern medication in a base containing old fashioned mutton suet, only 25c, double supply 35c. Get Penetro.

Hull Was First

Cordell Hull was the first cabinet member ever to address a joint meeting of congress.

Household Hints

To avoid stretching, line the pockets of knitted sweaters with sateen.

* * *

A small pincushion attached to the left wrist with an elastic is a handy gadget for catching the pins as you remove them when sewing.

* * *

Old pillow cases make good dress covers. Just slit the closed end and pull the case over the garment on the hanger.

* * *

When shortening a dress, snap a rubber band around a yardstick at the desired length line and measure the dress from the floor.

Subscriptions for papers going to points within the county (and adjoining counties) are considered continuing yearly subscriptions to be discontinued only upon notice from subscribers or at publisher's discretion. All other subscriptions will be discontinued one month after expiration, if not renewed but time for payment will be extended if arrangement is made by the subscriber.

Ink Spots And Spatters

By Jergie

BIRDHOUSE BUILING TIME IS HERE AGAIN

There is still time to put up that new birdhouse. This year more than ever the cheerful song and bustling activities of birds around our homes will be welcomed

The conventional bluebird and wren houses may be put up near buildings comparatively short distances from the ground, the former on posts in the open from five to ten feet high, and the latter under eaves of buildings and on open posts. The opening in wren houses should be about one inch in diameter or about the size of a quarter. The opening in bluebird houses should be about 1½ inches in diameter. When erecting birdhouses most immediately think of birds and wrens. However, other birds welcome man-made nesting sites. Hollow trees are the nest sites for many different kinds of desirable birds, including the woodpeckers, nuthatches, chickadees, titmice, and crested flycatchers Even the beautiful wood duck nests in hollow trees. It is an exciting adventure to build a birdhouse and have one of the uncommon birds claim it for its summer home.

One of the easiest and most satisfactory types of birdhouses may be made from a hollow log. Merely cut a sloping top, nail the ends of an orange crate on the top and bottom, drill a hole in the side, and put it up. In recent years the imported European starling has multiplied tremendously in Iowa and in some areas threatened to occupy all the nesting sites available, to the exclusion of more desirable native birds. If we hope to maintain our present supply of hole-nesting birds, we must increase the number of nesting sites available.

FACTS ABOUT THE ARMY SERIAL NUMBERS

The army serial number, which is really a part of every soldier's identity really tells a lot about him It tells where he came from and how he got into the army.

The first digit in the ASN, which is made up of eight, tells how the man became a soldier.

If this first digit is "1", he enlisted, but on December 15, 1942, enlistments were stopped, and all men now enter the service through the selective service boards. If the the first digit is "2", the soldier was a member of the National Guard when it was called.

When the digit is "3", the soldier entered the army under the selective service act. This is true even when he asked for voluntary induction, but in this case all his papers are marked with the letters "VI".

The second digit gives the number of the service command in which the soldier's home is located; or, if he was inducted away from home, where the induction center was located.

And "O" before the number, separated from it by a hyphen, indicates that the soldier is an officer, and if he gets his commission after being an enlisted man, he is given a completely different number. This is not true, however, of WAC's who earn a commission from the ranks. Enlisted WAC's have an "A" before their number, and when one is commissioned, the only change is that an "L" is substituted. These letters were chosen before the Woman's Army corps became a part of the regular army and the "A" stood for "auxiliary" and the "L" for "leader".

WHAT ARE SUBSTIDIES?

Subsidies are simply a direct grant, or government purchase at one price and resale at a lower price. They are the means of reducing the cost of food on the home front by paying the difference out of the federal treasury, with borrowed money.

This means that the public on the home front, while receiving high wartime wages, would be permitted to postpone part of their grocery bills until after the war, at which time the millions of our armed forces would be home and compelled to pay a part of our postponed grocery bills.

Our Men In The Service

OTHO KERAUS ADVANCED TO SERGEANT

Corporal Otho Keraus, who is on he fighting front in the mountains f Italy, has been promoted to the ank of Sergeant, according to his parents, Mr. and Mrs. W. C. Keraus of Klemme.

Sgt. Keraus is the veteran of a number of campaigns and has seen ction on both the African and the talian fronts.

Capt. Bowles Now In Italy

The editor received a V-mail etter from Capt. Glenn Bowles that made the trip from the mountains n Italy to Klemme in 13 days.

Capt. Bowles, former high school oach here, said he was trying to nake contact with Otho Keraus nd Milton Paul and stated he had hem located and hoped soon to have a "Klemme re-union."

MARINE GLENN LEWIS NOW AT SEATTLE, WASH.

Glenn V. Lewis, of the U. S. Marines, who recently returned from duty in the South Pacific, is now on the West Coast taking special training. His address follows:

Pvt. Glenn V. Lewis, U. S. M. C.,
Marine Detach., McKee Hall,
University of Washington,
Seattle 5, Washington.

W. S. C. S. MEMBERS HONORS

At the W. S. C. S. meeting held at the Methodist Church Thursday afternoon, Mrs. C. C. Kilgore and Mrs. T. C. Nelson, who are moving from the community, were presented with a gift.

The committee in charge served a St. Patrick's day lunch.

Both Mrs. Nelson and Mrs. Kilgore have been active in W. S. C. S. work.

FIRE DEPARTMENT CALLED TO BELLAMY FARM MONDAY

The Klemme fire department made a run to the Bellamy farm six miles east of Klemme Monday morning shortly after 7:00 o'clock.

An over-heated stove in the tenant house on the farm had caused a small blaze in the attic, but which was quickly brought under control by the fire department.

Firemen reported that damage was but slight.

COUNTY ROAD MEN ARE INJURED

Two Hancock county road maintenance men were rushed to hospitals Friday.

Lee Robbins of Goodell, fell from a truck while unloading lumber at the Britt shed and injured his back. He was rushed to a Belmond hospital.

Louis Knoke of Garner was taken to a Mason City hospital with a serverely injured foot, an injury that he received some time ago.

A large part of the anticipated 450 million pound increase in lard production this year is expected to be needed for making glycerine and soap.

Around Iowa

NOTED SIGNATURES

Attempting to obtain proper material for illustration of changes in style, spelling and punctuation to his composition classes at Simpson college, Dr. Harold F. Watson, head of the English department, purchased 100 letters from a New York City firm. Dr. Watson now has in his possession some letters and signatures of some notable and signatures of: Lord Byron; His Royal Highness, Edward, Duke of Kent, Queen Victoria's father; Henry Howard of Corby; Robert Walpole and Admiral Lord Hood. Dr. Watson belives the most interesting article is that of the poem of Lord Byron to the Hon. Mrs. George Lamb in what apears to be Byron's own handwriting.

TOO ORNERY FOR WORDS

Someone took the containers in two Tama county business concerns that had been put out to receive donations for a needy family. The money was to have been given to the William Yanda family who lost their trailer house and three young children in a fire in Marion recently. It is not known exactly how much was in the two containers but it is believed that the amount was approximately $18.

MISCELLANEOUS BOOTY

Thieves who boke into three Waverly business places in one night went to a lot of bother but took nothing of great value. In one place, they emptied a few cigar boxes, took some knives from a shelf and disposed of them outside the building. Another place entered was looted of 55¢ in change and the concern's invoices and business papers were scattered on the floor. The other business place reported 15 or 20 pennies taken.

MOVES BRIDGE

A 65 foot bridge recently was moved in Poweshiek county. It was estimated by county officials that if steel had been available it would have cost $6,000 to replace a worn-out bridge. However, since the steel was not available and the old bridge was, the county spent $1,000 to move a bridge originally costing $4,532. The bridge was moved a distance of about 400 feet.

DOUBLE ANNIVERSARY

The 40th double wedding anniversary of Mr. and Mrs. Fred Jossie of Coggon and Mr. and Mrs. Wallis Burnside of Central City, was celebrated on February 17. About 70 relatives were present to help in the celebration at the Burnside home. Mrs. Jossie and Mrs. Burnside are twin sisters. Each couple was presented with a purse of money as gifts of the guests.

IN WRONG PLACE

If anyone had been standing on the floor above the hot water boiler in the Aaron Main home in Grinnell, he would have found himself touching the ceiling when the boiler exploded recently. The floor above the boiler was torn up and some of the boards were sent through the ceiling. No fire resulted but considerable damage was done to the interior of the house.

GRANDPARENTS

Patty, the young daughter of A-C Robert J. Wilson, is well supplied with grandparents. She has one great, great grandfather, three great grandfathers, three great grandmothers, two grandfathers and two grandmothers. Robert's parents live in Independence.

MARCH FIRST WAS MRS. DRAKE'S BIRTHDAY

Wednesday, March 1st was Mrs. Margaret Drake's birthday anniversary and a dozen or more of her neighbors called on her to wish her many happy returns of the day. Lunch was served to the visitors.

Mrs. Drake also received twenty-eight birthday greetings cards.

WOODLOT WON'T PRODUCE LUMBER WELL IF GRAZED

Woodlots can't serve as a source of lumber and as a pasture at the same time and do both jobs very efficiently, asserts Eugene W. Fabes, assistant area forester at Iowa State College.

The damage from pasturing a woodlot comes from the cattle grazing on low hanging leaves and by destroying the young growth of seedlings.

Trees, like every other living organism, are constantly dying of old age. Under natural conditions this mortality amounts to about 5 percent that has to be replaced annualy.If young, potential trees are continuously grazed off, the ballance is thrown out of rhythm and the woodlot's life is materially lessened. Then, too, the best straight fine grained sawlogs come from thickly planted woodlots; such areas are difficult to maintain when pastured.

FILE FOR DIRECTORS

The Goodell Independent school election will be held Monday, Mar. 13th in the Community hall, opening at noon. Papers have been filed with Secretary Amos Hanson for re-election of Harvey Boller and Paul Halfpop as directors, and Omer Butts, treasurer.

Basketball Team Entertained To Steak Dinner Tuesday Night

Mr. and Mrs. Ed. Jacobs, Mr. and Mrs. Leo Esbeck, and Mr. and Mrs. Art Kudje entertained the high school basketball team to a six thirty o'clock steak dinner at the Kudje home Tuesday evening. The boys say it was "a grand, big feed."

Girl Scouts Had Birthday Party Tuesday Evening At School

A "Dues Paying Birthday Party" for the Girl Scouts was held at the school house Tuesday afternoon after school hours.

Elizabeth Goll and Peggy Coobs were in charge of the games after which a birthday cake and plenty of ice cream was served to the dozen members present.

The Girl Scout Assistant Leaders Mrs. J. A. Chambers were present.

NEED TO SPRAY PLUMS TO CONTROL BROWN ROT

Plum trees grown in Iowa require comparatively little pruning. But they do need spraying to control brown rot, the greatest drawback to producing good plums in this state, according to H. E. Nichols, extension horticulturist at Iowa State College.

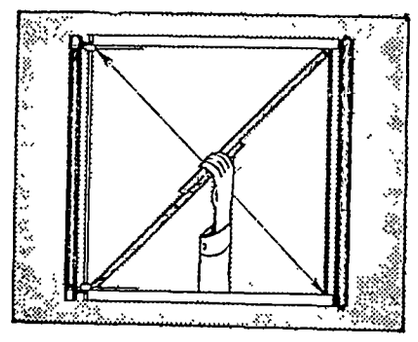
Waneta, a Hansen hybrid is the plum most commonly grown in Iowa. Other Hansen varieties common to the state are Kahinta, Hanska, Sapa, Opta and Toka. The Patten, developed by Iowa State College Experiment Station gives good results as does Terry. The latter variety is effective as a pollenizer.

Among the varieties developed by the Minnesota Agricultural Experiment Station are the Underwood, Superior, Pipestone, Red Coat and Minitor. Most of them are susceptible to brown rot but are suitable for growth in Iowa.

Three European varieties, Lombard, Green Gage and Blue Damson, give good results in southren Iowa only. Here the Stanley, new plum of the prune class, is also recommended for trail.

To really insure a good crop, a so-called pollenizer variety should be planted along with the others. Where varieties such as the Minnesota hybrids are planted, Nichols, suggests planting at least one tree of Kaga, Toka, or Terry.

Tips ON FARM MACHINERY



MEASURE DIAGONALS

Canvases on binders or combines climb and fray on the edges if the rollers on which they run are not parallel and square. Iowa State College agricultural engineers state that the squareness can be checked by measuring the diagonal distances each way. Two straight strips of wood may be used for this purpose, as shown in the illustration. The diagonal measurements should be equal.

LITTLE DANGER OF TOO MUCH DAIRY PRODUCTION

Dairymen of Iowa have the same assignment as other farmers: to produce the most needed foods in the greatest possible amounts; to use land, labor, livestock, machinery and other resources to the best of their ability. Arthur Porter, Iowa State College dairy husbandry specialist, points out that the biggest year in history is ahead for the dairymen throughout the United States.

The need for dairy products is beyond the limits of possible production. All fear of surplus is gone The strong demand for dairy products will last for the duration of the war and possibily for some time afterward. Porter says also that when the war stops, a demand for dairy cattle from the United States to countries where cow production has diminished seems almost certain.

The shortage of protein feed emphasizes the need for good pastures for plenty of legume hay and for careful attention to the quality of the hay put up. Dairymen with enough good, leafy legume hay for liberal feeding can use only home grown grains with it and not suffer too much from a lack of protein in the ration for ordinary producing cows.

The extension specialist recommends feeding the best hay to the cows that will show the greatest response, and rationing protein supplies on the farm by distributing high-protein feeds where they will do the most good.

Magician Runs Toy Shop To Train Army Bombardiers

A magician is running a toy shop of death here, turning out weird-looking contraptions to hasten defeat of the Axis.

His most important and impressive product is an apparatus about 15 feet long and four feet high, of plastic, metal and bright-colored wood, which looks like a cartoonist's idea of a perpetual motion machine.

No, this doesn't mean Uncle Sam has taken to Voodooism. It's a sane, sensible, scientific solution to technical problems encountered in the training of the most dangerous men in the world, army air forces bombardiers.

The "perpetual motion machine" is a giant model of the Norden bombsight. With this model, aviation cadets at this world's largest bombardier school can learn the intricacies of the sight far more rapidly and thoroughly than with a real sight, with its thousands of tiny parts.

Lieut. Joseph J. Chopp, a former professional magician, built the model and supervises a workshop in which this and similar devices are being produced for army air forces schools throughout the country.

Botulism Is Rated No. 1 Hazard in Home Canning

No. 1 hazard in home canning is botulism, fatal food poisoning caused by bacterial action, according to Dr. W. V. Cruess, professor of fruit technology.

At a recent state-wide conference on home food preservation he cautioned the people of the western states, especially newcomers, that extreme care must be exercised in canning meats and nonacid vegetables at home.

The bacillus, Clostridium botulinum, occurs in the soil and dust in all parts of the United States. The bacillus, when present on meat or nonacid vegetables, can withstand ordinary boiling but is killed in a short time by the higher temperature of the pressure canner, he stated. It is destroyed more readily in an acid environment, therefore fruits and tomatoes may be safely processed in the boiling water bath.

People may eat the bacteria on fresh vegetables without harm but its toxin is the most potent bacterial poison known. This toxin is produced when the bacillus grows without air in the environment of a can of inadequately processed meat or nonacid vegetables.

State Owns Finnish Utilities

All but 160 miles of Finland's 3,600 miles of railways are state owned. Public ownership also includes the 24,000 miles of telegraph lines, and most of the 118,000 miles of telephone lines. Airways link Finland with Estonia and with Sweden. Key road in the highway grid is the motor route linking Petsamo, northern port, with the south. A day's peacetime traffic count totaled 2,500 trucks, buses and motor cars. Winter temperatures pave the road with a tough upper crust that stands up to the pounding of truck traffic. Because of the Gulf Stream, Petsamo is ice free—a sea-door "spare" that can be used even though the Baltic ports should be closed by ice or enemy action.

National Holidays

Strictly speaking there are no national holidays although many of them, such as Christmas, New Year's day, Fourth of July, Labor day and Thanksgiving day, are nationally observed.

Such holidays have been designated as public holidays by both the federal government and all the state governments, but the federal government is without constitutional authority to enforce such an edict in the various states. All congressional acts fixing legal holidays have been limited to the District of Columbia, federal territories and federal government offices. Otherwise holidays are established by separate state legislation.

Cassie Chadwick

Cassie Chadwick, born Elizabeth Bigley in Eastwood, Ont., in 1857, for a time practiced clairvoyance, but soon turned to forgery and was first arrested and tried at the age of 16. Of little education, plain, and decidedly "queer," she nevertheless was able to dupe otherwise sensible business men into believing she was a kind of ward of Andrew Carnegie and secure unlimited credit on documents forged with his name. She was finally exposed when a small bank failed because it had loaned her so much money, was tried and convicted in 1905. Sentenced to 10 years in prison, Mrs. Chadwick died after serving only three.

Yanks Set Good Example

The United States army has captured the Australian soldier's imagination with its ceremonial customs, and this has led to a revival at several large Australian army bases of customs followed by the British army for centuries. An instance is the recent ordering of the ceremonial hoisting and lowering of the colors at sunrise and sunset in the Darwin area.

Every unit in the area hoists its flag at the mounting of the guard (sunrise) and lowers it at retreat (sunset). Revival of this traditional procedure is the answer to Britain's recent restoration of the "spit and polish" tradition.

Slender Hands Unnecessary For Fine Work, Army Says

The old idea that long, slender hands are necessarily the "finest" type, capable of doing the most delicate work, is "simply a lot of bunk," according to the flight surgeon of the world's largest bombardier school.

Basis for his statement is the examination, during the first year of operations at this huge home of the "Hell From Heaven Men," of thousands of bombardier cadets.

Because his is a job requiring split second accuracy, perfect timing and complete precision, the bombardier must have hands capable of work as delicate as that of a watchmaker, as deft as those of the finest artist. With his hands the bombardier must manipulate the complex mechanism of the famous U. S. bombsight in the few short seconds that his bombing plane is "on course," with the target reflected on the cross-hairs of the eyepiece. He must do this without a quiver or a tremor. In actual combat, he must keep steady in spite of enemy anti-aircraft fire, in spite of attacking enemy fighter planes. The action of his hands must be quick, skillful and certain.

"The idea that long, slender hands are the more skillful is based entirely on appearances, not on results," the flight surgeon at this bombardier school declared. "Here at this training center for Uncle Sam's bombardiers, where students must prove themselves not only proficient, but actually better than average, we have discovered through constant research that bombardier's hands run to all sizes and shapes, and that the physical proportions of hands have little, if anything, to do with their efficiency."

Army Mess Officer Plans To Get Most From Food

Housewives could take a lesson in making the most of their rations from an army mess officer. A mess officer's tricks to make a little go a long way are innumerable. For instance, bones are boiled three days to get a stock from which very tasty gravy and seasoning for soups and vegetables can be made.

When canned goods are used, the cans are placed in boiling water to be taken out and opened as used. This way, not an extra can is used. Fresh vegetables are used except in the case of corn and peas.

All excess fat is trimmed and rendered to be used as cooking fats and for frying. Even the lower part of a chicken's legs and the upper part of its neck are used. They are put in with the bones to boil. A very large part of the bone boils down to a very rich broth. A little of this rich broth goes a long way as a substitute for meat.

Now and then, soldiers receive a steak for their dinner. This is due to careful management by the post meat cutters. The army doesn't purchase any particular cuts of meat, they acquire the whole carcass. The plate (breast part) and shanks are used in braised beef. Chuck is used for meat balls, to go with spaghetti, and for meat loaf. And of course the better cuts are used in the standard manner.

Starts Oil Flowing

To start oil flowing from a well in hard, dense formations usually necessitates a shot of nitroglycerin or some other explosive. Charges of this chemical varying from 5 to 1,000 quarts are lowered into the well and set off by a time bomb or small charge of dynamite. When the nitroglycerin goes off, it loosens up the formation at the bottom of the well, and promotes a more rapid flow of oil.

If the flow of an old well in a limestone area slows down, a chemical—muriatic acid—is pumped into the formation. It increases the porosity of the limestone, and the oil runs out more freely.

Reflect Light

The two terms, fluorescent and phosphorescent, both of which are descriptive of types of luminous coatings which are being used in increasing volume in meeting war needs, are sometimes confused. It is pointed out that both terms represent the ability of certain substances to transform some form of invisible energy into visible light. The results are indistinguishable to the eye, but beween them there is one important difference. "Fluorescence" lasts only while the exciting energy source or ultra-violet "black light" is present; "phosphoresence" continues after the light has been removed.

New Uses for Old Drapes

Launder and save the upper parts of window draperies that have worn out at the bottom. There is often enough good material left from a pair of draperies, to make a jumper dress for a little girl or trousers for a boy, depending upon the type of fabric. If not suitable for apparel, the well-washed fabric can be used for pillow coverings, table runners, or other household decorations.

Keep Properties Up

"Paint is one of the essentials for keeping properties in a sound and livable condition," says the Federal Housing administration. FHA officials point out that one of the important ways for home owners to guard against undue deterioration of properties is by seeing that necessary painting jobs are not neglected.

HANCOCK COUNTY REAL ESTATE TRANSFERS

Carl C. Knudsen and Anna to Bert Heimendinger. Wty Deed 2-3-44, $1.00. North 40 ft. of lots 1, 2, 3 and 4 and all of lot 5 in block 11 Britt, and strip of land 6' 8" north and south by 110 east and west lying immediately north of and abutting said lots.

MADISON BOYS DEMONSTRATE TREATING CATTLE FOR GRUB AT THEIR MONTHLY MEETING

The Madison 4-H boys met at the home of Donald Shulz on February 24. John Haugland and Eldon Willis demonstrated treating cattle to control cattle grub. Paul Henderson, County Extension Director assisted in planning a program for the remainder of the year and discussed projects. The next meeting is planned for March 23 at the Hutson home.

Place your order early for chicks.

Potatoes boiled in their jackets take top honors for nutrition Prepared in this way they contain twice as much vitamin C and three times as much B-1, or thiamin, as baked potatoes.

Recent tests in the seed laboratory of Iowa State College shows some soybean seed is not testing as well as its appearance would indicate If much low quality soybean seed is planted, Iowa's 1944 crop may fail to meet expectations.

Iowa has 1,100 sawmills. During 1943 they averaged about 5 million board feet of lumber sawed per month If every mill in the state could be run at full capacity, the output could be stepped up to 85 million board feet per month.

On July 1 of this year nearly 1 million pounds of vegetable seeds and 2½ million pounds of field seed had been contributed voluntarily to the Russian war relief agency. Gratitude has been expressed by the Russian National Commissar for Agriculture for this contribution.

A series of notches cut in a short piece of lumber will allow support for coldframe or hotbed sash at the height that will give the desired ventilation as the weather changes.

Iowa hens laid 40 percent more eggs in January this year than during the same month in 1943.

Waxy hybrid corn is being contracted this year at a price 12 percent over that of ordinary corn.

Try seasoned, sliced, cooked potatoes in cream as a filling for an omelet.

WEEKLY NEWS ANALYSIS

American Fleet, Planes Strike Truk, Major Japanese Naval Base in Pacific; Tighten Deferment of Farm Workers; Allies, Nazis Trade Blows at Anzio

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union.

Italy—The Nazis are throwing everything but the kitchen sink at the Allies in Italy. At left, Pvt. Edward Gazler, Michigan City, Ind., is shown with concrete ball that the Germans roll down hills at Allied troops, and, at right, is big U. S. tank crippled by heavy enemy gun-fire.

PACIFIC:
Strike Westward

Two years and two months after the Japs' assault on Pearl Harbor, U. S. air and sea forces struck back at the enemy's own big Pacific base of Truk in the Caroline islands, central hub of Jap naval operations for their extended empire reaching into the Philippines and Indies.

Preceding the attack on Truk by several hundred planes operating from carriers shielded by a strong armada of battleships, cruisers and destroyers, long-range Liberator bombers plastered the other big Jap bastion of Ponape in the Carolines.

Centrally located in Japan's Pacific empire, both Truk and Ponape serve as a radiating point for enemy naval and air forces to operate against an attacking force while close to home stations. Loss of the Carolines to the Japs would mean loss of their advantage of operating close to defensive bases, and, vice versa, give the Allies the advantage.

As the Liberators took to their wings to plaster the Carolines, U. S. ground forces were putting the finishing touches to fighting in the Marshalls where small islet garrisons were being rooted out, and in the Solomons, where Allied landings to the north trapped 22,000 Japs holding out on Bougainville, Buka and Choiseul.

FARM WORKERS:
Draft Shakeup

Only those farmers who can produce 16 war units a year will be eligible for agricultural deferment, and the 700,000 farmers now in 3-C for dependency as well as occupational reasons, also will be reclassified and put into 2-C only if their work is essential.

More than 1,000,000 farmers are in 2-C, of which 400,000 are said to be single and under 22 years of age. With the 700,000 presently in 3-C, 1,700,000 farmers considered essential will be put into 2-C and given six-month deferments, with their cases again reopened at the end of that time.

Action on farm workers' cases followed general tightening up of draft regulations in the face of military demands for about 1,000,000 more men by July 1, with city dads no longer deferrable for dependencies and industrial deferments subject to stricter standards.

RUSSIA:
Finns Talk Peace

Russian troops made further gains along the Estonian border on the north end of the 800 mile eastern front, while reports indicated that the Finns were sounding out Moscow for peace terms.

As the Russ continued to chew into Nazi defenses below Leningrad, the Germans fell back to avoid encirclement from the rear, and each step backward found them closer to Estonia and the other Baltic states of Latvia and Lithuania.

Russo-Finnish peace reportedly hung on terms Moscow might offer, with the Finns receptive to proposals based on the 1940 border, but opposed to occupation of their military and naval strongholds by the Reds.

With the Russ again in possession of much of the mining region of the southern Ukraine, Finland remained one of the last sources of nickel for the Germans, and Hitler reportedly sought to prevent Finland's desertion of the Axis to protect these deposits.

EUROPE:
Beachhead Battle

With the sea at their backs, U. S. and British troops traded heavy blows with the Germans on the Anzio beachhead below Rome, as the big battle for the Eternal City raged.

While other Allied troops crawled forward up rugged mountain slopes about Cassino, the forces at Anzio fought with tanks on leveler terrain, countering the full weight of the enemy's famed panzer units.

In assaulting the beachhead, the Germans concentrated on the northern sector, 10 miles above the port of Anzio, through which supplies were streaming to Allied forces. With the area under fire of enemy artillery and bombers, Allied troops fought hard to keep the port open.

Bloody fighting continued on the Cassino front, with doughboys taking one by one concrete houses made into fortified pillboxes by the Germans, and other Yanks struggling up monastery hill to gain command over Nazi positions and the supply road leading to Rome, which lay below.

CONGRESS:
Ban Subsidies

With congress voting against continuance of subsidy payments to reduce retail prices of meat, butter, milk and other food items, GOP house members served notice that if the President vetoed the bill they would attempt to make it part of the measure to extend price control after June 30, thus forcing the President to accept it or kill his whole anti-inflation program.

To assure continued existence of the Commodity Credit corporation in the event of a presidential veto of the subsidy clause, congress wrote in an emergency provision extending its life until permanent legislation could be passed.

In voting against consumer subsidies, congressional foes of such payments said they could only save the average family about 11 cents a day, during a time when national income was at an all-time level. Advocates of subsidies, however, said abolition of such payments would bring about a 7 per cent increase in the price of the foods affected, and a 3 per cent rise in the general cost of living, leading to a clamor for higher wages.

Bucks Labor Draft

While congress was voting down consumer food subsidies, AFL President William Green told a senate military committee holding hearings on the Austin - Wadsworth labor draft that wage stabilization in the face of increasing living costs was the principal cause of strikes.

Sen. Austin

Said Green: "The way to prevent strikes is through upward revision of wage rates, or even more effectively, by rigid reduction and control of prices of the necessities of life."

While Senator Austin (Vt.) contended that a labor draft would reduce turnover in war plants and allow the War Manpower commission tighter control over job placements, Green said the act would amount to involuntary servitude, since civilian workers would have to take jobs in plants operating at private profit.

HIGHLIGHTS . . . *in the week's news*

HICCUPS: A 21-year-old New York city girl, hiccuping for 44 days, appealed to the President to obtain a furlough for her physician, who is a captain in the army. She said that the doctor saved her life two years ago by a delicate operation when she was suffering from another prolonged attack of hiccups. The President granted a leave for the officer to treat her.

CENTENARIAN: George W. Camerer, a veteran of the Civil war, who now lives in Jerseyville, Ill., has just reached his 100th birthday. He said he "wouldn't mind joining the army and going to Africa if his feet would hold up." He has 10 grandsons, two great grandsons, and a granddaughter serving in the armed forces in the present World War II.

WAR COSTS:
Cut by Army

Because of industry's speed in developing production efficiency, and also because of the army's insistence that savings be reflected in reduced prices, costs of military goods have been cut by 20 per cent since 1941, Brig. Gen. Albert J. Browning, director of purchases, declared.

In all, savings have amounted to about $9,000,000,000, and an additional $4,700,000,000 will be saved in the first half of 1944, General Browning said.

Because the army has worked for lower costs through price analysts in the purchasing departments, better ways have been found to produce goods more efficiently and with less material to assure profit margins, General Browning said. In cases where costs were not trimmed there was no incentive on the part of management to cut prices, the general revealed.

GOP Candidate

A 76-year-old Los Angeles, Calif., housemaid has filed formal declaration of intention to become a candidate for the Republican presidential nomination. Though she has never held political office, she said: "I want to see the President's job better done, and I can do it better."

FUEL:
Gas From Coal

With government officials warning of only a 14-year U. S. oil reserve at the present rate of consumption, Rep. Jennings Randolph (W. Va.) introduced a bill which the house speedily passed, calling for an expenditure of $30,000,000 on the construction of experimental fuel plants to obtain gas from coal, oil, shale and agricultural and forest products.

The U. S. bureau of mines' laboratory at Pittsburgh, Pa., already has developed oil from coal through a chemical process utilizing hydrogen, but costs have amounted to 16 cents a gallon, compared with costs of only 5 cents for getting fuel from oil.

Whereas U. S. oil reserves have been estimated as sufficient for 14 years, the bureau of mines said U. S. coal resources could furnish material for gas for 3,000 years.

Ask Foreign Sources

America's Allies should reciprocate for our heavy drain upon domestic oil resources for providing petroleum for the Allied war machine by transferring a corresponding volume of proven reserves from their fields to the U. S. after the war, the Truman investigating committee declared.

Sen. Truman

Although the committee, headed by Senator Harry Truman (Mo.) said the development of foreign petroleum fields should be left to private interests, it recommended that U. S. diplomacy be directed toward supporting such a program.

Bombing's Big Job

Nearly 60,000 men were in on the RAF's record 2,800 ton bombing raid on smouldering Berlin, which matched the shattering aerial blow at Hamburg, September 22, 1943.

Of the 60,000 men, 7,000 were flying personnel. About 4,000 men were required to load the planes with bombs.

The 1,000 planes used 1,000,000 gallons of gas and thousands of gallons of oil. Machine guns on the planes were loaded with 750,000 rounds of ammunition.

About 43 planes were lost on the mission, the 15th heavy assault on the German capital.

ARGENTINA:
Political Battleground

Having broken diplomatic relations with the Axis, President Pedro Ramirez of Argentina moved slowly before declaring war on Germany and Japan, since the country's military caste opposed such action.

Hints that Ramirez' foreign minister was considering a declaration of war against the Axis inflamed the military caste, known as the "Colonels' Lodge," and forced the president to dismiss his foreign chief and reorganize his cabinet to hold the different elements together.

As Argentina's internal situation boiled, pro-Ally General Arturo Rawson, who led the revolt against pro-Axis President Castillo last June, watched developments from Brazil, where he was reported under surveillance of Argentine agents for expressing strong pro-Ally sympathies, in opposition to Ramirez' policy of strict nationalism.

SCHOOLS

If a choice must be made, the country child should receive a better education than the city child, because his future is more vital to the national life, Dr. Floyd Reeves of the University of Chicago told delegates to the Great Lakes Conference on Rural Education.

Dr. Reeves pointed out that migration from rural areas with high birth rates to cities with low birth rates maintains the population of the big centers. Cities would dwindle and die without this migration.

Washington, D. C.

ARMY WIVES AND PROMOTIONS

The extent to which army wives influence promotions, dictate military expediency and dominate the army always has been a matter of warm debate at army posts.

Inside the war department, there are two schools of thought. One admits there is a certain amount of petticoat influence; the other maintains that the army is a man's army and that women have absolutely nothing to do with it.

Those of the former school point to the fact that Gen. John Pershing, when only a captain, married the daughter of Senator Francis Warren of Wyoming, then chairman of the senate military affairs committee, after which Pershing was jumped in rank and became a brigadier general. Then, when Woodrow Wilson faced senate controversy over who should head an American Expeditionary force to France, with many senators demanding Teddy Roosevelt, Wilson selected Senator Warren's son-in-law and thus quashed senate controversy.

The petticoat school also points to the fact that Gen. Douglas MacArthur first married the beautiful daughter of Edward T. Stotesbury, a J. P. Morgan partner, who requested Secretary of War Weeks to advance MacArthur to the rank of major general when most of his West Point classmates were still majors and colonels.

Another example is Mrs. George Patton Jr., wife of the pistol-packin' general. Her coolness, poise and charm helped her hot-tempered husband out of a good many peacetime scrapes long before his unfortunate encounter with a sick soldier in Sicily.

In the other school are those who point to a host of high-ranking generals whose wives have had no political influence on their careers. General Marshall's first wife aspired to be an opera singer, was sick for a long time, finally died. General Eisenhower's wife is an unassuming lady who has kept in the background. General Somervell, until recently, was a widower.

'Warning' to Fliers' Wives.

Now, however, comes a new argufier in this controversy. General "Hap" Arnold, chief of the army air forces, has been put squarely on record by Col. Alfred L. Jewett, commander of the air forces technical school at Gulfport, Miss., as recognizing that wives influence an officer's promotion.

Colonel Jewett himself doesn't make any bones about it. He says that an air force officer's "efficiency report" is affected by "activities by his wife." The "activities" in this case refers to joining the Gulfport Field Women's club. Colonel Jewett last month sent out a circular letter to all officers under him, virtually ordering their wives to join the club.

He even went so far as to warn that, "in the event that any officers' wives do not wish to belong, it is desired that their husbands so state in a letter to the commanding officer, such letter to be submitted prior to the fifth of the month following the date the officer reported to the station for duty."

And then, apparently afraid that his subordinates might not take the hint in the none-too-subtle warning, Colonel Jewett laid it right on the line by invoking the authority of General Arnold.

"Active participation in the work of the Women's club is a matter in which higher authority, including the chief of the air forces, is vitally interested," warned Colonel Jewett bluntly. "And every officer in the air forces may expect to find his efficiency report affected by the manner of participation in these activities by his wife."

So there it is in black and white.

* * *

CLEANLINESS NEXT TO GODLINESS

Take it from Lieut. Col. Jimmy Roosevelt, the President's son, the first thing a fighting man thinks about after a hard battle is a bath. Jimmy, who distinguished himself with the marines in the South Pacific, was recently telling friends about some of his war experiences.

"We had a pretty tough time of it on Guadalcanal, as everybody knows," Jimmy related. "After one of the first hard battles was over, some of us were taken aboard a navy ship. The first thing they offered us was a square meal. But we weren't hungry. We had managed very well on our K rations. What we all wanted was a bath. But I guess the soap and water sharpened up our appetites, for we just about cleaned out the ship's larder afterwards."

* * *

CAPITAL CHAFF

¶ AMG (Allied Military Government) is facing a tough problem regarding 300,000 tons of oranges and 300,000 tons of lemons waiting to be picked in Sicily and southern Italy. The fruit is ripe, but men can't be spared from the front to pick it. Meanwhile, we are forced to ship some dried citrus into Italy.

¶ American Zionists point out that Palestine has contributed more to the war effort than any other country in the Near East, including the manufacture of land mines.

The Grand Central Deppo, where the number of people who pass through it in one year approximates the population of the nation . . . The Sixth Avenue subway—five stories down . . . The main building at New York University—built of stones cut by convicts at Sing Sing . . . MacDougal Alley in Greenwich Village—a privately owned street—lit by gas lamps . . . The residential belt (between 8th and 10th) from the 20s through to the 50s—the rotting core of the town's shameful slums.

The Greenwich Village delicatessen with a sensayuma. Its sign reads: "Our pickles are dill-icious" . . . The Chinese laundryman on 181st Street with the sassiest name of all: "Tip Want" . . . The elegant doorman of a midtown night club, who softly says to passersby: "Good evening. Seen our show lately?" . . . The high-toned Madison Avenue grocery which features fancy dog food with "Sniff Appeal" . . . The closed employment agency — because it couldn't get any help . . . The 55th Street eatery which burlesks restaurants that name sandwiches after celebs. It names sandwiches after chorines who dine there . . . The coffee joynt on Lexington in the 50s where the latest headline (in cinnamon print) comes with your rice pudding.

Gay 90s Stuff: The beer truck, rumbling along 6th Avenue—pulled by horses—the drivers with long mustachios . . . The weary, worn-out women sign-carriers—advertising the beauty they probably had . . . The pet shop with the sign that doesn't mean what it says: "Free French Poodles" . . . The pretty barmaids at the Waldorf . . . The tugboat chugging up the East River at dawn with its anonymous cargo of unclaimed dead. On the way to burial in Potter's Field . . . The down and outers (many are counterfeits) whose beat is Broadway, where they become "famed" as characters. If they were down on the Bowery—they'd be ignored . . . The haunting stillness of Fifth Avenue (or Broadway) on a Sunday morning.

That husky guy who startles you in front of the swanky Pierre Hotel with a request for the price of a meal. With the want ads screaming for men . . . The Lighthouse for The Blind (on 59th) where the pavement in front has imbedded iron bars—to guide the tapping canes . . . The bowling alleys in the midtown arena—where you can't always get an alley to play in—around 4 in the morning . . . The colyum's influence on an East 59th Street stationery store's sign: "Are you keeping up with your letterature?" . . . The nifty canteen for servicemen in Chinatown—which has entertained American-born Japanese soldiers.

The wisecracking panhandler who asks you to stake him to a nickel until he gets his checkbook outta hock . . . Midtown's gaudiest block —50th between Radio City and Broadway—where nearly everything is a hawker's hole-in-the-wall . . . The powerful-appearing Soviet sailors—never before permitted to wear their uniforms on shore leave here until a few months ago . . . The charming cafe in the Museum of Modern Art garden . . . The melodrama and misery in The Family Court on E. 57th St.—if you think you have troubles.

The understanding policemen who turn the other way when they come across embracing couples (usually servicemen and their dates) in darkened doorways of midtown shops . . . The 48th Street spaghetti place where the headwaiter is a midget . . . The Western Union "boy" in the Radio City district—a woman of about 70. And she knows her war news, if you get her started . . . The blind man who peddles pencils on 34th Street. Wears a swallowtail coat to his ankles, knee pants and a straw skimmer.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for March 12

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS BETRAYED, DENIED AND CONDEMNED

LESSON TEXT: Mark 14:10, 11, 53, 54, 66-72; 15:12-15.

GOLDEN TEXT: He is despised and rejected of men; a man of sorrows, and acquainted with grief.—Isaiah 53:3.

The time had come! Jesus was about to be condemned and crucified; and though sinful men thought thus to rid themselves of the One who had pierced their hypocrisy and unveiled their unrighteousness, His death was, in the providence of God, the giving of Himself for our sins.

What He endured as He went to the cross is enough to break one's heart, for here we see the denial, betrayal and compromise of men.

I. Christ Sold for Money (14:10, 11).

When one sees the awful things which have been done and are being done for money in this world, it becomes clear why the Bible repeatedly calls it "filthy lucre."

"Money! How many awful things have been done for money. How many dishonest officials have secured high places in government by money! How many people have lost their lifesavings because some shrewd, crooked broker schemed to take their money away, because he wanted it. How many millions of people have been kept in poverty because men cared more to increase their wealth than they did to relieve the distress of those who worked for them . . . Money is what keeps the dance halls going; a lust for money is what keeps our breweries and distilleries open; it is money that makes men want to produce lascivious plays and motion pictures" (W. M. Smith).

Fundamentally, it was the love of money that made Judas betray his Lord. "What will ye give me?" was his question (Matt. 26:15).

But money is not the only price with which men may be paid. We find next—

II. Christ Deserted for Comfort (14:53, 54).

Peter would not have risen to the suggestion that he sell his Lord for money, so Satan was too smart to stir his loyalty by such a suggestion. He used another method with Peter.

Things had become very difficult for our Lord. He was led away to be falsely accused and subjected to persecution. It was no longer comfortable to be at His side, as it had been when He fed the multitude and healed the sick, and silenced His enemies.

This was cold unpleasant business. Why should Peter get mixed up in it? After all he could just as well keep a safe distance, and besides it was warm at the fire. Oh, yes, the enemies of the Lord had kindled it and stood around it, but that didn't need to make Peter an enemy of His—or did it?

How many Christians who would meet with hasty and courageous denial the suggestion that they sell their Lord, have betrayed Him by warming themselves at the fires of this world.

III. Christ Denied for Fear (14: 66-72).

Peter, the staunch defender of our Lord, who had assured Him that no matter how cowardly the others might be, he would stand fast (Mark 14:29), now quails before a servant maid. He curses and swears to try to strengthen his words of denial.

What had happened to Peter? He had become so at home by the fire of the enemies of his Master that he was afraid to confess his relationship to Him. He had followed so far off that He had lost touch with the Lord, and was again like the Peter who on another day looked away from the Master's face and feared the boisterous waves (Matt. 14:30).

Peter was afraid, and he denied his Lord. How many there are who are like him. They tremble before an unbelieving world, and fearing the scoffing of poor, weak, sinful men, they deny their Lord.

It is time that Christian people took courage and stood up for the Lord in all times and circumstances.

IV. Christ Condemned for Convenience (15:12-15).

Pilate found no fault in Christ. He had no desire to condemn Him. He wanted to set Him free. But it proved to be politically inexpedient. To stand by his convictions concerning this innocent person would have greatly inconvenienced him in many ways. So "wishing to content the multitude" he delivered Jesus to be scourged and crucified.

Men and women today are willing to condemn Christ anew because to submit to Him and bear His name would require of them a sacrificial living which they are not willing to give. So they pass Him by, and go on to a Christless eternity.

It costs something to follow Jesus—to stand true to Him in a rejecting world. One wonders at times whether this is not one reason why God does not send a revival to the Church. We are probably not willing to bear the inconvenience. It would upset our regular order of life.

New Revolution Stirs China as Farmers Learn Modern Methods From U. S. Expert

Primitive Tools, Hand Cultivation Limit Yield of Tiny Plots

By BARROW LYONS
Western Newspaper Union Correspondent

Probably no man has planned practical farming on so vast a scale as Dr. Walter C. Lowdermilk, assistant chief of the U. S. soil conservation service, who has just returned from a year in China.

His plans envisage revolutionizing the agriculture of Chinese provinces the size of several states; of freeing several hundred millions of farmers from the soil so that they can build new industries for China; of seeding 30,000,000 acres of eroded hillsides with grasses, legumes and hardy trees; of educating the masses away from the farming traditions of many centuries through demonstrations of what can be done.

Dr. Lowdermilk has a record of solid achievement behind him. With other experts of our Soil Conservation service, he has helped American farmers increase the yields of their own fields. The average increased yield in the last 10 years in this country, due to soil and water conservation has been about 20 per cent, in some cases running up to 300 per cent. It was this realistic demonstration which led the Chinese to borrow him for a year.

FARMERS WATCH a demonstration in American agricultural methods in Hwang Lung Shan region of Shensi province. At first skeptical, they became interested when larger harvests proved superiority of Yankee ways.

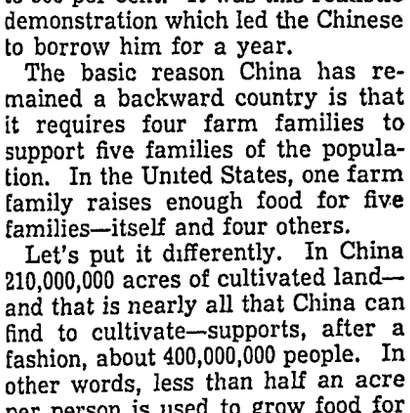
The basic reason China has remained a backward country is that it requires four farm families to support five families of the population. In the United States, one farm family raises enough food for five families—itself and four others.

Let's put it differently. In China 210,000,000 acres of cultivated land—and that is nearly all that China can find to cultivate—supports, after a fashion, about 400,000,000 people. In other words, less than half an acre per person is used to grow food for the Chinese. In the United States, 365,000,000 acres of cultivated land are used to support 133,000,000 people—about 5½ acres per person, or 11 times as much land per person for food as in China.

Freeing Workers for Factories.

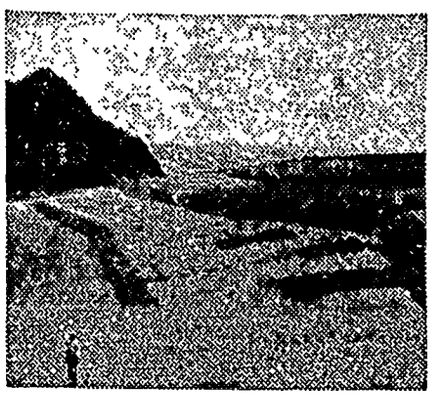
Better use of China's land for farming would free millions for other pursuits. China must industrialize. China can do so by freeing men and women from growing food.

When Dr. Lowdermilk went to China, the Chinese government gave him a staff of eight agricultural experts. For several months he taught them from field manuals in soils, agronomy, irrigation engineering, forestry, hydraulic engineering and farm economics, the methods by which the United States in recent years has made gains in soil conservation and productivity. Then they went out into the land and got to work.



WITH A BENT STICK for a plow, and two donkeys for power, this man turns the silty soil near Tienschui in southern Kansu province.

One of their first surveys looked toward improving irrigation along the banks of the Peng river where it runs through fertile plains between high hills in Penghsien. The unit of land measurement in China is the "mow"—about one-sixth of an acre. About 2,000,000 mow on the outwash plain along the river is fertile with plenty of available water. The Peng river is diverted to this land by irrigation ditches of carefully laid stones without cement or other binding. The spring floods generally wash out many of the stones and wreck the diversion works, so that, on the average, only one-third of the area can count on a water supply each year.



TERRACED SLOPES, built with much painful labor, are being ruined by erosion, as gulleys cut through the steep lands. This scene is in the province of Shensi. Dr. Lowdermilk is standing in the foreground, making a survey.

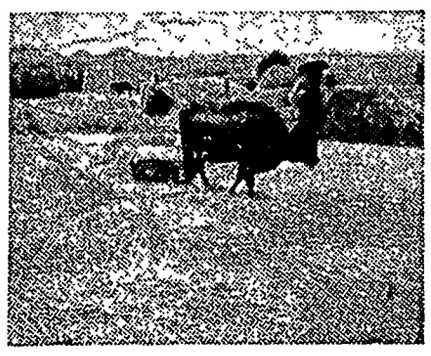
Another 2,000,000 mow on the sides of the lower mountains consist of steep slopes, some of them 80 per cent slopes, which are cultivated, but suffering rapid soil erosion. About 3,000,000 mow are too high for agriculture, but are capable of growing forests, if properly cared for, and now produce abundant water supply.

Concrete Highway Needed.

The farmers have cleared the intermediate slopes and are raising meager crops upon them. These slopes can be used for growing grass upon which sheep can pasture. But there is at present no means of marketing the sheep from the lower hills, or lumber from the higher hills. Concrete highways will be the answer.

But in handling the land surface the lessons learned from the Tennessee Valley experiment point the way to reclamation. Penghsien is to be a model guinea pig county for China. Dr. Lowdermilk and his experts laid the foundations for a vast demonstration of replacing loose stone diversion ditches with cement channels and making over the face of the valley so that its crops will never fail.

Near Sian, in the Province of Shensi, an actual demonstration was begun. Bench terracing that would conserve both soil and moisture was put in with improvised plows and tools; grass was planted along the ridges and crests to stop erosion; nut and fruit trees were planted on steeper slopes seeded with grass. Over an area of some 10,000 mow the yield was increased between May and October, and erosion was virtually stopped.



A BULLOCK DRAGGING a stone roller is the threshing machine for these people in Shensi.

Chinese farmers from miles around watched at first with deep skepticism—but in the fall, when the crops were gathered, they came to praise—even to ask that similar work be done on their own farms.

Three-Acre Farms.

One of the great handicaps to modern farming in China lies in the fact that farms are all small. The average farm in most of China is about 3.3 acres. In the Northwest the farms are larger—about five acres each. This means that modern machinery cannot be used economically unless villages can pool their land, and farm cooperatively.

This is the pattern that is being advocated by the Chinese government, and is beginning to find acceptance. As the tremendously increased efficiency and profit of the use of modern machinery become evident, there is no doubt that this type of farming will spread as rapidly as machinery can be obtained. (Farm machinery manufacturers take note.)

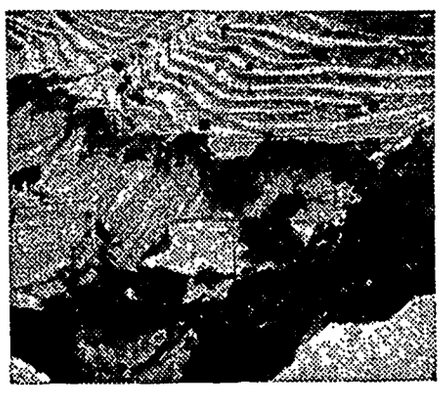
But there, resistance arises from the intense individuality of the Chinese farmers. He is even more independent and individualistic than the American farmer. He likes to work his little farm by himself without even hired labor, in most cases. When farmers try to work together, they generally get to quarreling, he feels. He is likely not to like the way his neighbor does things.

Just the same, when he sees the village next to his, which has adopted the new ways of farming, prospering as he never thought possible, he is moved to giving consideration to the advantage of cooperative action. Then, too, he has heard of the strange things that are happening in the cities, where cooperative industries have sprung up to make implements of war for Chiang Kai-shek's armies. And when he thinks about it for a while, cooperation becomes worth trying, although at first the hazards seem extreme.

'Bombing' With Grass Seed.

Perhaps the most spectacular of the plans developed by Dr. Lowdermilk and his experts is the project for reclaiming almost a third of China, which has been ruined for cultivation by deforestation and erosion. These intrepid pioneers propose that after the war, when airplanes and pilots become available, this land be seeded with clay pellets which contain the seeds of grass and leguminous herbs and hardy trees.

After the war the Chinese hope to drop millions of seeds upon the washed out slopes of China when they are damp and soft after rains, so that the pellets will sink in and stick, and the seeds will grow. The chief difficulty will be to obtain enough seeds. In one year the United States Soil Conservation service managed to get 800,000 pounds of grass seed for soil reclamation in this country; but much more will be needed, if the job is to be done quickly in China.



ANOTHER VIEW of terraced land from a greater distance shows the character of this type of cultivation. As much of China is hilly, this method must be used.

Cattle and Sheep Land.

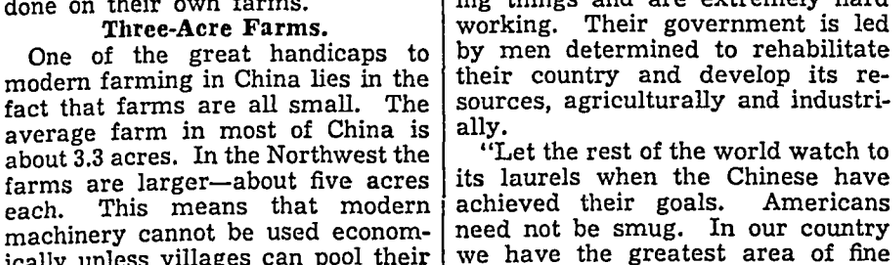
Beyond the Great Wall of China, built to keep out the nomad tribes that wandered over the great grassy areas of the west and north, still other food possibilities are open for the Chinese. Here they can raise blooded cattle and sheep for beef and mutton in great quantities.

So the program shapes up like this: 1. soil conservation through bench terracing and the planting of grass; 2. fruit and nut trees for the steeper slopes that should not be farmed with grain or row crops; 3. better irrigation; 4. reforestation of the mountains and development of water power; 5. improvement in fertilizers; 6. cooperative farming, which makes possible the introduction of modern machinery; 7. cement highways to make possible the exchange of products; 8. reclamation of eroded lands with soil saving dams and revegitation; and 9. beef raising for the grassy plains and sheep for the hillsides.

"I have utmost faith that the Chinese will do these things and solve their own problems," said Dr. Lowdermilk. "They are the best farmers in the world, in the sense that they understand the nature of growing things and are extremely hard working. Their government is led by men determined to rehabilitate their country and develop its resources, agriculturally and industrially.

"Let the rest of the world watch to its laurels when the Chinese have achieved their goals. Americans need not be smug. In our country we have the greatest area of fine farm land that exists on the face of the earth—not even excepting the rich farm lands of the Ukraine. If we believe that no other nation is envious of this richest of all heritages, we are living in blissful ignorance.

"It would be easy for us to take out of cultivation the poorest of our farm lands and still support a population of 300,000,000 from the best of our farms. Some day we shall need that many people to defend our shores from young, strong nations envious of our wealth. That is a thought for our farmers and business men and industrial workers to think about. It is also worth making the Chinese our allies."

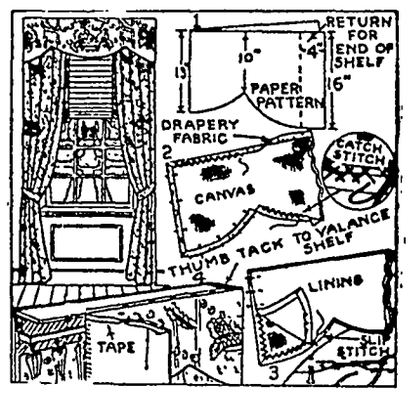


REFUGEES RETURN to their home city, Changteh, Hunan province, in the heart of the "rice bowl" section of China. Japanese troops were driven out after bitter fighting on December 9, last year, after holding it about a week.

The city of Changteh is especially important because through it great quantities of rice move annually. Freeing of these "rice bowl" cities is one of the most important tasks in the grave problem of feeding the great Oriental nation in wartime.

Typical Window of Eighteenth Century

WE KNOW that the Eighteenth Century is often called the golden age of the cabinet makers. We know that the English cabinet makers, Chippendale, Hepplewhite, Sheraton and the Adam brothers, flourished then and that their work was copied by our own cabinet makers of the late Colonial period. The furniture types of their day have become standard with us but we seldom stop to think about the kind of curtains and draperies that were originally used with this furniture.



Visitors to the reconstructed village of Williamsburg, Va., are often surprised to find that Venetian blinds were the fashion long before the Revolution, and the well tailored canvas lined valance used with floor length chintz draperies also seem modern to them. Yet these were the curtain styles when ladies and gentlemen wore powdered wigs. Valances were made just as we make them today and were tacked to a valance board in pretty much the same manner as is shown here.

* * *

NOTE—This is the second of a series on modern adaptations of period curtain fashions. Another version of the shaped type of valance is given in BOOK 5 of the series of ten booklets on sewing for the home. To get copy of Book 5 send 15 cents direct to:

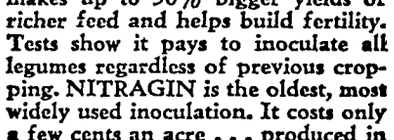
75¢ WORTH OF
NITRAGIN
PAID $390.00 IN MY CLOVER FIELD
One farmer writes that he spent 75c to inoculate half of 30 acres of red clover with NITRAGIN and got $390.00 worth of seed extra from the 15 acres he inoculated.

Inoculate all Legumes with NITRAGIN

With clover seed at 25¢ and alfalfa 50¢ or more per pound, you can't afford not to inoculate every pound of seed you plant with NITRAGIN. For a few cents an acre, NITRAGIN makes up to 50% bigger yields of richer feed and helps build fertility. Tests show it pays to inoculate all legumes regardless of previous cropping. NITRAGIN is the oldest, most widely used inoculation. It costs only a few cents an acre . . . produced in the most modern laboratory of its kind. Be sure you get NITRAGIN for soybeans, alfalfa, clover—other legumes. Get it where you buy seed.



FREE BOOKLETS
How to grow bigger, better crops of legumes.

IOWA RATIONING CALENDAR

TIRES

Certificates no longer needed for recapping truck tires.
Class A Ration: Third Inspection Period through Mar. 31 1944.
Class B Ration: Fifth inspecition period through June 30.
Class C Ration or Bulk Coupons: Fifth Inspection Period through May 31.
Commercial Vehicles: Every 6 mo. or every 5,000 miles, whichever occurs sooner.

GASOLINE

A coupon, No. 10 (3 gals. each), valid through March 21, 1944.
B and C Coupons (issued prior to Dec. 1) good for 2 gals each.
B2 and C2 coupons (issued after Dec. 1) good for 5 gallons each.
E coupons (1 gal. each) non-highway gasoline
R coupons (5 gals. each) non-highway gasoline.
For your protection against the black market the rationing rules now require that every car owner immediately write his license number and state on all gasoline coupons in his possession

FUEL OIL

Period No. 3 Coupons (10 gals. each unit) valid through Mar 13, 1944.
Period 4 coupons (10 gals. each) valid Feb. 8 through Sept. 30, 1944
Period No. 5 coupons (10 gals. each unit) valid through Sept. 30, 1944.
(No extra fuel oil available. Consumers must keep within allotments.)

SUGAR

Coupon No. 30, Book 4 (5 lbs. each) valid indefinitely. (It was previously announced Coupon No. 30 would expire March 31, adequate advance notice will be given when a new expiration date is fixed for it.)
valid through March 31, 1944.
Coupon No. 40, Book 4 (5 lbs. each) valid for canning through Feb. 28, 1945.

PROCESSED FOODS

K, I, and M green stamps, Bok 4, valid through March 20.
A8, B8 C8, D8 and E8 blue stamps Book 4, valid through May 30.

MEATS, FATS, CHEESE CANNED FISH

Y, and Z brown stamps, Book 3 valid through March 20.
A8, B8 C8 red stamps, Book 4, valid through May 20
D8 E8 and F8, red stamps, Book 4, valid March 12 through May 20.

SHOES

Coupon No. 18, Book 1, for 1 pair, Valid through April 30
Coupon No 1 Airplane Stamp, Book Book 3 (1 pair), valid indefinitely.
(Stamps may be exchanged between members of the family living under the same roof. Loose stamps are not good.)

Former Residents Visited Here

Mrs. Clara Striebe and son Donald, and her married daughter, all of Everett, Washington, were dinner guests at the home of Mr. and Mrs. Henry Lewis last Thursday. The Striebe family lived in Klemme a number of years ago. Donald Striebe is a navigator on a B-17 and had been overseas for several months and is now back on a furlough.

GARNER MAN TAKES OUT NOMINATION PAPERS

J. N. Steil, of Garner, last week took out nomination papers for nom nation as supervisor for the term beginning January 1, 1945, in the republican primary election to be held in June.

Mr. Steil has been a resident of Hancock County for 43 years, the greater part of which was spent in the vicinity of Garner as a farmer. He was also in the shoe and harness business for 15 years, and was superintendent of the County Farm for 4 years.

Steil supported the Democratic party until recently when he had a change of heart and on February 23 filed a "change of party affiliation" blank which stated his desire to change from the democratic to the republican party.

CHOIR HAD FAREWELL PARTY FOR MRS. C. C. KILGORE

Thursday evening the members of the Methodist choir met at the Church for rehearsal after which they held a party honoring Mrs. C. C. Kilgore who is moving away.

A social hour was enjoyed playing games which were in charge of Eunice Larsen and Patricia Kudje, after which home-made ice cream and cake, and coffee were served.

Mrs. Kilgore was presented with a framed picture of the American flag and Bible.

Mr. and Mrs. Les Ramsey and son and Mr. and Mrs. Gus Ramsey of Estherville, visited with Mrs. John Clements Wednesday morning of this week.

Thank You!

I wish to take this means to thank all my friends and relatives for the lovely cards and hankies I have been receiving during my illness. Also, to those who called, I want to say Thank you.—Mrs. Donald Neuberger. 1tp

Mrs. Earl Ruka was in Goodell on business Thursday.

Mrs. Clara Stille entertained to dinner Sunday Mr. and Mrs. Arthur Carlson and daughter Carol, of Clear Lake; Mr. and Mrs. George Stille and family of Goodell; and Mr. and Mrs. Elmer Schaefer.

Mrs. C. A. Arnold went to Centerville Friday for a few days visit at the home of Dr. Elmer Larson and family. Mrs Adolph Ridder, who has been visiting at Centerville returned to Klemme with Mrs. Arnold for a visit.

Dinner guests at the home of Mr. and Mrs. Edmund Josten Sunday were: Mr. and Mrs. Ernest Palmby of Vernon Center, Minn.; Mrs. Esther Barz and sons; Grandma Wille; Mr. and Mrs. Les Hartbeck and family; and Mr. and Mrs. Fred Barz.

Rev. Wm. Suckow, pastor of the U. B. Church at Van Meter, Iowa, visited last week in Klemme with his mother, Mrs. H. L. Suckow and other relatives. He came to get his wife who had been caring for her father, Charles Bredlow, who had been ill for about a month.

Today noon, Wednesday, Mrs. H D. Ramsay had a surprise birthday dinner for Larry, who was celebrating his thirteenth birthday. Mrs. Ramsay had invited as guests several of his boy friends. The boys said Mrs. Ramsay sure had a swell dinner and had everything boys like best.

We were reminded of winter again when about three inches of snow fell here Sunday night and Monday morning and the temperature down to 20 degrees. Monday afternoon high winds whipped the snow and a blizzard resulted, with dropping temperatures which continued Tuesday and in some sections of the state roads were blocked and the thermometer dipped to zero. Maybe the ground hog was right and we still are due for some winter weather.

A sprig of green on the Mediterranean front; today it's camouflage for an American machine gun nest. To win quicker our soldiers must have munitions and materiel, more and more. To provide them all of us must **buy more and more War Bonds.** *U. S. Treasury Department*

IN REMEMBRANCE OF OUR BABY
By Mrs. Marlin Bowles

Just two months ago today,
God took our little babe away.
Oh why did God take her from our sight
But, He knows best, and what is right.

As I held her to my breast,
We watched her close her eyes in rest.
Our love that went with her God alone knows.
But our angel was one that He chose.

She was the sweetest babe that from heaven is sent
That any doll could represent.
She was in my arms from morn 'till night,
Whether I'd sow, read or write.

She was beginning to do such sweet little stunts,
And was with us for only about four months.
She always had for us a smile,
And laughed out loud once in awhile.

Her pretty lue eyes would follow me from morning 'till night,
Like she didn't want me out of her sight.

And at night to me she would cuddle up close
For I was her Mother, and she liked me most.

Her little sister was always close by,
To try and play with her so she wouldn't cry.
Then the baby would begin to coo,
To her sister who is only two.

Her father really loved her too,
But there was work he had to do.
So he wasn't with her so much of the time,
Which made her seem more like she was just mine.

We all miss our baby an awful lot
And know that another can't fill that spot
That we had in our hearts for her alone,
For she was like the sun that had brightly shone.

So now we know we must prepare,
To meet our little babe up there.
For the trouble ahead we know God has seen,
For our little baby Roberta Marline.

Experiments have shown ference in breeds in resista pullorum. White Leghorns ar resistant, while Rhode Island and New Hamshires have found more susceptible.

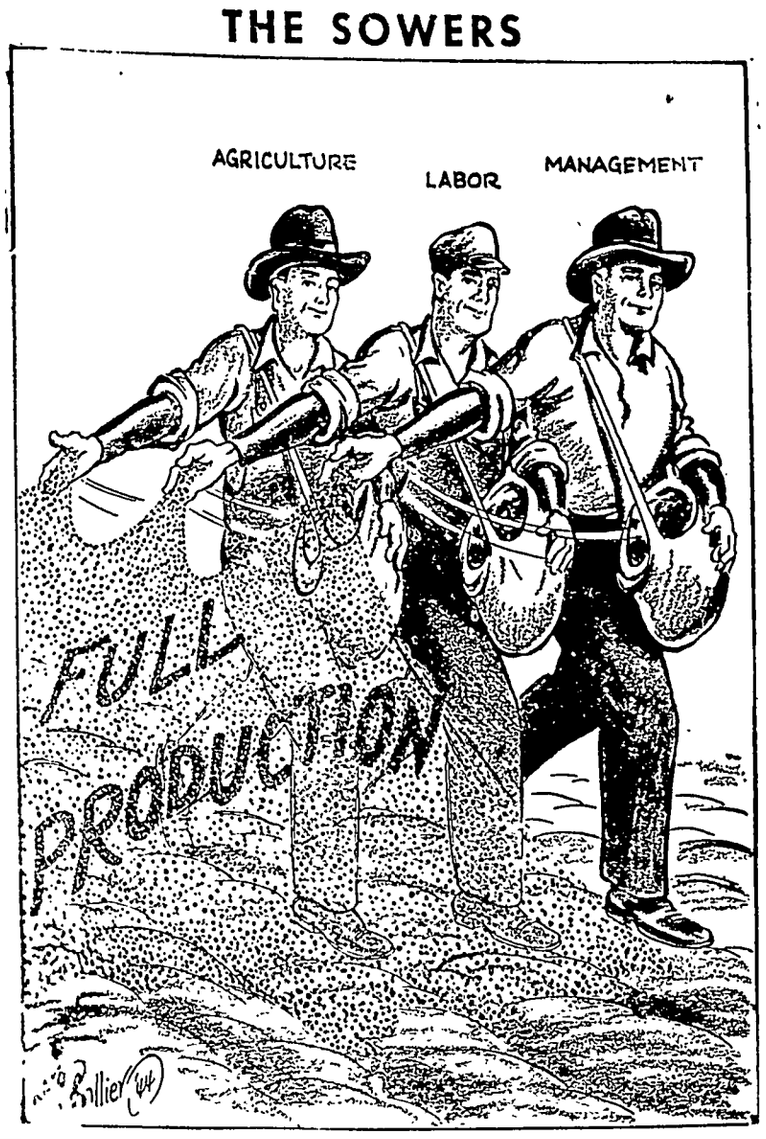
THE SOWERS



Local Farmer Died Sunday Following Long Illness

LIBERTY TOWNSHIP FARMER DIED SUNDAY, MARCH 12

Funeral Services Held Today For Louis F. Katter At Peace Reformed Church

Louis F Katter, 55, Liberty township farmer, died Monday following an illness of about two years

Services for Mr. Katter are being held at the Peace Reformed Church of Ell Township, of which he was a life-long member.

Rev K. J. Stubbe of Sheboygan, Wisconsin, preached the funeral sermon

Interment was in the cemetery adjacent to the church, and the pall bearers were Ben V Greiman, Ben F. Greiman, Victor Hueneman, Gideon Wittenberg, Ben Katter, and Henry Kirchhefer. The Wellemeyer Funeral Service was in charge of the arrangements.

The obituary is printed at the bottom of this page.

FORMER KLEMME FARMER DIES IN CALIFORNIA

Word has been received of the sudden death of V W Hammitt, 65 at El Cerrito, Cal., Saturday, due to a heart attack. The remains are being sent to Popejoy for funeral services and burial will be in the Alden cemetery.

Mr Hammitt farmed near Klemme several years ago and had been a resident of Popejoy and vicinity for many years He went to California last fall.

He leaves 4 children, Mrs. Lola Schlawin of Klemme; Laverne in the armed forces in England; Lyle of Garner, and Lavonne of Galt.

Onions raised from seed store better than those raised from sets.

FUNERAL SERVICES HELD FOR MINNIE HARMS, MONDAY

Funeral services for Miss Minnie Harms were conducted by the Wellemeyer Funeral Service, Monday, March 13th, 1944 at 1:00 p. m. in the Stenus Harms home in Klemme and at 2:00 o'clock in the Zion Reformed Church of Richland Township, Franklin county, and burial was made on the family lot of the church yard besides five infants and the mother.

Rev Johanas Schmidt officiated at the services, assisted by Rev. C. Grosshuesch. Six brothers acted as pall bearers.

Obituary

Miss Minnie Harms was born on September 10, 1922, in Richland Township, Franklin County, Iowa.

At the age of 9 years, Minnie moved with her parents to a farm seven miles east of Klemme, Iowa, and in December 1943, the family moved to the town of Klemme.

Miss Harms became ill suddenly and on February 28th she was operated on for a ruptured appendix. Peritonitis developed and the end came March 10th. She had reached the age of 21 years, 5 months.

She was preceded in death by her mother who died in 1941.

She leaves to mourn her sudden departure her father, Mr. Stenus Harms; seven brothers: Ernest of Alexander; John of Belmond; Taus of Thornton; Martin of Belmond; Reno of Thornton; Stenus Jr., and Herman at home.

Three sisters: Etta (Mrs. Carl Heginger) Klemme; Grace, Swaledale and Maggie at home; also six uncles, four aunts and numercus cousins.

Trees close to the garden sap the ground of moisture and provide too much competition for vegetables. This competition can be prevented by digging a trench 2 feet deep between the garden and the trees.

One Act Plays Will Be Given By H. S. Next Wed. Night

NO PAPER WILL BE PRINTED NEXT WEEK

For a number of years it has been customary for The Times to skip publication one week during the year. This year we have decided to skip the issue of March 22. Therefore The Times office and printing department will be closed from Thursday, March 16th, to Monday, March 27th.—The Editor.

GLEN BRIDGES NAMED SCHOOL DIRECTOR IN CLOSE RACE

Eighty-seven Votes Were Cast In Monday's School Election

Glen Bridges, running as a "dark horse" in Monday's school election, won out over E. F. Jacobs, incumbent by a margin of three votes for the three-year term. Bridges received 39 votes and Jacobs received 36 votes. Twelve ballots were classed as spoiled, making the total of 87 ballots cast.

Mr. Jacobs, who was appointed as director by the board, was filling the unexpired term of Dr. A H. Dulmes, who resigned as director to enter service with the U. S. Army.

Mr. Bridges, whose name was written in on the ballot to win the directorship, will take office at the next meeting of the school board.

BRITT GIRL BRIDE OF FORMER KLEMME YOUNG MAN

Miss Eva E. Copeland, daughter of Mrs. Louise Thompson of Britt, and Paul Jahnke, Britt, son of Mr and Mrs Henry Jahnke of Klemme were united in marriage at the Klemme Evangelical and Reformed Church parsonage on Friday afternoon, March 10th at 2:00 o'clock with the Rev. Calvin Grosshuesch officiating..

The couple was attended by Miss Lila Stone, Britt, as bridsemaid, and Paul Thiemann, Klemme, as best man.

The bride was attired in a light green two-piece suit and her corsage was of mixed roses, sweetpeas and snapdragons.

The bridesmaid were a light blue two-piece suit with a corsage of pink carnations.

The bride attended the Britt schools and had been employed at the Charles Clark home.

Mr. Jahnke attended the Klemme schools and has followed the occupation of farming since.

The couple will begin housekeeping and will farm for John Ostercamp Jr., near Britt.

Following the wedding ceremony the bridal party had a dinner at the Clear Lake Cafe. The couple then left on a honeymoon trip

JAMES DOLLIVER WILL SPEAK IN KLEMME MONDAY EVE

James Dolliver, republican candidate for Congressman, will be the speaker at the Methodist Sub-District Brotherhood meeting to be held Monday evening, March 20th at the Klemme Methodist church.

Mr. Dolliver will speak on the obligations we owe the men in the service after the war.

Supper will be served at about 6:30 p. m. and all men who are interested are invited to attend.

SOMETHING DIFFERENT IN THE WAY OF HIGH SCHOOL ENTERTAINMENT HERE

Characters Chosen From All High School Grades For Plays

Initiating a new program in Klemme, the student body of the Klemme High School will present "An evening of three one-act plays" on Wednesday, March 22, at 8:00 o'clock in the school auditorium.

This is a novelty from two standpoints: First, the casts were chosen from the entire high school rather than limited to particular classes, such as Juniors or Seniors; Secondly, it inaugurates an evening's entertainment made up wholly with three separate and distinct plays, complete in themselves, rather than one long play as hitherto presented.

These plays are all of different types and offer something in varied entertainment. The three plays are as follows: "Silence, Please," a domestic comedy; "Afraid of the Dark," a stark tragedy about the reaction of three men about to die in the electric chair and their feelings as they await their turn in the "death row" of the penitentiary; and "By Special Request," a hilarious farce of high school youth and their troubles with the teachers at school.

The characters in each of the plays is as follows:

"Silence, Please," Wava Schoenwetter, Dorothy Ellingson, Nadine Kimball, Allen Lau.

"Afraid of the Dark," Jim Thomas, Raymond Schoenwetter, Ronald Brinkman, Elwood Harvey, Duard Lewis, and extras. Ewald Grosshuesch, Elwyn Ridder and Larry Van Syoc.

"By Special Request," Rosella Koehler, Ruth Bell, Betty Lacey, Roger Bock and Donald Schaefer.

Members of the Speech Class will again act as production and backstage crews. The plays are under the direction of Mrs. H. N. Campbell.

Admission, including the tax, is is follows: Adults, 35c; high school students, 25c, and grade school students, 15c No seats will be reserved for this performance.

May Enter Play Contest

Plans are now being made to take one of the plays to a one-act play contest to be held at Dakota City and sponsored by the Iowa Speech Association this Wednesday, March 15th Results as to which play was taken and criticisms will be published in the next edition of The Times.

DONALD FRANKLIN WINNER OF SPELLING CONTEST

The annual spelling contest was held in the Klemme grade school Friday to determine who would represent the Klemme school at the county spelling contest.

Donald Franklin was the winner of the contest and will enter the county contest. Marjorie Lau was second high and Luella Priebe the third highest over all.

Others in the high ten were La Nell Harvey, 4th; Ruth Smith, 5th; Lyle Katter, 6th; Velma Tiggerman, 7th; Irene Neitland, 8th; Billy Jones, 9th and Rose Schaefer, 10th.

The county spelling contest will be held April 1st, at 2:00 p. m. in the Garner High School gymnasium. Mr. C. W. Sankey, Clarion, Superintendent of Schools in Wright county, will pronounce the words.

MEN TO ENTER SERVICE WERE GUESTS OF BIBLE CLASS

The Bible Class of the Klemme Evangelical and Reformed Church met Monday evening and held a party in honor of the men who are soon leaving for the armed service. Lunch was served after the party.

OBITUARY OF LOUIS FREDERICK KATTER

LOUIS FREDERICK KATTER was born July 2nd, 1888 in Liberty township, Hancock county, Iowa, the third of a family of five children born to his parents, William and Anna Greiman Katter.

He was baptized Sept. 2, 1888 by Rev. Henry Treick, pastor of the Peace Reformed Church, Ell township. On April 1, 1904, at the age of 16, he became a member of this church by Confirmation, during the pastorate of Rev. G. Gaterman. His memory verse was Joshua, Chapter 1, Verse 8: "Be thou strong and very courageous, that thou mayest observe to do according to all the law which Moses my servant commanded thee: turn not from it to the right hand or to the left, that thou mayest prosper whither so ever thou goest."

Louis Katter was a farmer, and he and his brother Arthur operated the Home Farm in Liberty township for many years.

His health began to fail him about two years ago when he became ill with rheumatism and finally on the morning of March 12, 1944, he suffered a paralytic stroke which ended his career.

He reached the age of 55 years, 8 months and 10 days, and leaves to mourn his passing, two sisters: Mrs. Herman Stromer and Mrs. Ray Veldhouse and one brother Arthur Katter.

Meals Without Meat

getables can be filling, too! If re working on menus without meats, you can still give your family foods that will give them plenty to put their teeth into—foods with that stick-to-the-ribs quality.

getables will give you minerals itamins aplenty. Some of them even supply some quantities of in, but fortify these foods with lete proteins from milk, cheese ggs. There's not a recipe in 's column that will not satisfy desire for color and zest.

old favorite, bean roast, is cially good at this time of year. ntains no meat, but tastes as h it certainly had some:

Cheese and Bean Roast.
(Serves 5)

o. 2 can kidney beans
ound American cheese
ion, chopped fine
blespoon butter or substitute
p bread crumbs
and pepper to taste
gs, well beaten

in the beans and put them with neese through the food chopper. the onion in butter. Combine res, add seasonings and eggs. into a buttered loaf tin and with buttered bread crumbs. in a moderate oven (350 de-) about 30 to 35 minutes or browned. Serve with tomato .

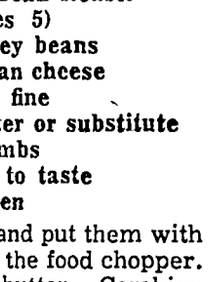
Save Used Fats!

s are dipping down in price an be used generously as in llowing recipe:

eamed Potatoes and Eggs.
(Serves 6)

s diced, cooked potatoes (left-er potatoes may be used)
rd-cooked eggs
ups milk
lespoons butter or substitute
lespoons flour
spoon salt

e a white sauce by melting , adding flour, and mixing in Cook until h and thick-Add salt, es and eggs slices. Let thoroughly. alf cup of American e may be for topping before serving, if d.



Save Used Fats!

aragus and Cauliflower With Rarebit Sauce.
(Serves 6)

blespoons butter or substitute
blespoons flour
p milk
easpoon salt
up grated American cheese
drops Worcestershire sauce
enne
nches cooked asparagus
ad of cooked cauliflower

Lynn Says

od Supplies: Sweet potato lies this year will be good, bringing them within the e of every family in the coun-

tato supplies will depend on May crop. Dried beans, peas, flour and grits, and peanut r prospects are good. Sugar lies will be about the same st year, but more will be for home-canning.

ir supplies only of these are indicated: vegetables, e, cream, butter, ice cream, honey, jams, jellies, rice, oils, salad dressings, short-s, tea, cocoa and marjoram. ese foods will be scarce: on-until April, bananas, canned , lentils, fresh fish, white meal, corn syrup, hominy coconut, pineapple, celery cinnamon, thyme, black

Lynn Chambers' Point-Saving Menus

Creamed Eggs on Biscuit
Green Beans
Wilted Lettuce Salad
Enriched Bread
Cherry Pie Beverage

Make white sauce of butter, flour and milk. Add cheese, seasonings and stir until melted. Pour over asparagus and cauliflower arranged on platter. Garnish with pimiento strips and parsley.

Eggs make splendid, nourishing food for lenten meals. Treat them gently — not too fast cooking and the egg will reward you well in texture and palatability:

Spanish Eggs.
(Serves 4)

2½ cups tomatoes
½ green pepper, chopped
1 small onion, chopped
½ cup chopped celery
1 teaspoon sugar
¾ teaspoon salt
⅛ teaspoon pepper
1 bay leaf
¾ cup bread crumbs
4 eggs
½ cup grated American cheese

Cook tomatoes, pepper, onion, celery, sugar and seasonings together for 10 minutes. Remove bay leaf, add crumbs and place in casserole. Break eggs on top, sprinkle with salt and pepper and cover with grated cheese. Bake in a slow oven (325 degrees) until eggs are firm and cheese has melted, 15 to 20 minutes. Mixture may also be placed in individual baking dishes.

Save Used Fats!

Eggs With Spanish Rice.
(Serves 6)

1 cup uncooked rice
2½ cups cooked tomatoes
½ small onion, sliced
¾ teaspoon salt
1 bay leaf
2 cloves
2 tablespoons melted butter
2 tablespoons flour
6 eggs
2 tablespoons grated cheese
½ cup buttered bread crumbs

Cook rice in boiling, salted water until tender. Drain and rinse with hot water. Simmer tomatoes, onions, salt, bay leaf and cloves for 10 minutes. Strain. Blend butter with flour in saucepan and add strained tomatoes, stirring constantly. Cook until thickened. Arrange layer of rice in greased casserole and make six depressions in rice. Break eggs into each depression, then pour tomato mixture over all. Sprinkle with cheese and crumbs and bake in a moderate oven until eggs are firm.

Save Used Fats!

Egg Shortcake.
(Serves 6)

6 hard-cooked eggs
3 tablespoons butter
3 tablespoons flour
2 cups milk
½ teaspoon salt
⅛ teaspoon pepper
1 tablespoon chopped parsley
1 teaspoon minced onion
Biscuit dough (using 2 cups flour)

Melt butter, blend in flour. Add cold milk and stir constantly, cooking until thickened. Add salt and pepper, five coarsely chopped eggs, onion and parsley. Heat thoroughly over hot water.

Prepare biscuit dough and roll ½ inch thick. Cut into 12 biscuits and bake these in a very hot oven until browned.

Arrange biscuits, one topping the other with a spoonful of creamed eggs between them. Top with more creamed eggs and garnish with a slice of egg.

Intelligent Self-Aid Key To Protection From Gas

Immediate and intelligent self-aid by all members of the civilian population is the key to successful resistance in a gas attack.

Physicians are not expected to treat people exposed to gas unless they are also injured. More than 90 per cent of the people caught in a gas attack must treat themselves by a few simple measures. The first and most important thing to remember is to stay calm. Second, get inside the nearest house and seal it as thoroughly as possible, stuffing chimneys and ventilators, and sealing shattered doors or windows with cardboard or wet blankets. Once inside, go to the upper floor and stay quiet.

Anyone who has been gassed should remove his shoes and outer clothing before entering the house and then take a shower using plenty of soap and warm water. If the eyes have received any splashes they should be washed with weak soda solution or water; if any liquid gas has splashed the skin it should be blotted off and bleaching solution applied. Most gas casualties need no further treatment, but if there is persistant cough after a few hours, or shortness of breath, or cigarettes become distasteful, a physician should be summoned.

Observe Precautions for Growth of House Plants

A few precautions must be followed if you wish success with house plants. Wash the leaves regularly to remove all dust and dirt that collects on them. This allows light and air to get to all the breathing pores in the leaves, so that they can perform their functions properly. A few plants, such as Saintpaulia and the primroses, have the downy fuzzy type of leaf that should not come in contact with water, and such leaves should be cleansed by brushing with a soft cloth or brush.

Don't place plants in drafts. Don't overwater. On the other hand, don't allow to become excessively dry. Keep the air moist through vapor pans on radiators, moistened peat moss beneath the plants, or by setting pots on gravel-filled troughs that have an inch or two of water in them for evaporation, yet do not allow the pot to rest in water.

Extend Season

To extend the harvest season, part of the snap bean planting may be left to ripen, to provide dry beans for winter eating. Some families like to use ripe cucumbers for making pickles, after the fruits are too old for salad. If tomatoes are late, some of the green tomatoes can be fried, to provide fresh food while other tomatoes are ripening.

To provide more variety for winter meals, some of the vegetables may be dried or salted instead of being canned in usual style. Corn, snap beans, cabbage, onions, and turnips are good salted; while corn and snap beans are good dried. The dried and salted vegetables have a different flavor from the canned product, and increase the number of winter dishes that can be served from garden foods.

Nicaraguan Economy

In Nicaragua, food supply is linked with production of rubber and mahogany. Nicaragua is the biggest producer of natural rubber in Central America. Upwards of 3,000 workers are collecting wild rubber. Most of this rubber and much of the mahogany comes from the low-lying jungle regions drained by the Coco river in the northeast. This area was devastated by hurricane in 1941 and further impoverished by a banana blight. Banana growing was one of the chief sources of living for the Coco river country. For years the fruit used to be collected from the growers by a steamer, which often brought in supplies. With the outbreak of war, the steamer suspended service.

Bonanza

"I'm going to get a divorce. My wife hasn't spoken to me for six months."

"Better be careful. You'll never get another wife like that."

Amiable Cuss

Sonny—Dad, what do you call a man who drives a car?

Dad (a pedestrian)—It all depends on how close he comes to me, my boy.

Canals Used With Rails For Transport Supremacy

More than a century ago—on July 4, 1828—two men turned spades which started a rivalry between railroads and canals. President John Quincy Adams broke ground for the Chesapeake and Ohio canal, and Charles Carroll of Carrollton began construction of the Baltimore and Ohio railroad. The rivalry continued until the outbreak of World War I.

Canal traffic reached its peak in the 1850s, declined when the railroads crisscrossed the country. Canal transportation was cheap, but it was also slow, and railroads made their bid for business with the new element of speed.

In 1917 pressure on rail facilities by troops and war supplies revived canal transportation as a natural supplement to railroads. But the revival was short-lived. Post-war development of motor transport and the rapid extension of motor highways diverted public interest in canals.

The current World war has given canals new life. Rail lines are jammed. Troop trains are tailed by flatcars loaded with jeeps and landing barges. Freight trains bulge with food and clothing, iron and steel and coal, materials for building munitions plants and plane factories, timber from forests and scrap from the four corners of the United States. Motor transportation is hampered by spotty gas shortages.

King's Fashionable Estate Made a Victory Garden

King George's "Victory Garden" was harvested after a very successful season.

The "garden" was on his estate at Sandringham, Norfolk, where, as all over Britain, every available acre has been converted to farmland. The golf course, for instance, was plowed up for a large crop of oats; six acres of lawn in front of the house itself were under a crop of rye; and where brightly colored flowers once filled ornamental beds, beets and parsnips now grow.

Thanks to comprehensive planning, carried out with the help of the Norfolk agricultural committee, the king's estate showed heavy yields: potatoes gave up to 12 tons an acre and wheat 60 to 70 bushels an acre

Altogether, 1,433 acres were farmed, of which 977 were under the plow; of these 977, some 539 were added after the war started. Most impressive section of the newly plowed land was the 476 acres which have been reclaimed from the Sandringham marshes. Reclamation has involved extensive ditching and draining operations, but the land is now producing potatoes, peas, beans, mustard, wheat and oats.

Wages Rise

An impartial examination of figures compiled by the bureau of labor statistics shows that since August, 1939, average weekly wages of workers in manufacturing establishments throughout the country have gone up 82.4 per cent. Living costs in this period (August, 1939, to June, 1943) have increased less than 27 per cent. In other words, the rate of increase in wages has been three times as great as the rate of increase in the cost of living

In the past two years, average weekly earnings of manufacturing employees have increased nearly 54 per cent—from $28.08 in April, 1941, to $43.35 in June, 1943. Only about half of this gain was due to overtime payments. While average weekly earnings increased 54 per cent, hours worked per week increased only 11.5 per cent, the number of hours for these two periods being 40.0 and 45.2 respectively.

Has Many Meanings

In the 16th century Creole came into use to denote persons born in the West Indies of Spanish parents, as distinguished from immigrants direct from Spain, or natives.

It has marked local variations In this country it refers to French speaking inhabitants of Louisiana who are of French and Spanish origin; in Mexico, to white persons of pure Spanish extraction and in Alaska, to the offspring of a Russian father and an Eskimo mother. There is a rather widespread but completely erroneous belief that it means a person of mixed white and Negro blood.

Address .....

Household Hints

Why not keep a game scrapbook? It is sure to come in handy when the children are shut in on rainy days, or when a party is in the offing.

* * *

Have mounted on one end of your clothesline post a clothespin box resembling a bird house. Paint it green to match the foliage and put on it a hinged top. This makes a grand and easy place to keep your clothespins.

* * *

A spool screwed to the scrub brush in such a position as to fit between the thumb and the index finger will greatly reduce the gripping required.

* * *

If you have some worn out socks and do not know what to do with them, put them to work in your mop clamp. They will make a fine mop.

* * *

Bedspreads should be ironed the "long" way to avoid stretching out of shape. Candlewick and chenille spreads do not need ironing, may just be shook out to dry.

* * *

Two large staples nailed to the end of a porch step will make a handy bootjack for removing heavy rubbers.

* * *

As soon as you accumulate one pound of leftover used kitchen fat, take it immediately to your meat dealer and collect your cash and extra ration points. He will accept even a half pound, and allow you one meat point. Take the fat in a clean tin can because the danger of breaking makes the glass jar unacceptable. A No. 2 can, which holds 20 ounces, weighs 3.6 ounces.

* * *

To remove the odor of onions from knife or hands, wash them in cold water. Hot water sets the odor.

Cockney and His Friend Were Agreed Upon 'Owl

A Cockney and his American friend were walking down the street of an American town one night. An owl set up his ancient "W-h-o, w-h-o, w-h-o."

The Cockney, startled, asked of his friend: "What is that?"

"Why, it's an owl," answered the American casually.

"Oh, it's an 'owl, then, is it?" said the Cockney, disdainfully. "So, it's an 'owl."

"Yes," replied the American, "it's an owl."

"Well," growled the impatient Cockney, "I know it's an 'owl full well. But who the devil is it 'owling?"

WEDDING CEREMONY AT THE REFORMED CHURCH MAR. 12

The Klemme Evangelical and Reformed Church was the scene of a double-ring wedding ceremony on Sunday afternoon, March 12th, at 4 00 o'clock when Miss Lavonne Irene Foss, daughter of Mr. and Mrs Henry Foss of Belmond, was united in marriage with Mr. Elmer Meinders, son of Mr. and Mrs. John Meinders of near Klemme. Rev. Calvin Grosshuesch officiated.

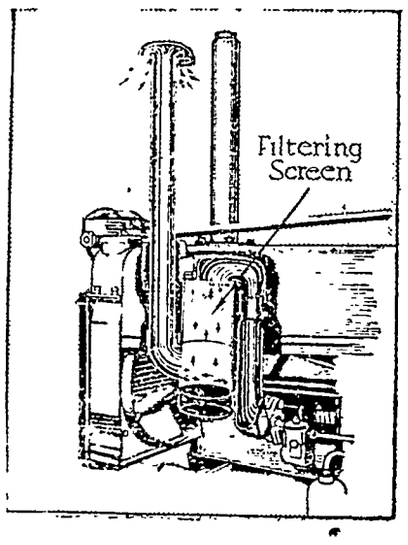
Miss Lorrraine Wessels was the bride maid and Mr. Harlan Nuehring was the best man.

The bride wore an aqua blue dress with accessories to match and the bridesmaid wore a dress of Wedgewood violet

The couple will not begin housekeeping until after the war, as the groom is awaiting his call from the Navy, while the bride will remain with her folks at Belmond.

A reception for the couple will be held tonight, Wednesday at the Klemme Community Hall.

Tips ON FARM MACHINERY



Service Air Cleaner

The air cleaner on the farm tractor should be serviced regularly and thoroughly. Iowa State College extension agricultural engineers recommend that the cup be filled to the level with SAE 30 or 40 oil for summer operation SAE 10 oil is used for intermitttent cold weather operation

The air cleaner requires dismantling twice a year and a thorough cleaning of the air intake stack and filtering screen. This cleaning is done by washing with kerosene. The air tube leading from the air cleaner to the carburetor should be checked frequently for cracks and loose connections.

Check Tension

Tensions on the grain binder can be checked with a small spring scale as shown in the illustration Grain binder needle tension should be 6 to 8 pounds Knotter twine tension should be 12 to 15 pounds, and twine holder tension, 35 to 40 pounds.

7TH ADJOURNED JANUARY MEETING

Garner, Iowa, March 7, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with John Chambers, F. J. Schoun, and Penn Eckels present.

The minutes of the last meeting were read and approved as read.

This being the 7th day of March, 1944, a date heretofore set for a hearing on the reclassification of Hancock County, Iowa, Drainage District No. 14, the date also for a hearing on the classification of added lands and on claims for damages, as reported by commissions heretofore appointed to reclassify the lands in said district according to laterals and the main ditch and to classify added lands and assess damages in said district, the hour for said hearings having arrived, the reports of the commissioners being on the file, the proofs of publication being on file and the Board being fully advised, said hearings were held as scheduled The Board with all members present did hear all objections both oral and written and after duly considering all objections the Board deemed it necessary to approve the reports of the Commissioners as reported.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of D. D. No. 14, that the reports of the Commission to reclassify the lands in D. D. No. 14, to classify added lands in the watershed of D. D No. 14 and claims for damages be approved as reported and said reclassification will henceforth be the basis for all future assessments against the main ditch and laterals in D. D. No. 14, Hancock County, Iowa, until such time as same may be changed by the due process of law.

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption, was seconded by Supervisor Penn Eckels, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, John Chambers and Penn Eckels, Aye. Nays none. Whereupon the chairman declared the resolution duly adopted.

On motion and second Charles F. Merten is hereby appointed County Engineer of Hancock County, Iowa, effective March 6, 1944, and as such Engineer his salary is hereby fixed at $2100.00 per annum with mileage at 5c a mile when it becomes necessary to use his automobile the administration of the duties of his office. His bond as such Engineer is hereby fixed at $2500.00.

Supervisor Penn Eckels is hereby appointed a committee to investigate and cause repairs to be made in D. D. No. 105 and D. D. No. 10, lateral No. 1.

On motion and second the Board adjourned to March 20th, 1944, at 9 o'clock A. M.
F. J. SCHOUN, Chairman
ATTEST: FRED C. MISSAL,
County Auditor.

BEN F. GREIMAN CANDIDATE FOR CO. SUPERVISOR

Ben F. Greiman, of Garner, a former supervisor, has taken out nomination papers for County Supervisor for the term beginning January 1, 1946, and is running against J. A. Chambers who is now serving his first term.

Mr. Greiman was elected supervisor a few years ago on the democratic ticket, defeating Schoun at that time. Greiman served one term and was then replaced by Schoun.

Greiman abondoned the democratic party and switched to the republican banner two years ago when he voted the republican ticket.

RONALD BARZ HONORED AT PARTY HERE

Mr. and Mrs. Harvey Barz entertained a large number of friends at a 500 party at their home Friday evening in honor of Ronald Barz of Garner, who leaves Thursday of this week to enter the armed service.

500 was played at five tables. High score for the ladies was won by Mrs. Edmund Josten, while Raymond Barz won the high prize for the men.

Mr. and Mrs. Barz served a delicious lunch after the evening's entertainment.

SHAMROCKS DEFEATED IN DISTRICT TOURNAMENT

Coach Leo Esbeck's Shamrocks met a powerful Harcourt team in the first round of the district tournament at Webster City last Wednesday night and went down in defeat 40 to 18.

Harcourt then went on to beat Jewell in an overtime period 26 to 25 to go into the sub-state.

Eagle Grove won the final round from Webster City 33 to 30.

Klemme and Eagle Grove were the winners in the sectional held at Belmond.

BIRTHDAY PARTY HELD AT MERLIN NEUBERGER HOME FRIDAY EVENING

Mr. and Mrs. Merlin Neuberger held a party Friday evening, Mar. 10th in honor of their son, Dean Arlan's first birthday.

Chinese Checkers were played, and pictures were taken by Emil Blumer.

Those present were Mr. and Mrs Will Kraus, who are Dean's great grandparents; Mr. and Mrs. Emil Blumer, Mrs Carol Brager and Daryl; Mr. and Mrs John Neuberger, Ruth and Fay; Mr. and Mrs. Walter Blumer, Maryann. Glenn and Marlene; Mr and Mrs Raymond Wille; Mr. and Mrs. Bill Neuberger, Marie, Billy, David Merna and Marlys; Mr. and Mrs Walter Neuberger

Dean Arlan received many lovely gifts. Lunch was served at a late hour

HARD WORKING DRUMMER

Discovery of a drumhead originally belonging to the drum used in the Washington Prairie band brought back memories to some residents. The drumhead was one broken out at the wedding of Anna Brown and Christian Hildahl in 1896 The words WASHINGTON PRAIRIE BAND in red letters are not very plain and the word CORNET in black across the center of the drumhead is also dim. Will Linnevold, Washington Prairie remembers the Hildahl - Brown wedding as he became director of the band on the day of the wedding The drumhead was discovered in the Washington Prairie parsonage.

IOWA RATIONING CALENDAR

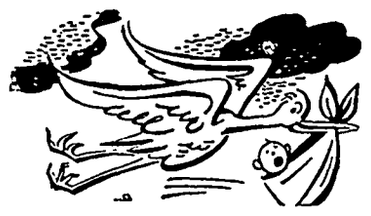
(Stamps may be exchanged between members of the family living under the same roof Loose stamps are not good.)



HELLO, FOLKS!

A daughter weighing 10 pounds, 2½ ounces was born to Mr. and Mrs. Theodore Nelson, Goodell, at the Mercy hospital in Mason City on Saturday, March 4th.

The Nelsons live on a farm one mile north of Goodell.

Mr. and Mrs. Eugene Kluckhohn are the parents of an 8 pounds, 5 ounce baby daughter born to them at the Mercy Hospital in Msaon City on Saturday, March 11th.

The new arrival has been named Shannon Kay.

U-DELT-EM BRIDGE CLUB MET THURSDAY

Mrs. R. A. Jorgenson was hostess to the U-Delt-Em bridge club at her home Thursday. Mrs. Ed. Jacobs won high score, Mrs. W. F. Missman, second, and Mrs. P. M. Wilson, third high.

1944 SUGAR BEET, SOYBEAN GOALS AND DAIRY FEED PAYMENTS FOR HANCOCK COUNTY

The following sugar beet goal for 1944 has been received by Alfred V. Josten, Chairman of the Hancock County Triple - A. The War Food Administration has set a goal for Hancock County of 900 acres of Sugar Beets for 1944. This is double the acreage planted last year to Sugar Beets.

In the past most Sugar Beet Growers have felt that the Government was not much interested whether or not Sugar Beets were grown. But now the situation has changed.

Mr. C. R. Oviatt, head of the Sugar Beet Section of the Sugar Branch of the War Food Administration made the following statement:

"Our sugar supply picture is now changed from adequate supplies to a tight prospect by the serious reduction in beet sugar production in 1943, together with a declining production in Hawaii and Puerto Rico, primarily due to shortage of fertilizer in these islands and the earmarkings of sugar bearing materials in Cuba equivalent to 300,000 tons of sugar to be diverted to the production of industrial alcohol. Many distilleries, formerly using sugar, has turned to grain for alcohol making, but now that grain is needed to badly for food and feed, sugar can products must again be utilized for war industry manufacturing."

War uses of Sugar Beet besides their use for food are:

1. One ton of sugar provides fire power for thirty 12" shells.
2. One ton of sugar for 10 life rafts.
3 One ton of sugar for rubber for 160 gas masks.
4. Each time a 16" gun is fired it uses sugar from an acre of beets.

Fieldmen on Sugar Beets will call on all Sugar Beet growers and explain the new Sugar Beet contract Tabulation on 1815 1944 farm plans show that Hancock County farmers fail to meet 1944 goal on soybeans.

The soybean goal for Hancock County is 48,000 acres the intentions on 1815 farms shows 27,239 acres of soybeans with about 450 farm plans left to tabulate.

Hancock County has always met the goal set on War Bonds, War Chest Fund and Red Cross.

Let us not forget that soybeans essential and necessary in the War Effort. Growing of Soybeans does not require any change in actual farm operations, certainly Hancock County will be go on record in the War Effort by meeting the soybean goal for 1944.

Dairy Feed Payment will be continued for Feburary and applicants are asked to submit their evidence for February payment to the AAA office at Garner, Iowa. The rate for February will be 5 cents per lb. of butterfat and 35 cents per CWT of whole milk.

FRASER TO END

Going the way of a lot of small towns, a petition has been placed on file in Boone county district court requesting the legal discontinuance of the incorporate charter of Fraser. At one time, Fraser had a population of about 3,000, when the coal mines were running full blast. About the only possible change will be that the property there would return to the township for taxation purposes.

CREAM HORSE CO-OP FORMED AT IOWA FALLS

Klemme Man Is Vice-President Of New Organization

Officers and directors of the newly-organized American Cream Horse co-operative are C. T. Rierson, Radcliffe, President; Verner Stromer, Klemme, vice president, Karene Bunker, Radcliffe, secretary-treasurer. Directors include H. L. Bavender, New Providence; Earl Werling, Renwick; and Al Standt, Dougherty.

Other breeders attending the organization meeting in Iowa Falls were Leonard Ites and Robert Ites, both of Alden; E. E. Reece, New Providence; John King, Hubbard; Ernest Werling, Renwick; Paul Ackley, Blairsburg; William Donelson, Alden; and Merle Bunker Radcliffe.

Another meeting will be held soon to draft articles of incorporation and by-laws.

The first cream-colored draft horses brought to the attention of breeders in this vicinity was in 1910 when Harry (Hat) Lakin, Ellsworth stock buyer, bought a mare of that color at a farm sale in Story county.

Lakin later sold the horse to Nelson Brothers of Jewel; and Eric Christian, Jewell, lover of horses and oldtime veterinarian, saw the possibilities of developing a new breed.

Characteristics of the cream horses are a rich cream color, pink skin, white mane and tail, a few white markings on face and feet, and amber-colored eyes which are almost white when the colts are young. Breeders say the horses have excellent dispositions, that are easily handled, yet have plenty of style and action.

Rierson now has 21 of the new breed, Reece & Son of New Providence, 6; and Bavender, 5.

Mr. Stromer of Klemme has several of this type of horse and owns one of the most outstanding stallions of this breed.

CO-OP LINEMAN HURT BY BLAST

Dynamite Explodes as Workman Investigates

Clarence Niemeyer, of Garner lineman for the Hancock county Rural Electric Co-operative, narrowly escaped death Wednesday afternoon, when a charge of dynamite that had been set in the morning and failed to explode, exploded two and one-half hours later as Niemeyer went back to investigate.

Niemeyer received severe injury to his face and right eye by frozen dirt blown into his face and was taken to a Mason City hospital. It was thought at first that the sight of the right eye was destroyed but doctors now have hope of saving his sight in the injured eye.

The line crew was using dynamite to break frost in digging post holes for a new line being built.

H. OLLENBURG BECOMES HEAD OF BANK AT GARNER

Herbert L. Ollenburg was elevated to the presidency of the Hancock county National bank of Garner at a meeting of the board of directors. Ollenburg had been vice president and succeeds the late C. H. Nelson.

Dr. J. S. Wesson remains vice president and William Baggs was elected cashier. Bernice Schulz and Lucille Wesson were elected assistant cashiers and Wanda Johnson and Lois Schulz bookkeepers.

Mr. Baggs was also elected a director to fill the vacancy caused by the death of Mr. Nelson.

New Guinea—Following a strict medical examination, New Guinea natives receive training equipment for military police duty in Papuan foothills against bandits and tribesmen.

CONGRESS:
Democratic Revolt

Reelected by the senate's Democratic majority as its floor leader after breaking with President Roosevelt on the tax veto, burly Sen. Alben Barkley (Ky.) took back the reins of a balky party, but not without an eye on restoring harmony in its ranks with its principles.

Barkley's break with F.D.R. came as a result of the President's rasping attack on the $2,300,000,000 tax bill, which he said was an "inedible crust" offering relief to "the greedy instead of the needy." It was not the question of the increased taxes but rather of the size and nature of the new levies which promoted the differences between the Chief Executive and congress, and Barkley's position indicated stiffening congressional independence in formulating legislation, rather than an all-out repudiation of Democratic principles.

The same attitude prevailed in the house, where 80-year-old Rep. Robert Doughton's declaration that he "parted company" with F.D.R. on the tax veto set the stage for congressional overriding of the veto.

WAR GOODS:
Sell Surplus

With the U. S. treasury preparing to sell 20,000 horses, 10,000 motor trucks and 4,600 motorcycles released by the army, the Surplus War Property administrator, William L. Clayton, was completing organization of the newly created agency to supervise disposal of all such goods.

W. L. Clayton

Although the treasury already has disposed of 100 million dollars worth of surplus material chiefly to lend-lease and other U. S. agencies, the new unit was established by the President upon recommendation of the Baruch postwar planning committee to supervise sale of excess government goods so as not to glut and disrupt ordinary markets.

Principal task of Clayton's agency will be to determine selling and distribution policies and insist on minimum prices, leaving actual sale of material to the various government departments which originally procured the goods.

EXTEND CCC:
Subsidies Included

With consumer subsidy foes unable to override a presidential veto, the senate passed a bill extending the life of the Commodity Credit corporation until June, 1945, and permitting its use of from 750 to 900 million dollars for paymnts to hold down retail food costs.

Headed for acceptance in the house, whose banking committee approved similar legislation, the bill also calls for continuation of price-support programs to assure farm production, a feature endorsed by those who opposed consumer subsidies or government payments to processors and others to cut retail prices.

A recent check by CCC showed that only one billion of its three billion dollar funds have been obligated and the remainder are available for extended operations. War Food Administrator Marvin Jones' request for an additional $500,000,000 postwar fund was turned down.

AIR WARFARE:
Hit London

Stung by Allied bombers' destruction of their cities, Germany's once-vaunted Luftwaffe appeared in force over London again after a two-year lapse, blasting the British capital with block-busters that ripped up residential and factory areas.

As the Luftwaffe struck at London, big Allied bombers continued their attack on Nazi war-plane plants throughout Germany, seeking to cripple fighter production and reduce aerial resistance to U. S. and British forces when they open the second front.

From January, 1943, to the same month in 1944, the RAF and AAF lost 3,835 bombers in operations over western Europe, it was announced, with 2,688 of the craft being British and 1,147 American.

Open Fighting

With their lines lying exposed in the broad Roman plains, both German and Allied forces alike came under the heavy fire of artillery and aircraft around the Anzio beachhead, and the enemy's armored moves met stubborn resistance from U. S. and British troops.

To the southeast, wet weather muddied the mountain-sides and slowed up Allied advances against the Germans around Cassino. So bitter was the fighting in Cassino itself where the Nazis clung to part of the town that a U. S. Doughboy with Yankee wit reported to his commanding officer that " . . . Today, we captured a parlor, bedroom and kitchen . . ."

PACIFIC:
Closer to Tokyo

Surging beyond Japan's crumbling outer Pacific defenses, U. S. carrier forces struck within 1,400 miles of Tokyo to blast at the Mariana islands, so called gateway to the enemy homeland.

While planes from the carrier force ripped Jap defenses in the Marianas, other U. S. air and naval units continued hammering down enemy resistance in the New Britain area, blasting shipping centers used as feeder points for barges supplying embattled Nipponese troops in South Pacific outposts.

As U. S. naval and air forces tore up the Marshalls, Carolines and Marianas, the enemy's vaunted navy and aerial auxiliary still showed no face to scrap, with the Tokyo radio telling its listeners that the Jap chiefs will order a fight only after drawing the U. S. from its bases.

ARMY BEEF:
Small Plants Tapped

To assure the military services of needed supplies, the War Food administration prepared to order 3,000 small packing and slaughter plants and local butchers to set aside 50 per cent of their "army style" beef beginning April 1.

At the same time, WFA announced manufacturers of cheddar cheese will be required to reserve 45 per cent of their March and 55 per cent of their April production, compared with 35 per cent for January and February.

Since the small packers and butchers sold their entire output to civilians, their reservation for the services is expected to cut into domestic supplies. Previously, the government obtained its beef from about 425 federally inspected plants, but decided to tap the other sources upon the belief that more than normal numbers of cattle were being marketed in the smaller centers.

HIGHLIGHTS . . . *in the week's news*

BUGLE: Plastic materials have solved another problem—this time in the brass musical instrument field. The army has been short of bugles because of a scarcity of brass. A plastic bugle has been developed that sounds as sweet as the metal ones. Besides that, it is only half as heavy, needs no warming up on cold mornings, and costs less to make.

MARS PLANES: The naval air transport service will put 20 of the new model Mars planes into service as soon as they are finished. The new JRM-1s are primarily designed for cargo carrying, but are quickly convertible to use as hospital ships or troop transports. They can carry 145,000 pounds of cargo, such as field guns, jeeps or engines, or 132 men, as transports.

RUSSIA:
Army Anniversary

Celebrating the 26th anniversary of the creation of the Red army with "Molotov cocktails," Russian forces continued bending back German lines at both ends of the 800 mile front. Meantime, it was also indicated that peace negotiations with the Finns progressed.

As the Nazis announced retirement movements on the eastern Estonian border, the Reds drove on the important rail and highway hub of Pskov, communication gateway to the Baltic states.

At the southern extremity of the front, the Russ kept chewing off chunks of the German wedge extending far to the rear of their lines in Poland, with the iron, copper and coal center of Krivoi Rog falling into their hands after almost 2½ years of enemy occupation.

Stub in the Finnish peace moves was the presence of 175,000 Nazi troops in the country's mineral-rich north.

WORLD AIRWAYS:
Blimps in Picture

Forgotten recently because of the spectacular action of the airplane in the present war, the huge, sleek dirigible has slipped quietly back into the picture, with the U. N. Airships Incorporated's application for five routes from Washington, D. C., to large cities in all parts of the world.

Using noninflammable helium, the U. N. Airships Inc., would operate passenger and cargo dirigibles over 41,633 miles of world routes to Calcutta, India, via Dakar, French West Africa; Buenos Aires, Argentina, via Rio de Janeiro, Brazil; Capetown, South Africa, via Zanzibar, British East Africa; Brisbane, Australia, via Los Angeles, Honolulu, Chungking, China, and Darwin, Australia; and finally to Moscow via Glasgow, Scotland.

Although the dirigible's speed is limited to 75 to 100 miles per hour as compared with the airplane's 150 to 200, blimp enthusiasts say the huge lighter-than-air craft can cruise greater distances and provide passengers with more luxurious quarters.

BREAK STRIKE:
Army in Los Angeles

With a strike of its AFL electrical workers tying up repair of damaged power lines feeding war plants and private homes and business houses, Los Angeles called upon the army to take over the city's municipal water and power department and restore stricken facilities.

W. Beery

Power lines were downed during one of southern California's severest storms on record, 7.3 inches of rain flooding homes and chasing small water craft into coastal ports. Glancing over the drenched countryside, rough and tumbly film actor Wallace Beery groused: "One advantage in the South Pacific is that down there they've got islands."

When the army moved in on presidential order, the strikers who walked off the job in a wage dispute, went back to their work after a 10-day layoff.

ARGENTINA:
New Chief

Having drawn the displeasure of Argentina's celebrated "Colonel's Club" which stands as the dominating force in Argentine politics, Gen. Pedro Ramirez turned over his presidency to Gen. Edelmiro J. Farrell, army favorite.

Ramirez' action climaxed the crisis created when his foreign minister stood for declaring war on the Axis and subsequently was fired on the insistence of the ultra-neutral "Colonel's Club."

Although Ramirez' foreign minister left his cabinet, he evidently lost the confidence of the "Colonel's Club," which then promoted Farrell to the high position.

Take Out OUCH!

Long the terror of even the bravest of heart, dental drilling may soon be relieved of much of its pain by general adoption of a new technique used by the army.

The new technique is simple in itself, the dentist pouring cold water into the patient's mouth at the rate of eight ounces a minute, while drilling, and draining the same amount out through another tube. By circulating about the mouth, the water cools the drilled tooth, the pain of which is caused by heat generated by friction of the drill.

Because of the relief of the pain and the greater rotation of the drill in the reduced temperature, the dentist can do a better job on the tooth and perform almost 40 per cent more work, army dental technicians

FEEDING WORKERS

About 6½ million of the 20 million war workers in the nation are eating in their factories. Expansion of facilities is expected this year to take care of 5½ million more. The other 8 million work under conditions in which it is difficult or impossible to provide for their needs.

Many plants contain cafeterias for employees. In others, "snack wagons" travel around with sandwiches, cake and coffee, often at the expense of the management. This free food is an inducement to production

Washington, D. C.

SHOE FIGHT

A hot fight is raging backstage between the WPB and the OPA over shoe leather. Inside fact is that the shoes you are wearing are inferior not entirely because the best leather is rightfully being allocated to the armed forces. That is only part of the story.

Another reason why your shoes are inferior and your shoe bill higher is that certain industry moguls in WPB's leather and shoe branch have been blocking a program to prolong the wear of civilian shoes by the application of wax and oil treatments to soles. The process costs only two or three cents a shoe, but many manufacturers don't like it because it isn't flossy enough. They say that consumers prefer shoes with a high, light polish on the sole, though they admit that this polish robs the sole of some of its wearing quality.

Bureau of Standards experts have testified at hearings of the senate war-mobilization committee, headed by West Virginia's Sen. Harley Kilgore, that the use of oil (by actual test) prolongs the life of shoes 14 per cent, while soles treated with wax preparations last from 30 to 41 per cent longer.

This has been corroborated by leading industry spokesmen, including Paul C. Wolfer, a vice president of the Douglas Shoe company, who is a consultant in the standards division of the OPA. Wolfer not only urged general adoption of oil-wax treatments but intimated that the government should crack down on the shoe industry and **require** it.

In addition to cutting down the nation's shoe bill, another factor Wolfer emphasized was wartime conservation of leather. So far, however, the OPA has made little progress in selling the oil-treatment idea to the WPB. Some manufacturers have adopted the sole treatments voluntarily, but only on a very limited scale.

The big shoe companies, OPA claims, are antagonistic. In this, they have the potent backing of the WPB's leather and shoe branch, headed by Lawrence B. Sheppard, a vice president of the Hanover Shoe company.

Before the Kilgore committee, Sheppard expounded at length on "manufacturing difficulties . . . lack of conclusive tests," and other objections to a government order requiring the oil treatment of soles. His statement was effectively contradicted by other witnesses, who brought out that tests had been adequate and that facilities for sole treatments could be installed throughout the country with little difficulty and at small cost.

NOTE: The Kilgore committee has finally sent a hot note to Donald Nelson demanding that he issue an order to compel the general adoption of sole treatments by shoe companies.

DESK ADMIRALS

The navy is doing a magnificent job whenever it goes into action in the Pacific, but members of the Truman committee are not convinced that this is true of all the desk admirals or their flunkies in Washington. Among other things, they are casting a curious eye at the manner in which Adm. Ernie King and his staff preserve the myth of being "at sea" when actually they sit at desks in Washington.

To make the myth more realistic, Admiral King lives most of the week on a yacht in the Potomac. It is a small yacht and his multitudinous staff has no room to live there with him. However, they draw extra pay for the hazards of life "at sea."

So when payday arrives, the paymaster carries a satchel down to Admiral King's yacht to pay off the staff. The paymaster knows full well that the men are not on the yacht. However, he goes through this ritual, then comes back from the yacht to the navy department, where he finds the men and gives them their pay.

STEEL-WAGE DISPUTE

Hard-working Will Davis, chairman of the War Labor board, is having a tough time selecting a panel to settle the vital question of wages in the steel industry. He proposes a panel of three, one representing labor, one the steel industry, one the public, with three alternates. But though he has called up all sorts of people and literally begged them to serve, their patriotism seems deficient when it comes to labor disputes.

Meanwhile, the steel companies, faced with retroactive pay for whatever wage decision is finally handed down, are getting restless.

JESUS CRUCIFIED

LESSON TEXT: Mark 15:22-27, 29-39.
GOLDEN TEXT: He was wounded for our transgressions, he was bruised for our iniquities; the chastisement of our peace was upon him; and with his stripes we are healed.—Isaiah 53:5.

The crucifixion of Christ brings us to that darkest of all days in the history of the world, when wicked men with cruel hearts and hands crucified the loving Son of God. But, thanks be to God, it was also the day when bright hope shone forth for sinful humanity, for in His death Christ bore our sins upon the tree, the veil was rent, the old sacrifices were set aside, and the "new and living way" was opened into the "holiest by the blood of Jesus" (Heb. 10:20).

The cross is not just an ornament to decorate the steeple of a church, or to adorn man. It speaks of the black horror of the cry, "My God, my God, why hast thou forsaken me?" But it also tells of our God, who "so loved the world that he gave his only begotten Son" as its Redeemer.

What does Calvary mean to us? It means that—

I. The Saviour Died So We Could Live (vv. 22-27).

The details of and circumstances surrounding the crucifixion are of deep interest to every Christian. We stand with Luther and weep as we see Christ's unspeakable agony, not only of body but of spirit, and we cry, "For me, for me!" How can any believer contemplate the cross and withhold self, substance, or service from Christ?

There would be less careless, selfish living if we would go often to the story of the death of Christ and recognize the loving, sacrificial devotion of Christ.

Equally heart-searching is the message of the cross to the unbeliever. He knows he is a sinner (Rom. 3:23); he knows that "the wages of sin is death" (Rom. 6:23), and he knows that "neither is there salvation in any other, for there is none other name under heaven given among men whereby we must be saved" (Acts 4:12). Here at the cross he meets that one "who his own self bare our sins in his own body on the tree, that we, being dead to sins, should live unto righteousness: by whose stripes ye were healed" (I Pet. 2:24).

Note the difference between the two thieves who were hanged with Jesus, for it is the difference between those who face Christ in our day. One railed on Him (Luke 23:39), while the other, repentant, had a faith that looked all the way into Paradise (Luke 23:43).

II. The Son Was Forsaken So We Could Be Accepted (vv. 29-36).

Awful was the railing and mocking which our Lord endured on the cross. It must have made His devoted, loving heart well-nigh break as He saw the scorn of the very ones He died to save.

Yet it was as nothing compared to that moment when He who knew no sin "was made sin for us" (II Cor. 5:21). Bearing the awful load of the sin of the world He knew the bitter agony of being forsaken by the Father. He turned His head away and we hear that saddest of all cries, "My God, my God, why hast thou forsaken me?"

We cannot fathom the full meaning of that hour, we dare not attempt to explain it, we can only accept it and thank God that because He did become sin for us we may be "made the righteousness of God in him" (II Cor. 5:21). He died that we might live. He was forsaken that we might be "accepted in" Him "the beloved" (Eph. 1:6).

After the darkness, however, comes the light. He died not as a martyr, a vanquished gladiator defeated in battle; no, there was victory.

III. The Veil Was Rent So We Could Enter (vv. 37-39).

The death of Jesus was not the pitiful weakening of a human martyr. Here was the Son of God, crying with a loud voice (v. 37), giving up His spirit to the Father (Luke 27:46), declaring that the work of redemption was "finished."

As a visible indication of that fact, and as a declaration that the old dispensation of law had given place to the new dispensation of grace, God tore the temple veil in twain. Only He could have done it.

No man could have torn this sixty-foot long, twenty-foot wide, and inch-thick curtain, and note that it was torn from top to bottom. This was the act of God. This veil had hung in the temple to keep all but the high priest out of the Holy of Holies, and he entered with fear and trembling but once a year as the representative of the people.

Now all this is changed. We have now, "brethren, boldness to enter into the holiest by the blood of Jesus, by a new and living way, which he hath consecrated for us, through the veil."

Therefore, "let us draw near with a true heart and full assurance of faith" (Heb. 10:19-22).

Generous Treatment of Axis Prisoners in United States Improves Conditions for Captured Americans

Red Cross Reports Men in German Hands Well Fed and Housed

By BARROW LYONS
WNU Staff Correspondent

In some 30,000 families throughout our land today the folks are thinking of some soldier from home who has fallen into enemy hands—now a prisoner of war far away. When our troops make the great push against the mainland of Europe, there will be more boys taken prisoners.

In the war prisoner camps within the United States, we hold some 175,000 enemy soldiers captured mostly on the battlefields of Africa, Sicily and Italy. Of these, 125,000 are Germans, 50,000 Italians. Only 116 are Japanese.

Many protests have been made to army authorities, because of the good treatment given these prisoners. Lots of people don't understand why enemy prisoners should be given the same comforts, the same medical attention, the same food as our own soldiers.

But there is a reason so compelling, that none can complain when it is understood. It is not for the sake of the prisoners, but in the interest of our own soldiers held by the enemy. They are the real object of our forbearance and solicitude. And, of course, our national honor is involved, for we agreed to give prisoners the same food and care as our own men under the Prisoners of War convention signed and ratified at Geneva on July 27, 1929.

Reciprocal Good Treatment.

Reliable reports made to the army indicate that the good treatment we have accorded prisoners has won for our own men in German prison camps conditions that are at least as good as those under which German soldiers live.

These facts were revealed for the first time to your correspondent by Maj. Gen. Allen W. Gullion, provost marshal general of the army, who has general supervision over prisoners of war. The actual guarding of the prisoners is a function of the prison camp commander who is under the control of the commanding general of the service command.

Censorship reveals that letters from relatives and friends express much gratitude and happiness over the way we are treating their men.

"We are informed by the International Red Cross that the Germans say that because of our good treatment of their soldiers, they are giving our men more liberties and better treatment," General Gullion told your correspondent. "The Geneva conventions required that each prisoner be given the same food as soldiers of the capturing power receive in base camps. According to the reports of Swiss observers, the Germans are living up to this provision; our men in some instances are getting even a little better food than the German soldiers, although the German facilities do not compare with ours.

"I think there can be only one answer to the complaint that we are treating the prisoners we take too well. One gets it when one asks the question: Is it better to yield to a very natural, vengeful impulse to take it out on our prisoners, or to observe our treaty agreements and protect our own men?"

Few Escape.

There have been complaints also that the prisoners we hold have not been sufficiently guarded; that too many have escaped to become a menace to the home population. General Gullion points to the facts. Of the 175,000 prisoners we now hold in this country, about 100 have escaped, but all except three have been recaptured and are in custody. The only men at large are two Italians who escaped from a branch camp at El Paso, part of the Lordsburg, N. M., camp, and one German who got away at Crossville, Tenn.

There has been complaint from organized labor lately because we have used some of the war prisoners for tasks in lumber camps and on road work, where there was no American labor available. General Gullion gives labor assurance that prisoners of war are not being put to work on any job where civilian labor is available in adequate supply. Prisoner of war labor is a temporary expedient to relieve the existing shortage of man power. The United States agreed at the Geneva convention to return all prisoners of war to their own countries at the conclusion of the war, hence the fear of competition with free labor is groundless, the general says.

Prisoners Cut Pulpwood.

Prisoners have been in logging operations where American workers have left the woods to work in shipyards and machine shops at much higher wages, he explains. They have been useful in cutting and peeling pulp logs needed critically for containers in civilian industry and for newsprint, of which there is a shortage. Prisoners have been used also in maintaining roads in some areas where other manual laborers are very scarce. The tremendous importance of road maintenance, in view of the heavy traffic, is obvious.

Prisoners have been used also in laundries. Nearly everyone today has suffered inconveniences because of the shortage of laundry labor, and can understand this expedient.

The story of Japanese prisoners is less happy. When a Japanese soldier is taken prisoner he is washed up—he never wishes to return to Japan for he is disgraced forever in the eyes of his countrymen.

We have in this country scarcely more than a hundred Japanese prisoners, and General MacArthur has only a few hundred more, according to General Gullion.

They are given the same food and accommodations as our own soldiers, because we hope by according such treatment to ameliorate the lot of our own 18,500 men held by the Japanese.

The first German soldier to be taken prisoner in Iceland was Sergeant Manfrak, who bailed out of his Junkers plane after it had been hit by U. S. army fighters. He is shown at intelligence headquarters, enjoying the rations on the tray before him, despite a bandaged arm and numerous bruises.

Yanks Had to Blast Japs Out of Holes On Marshalls

Doughboys of the Seventh infantry division who captured Kwajalein and other islands of the Kwajalein atoll during the invasion of the Marshall islands literally had to dig the Japanese out of the ground. Col. Syril E. Faine, infantry, of New Straitsville, Ohio, who is now in the United States, acted as deputy chief of staff of the division during the six-day campaign. He said the Japanese defenders of the mid-Pacific coral base had taken refuge in hundreds of shell craters by the time the first waves of infantry hit the shore on January 31 (February 1, Pacific time).

"It was just like killing rats," he declared. "The whole island was rubble, after the preliminary bombing and shelling. The Japs had crawled underground wherever they could, and the infantrymen had to stop at every hole and fire down into it, or throw grenades into it."

Playing Possum.

The Japanese were up to their usual nasty tricks, went on Colonel Faine. Even after they were hopelessly defeated, they refused to give up. At one point in the action, an American aid station was established close to a pile of three apparently dead Japs. Only two of them, it turned out, were really dead. The third, at the bottom of the heap, pulled himself up after playing possum for a long time and fired one ineffectual shot at an American officer. Other Japs blew themselves up with grenades.

The landing on the Marshalls, Colonel Faine said, was preceded by one of the most intensive bombardments of the war. Both army and navy planes participated, and later, warships pounded the Jap defenses. "One airstrip on the Wotje atoll was so chopped up," Colonel Faine said, "that not only couldn't the Japs get a plane off it, but you couldn't even have run a wheelbarrow along it."

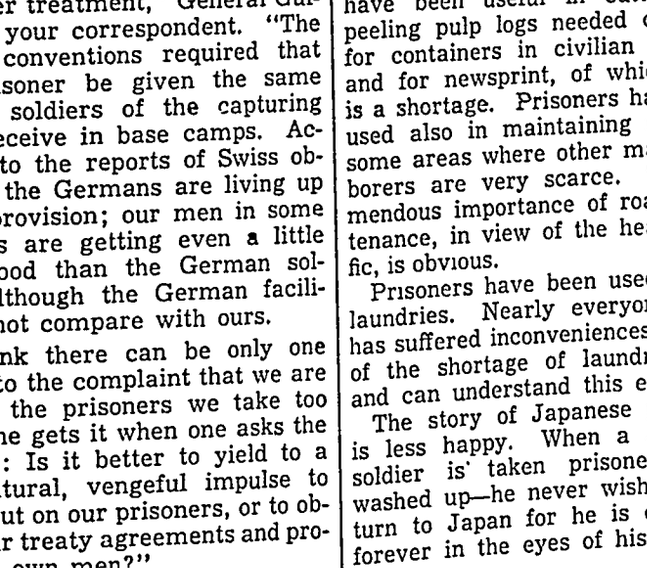
Amphibious Warfare.

The aerial hammering kept up as the invasion armada, containing more ships than there were in our whole navy at the start of the war, swept over the horizon. As the landings started, Seventh division infantrymen who had received special amphibious training drove their own "alligators" and "ducks" toward shore, and later ferried supplies back and forth from the mother ships.

The doughboys had relatively easy going when they first hit the beaches advancing 1,300 yards on the first day. On the second day, they began to run into lines of pillboxes, against which they advanced with combat engineers right behind them. With flamethrowers, grenades, and other weapons, the infantrymen calmly cleaned out each pillbox as they got to it. The engineers used 400 tons of dynamite on two islands alone, levelling everything on them.

TELEFACT

FEW JAP PRISONERS HAVE BEEN TAKEN BY U. S.



Leader of this orchestra of Italian war prisoners in Bizerte, Tunisia, is Joseph Pellegrino from Passaic, N. J., a citizen of the United States. He happened to be visiting in Italy when that nation entered the war. Despite his protests, he was inducted into the Italian army, and he served unwillingly until he was captured by American troops during the North African campaign. Sometime after this picture was taken, Pellegrino was accepted for induction into the U. S. army.

PATTERNS SEWING CIRCLE

Pattern No. 8559 is in sizes 11, 13, 15, 17 and 19. Size 13, jumper, requires 2 yards 39-inch material; jacket, long sleeves, 2⅛ yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Early Thought.

A BIT early, perhaps, to speak of graduation frocks, but the lovely young miss no doubt already is thinking of the time when she will want one of the prettiest, most youthful of frocks that she has ever possessed. This one is a love and can be used as her nicest dance dress later on.

* * *

Barbara Bell Pattern No. 1941 is in sizes 10, 12, 14, 16, 18 and 20. Size 12, long dress requires 4¼ yards 39-inch material; short dress, 3½ yards 39-inch material.

Spring Beauty.

IT'S a wonder garment—you can use it as the base for half-a-dozen costumes. Wear the jumper with gay blouses—the jacket with separate sports skirts, with slacks. Jacket and jumper worn with Ascot scarf makes a smart spring suit!

AS PURE AS MONEY CAN BUY

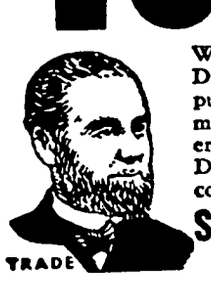
None faster. None surer. None safer. No aspirin can do more for you than St. Joseph Aspirin—world's largest seller at 10¢. 36 tablets, 20¢; 100 tablets, only 35¢. Be sure to demand St. Joseph Aspirin.

Gas on Stomach

Relieved in 5 minutes or double money back

When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

TOO BAD



We can't make enough Smith Bros. Cough Drops to satisfy everybody, because our output is war-reduced—so please buy only as many as you really need. Through three generations and five wars, Smith Bros. Cough Drops have given soothing relief from coughs due to colds. Still only 5¢.

MINOR SPRAINS

Naturally a man looks old beyond his years when he's sore from lumbago or other muscle pains. The famous McKesson Laboratories developed Soretone Liniment for those cruel pains—due to exposure, strain, fatigue or over-exercise. Get the blessed relief of Soretone's *cold heat* action;—

1. *Quickly Soretone acts to enhance local circulation.*
2. *Check muscular cramps.*
3. *Help reduce local swelling.*
4. *Dilate surface capillary blood vessels.*

Soretone contains methyl salicylate, a most effective pain-relieving agent. There's only one Soretone—insist on it for Soretone results. 50¢. A big bottle, only $1.

MONEY BACK— IF SORETONE DOESN'T SATISFY

"and McKesson makes it"

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

Rhubarb should be dug up, pulled apart into small sections, and replanted every 4 or 5 years.

MR. AND MRS. BRUCE PECK MARRIED 25 YEARS

Twenty-five years ago on March 13, 1944, Dora Wagner and Bruce Peck were united in marriage, and on March 12, 1944 they celebrated their 25th wedding anniversary at their home east of Klemme.

All of their children were home for the occasion. They are Mrs. Dorothy Keeling and husband, and Irene Peck of Clarion; Beryl Meryl, Terry, Thelma, Charlotte, Charles, and Doris Peck, all at home.

A short program was given: a welcome address by Donna Braund; nursery rhyme by Phyllis Johns; two vocal solos by Thelma Peck; a piano solo by Mrs. Glen Snider. "I'll take you home again, Kathleen, was sung by Helmar Hill, Clarence Smith, Mrs. Snider, Mrs. Dunlap and Thelma Peck, accompanied by Mrs. Peck at the piano. The family prophecy of 25 years from now was read by Mrs. W. O. Dunlap, and provided many chuckles

The honored couple were then presented with many beautiful gifts.

Guests attending the celebration besides the honorees, were Mr. and Mrs I E. Gordon of Miller; Mr. and Mrs. W. O. Dunlap, Mr.s Glen Snider of Algona; Mr. and Mrs. Clarence Smith of Kanawha; Mr. and Mrs. Donald Moore and daughter, Mrs. Edna Kroeger, Mr. and Mrs Joe Zillar of Belmond; Mr. and Mrs Ray Harson and son of Rowan; Mr. and Mrs. Paul Van Buskirk and daughter of Klemme; Mr and Mrs. Leslie Braund and daughter of Klemme; Mrs. Mary Faust and Anna, Mr. and Mrs. Clarence Faust and family, Mr. and Mrs Helmar Hill, Mr. and Mrs. D. J. La Bounty and grandson David Larsen of Kanawha; Mr. and Mrs. Geo Schrader and family, Mrs. Johns and daughter, and Mr. Ray Morris of Britt.

Refreshments were served at the close by Mrs. Donald Moore, Mrs Edna Kroeger, Mrs. Leslie Braund and Mrs. Glen Snider.

New Telephone Operator

Bert Jones, manager of the Central Iowa Telephone Co. here, has secured Mrs. George Cosgriff, of Britt as Chief Operator at the local exchange. Mrs. Cosgriff is an experienced operator.

The Jones family have moved to the Arnold house in South Klemme. Mr. and Mrs. Cosgriff will reside at the telephone office.

Keith Albertson left Monday night for Minneapolis to attend a lumber dealers convention for a couple of days.

Rev. H. E. Harvey was on the sick list the fore part of the week and confined to his bed.

Mr. and Mrs. Conrad Quandt were Mason City visitors Friday.

Clarence Bredlow of Glen Flora, Wisconsin, stopped in at the Times office today to renew his subscription He had been here to visit his father, Charles Bredlow, who had been ill, but is now much better.

FORMER BELMOND BOY TAKES RANK OF MAJOR

Announcement has been made by the war department of the promotion of Raphael F. Kernen, former Belmond boy, to the rank of major in the army air corps. Major Kernan has been serving in the European theater for over 21 months His wife and little daughter live at Des Moines.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Rev. Broberg of Garner was in Klemme on business Thursday.

Rev. and Mrs. H. E. Harvey were Mason City visitors last Thursday.

R.A. Jorgenson was at Goodell on business Thursday afternoon.

The Misses Marie Blank and Helen Albers were visiting in Des Moines Monday.

Mrs. John Lemke entered a Mason City hospital last week for treatment of pleurisy. She is reported to be getting along fine.

Shirley, daughter of Mr. and Mrs Quentin Stille, was taken to a Mason City hospital Thursday for treatment of pneumonia.

Mrs. E. J. Arnold and Evelyn; Mrs. Gerald Koerner and Terry and Mrs. Martha Bredbenner were at Mason City, Saturday.

Mr. and Mrs. Henry Jost drove to Mason City Friday to visit Mrs. C. K. Finders, who is a patient in the Mercy hospital.

Mr. and Mrs. Ed. Thompson and daughter Barbara, spent Sunday at the parental Thos. H. Thompson home in Kanawha.

Dr. and Mrs. W. F. Massman were dinner guests Sunday at the P M Wilson home. The occasion was Mrs. Wilson's birthday.

Mr. and Mrs. Ray Radloff of near Garner are the parents of a daughter born to them at the Rust Nursing home on Wednesday, March 1.

Mrs. Franklin Thompson of West La Fayette, Ind., spent Monday visiting at the home of her brother-in-law, Ed. Thompson and family.

Elwyn Jacobs of Simpson College spent Tuesday in Klemme visiting with his parents, Mr. and Mrs. Ed. Jacobs and family.

Mr. and Mrs. Louis Perkins received a letter from their daughter Darlene stating that she was now employed with the Southern California Power Company.

Mrs Mary Dominy, Howard and Josephine, of near Goodell, were dinner guests Sunday at the home of Mr. and Mrs. E. J. Schneider, east of Klemme.

The town council at Goodell has appointed Walter Boller assessor to fill the vacancy caused by the resignation of Francis McNulty, who moved to Belmond recently.

Mr. and Mrs. Lee Stuart and Mrs. Stella Hinton of Webster City came Sunday and were dinner guests at the Louis Perkins home. The occasion was Mr. Perkins' birthday anniversary.

Howard and Josephine Dominy returned home Wednesday from Ottawa, Illinois, where they went to attend the funeral of their grand mother, Mrs. Poole, who was 92 years old.

Mrs. Paul Kramer was taken to a Rochester, Minnesota, hospital for treatment last Thursday. She had been a patient at a Mason City hospital. Mrs. Max Fuller is taking care of the Kramer baby.

Monday was Mrs. W. F. Pavey's birthday and that evening the Benn Coobs and Verner Lewis families came and surprised her They brought home-made ice cream and cake which was served.

Mr. and Mrs. Herman Paul accompanied their daughter, Mrs. Ed. Epps and daughter Tally, to Des Moines last Thursday where Tally was fitted with glasses at the University hospital to correct an eye trouble.

Mrs. Harley Dawes, of Cedar Rapids, spent last Wednesday and Thursday visiting her brother, E. J. Thompson and family. She then went to Kanawha for a visit until Monday with her father, Thos. H. Thompson.

Mr. and Mrs. Frank Sandry received a letter from their son Bill, who is with the U. S. Army overseas. Bill said that he had the good fortune to run onto Dr. A. H. Dulmes of Klemme "somewhere in Italy." The Klemme men had a good visit.

Mr. and Mrs. Edmund Josten entertained the following to dinner at their home east of Klemme Sunday: Mr. and Mrs. Fred Becker; Mr. and Mrs. Ed. Becker; Mr. and Mrs Cecil Katter; Alfred Josten and family; the Becker Sisters and Eugene Habercamp; and Mrs. Peter Josten.

Mr. and Mrs. Fred Barz had a family dinner Sunday and entertained their children and families in honor of their son, Ronald, who is leaving for the armed service. Those present were Ronald Barz and family; Marvin Barz and family and Eugene Grieman and family.

Mr. and Mrs. Benn Coobs and Peggy were dinner guests Sunday at the Wallace Pavey home.

Mrs. Evert Barz and baby came home Sunday from the Mercy hospital in Mason City. Mrs. Armour Mullen has been taking care of the Barz children during the mother's absence and will help care for the new baby.

The Times received a letter from Mrs. P. W. Johnson of Humboldt, renewing their subscription. Mrs Johnson says they enjoy getting the news of their old friends here. She also stated that Miss Gladys Buchan, a former Klemme teacher, had been at Anchorage, Alaska, now for over a year. Mr. Johnson is a salesman for the Curtis Candy Company and enjoys a good business.

The Editor received a letter the other day from Sgt. Otho Keraus, who is in Italy. Sgt. Keraus had read the story of a 400 pound doe being killed on the highway near Klemme Otho said that some Minnesota and West Virginia soldiers also read thea rticle and caused a near riot, as they didn't want Iowa to get ahead of them on big deer, said deer that big was heavier than the national record. "Oats" held up the argument by telling them it was the Iowa corn the deer consumed that made it weigh so much!

Henry Sporra of Garner was a business caller in Klemme Monday.

Mr. and Mrs. R. A. Jorgenson visited at the Paul Grange home at Mason City Sunday afternoon.

Mr. and Mrs. Conrad Quandt left Sunday afternoon for Wichita, Kan. for a two weeks visit with their son-in-law and daughter, Mr. and Mrs. Ernest Gerardi and daughter, Gracka Maria.

Our Men In The Service

Mr. and Mrs Ben Neitland have received word from their son, George, who is with the U S Army in the South Pacific theatre of war that he was recently promoted from from P. F. C. to Corporal George has been in the Pacific Area for a number of months, being with one of the first units to arrive in Australia or that vicinity.

Sgt. Otho Keraus, son of Mr and Mrs. W. C Keraus, wrote his parents that he certainly had a fine birthday surprise on March 4th, when he received a box of cookies from his mother and other greetings and in addition to an already fine birthday, he was promoted to Staff Sergeant. Sgt. Keraus is stationed somewhere in Italy.

A number of Klemme folks who listen to the radio each morning to the "Breakfast at Sardi's" at Los Angeles, were delighted to hear the voice of a former Klemme boy now in the service When the master of ceremonies was asking the names of service men, Klemme folks were surprised to hear "Private 1st Class William Zabilka, Klemme, Iowa," come on the air Billy is the son of Rev and Mrs Wm. Zabilka, now of Merrill, Iowa.

Lloyd Wistey, Seaman Second Class, came last week for a visit in Klemme with his sister, Mrs E. F Jacobs, and his mother, Mrs Louisa Wistey at Clear Lake Seaman Wistey contracted malaria fever in the South Pacific and has been confined to a hospital for several months At present he is stationed at a rest camp at Davisville, Rhode Island and is improving in health.

Mr. and Mrs. Martin Brinkman have received word that their son Garland, who is with the Sea-Bees, is now stationed in the Aleutian Islands area.

Sgt. R. J Keeper, arrived home last week from Biloxy, Miss., on a ten day furlough which he is spending in Klemme and Mason City.

Melvin, son of Mr. and Mrs. Benn Coobs, writes his parents that he has been transferred to Camp White, Oregon.

Mrs. Willard Palmer has received word from Pvt. Palmer that he has been transferred to Denver.

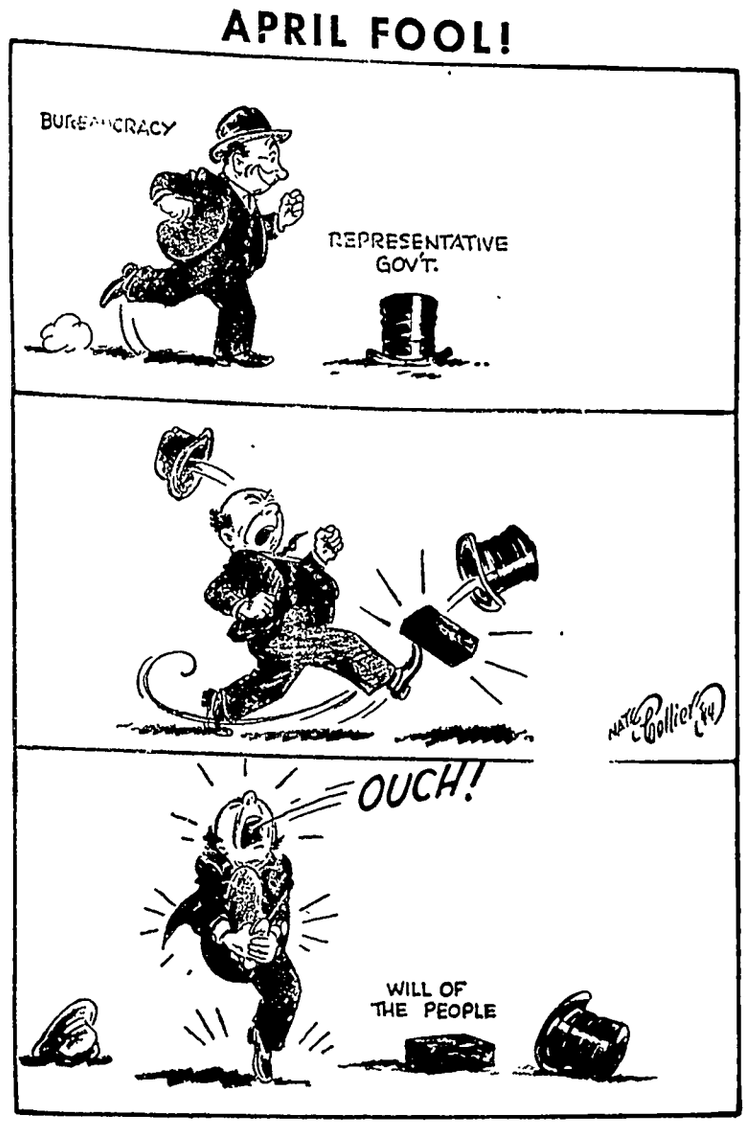
APRIL FOOL!



Auxiliary Women Plan Special County Program At Britt

COUNTY AMERICAN LEGION AUXILIARY EXTENDS AN INVITATION TO LADIES

The Hancock County American Legion Auxiliary, consisting of units of Garner, Klemme, Kanawha, Corwith, Crystal Lake and Britt, will hold a patriotic tea at the Memorial Hall at Britt on Tuesday, April 4 at 2:00 p m All wives, mothers, sisters and daughters of men and women now serving in the army are invited to attend

The event is planned as a special tribute to army personnel and is in recognition of Army Day which falls in the same week.

Due to transportation problems it is impossible to insure transportation to guests but is is suggested that those wishing to attend contact American Legion Auxiliary members of the town nearest them in order that car pools can be arranged.

A "Hero's Shrine" is being arranged. This will consist of exhibits of souvenirs sent home by men in service. Both guests and members are urged to bring exhibits for the display.

Registration will begin at 1:45.

ALL COUNTY OFFICERS SEEK RE-ELECTION THIS SPRING

Only Opposition Is For Office Of County Supervisor

With the filing date closed, all of the present county officials have filed for re-nomination in the June Primary. They are: Treasurer, Roy L. McMillin; Auditor, Fred C. Missel; Clerk, Elmer Raw; Recorder, Fern Peck Katter; Sheriff, L. M. Brower; County Attorney, Henry C. Meyer; Coroner, Kenneth F. Boughton; Supervisor for the term beginning Jan 1, 1945, Frank J. Schoun; for the term beginning on Jauary 1, 1946, John Chambers.

The only opposition on the republican primary are both for the office of Supervisor J. N. Steil is opposing Frank Schoun, and Ben F. Greiman is opposing John Chambers.

Methodist Men!

Methodist Men meet at Klemme next Monday at 7:00 p. m. for a supper program. The Hon. James I Dolliver, Fort Dodge, will be the guests speaker. Men will come from the Sub-District, including Clear Lake, Garner, Britt, Belmond, Thornton, Swaledale, Liberty and Klemme. All men are invited.

FORMER KLEMME COUPLE MARRIED AT DES MOINES

Miss Ruth Johnson And Donald E. Carson Exchanged Vows At Methodist Chapel March 7

Miss Ruth E Johnson, daughter of Mr. and Mrs. John A. Johnson of Klemme, and Lt. (jg) Donald E. Carson, son of George Carson of Livermore, Iowa, were united in marriage at the Methodist Church Chapel in Des Moines on Tuesday afternoon, March 7th, 1944, at 5:00 o'clock, with the Rev. Bacon officiating The couple were attended by Mr and Mrs. Frank Gibbs, also former Klemme residents.

This romance which ended so happily began when Mr. and Mrs. Carson were students in the Klemme high school nineteen years ago. At that time the Carson family lived in Klemme and Mr. Carson was the proprietor of the barber shop now operated by Don Christiance.

After graduating from the high school here, Mrs. Carson took up nurses training and for the past 10 years has had the responsible position of night superintendent of obstetrics at the Methodist Hospital in Des Moines.

Mr. Carson is serving in the U S. Navy and is stationed at Corpus Christi, Texas and holds the rank of Lieutenant junior grade.

Mrs. Carson will continue her work at the Methodist Hospital until after the war.

NEPHEW OF KLEMME WOMAN KILLED IN ACTION

Stanley Freie, Son Of Alvin Freie Loses Life On Foreign Soil

Mrs George Lawhorn received word that her nephew, Cpl. Stanley A. Freie, son of Mr. and Mrs. Alvin Freie of Belt, Montana, was killed in action March 4 in combat on foreign soil.

Stanley enlisted over a year ago and took his training at Camp Cook, Cal. He had been overseas for several months.

Corporal Freie was 18 years of age when he entered service. He is a grandson of the late Henry Freie of Klemme.

HOUSE WARMING PARTY HELD ON MR. AND MRS. CHAMBERS

The Loyal Workers and the Good Fellowship classes of the Klemme Methodist Church Sunday School held a surprise "house-warming" party on Mr. and Mrs. John Chambers at their home Monday evening.

Coffee and doughnuts were served and Mr. Dwight Hummell showed his colored moving pictures. All enjoyed a fine evening.

Entertainment Planned At High School Wednesday, April 5

FUNERAL SERVICES HELD TUESDAY FOR MRS. VELAU

Klemme Woman Died Suddenly On Sunday Morning At Home

Funeral services for Mrs. Charles Velau, 76, were held at the Klemme Episcopal Methodist Church Tuesday afternoon with arrangements in charge of the Wellemeyer Funeral Service, and with Rev. Herschel E. Harvey delivering the funeral sermon.

Mrs. Velau had been a resident of this community for nearly half a century, and had resided in the town of Klemme for about thirty-eight years.

Burial was in the Ell Township Cemetery south of Klemme and the pall bearers were Art Schoenwetter, Wesley Haefner, John Heginger, Wes Schuldt, Harry Gibbs and P. P. Schwartz.

The obituray is printed elsewhere in this issue of The Times.

CARD OF THANKS

We wish to take this means of expressing our sincere thanks for the many kindnesses shown us in our bereavement, and for the words of sympathy and for the flowers contributed in memory of our departed loved one.

Charles Velau
Earl Kahler and family
Mr. and Mrs. E. A. Zeidler
John Velau and family
William Velau and family.

(19-1tp)

MRS. WILLIAM SMITH DIED AT HOME OF DAUGHTER HERE MONDAY MORNING

Funeral Services Being Held At Methodist Church Thursday

Mrs. William Smith, a resident of this community for fifty years died Monday morning, March 27th, at the home of her daughter, Mrs John N. Day of Klemme. Mrs Smith had been in ill health for the past few years and had made her home with her two daughters, Mrs Day in Klemme and with Mrs. Bert Mathews at Clear Lake. She had reached the age of 83 years, 7 months and 22 days.

Services for Mrs. Smith are being held this Thursday afternoon at the Klemme Methodist Church in charge of the Wellemeyer Funeral Service, Rev. H. E. Harvey officiating.

Burial will be in the Memorial Park Cemetery near Mason City beside her husband, who died a few years ago.

She is survived by two daughters, Mrs. John N. Day of Klemme and Mrs. Bert Mathews of Clear Lake; one grandson, Dorance S Day and wife Ruth, and one great grandson, Gary Day of El Segundo, California; one sister, Mrs. S. T Barr of Manhatten, Ilinios; three brothers, Dr. W. G. Ross, Kempton, Illinois, Alex and Walter Ross of Garner.

MORE CONTRIBUTIONS SENDS RED CROSS TOTAL TO $707.05 FOR TOWN OF KLEMME

More contributions since the list was published has boosted Klemme's list of contributions to the Red Crosss up to $707.05, which is over $200.00 over the quota. Here are the contributors not previously listed:

Mrs. Henry Medaus	$5.00
George Schoenwetter	$15.00
Klemme Fire Co.	$5.00
Mr. and Mrs. L. Perkins	$5.00
Henry Smid	$1.00
Mrs. Armour Mullin	$1.50
Frank Sandry	$5.00
William Velau	$3.00
Mrs. Evert Barz	$2.00
Total to date	$707.05

HIGH SCHOOL WILL GIVE SPRING MUSICALE

A spring Musicale, directed by Mrs. Wayne Gifford, is to be held in the Klemme High School Gymnasium, April 5 at 8:00 p.m. Price 25 cents.

It will be a musical program consisting of numbers by contest entries, the band, girls' glee club, and choral reading by the speech class under the direction of Mrs. Howard Campbell.

Solos entering the Preliminary Contest at Mason City April 14 and 15 are as follows: Julia Bell, french horn; Clara Koehler, violin; Eunice Larsen, clarinet and soprano; Patricia Kudje, alto-saxaphone, saxaphone quartet; and the girls' sextet.

Saxaphone quartet members are: Patricia Kudje, Edward Barz, Edward Butenbach, and Jimmie Thomas. Sextet members are: Eunice Larsen, LaVohn Schlawin, Patricia Kudje, Ruth Bell, Julia Bell, and Clara Koehler.

Patricia Kudje's alto-saxophone solo previously won first place in the State Contest in 1942, and she will enter National Honor events April 28 at the State Contest.

Come April 5th and enjoy a full evening of musical entertainment.

KLEMME GIRL HONOR STUDENT AT HAMILTON'S

Miss Ardella Nelson, daughter of Mr. and Mrs. Verner Nelson, Klemme, placed on the Super Honor Roll for the Winter Quarter which was recently released at the Hamilton School of Commerce, Mason City.

While requirements for the Honor Roll demand that a student earn an average of B or 3 grade points with no grade below C, the Super Honor Roll requires an average of 3.5 or B+ with no grade below B. Only nine students attained super honors. Miss Nelson is enrolled as a Junior Secretarial student.

BRITT HEMP MILL MADE A TRIAL RUN

Roy Schaefer of Klemme, a mechanic at the Britt hemp plant, reports that the mill was officially inspected and made a trial run some time ago and last Thursday was taken over by the War Hemp Industries.

A hemp plant representative is now on hand working out some changes and putting the finishing touches on the equipment and it is expected that in several weeks everything will be in readiness and the plant will start operating.

More labor will be employed as needed and about 15 people will be required to operate the plant on the day and night shift.

HELLO, FOLKS!

T-5 Sgt. and Mrs. John Clements are the proud parents of a fine baby boy, weight 8 pounds, 5½ ounces, born to them on Saturday, March 25th, 1944, at the Mercy hospital in Mason City.

Sgt. Clements is stationed with the U S. Army over-seas.

Mr. and Mrs. LuVerne Drake of Cedar Falls are the parents of a baby boy, weight 7 pounds, 3 ounces, born to them at a Cedar Falls hospital on March 11th.

Mr. Drake is a former Klemme boy and Mrs. Drake is the former Miss Estelle Hanson, a teacher in our schools.

Surgeons Focus Attention On Infected Wounds in '43

In surgery in 1943, attention was focused, because of the war, on the treatment of infected wounds and on shock . . . The sulfonamide drugs are given by mouth and in some instances applied directly to the wounds to lower the rate of serious infection. The mortality among the wounded in this war is less than 3 per cent and in many engagements less than 1 per cent, contrasted with a death rate as high as 7 to 9 per cent in previous wars. The studies made on shock indicate that the administration of plasma was the important life-saving measure. Scientists reversed their views on the treatment of shock by stopping the use of heat in shock and resorting to the use of a simple blanket to prevent chill.

The attention of experts in nutrition turned away from vitamins and toward minerals and amino acids as essential substances. It was found that only 8 out of more than 22 amino acids are necessary to maintain the nitrogen required for the health and growth of the human body. The amino acids now considered essential for the health of the human being are isoleucine, leucine, lysine, methionine, threonine, valine, phenylalamine and tryptophan.

Says Banana Dehydration Can Supply More Food

Dehydration of fruit now being wasted in the great banana-growing areas of Middle America may offer a source of additional food to help meet the world's postwar food needs.

This is suggested by Donald F. Othmer of the Polytechnic Institute, Brooklyn, New York, a chemical engineer and authority on acetic acids, in a report to the Inter-American Development commission, Washington. His report is based on studies of ban... ...ion made in Honduras l...

Dehydration of bananas for export already is being done in Honduras and Brazil. However, Mr. Othmer believes possibilities for utilization of wasted fruit through drying are far from exhausted.

Preservation of bananas can be accomplished simply by removal of about 75 per cent of the water content, he explains, and then continues:

"The drying operation may be conducted on the whole fruit after peeling. Or the bananas may be pulped or emulsified before drying in a spray dryer. These operations give a fine powder.

"A peculiarity of the banana is that in the green state it has a high carbohydrate content as starch. This starch is self-converted to sugar during the drying process."

Story of the Match

The story of the ordinary match goes back to 1670 and the accidental discovery of phosphorus by a German alchemist in the city of Hamburg. By treating brown paper with phosphorus and drawing a sulphur-tipped splinter of wood through the folded paper, the "match" ignited. Matches so made were called "spunks."

The first useful friction match, however, was not "born" until 1827, when an English druggist hit upon the idea of attaching the combustible "head" to a splinter of wood with gum arabic as the adhesive agent. The match was then drawn through folded sandpaper until it ignited.

These early lighters bore such names as "Lucifers," and "Congreves." In the 1830s they were sold in the United States as "locofocos."

'Mud in Your Eye'

Blurred sight and double vision arise from the action of alcoholic liquors in paralyzing temporarily the delicate muscles of the eyes. Usually the eyes wobble long before the large muscles in the legs are affected enough to cause staggering. The tiny ciliary muscle, which controls the crystalline lens for near and far vision, also is affected early. This situation is further aggravated by a decrease in the powers of attention. The familiar drinking toast, "Here's mud in your eye," isn't so far from the truth.

MINOR SPRAINS

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

Today as Always...
MORE FARM TRACTORS ARE EQUIPPED with Firestone
GROUND GRIP TIRES
THAN WITH ANY OTHER MAKE

WHEN a product wins and holds customer-preference year in and year out you know its leadership is established on merit. On every score, by every yardstick of value, it has met and passed the test of critical public appraisal.

Since Firestone developed the first practical pneumatic tractor tire 12 years ago and put the farm on rubber, farmers have shown an ever-increasing preference for Firestone Ground Grip Tires. Their point-for-point superiority is known wherever farm tractors roll. ***That's why farmers, today as always, use more Firestone Ground Grip Tractor Tires than any other make.***

GREATER TRACTION

BOARD PROCEEDINGS

8TH ADJOURNED JANUARY MEETING

Garner, Iowa, March 20, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with John Chambers, F. J. Schoun, and Penn Eckels, present.

The minutes of the last meeting were read and approved as read.

On motion and second the Bond of Chas F. Merten, County Engineer, is approved as read.

On motion and second the application of John W. Holecek for a loan from the Permanent School Fund is hereby rejected.

On motion and second a letting is hereby ordered on the printing of 350 copies of the Hancock County Financial Report for the year 1943. Said report to be printed in Booklet form. Said letting to be held in the Board Room in the Courthouse at Garner, Iowa, on April 3, 1944, at 1 o'clock P. M The County Auditor be and he is hereby directed to cause notice of such letting to be published on March 29 in the official papers of Hancock County, Iowa.

On motion and second a letting is hereby ordered on medicine and medical care at the Hancock County Home for the year from April 1, 1944, to April 1, 1945. Said letting to be held at the Courthouse in Garner, Iowa, on April 3, 1944, at 1 o'clock p m.

On motion and second the road petition of Albert Chizek is hereby tentatively approved and Wm. Boehnke is hereby appointed a commissioner to locate a road between sections 16 and 21 in Township 96, Range 24, as provided in Chapter 237, Code of Iowa, 1939, and laws amendatory thereto.

Said commissioner to file his report on or before the 3rd of April, 1944, which report shall set forth the feasibility of the establishment of such road, the probable cost thereof and whether or not public convenience requires it.

WHEREAS, there is now pending before the Congress of the United States a bill, H. R. 2426 (S-971), which would authorize funds for postwar highway construction, a portion of which funds would be available for projects located on the Secondary Road System, and,

WHEREAS, the Board of Supervisors of Hancock County desires to secure for said county any such funds that might be available to said county, and,

WHEREAS, it is the opinion of the Board of Supervisors of Hancock County, Iowa, that projects for inclusion in a postwar highway construction program should be selected at this time in order that surveys and plans for same may be prepared without delay and thus be available when needed.

NOW THEREFORE BE IT RESOLVED: That the Board of Supervisors of Hancock County, Iowa, on this 20th day of March, 1944, recommends that the following projects be considered by the State Highway Commission and approved, subject to the requirements of the Federal Legislation if and as enacted and the rules and regulations governing same:

Description and Location of Projects:—

No. 1—Beginning at the railroad track in Kanawha, thence South to the SW Corner Sec. 27-94-25, thence East to Primary Road No. 69.

No. 2—Beginning at West ¼ Corner of Section 33-97-24, thence East to East ¼ corner of Section 34-97-24, thence North to the NW corner of Sec. 35-97-24, thence East to the NE Corner Sec. 33-97-23.

No. 3—Beginning at the SW Corner of Sec. 6-97-26 thence East to the SE Corner Section 4-97-26; also beginning at the Primary Road No. 111 in Woden, thence North to the NE corner of Section 4-97-26.

No. 4—Begining at the SW corner of Sec. 34-95-26, thence East to Primary Road No. 111, also beginning at the NW corner of Section 34-95-25 thence East through Klemme to the SE corner of Section 2-95-23.

No. 5—Beginning at the SE Corner of Section 29-95-26 thence North to the NE corner of Sec. 20-95-26, thence East to the SE corner of Section 15-95-26.

F J Schoun, Chairman, Board of Supervisors, Hancock County, Iowa

I, Fred C. Missal, Auditor in and for Hancock County, Iowa, do hereby certify the above and foregoing to be a true and exact copy of a resolution passed and approved by the Board of Supervisors of Hancock County, Iowa, at its meeting held on March 20th, 1944.

FRED C. MISSAL, County Auditor

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in D. D. No. 46-3.

WHEREAS, the applications for Homestead Tax Credit of L. A. Doege, Charles Hipp, Boyd Miller, Ben Aukes, Wm. Rike, Stephen Tjaden, Joseph Mokry, Lloyd Alborn, Ernest Senne, George C. Eden and Ben and Sena Limberg for the year 1943 have been mislaid or lost and whereas, said applicants did file said applications with the assessor of Bingham Township as provided for by law.

BE AND IT IS THRREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the State Tax Commission at Des Moines, Iowa, be requested to reimburse the applicants named in the preamble hereof in the sums due them on the 1943 tax as by law provided.

The County Auditor be and he is hereby directed to certify a correction of this error to the State Tax Commission which correction shall be accompanied by an affidavit from the assessor of Bingham Township, Hancock County, Iowa, and the Hancock County, Iowa, Board of Supervisors, which affidavit shall state the applicants hereinbefore mentioned made their application for the 1943 Homestead Tax Credit in good faith and under the provisions of laws governing such action.

The foregoing resolution was offered and read by Supervisor Eckels who moved its adoption, was seconded by Supervisor Chambers, whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels, and John Chambers, Aye. Nays—None.

On motion and second the Board adjourned to April 3, 1944, at 9 o'clock a.m.

F. J. SCHOUN, Chairman

ATTEST: FRED C. MISSAL, County Auditor.

REQUEST FOR IOWA WAR BALLOT

To be voted at the PRIMARY Election

Place of residence at time of entering service _____ (City, Town or Township) _____ (Street address, if any)

_____ (Ward, if any) _____ (County)

Age _____ **Length of residence in City, Town or Township** _____ (Years, Months, Days)

County _____ (Years, Months, Days) **State** _____ (Years, Months, Days)

I am affiliated with the _____ **Party.** (State Republican or Democrat)

Give complete address where ballot is to be sent (Print if possible)

Date _____ **Name** _____

_____ (Signature of Applicant) **Address** _____

NOTE: The above form, if cut out and forwarded at once to any voter in the armed forces of the United States, can be used in making application for a primary election ballot for use at the Primary election to be held June 5, 1944. This form is published by courtesy of this newspaper, and through co-operation with the Republican County Central Committee and Wayne M. Ropes, Secretary of State. The form must be filled out in full, and when signed by the voter making application for the ballot, should be forwarded to the county auditor of the county where the voter is entitled to cast a ballot. This should be done at the earliest possible time. An official ballot will then be forwarded to the voter who should mark and return it as quickly as possible.

OBITUARY OF MRS. CHARLES VELAU

MRS. CHARLES VELAU

Johanna Kraak was born October 27, 1867 in Schleswig, Holstein Germany.

She attended the village schools for several years in Germany, and then at the age of 12 years came to America with her mother and other relatives. Her father and two brothers could not obtain a release from their employer at this time, but took passage on another ship some weeks later. This ship encountered bad weather and was sunk and all on board were lost.

Johanna made her home with her grandmother, who lived at Ida, Michigan, where she attended a German Lutheran Church school. At the age of 16 she became a member of this Church by Confirmation. Shortly thereafter her relatives moved to Toledo, Ohio. Here she found employment in various homes as a maid.

On March 11th, 1886, at the age of 19, Johanna Kraak and Charles Velau were married in Toledo, Ohio. They commenced housekeeping on a farm in Liberty Township, Hancock County, Iowa, and ten years later moved to Klemme, where they continued to reside until the present day.

Mrs. Velau loved the out-of-doors and spent much of her spare time among her flowers and in her garden. She was a loving mother and a good wife.

Some 35 years ago she had a sick spell from which she never quite recovered, but she was able to be up and attended to her household duties. However, her daughter, Mrs. Zeidler, helped out from time to time.

On Sunday morning, March 26, 1944, Mr. and Mrs. Velau were up and preparing breakfast when suddenly Mrs. Velau suffered a stroke which ended her career.

She reached the age of 76 years, 4 months and 29 days and leaves to mourn her passing, her husband, Charles Velau; two daughters, Minnie (Mrs. E. A. Zeidler,) Klemme; and Lillie (Mrs. Earl Kahler,) of Garner; two sons, John and William, both of Liberty township; ten grandchildren, and four great grandchildren.

GRANDDAUGHTER OF FRED NAGEL IS MARRIED

Fred Nagel of Klemme, received an announcement of the marriage of his granddaughter, Miss Joy Ernestine Nagel to Mr. John Nveen Demsey, on Saturday, March 25 at 5:00 p. m. at the Congregational Church. Both are residents of Berkeley, California.

The bride is a daughter of Mr. and Mrs. Ray Nagel of Berkeley, and after graduating from high school she entered college and will complete a course in bacteriology in June and expects to follow that line of work.

Mr. Demsey is a graduate chemist and is employed as such.

The couple will begin housekeeping in an apartment in Berkeley.

MRS. KILGORE HONORED AT PARTY HERE

Mrs. Herman Paul entertained a number of ladies at her home Saturday evening in honor of Mrs. C. C. Kilgore, who is moving to Fort Dodge soon. The ladies spent the evening sewing on fancy work and visiting after which Mrs. Paul served lunch.

DID YOU LOSE IT?

R. F. Kehrberg of Sheldon assembled a collection of articles left by men, women, and children in his theater during the past 90 days. He placed the articles on display in the theater. Included among them were such things as children's mittens, a prayer book, a pair of men's trousers and belt, hats, caps, gloves, even hunting caps. Mr. Kehrbreg reported that children's mittens, hats, caps and gloves lead the list, with women's shawls, handbags and gloves, next. Signs were placed on the billboard in various places, some of them reading: "Everything that is lost isn't lost in this theatre, but some of them are," If you lost it, take it," "All goods lost over thirty days will be given away," "All cigarettes lost in this theatre will be smoked by the management."

SURPRISE FOR TEACHER

The usual thing for a school teacher is to have her pupils prepare a program for mothers, but the mothers of pupils in the Mt. Hope district in Warren county reversed the procedure. Nine mothers of pupils in the district arrived at the school unexpectly one afternoon, took over management and gave a program. The program consisted of songs, and nursery rhymes, and then a recess.

GOOD TIME NOW TO GET FARM MACHINES PAINTED

Farmers who haven't given their machines needed coats of paint this winter may do so in the days left before field work begins, suggests C. H. Van Vlack, extension agricultural engineer at Iowa State College. Repainting protects metal parts of machines from rust and wood parts from checking and decay

In preparing to paint machines, Van Vlick says to block them up so that all parts may be readily cleaned and painted. Remove all grease with turpentine or kerosene. Wire brush or scrape off loose rust from metal and scaling paint from woodwork.

Mix a quanity of red lead, linseed oil and gum spirits of turpentine according to the amount of paint desired. This makes a high quality first coat. Brush the paint evenly and thoroughly on all metal and woodwork Two coats will greatly increase the durability Blue lead or metallic zinc paint may be used. The latter is preferred where repainting of galvanized surfaces is desired.

Apply a finish coat of varnish paint or a good lead base paint with linseed oil. An attractive shade of brown can be obtained by adding a small amount of paste lampblack-in-oil to red lead paint. Thin the lampblack with turpentine or linseed oil before adding it. Any good quality exterior house paint can also be used as a finish paint.

Certain bright parts of machines should be protected from rust by a coating more easily removed than paint. Used engine oil will often do if the machine in housed. If exposed to the weather, more durable treatment such as ordinary axle grease should be provided. A brush, a can of thick grease and a few minutes' time will keep plow bottoms and rolling coulters in good scouring condition.

PLAN TO DOUBLE FARM MACHINERY

But New Machinery Increase Is Not Enough to Take Care Of Needs

Approximately double the 1943 output of farm implements is being built for 1944 But farmers will have to continue operating chiefly on a maintenance basis. D. K. Struthers, extension agricultural engineer at Iowa State College says that manufacturers are expected to meet production schedules on most farm implements.

Four Care Measures

Four measures will get Iowa farmers thru the 1944 crop season successfully, Struthers predits First of all, he lists proper lubrication. Not overloading or running machinery at too high speed is the second requisite. General preventive maintenance is next. Keep the bolts tight. Check for worn parts regularly to catch trouble before it gets serious Finally, custom work and exchange of machinery and labor among farmers are necessary

If those things are accomplished and Iowa farmers aren't confronted with a session of bad weather, they probably can win out over increased acreages. and less labor, Struthers says.

Normally Replace 10 Percent

Iowa farmers normally replace about 10 percent of their machines annually. For 3 years they haven't been able to do that, Struthers points out. He says this adds to the necessity for giving machinery first-rate care.

The quota of combines for the state this year is larger than the number of new machines supplied last year. The soybean acreage goal, however, is higher this year than last, and the soybean harvesting job actually will be more of a problem than in 1943. Farmers will need to have a lot of custom work done in combining beans, as well as in picking corn.

WRONG HOUSE

Mrs. A. W. Larson advised the Madrid Eastern Star ladies that she would make a contribution to a rummage sale and would leave the articles on the back porch. W. B. York and family now live in the house formerly occupied by the Larsons. The same morning the pickup was made for the rummage sale, three suits of Mr. York's, some guest towels, table linen and other articles were placed on the back porch to be picked up by the cleaners. Mrs. Minnie Langland picked up the articles she thought belonged to Mrs. Larson, forgetting that the Larson's had moved, and she actually got the York's things intended for the cleaners. The rummage sale was a success, including the sale of the York articles. Later the Eastern Star ladies assisted in rounding up the missing articles. It is reported that Mrs. Langland is threating to leave town until everyone stops laughing.

URGES STARTING HEALTHY CHICKS

Whitfield Says Pullorum Is Most Often Cause of Heavy Losses

Heavy losses of baby chicks can be avoided. Such losses are largely due to the purchase of chicks which are badly infected with pullorum, have been improperly hatched, or are weak and should have been destroyed. W. R. Whitfield, extension poultry specialist at Iowa State College, says much of the trouble is due to chick buyers being more conscious of price than quality. They therefore fail to urge the hatcherymen to produce and sell only good chicks.

Need Tested Flocks

Chicks which are free from pullorum are no accident but are the result of multiple testing oft he parent stock until it is free from the disease. Pullorum is the most sericus of chick diseases and chick buyers would do well to urge their hatcherymen to spend more money and effort in getting rid of hatchery flocks which carry this infection.

A light infection in one laying flock can spread the disease to many chicks in the incubator and cause disastrous results among chicks that came from clean flocks Flock owners desiring to have their chicks custom hatched should realize the necessity of having the flock tested in order to prevent the spread of the disease in the incubator.

Care Is Important

A infection can develop into a heavy one after the chicks are put in the brooder house because of improper feeding methods or temperature levels during the first few days of the chicks' life. If reasonably well brooded, good chicks will live well but widely varied temperatures or crowded conditions are prone to cause bowel trouble, due to temperatures which affect digest on.

Cornstalks and other crop residues if plowed under provide valuable food material for the crops and, in addition, they furnish the soil bacteria with material to work on, thus making other material in the soil available to crops.

Very early onions can be grown from the smallest onions on sale in grocery stores.

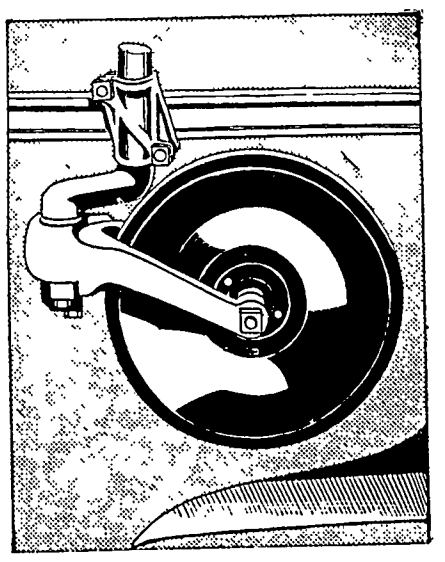
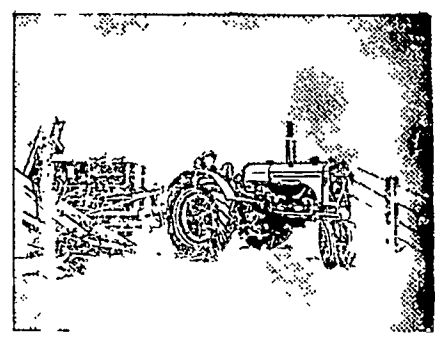
Tips ON FARM MACHINERY



ADJUST COULTER

Plow coulters should be set to cut one-half to two-thirds the depth of plowing. The hub of the coulter should be located 1 to 3 inches behind the point of the plow. In the third adjustment set the coulter out ½ to three-fourths inch, away from the landside.

Large coulters, kept sharp and properly adjusted, can be expected to do a good job.



Disengage Power Take-Off

Always disengage the power takeoff before turning at the end of the field, unless the machine is especially designed to give smooth operation on turns. Sharp angles cause excessive wear on the universal joints in the power takeoff connection.

WEEKLY NEWS ANALYSIS

National Income Reaches Record Level; Reds Press Closer to Baltic States; See-Saw Fight Marks Anzio Beachhead; U. S. Reinforced in Admiralty Islands

(EDITOR'S NOTE: When *opinions* are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Released by Western Newspaper Union.

Marshall Islands—Caught off Jaluit atoll in Marshalls by U. S. naval planes, this Jap freighter was strafed and bombed and set afire.

NATIONAL INCOME:
Record Level

Boomed by the war effort, the national income of the nation's 50 million workers soared to 142 billion dollars in 1943, with about two-thirds of it spent for goods and services, the department of commerce announced.

Reflecting the country's full swing into high speed production during 1943, income increased 26 billion dollars over 1942, but reflecting the continued shortage of civilian goods, expenditures only went up 8½ billion dollars.

From July to March, government spending reached 60 billion dollars, with 56 billion dollars paid out for the war effort. During this period, government receipts totaled 25 billion dollars, leaving a deficit of almost 35 billion dollars. Because of the recent fourth war loan drive, the government had a cash balance of 19 billion dollars.

Beverage Purchases

Of the 90 billion dollars that consumers spent for goods and services in 1943, six billion dollars were expended for alcoholic beverages, the department of commerce revealed. This brought expenditures for liquors up to $46 per person, compared with $39 in 1942 and $26 in 1939.

Despite the record expenditures for alcoholic beverages, however, less liquor was actually drunk, price increases accounting for the rise. Less than 74 million gallons of hard liquor were consumed in 1943, compared with 88 million gallons in 1942. Wine consumption dropped below the 1942 level of 112 million gallons.

Total beer consumed increased during 1943, however, chiefly because of a rise in demand from 10 million to 44 million barrels of the bottled type.

SOLDIER VOTE:
Compromise Bill

In an effort to give servicemen overseas every chance to vote and yet protect states' rights in supervising elections, congressional conferees drew up a compromise bill.

Under the bill, servicemen overseas from states with no absentee voting laws could use the blank federal ballot with only the names of the political parties designated if their governors approve, or, servicemen from states with absentee voting laws could only use the federal ballot if they fail to receive their state ballot by October 1.

So far, 20 states are reported to have adequate absentee voting laws, while nine others are considering such laws or about to convene their legislators to take up action on the issue.

RUSSIA:
Fighting; Diplomacy

Nibbling deeper into Nazi defense lines, Red troops pressed ever closer to the Baltic states of Estonia, Latvia and Lithuania, while German forces clung bitterly to their positions behind Russian forces at the southern end of the 800 mile front.

In Finland, there was agitation for better peace terms from the Russians as a basis for withdrawing from the war, with opposition to Moscow's proposals for restoration of the 1940 borders and discussion about disposition of northern Finnish territory.

Crossing the Narva river, Red troops advanced 15 miles into Estonia, while other Russ forces converged on the Latvian gateway of Pskov. Far to the south, the Reds met bitter German resistance as they tried to whittle down Nazi lines to the rear of General Vatutin's troops in Poland.

EUROPE:
Hold Ground

With concentrations of heavy enemy artillery pouring shells onto their beachhead, and with strong German armored forces stabbing into their lines, U. S. and British troops under command of Allied Gen. Harold Alexander held their own in see-saw fighting below Rome.

Gen. Alexander

Meanwhile, Allied bombers continued to blast at Nazi fighter-plane plants in Germany to reduce aerial resistance to a second-front and further attacks on European war industry.

Three times the Nazis lashed at Allied lines below Rome with tanks after heavy artillery preparations, and three times gallant U. S. and British troops gave way, only to bounce back in savage counterattacks restoring lost ground.

PACIFIC:
Gain Admiralties

Fighting with their backs to the wall in Japan's crumbling string of defensive outposts, enemy troops bitterly resisted U. S. landings on the Admiralty islands to the north of New Britain and the Solomons.

Bringing in strong reinforcements, Gen. Douglas MacArthur's command maneuvered the Japs into spreading their limited strength, however, and robbing them of concerted striking power.

As U. S. doughboys tightened their grip on the Admiralties, American warplanes ranged the whole breadth of the battle area, continuing to pound the big enemy base of Rabaul on New Britain, former feeder point for Jap barges supplying outlying islands. Occupation of the Admiralties put U. S. bomber forces directly in the path of enemy cargo shipping sailing southward to Rabaul, further weakening the once formidable base.

AGRICULTURE:
Corn Ceiling Sticks

Shortly after OPA had advised the Chicago Board of Trade president, Philip O'Brien, that the $1.16 price ceiling on corn would stick through 1944, the War Food administration announced allocation of wheat for food, feed, alcohol, export and lend-lease would begin before June.

In testifying before a senate agriculture subcommittee, O'Brien advocated a $1.45 corn top to relieve the drain on wheat for feeding hogs, since price supports on pigs make it more profitable to fatten them than sell grain on the market.

O'Brien's statement that the country was consuming more wheat than it produced was substantiated by department of agriculture statistics which show that over one billion bushels of the grain disappeared in 1943 against harvesting of 850 million bushels.

Support Egg Prices

Continuing its policy of supporting egg prices at parity, the War Food administration announced that it would pay an average of 30 cents per dozen for the period ending April 15.

Since January 1, WFA bought the equivalent of 3,980,000 cases, or 119,400,000 dozen, of shell eggs. Actually WFA purchased only 280,000 cases of shell eggs, although its acquisitions of dried eggs were the equal of 3,700,000 cases.

Continued WFA carlot purchases will be on the basis of U. S. wholesale No. 1 and No. 2 extras, with 45 pounds minimum net weight.

IRELAND:
Affected by War

Although war has not come to Ireland, its effects are being felt in the emerald island where the river Shannon flows, with lack of materials contributing toward the closing of many industries.

Recruitment of 130,000 Irish for work in Britain, and enlistment of another 100,000 Irish in the British army have helped relieve unemployment in the country, however. Even so, at least 50,000 are idle. In an effort to hold skilled help for post-war production to balance the nation's economy, many closed industries are keeping people on their payrolls.

Certain Irish industries are booming, especially those canning meats and milk for Great Britain. With woolen goods imports cut, Irish textile mills also are humming to produce material for the home market. In all, industries generally are operating at 66 per cent of capacity.

ARGENTINA:
Quell Revolt

Turbulent South American politics took another dramatic twist with an Argentine army officer's attempted revolt against the new government of ultra-neutral Gen. Edelmiro Farrell, which ousted ex-President Pedro Ramirez because his regime was inclined toward a declaration of war against the Axis.

Because the powerful "Colonels' Club" of army chiefs was behind the move to replace Ramirez, however, the rebellious officer found himself standing alone, with no indication that his 1,000 troops were panting for action. After marching from the capital of Buenos Aires, the rebels surrendered unconditionally.

Argentina's swerving back toward a strict policy of neutrality after the Ramirez' government's wavering away from it, revealed that country's insistence on maintaining its complete political independence, linking it up with its sister republic of Bolivia to the northwest.

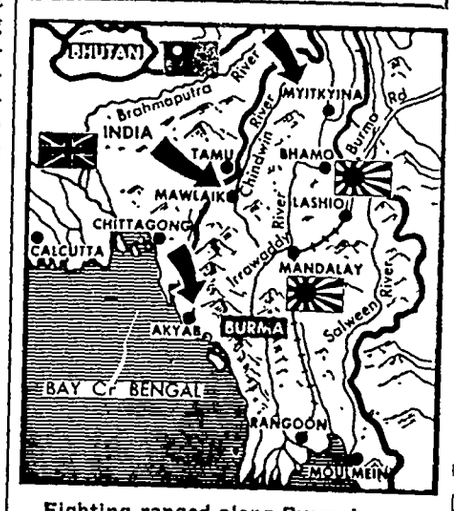
COLLEGE EDUCATION:
Would Change Titles

Claiming that professors' titles do not always reflect the real achievements of their holders, President Robert M. Hutchins of the University of Chicago proposed abolishing all teaching distinctions like professor, associate professor, assistant professor and instructors, and calling them all merely "members" of the faculty.

Hutchins' proposal was his latest in a long list of changes he has recommended for streamlining higher American education, the most noted one adopted so far allowing students to complete an ordinary four year course in two years.

Under Hutchins' latest plan, neither present salaries nor jobs would be affected by classifying all teachers merely as members, but some complained that in hard times when compensations would be stabilized, they would not be able to offset economic loss by obtaining more prestige through higher titles.

Burma Front



Fighting ranged along Burma's mountainous western border country, with Allied troops freeing two divisions of British-Indians trapped by Japanese moving against their rear (lower arrow). In two other sectors, the Allies drove against the enemy in the China hills (middle arrow), and fought to clear a supply road to China in the north (top arrow).

WOOL:
Stocks Plentiful

Although the nation now has adequate supplies of wool for clothing, the two-pants suit with a vest is still forbidden by the War Production board. The reason is the shortage of manpower, since it takes more work to make those extra garments. It's the same with pleats in women's dresses, but insufficient rayon goods for linings is another reason given.

Imports of wool from Australia were not halted by the Japanese navy, as was feared. Between 500 and 600 million pounds were brought in last year and in 1942. This, plus a domestic crop stimulated by a subsidy of 18 cents a pound has resulted in a stockpile of large proportions.

DIAMONDS

Germany reportedly is receiving industrial diamonds from the Belgian Congo mines by an ingenious smuggling route.

A half million carats have been reaching the Reich from Congo annually, according to London sources.

The diamonds are consigned to neutral Turkey and travel across Egypt, which is under British sovereignty. From Turkey the stones progress through the Axis-controlled Balkan states to Germany, it is believed.

HIGHLIGHTS . . . *in the week's news*

LEGISLATION: To discourage governmental agencies from issuing directives that do not express the intentions of congress, Rep. Wollcott of Michigan suggested at a committee meeting that hereafter all acts when passed have this footnote added: "By God, we mean it!" He also proposed that all legislation be written in words of one or two syllables.

JET PLANES: An article in the official publication "Air Force" states that the new jet-propelled planes can travel at least a hundred miles faster than the present propeller-driven planes. This is because air becomes compressible at speeds of 450 miles per hour, and the effect becomes apparent on the propeller. The jet-driven plane is not bothered by this phenomenon.

DREW PEARSON

Washington, D. C.

LATEST ON CIVILIAN GOODS

The Truman committee is about to issue a report which will be good news to manufacturers, to say nothing of the housewife who has been scrimping along with a worn-out refrigerator, no washing machine and an electric iron that blows out fuses.

The Truman committee will recommend that the War Production board go much further than the army has been willing in restoring production of civilian goods. The committee will not urge anything near unlimited production, but it will point out the following important facts:

(1) War contracts are being cancelled at an increasing rate. The war department cancelled 10½ billions in contracts as of January 31, while the navy cancelled 2⅓ billions up to February 5. This means more factories and more men available for civilian production.

(2) Tremendous stockpiles of steel and other materials have been accumulated—far more than can be used for the war. Already aluminum plants with a capacity of a half-billion pounds a year have been closed because the supply of aluminum is so great.

(3) The military was slow in curtailing civilian production. Now it is slow in letting the country get back to civilian production.

Therefore, the Truman committee recommends that while we cannot "soon resume full-scale civilian production, we can produce limited quantities of a few score additional items classified as essential."

SOME REVEALING FIGURES

The impending Truman committee report will reveal that 100 big corporations hold 70 per cent of all the war orders; furthermore, these 100 first companies of the nation had only 30 per cent of the country's business before the war—and the Roosevelt administration was supposed to help the little fellow!

Norman Littell, hard-hitting assistant attorney general, will get a boost from the Truman committee for hurrying up government payments to the farmers and others whose land was seized by the army and navy. The committee will recommend that all government purchase of land be handled by Littell.

American labor doesn't look so bad when contrasted with British labor. The Truman committee will find, despite the national service act, long operating in England, there were 1,638 English strikes involving a manpower loss of 1,676,000 man-days. Taking into account the larger population of this country, U. S. strikes were only .025 per cent worse than England—even without a national service act.

President Roosevelt didn't know it, but the Truman committee had prepared some devastating evidence supporting him on one of the most controversial phases of the tax bill—renegotiations of war contracts to recapture excess war profits.

Nevertheless, all the members of the committee except Mead of New York, Kilgore of West Virginia and Wallgren of Washington voted to over-ride his tax bill veto.

LOUIS BROMFIELD, THE PROPHET

Secretary of Agriculture Claude Wickard is chuckling over a letter he has received from the Reader's Digest, signed by William Hard Jr., associate editor. It is the last, pathetic note of a correspondence begun last summer when the Digest published the Louis Bromfield article, "We Aren't Going to Have Enough to Eat."

At the time, Wickard wrote to the Digest, refuting Novelist Bromfield, offering to write an article to tell the other side of the story and saying we would have plenty to eat. But the Digest declined to hear the other side.

They confided privately to Bromfield that they were embarrassed by reactions to his story, but publicly they stood on his gloomy forecast. He had said: "I would rather not think about next February. By then, most of our people will be living on a diet well below the nutrition level."

February has now come and gone. People are eating well despite Bromfield. American farmers have written the refutation. Actually, we have a greater accumulation of stored foodstuffs than at any time in history.

Wickard couldn't resist the temptation to rib the Digest, and recently sent to Editor DeWitt Wallace a few figures about the overflowing granary. In reply, he received merely a short note from William Hard Jr., saying, "Mr. Wallace is home, fighting off a cold."

MERRY-GO-ROUND

¶ Each day, White House reporters are given a list of the President's appointments, beginning usually at 10 a. m., with cabinet officers, military and naval advisers, diplomats, congressmen or other callers. Recently, reporters were startled to note on the calling list: "2:30 p. m. —Mrs. Roosevelt."

¶ Reports from Bolivia indicate that the new government, which the state department refuses to recognize, is becoming more and more entrenched.

Walter Winchell

(WNU Service)

Robert Ripley's exploiter reports that Ripley is the researcher on it . . . That Herr Goering's first name, Herman, came from a Jewish doctor, Herman Eppstein, of Tyrol, Austria . . . Goering's father was Governor of German East Africa. A widower, who couldn't take along his infant son—so he boarded him with Dr. Eppstein . . . The physician raised the boy—sent him through school in Bavaria and paid the tuition until he graduated as a lieutenant . . . Dr. Eppstein passed on in 1935 . . . No. 2 Nazi Goering attended the funeral . . . When he entered the synagogue, he paused at the door and asked if he should wear or remove his hat . . . Ripley adds: "In case you didn't know, the name Winchell in German means divining rod, the instrument that detects the truth."

In the foyer of the Barberry Room the other night Raymond Paige took this snapshot . . . A corporal noticing a colonel losing one of his eagles—meekly offered to pin it back . . . "Thanks," grumped the colonel, "the damb things catch on everything."

"Gee, sir," was the reply, "I wish I had your troubles!"

Bigtown Murals: At about 8:30 the other Monday night (during a heavy rainstorm) a packed Amsterdam Avenue trolley stopped at 128th Street. The conductor got out—went to a bar and grill—ordered two sandwiches and a beer—while the passengers waited 20 minutes . . . The newsreel theater in the Grand Central Station. It features a clock to the right of the screen . . . The clock is set two minutes fast—so spectators won't miss trains . . . The clock at the near-by Commodore Hotel bar is set three minutes ahead. Indicating that you can get away from a newsreel sixty seconds sooner than you can part from a drink.

The defacing of St. Patrick's Cathedral and other churches by some crackpot reminds us of what happened in Paris at the Place de la Concorde when the Nazis marched in . . . Ten German army bands held a concert and 8,000 Frenchmen were forced to assemble . . . Through the microphone the assemblage was asked: "Who doesn't speak German?" The whole crowd raised their hands, and a picture was taken . . . Which showed up in South America via the Goebbels propaganda machine—with this caption: "French crowds acclaiming German army in Paris with Nazi salute" . . . Dismiss this incident at these worshipping shrines as the job of those desperately trying to cause disunity and trouble.

The Wireless: "The Song of Bernadette," so beautiful to read and see, suffers from the slows on the kilocycles. It comes to the ears as ham-heavy, which it never is between covers and on the screen . . . The west coast comics "localed" you dizzy with their jibes at California's unusual weather. What you might call house-organ comedy, strictly for the family . . . One coast announcer got a mouthful of esses, and it came out: "Upton Close on the Noose" . . . The guffaw of the month was uttered by a Berlin radio expert named Von Hammer, who whimpered that "the Red Army is using unmannerly military tactics" . . . Fulton Lewis' blast at certain congressional under-the-belters was ear-arresting . . . John B. Kennedy was also aroused into slugging back at them.

Quotation Marksmanship: Ethel Smith: She was the light of his life, but it turned into an awful glare . . . Ambrose Bierce: Woman would be more charming if one could fall into her arms without falling into her hands . . . Eleanor Roosevelt: No one can make you feel inferior without your consent . . . Mme. Deluzy: A coquette is a woman without a heart, who makes a fool of a man who has no head . . . D. R. Henderson: The V for Victory is only half the W for Work . . . Christopher Morley: There is so much for me to say, but your eyes keep interrupting me . . . B. Lytton: A stiff man, starched with self-esteem . . . Garry Moore: He sweeps women off their feet—a Beau Broomel.

$64 Question: The President, they say, was asked (by a reporter) to name the member of the United Nations he considered the most important ally. "Is it Great Britain, China or Russia?"

"I'll ask you one," FDR said. "Which is the most important leg on a three-legged stool?"

Once William Allen White was attending a Democratic national convention . . . A Senator, smiling, announced: "In looking over the delegates I fail to recognize any clergymen, and so I shall call upon my good friend, William Allen White, to open the convention with a prayer."

Mr. White arose. Stabbing the Senator with a glare, he sarcasmed: "You will have to excuse me. I'm a little out of my element, and the fact is, I prefer the Lord does not know I am here!"

Immense Task of Soil Rebuilding Faces Managers of Nation's Six Million Farms

Land Being Mined by Excessive Cropping Will Need Fertilizer

American farmers face the most gigantic soil rebuilding job in all history when World War II is fought to a successful conclusion.

That is the considered opinion of farm economists, soil conservation experts and leading agronomists of state agricultural colleges throughout the country.

What this job will cost, no one knows yet, but it will be considerably above the 250 to 300 million dollar expenditure farmers have been making for fertilizer in recent years. Virtually all of the nation's 6,000,000 farms will need serious attention.

Two major reasons are cited by soil experts for this situation:

1—Wartime crop goals necessary to produce foodstuffs, meat, dairy products, oil and fiber crops for victory, are eating up the soil's resources of nitrogen, phosphorus and potash much faster than they can be replaced today. Steps to correct this must be taken immediately the war crisis is over.

2—The long-range job of soil conservation must be stepped up. Big-scale operations can be postponed no longer. The "fifth column" attacks of erosion are becoming more menacingly serious. Wasteful farming practices over a century and a half have squandered precious topsoil to a dangerous degree.

Farmers recognize that the present wartime drain on their soils' fertility level is a necessary contribution to victory. But they should bear in mind the imperative fact that wealth borrowed from the soil to help win this war, must be repaid later on.

Dr. George D. Scarseth, head of the agronomy department of Purdue university, summed things up when he said:

"Farmers in the Middle West and elsewhere throughout the nation are making a sacrifice in the war production program to an extent not fully realized by the world. Soils that have had to produce war crops by fertility exhaustion practices will not have dividends to pay after the war, but will require their own kind of taxation in the form of fertilizers.

"In reality, farmers are in the manufacturing business, the same as munitions makers, or steel producers. They are turning out essential products for our armed forces. They are manufacturing foods, feeds, fibers and oils out of the raw materials of the soil—the nitrogen, phosphorus, potash and lime.

"Fortunately all our soils are not exhausted of their inherited riches. But exhaustion is on the way even with our best soils, and we face a future where these raw materials must be added to the soils as fertilizers in greater amounts than in the past. Unless we do this, the productivity of the soil will sink to a dangerous level."

Concerning the future outlook, he said:

"Our war debt won't be only a matter of taxes and maturing bonds. Our farmers are asked to mine their soils because fertilizer materials are scarce. But crops must be made on the 'fat' of the soils. This means that a farmer of the future will have the handicap of a more exhausted soil and smaller crop yields to pay the taxes that will follow this war."

Tremendous Drain.

Just how big a drain on the soil's fertility resources does this extra crop production impose?

The answer is plenty! Take one single crop — corn — for example. Agronomists estimate that the 1941 corn crop in ten midwestern states removed 2,645,404,730 pounds of nitrogen, phosphorus and potash from the soil. Increasing wartime yields boosted this tax to 3,093,123,334 pounds in 1942 and 3,227,393,770 pounds in 1943.

Large as this removal was, it represents but a portion of the fertility loss from a single region. Add to it the fertility drain caused by producing huge yields of wheat, soybeans, potatoes, alfalfa, clover, oats and other crops and you have some idea of the depreciation of fertility resources. But that doesn't tell the whole story, either, for the job of producing livestock and dairy products requires heavy amounts of plant food, too.

The plain fact is that every time a crop is harvested and hauled to market, or livestock are shipped to a packer's yards, some of the farm's fertility goes with them. Those essential elements, nitrogen, phosphorus and potassium, in various compounds, have been drawn out of the soil by the plants that grew on it. The bigger and better the crop, the more vital minerals extracted. Ordinarily, much of these elements is replaced by rotation, fallowing, or application of fertilizers, but during these war years when every field mst be made to yield to the limit, there is an annual loss. Also, the scarcity of fertilizers, and shortage of help and machinery have conspired to impoverish the farmer's land.

There is still another important factor in this present soil-exhausting problem. That is the matter of increased acreage. In order to produce the extra crop quotas, not only do existing acres have to do a bigger crop yielding job but more and more acres have to be tilled. Much of this land represents a lower strata of fertility level and hence it is not able to bear the burden of heavy cropping effectively. A glance at acreage figures tells the story. In 1941 the total harvested acreage of principal crops in the United States was 334,130,600. In 1942 it rose to 338,081,000 and in 1943 to 347,498,000 acres. New production goals for 1944 propose the use of some 380 million acres.

One-Twelfth of Land Ruined.

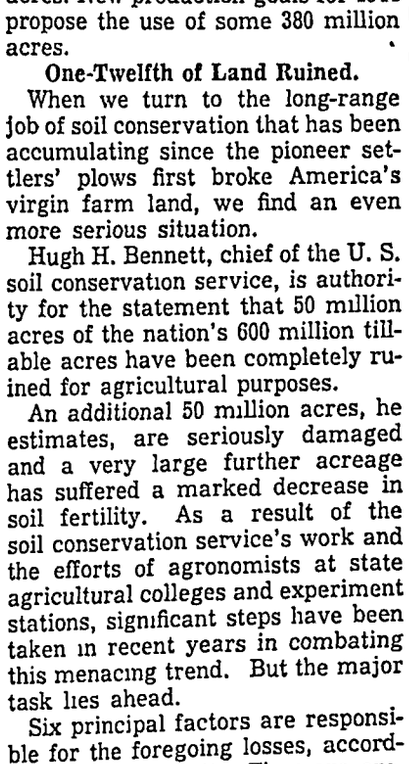
When we turn to the long-range job of soil conservation that has been accumulating since the pioneer settlers' plows first broke America's virgin farm land, we find an even more serious situation.

Hugh H. Bennett, chief of the U. S. soil conservation service, is authority for the statement that 50 million acres of the nation's 600 million tillable acres have been completely ruined for agricultural purposes.

An additional 50 million acres, he estimates, are seriously damaged and a very large further acreage has suffered a marked decrease in soil fertility. As a result of the soil conservation service's work and the efforts of agronomists at state agricultural colleges and experiment stations, significant steps have been taken in recent years in combating this menacing trend. But the major task lies ahead.

Six principal factors are responsible for the foregoing losses, according to Mr. Bennett. They are erosion, leaching, the removal of fertilizer elements by harvested crops, livestock and livestock marketing, oxidation of soil organic matter, and fire.

Erosion is the worst offender, removing annually 2,500,000 tons of nitrogen, 900,000 tons of phosphorus and 15,000,000 tons of potash—the three major plant foods which make the productions of crops possible.



Hilly land often considered practically worthless can be made to yield good returns by proper strip cropping. C. D. Blubaugh, Danville, Ohio, is shown weighing the harvest from such a field. He is one of the three million farmers now included in 693 soil conservation projects.

An aerial view of a large Georgia farm on which several soil conservation methods are used. In the upper part of the picture appears a large meadow strip, which serves as a safe water disposal area for surface runoff from adjoining fields. The curved bands are contour strip cropping, and terracing. The owner, Dr. A. C. Brown of Royston, also follows improved rotation practices.

Harvested crops rank next in depleting the soil and are in normal years responsible for taking out an additional 4,600,000 tons of nitrogen, 700,000 tons of phosphorus and 3,200,000 tons of potash.

Nearly a third of the fertile topsoil of American farms has been lost due to erosion, floods and the damaging effects of overcropping, according to a statement issued by the Middle West Soil Improvement Committee.

Six Inches of Topsoil.

"A century and a half ago," says the statement, "there was an average of nine inches of topsoil spread over the entire United States. Today this averages only six inches in depth.

"The present war emergency, as well as the future of American agriculture itself calls for a determined fight against the forces of soil depletion. The effectiveness of the individual farmer's soil management plan in wartime as well as in the peace era to follow, can be aided by the cooperation of agronomists at state agricultural colleges and experiment stations. Through research and experimentation over a long span of years, these experts have developed information concerning fertilizer needs for various crops and soils that is helpful to the farmer who is striving to rebuild his soil's productivity."

In combating the destructive effects of erosion, individual farmers and organized agriculture are confronted by a stealthy, fifth-column enemy. Erosion's damage is gradual and in the first stages, barely noticeable. But once it gains headway, winds and rains not only carry away valuable topsoil, but also remove needed fertilizing elements such as nitrogen, phosphorus and potash.

Conservation methods are the surest means of reducing these losses of valuable topsoil and plant nutrients. It has been found that soils having a cover crop suffer only a fraction of the losses from erosion that other farm areas experience. Not only will grasses and legumes provide effective vegetative cover for holding topsoil in place and furnish a balanced ration for farm animals, but they promote nitrogen fixation, improve the soil tilth and help increase crop yields following in the rotation. This is particularly true where adequate fertilization is undertaken.

Bonds Will Provide Funds.

Fortunately the means for accomplishing this soil replenishment job are in the hands of virtually every American farmer. Dollars invested in war bonds now that farm cash income is at the highest level in history and farm debt at the lowest point in many years, can provide the ready cash to pay for the purchase of nitrogen, phosphorus and potash needed to restore the fertility level of farms later on.

"It is not too early to begin planning for this agricultural reconstruction job, any more than it is premature at present to lay plans for future political and economic peace," a statement by the Middle West Soil Improvement Committee concludes. "For it is becoming increasingly clear that the whole structure of future security will rest on the productivity of the soil. While every encouragement will be given to soil rebuilding projects by the federal government and by state agricultural agencies, the major responsibility for getting the job done will rest on the shoulders of individual farmers. By earmarking part of present war bond purchases now for peacetime soil rebuilding expenditures, farmers can be ready when the materials and manpower become readily available in the postwar era."

Ammonium Nitrate Will Boost Yield of Hay Or Brings Pasture to Grazing Stage Earlier

The use of nitrogen as a means of increasing vitally needed hay and pasture production to meet wartime feed requirements, was recommended by Dr. D. H. Dodd of the Ohio State university.

Summarizing the results of a series of experiments, Dr. Dodd declared that:

1. Sixty pounds of nitrogen, equivalent to 175 pounds per acre of ammonium nitrate applied to a good sod of timothy or other hay-type grass by April 1, will on the average produce an extra ton of 6 to 9 protein hay if cut at the proper early stages.

2. A similar application of nitrogen applied to a good grass pasture sod will bring the herbage to the grazing stage two to three weeks earlier than without the nitrogen. By the time untreated pasture is making sufficient growth to carry its normal load, the nitrogen-treated grass will have exceeded it by 700 to 1,000 pounds of herbage containing 175 to 250 pounds of protein per acre, figured on a dry basis.

3. The inclusion of 20 to 30 pounds of nitrogen with phosphorus or phosphorus and potash in a first treatment for general pasture improvement, may be expected to increase the returns the first year by 50 to 75 per cent instead of 25 per cent, which is a reasonable expectation for the first year for the mineral without nitrogen.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

THE SACREDNESS OF LIFE (TEMPERANCE LESSON)

LESSON TEXT: Gen. 1:27, 28; Matt. 12: 11, 12; Rom. 14:19-21; I Cor. 6:19, 20.

GOLDEN TEXT: Know ye not that your body is the temple of the Holy Spirit?—I Corinthians 6:19.

A high and ennobling concept of the value of human life is an important element in Christian thought. The Word of God always regards human life as sacred—a gift of God to be used for His glory, never to be exploited for gain or destroyed at will.

This important truth needs constant reiteration in a social order which is so shortsighted and sinful that it will permit the destruction of man through the sale and use of alcoholic beverages. The lesson has a real application to the liquor problem.

I. God Honored Man (Gen. 1:27, 28).

It should be of primary interest and concern to discover what the Maker and Lord thinks of His creation, man. He knows what is in man and if we learn of Him we may come to evaluate man aright.

1. He Made Him in His Own Image (v. 27).

The teaching of Scripture makes it clear that this image was not anything material or physical, but rather a likeness of personality. As God is a personal, moral, intelligent Being, so is man.

How tragic then that man will not only reject that grace, but will subject his God-given personality to the narcotic and destructive influence of alcohol.

Not only did God make man in His image, but—

2. He Gave Him Power and Authority (v. 28).

This is the very thing man is seeking, and here we learn that the only One who had a right to give it—God Himself—bestowed it upon man.

Having dominion over the entire earth, man is in a place of responsibility, not only for his own moral choices, but for the welfare of others. Think that over as it relates to the ever-growing liquor problem.

II. Man Should Honor Man (Matt. 12:11, 12; Rom. 14:19-21).

Since God has such a high regard for man, it is clear that we ought to have real respect for our fellow man. "Man's inhumanity to man" is often declared to be the world's greatest difficulty. It would not be so if God's Word were obeyed. Man would learn that—

1. He Should Recognize His Fellow Man's Value (Matt. 12:11, 12).

Property values are so well to the front in the thinking of all, that it requires no argument to convince anyone that a sheep that has fallen into a pit should be rescued. But the sad thing is that the man who would run for help to rescue a sheep in that predicament will hardly cast an interested glance at the drunk in the gutter, or lose a few minutes sleep over the girls who are going to hell by way of our countless taverns.

The plain fact is that we do not regard a man as of more value than a sheep. Many a neighborhood has been stirred to angry reprisal over the poisoning of a pet dog, but will let the liquor dealer poison men and women—all for a small license fee.

The man who loves his fellow man knows that—

2. He Should Sacrifice for His Fellow Man's Good (Rom. 14:19-21).

Paul here states a high principle of Christian consideration. He makes clear that man is his brother's keeper and must do nothing which will tempt his brother to do that which will harm him.

III. Man Should Honor Himself (I Cor. 6:19, 20).

Man is told not to think more highly of himself than he ought to think (Rom. 12:3), and that is good counsel. But at the same time he ought to think as highly of his own being as God does. He should recognize that—

1. His Body Is the Temple of the Holy Spirit (v. 19).

The Bible teaches that the moment a man believes in Christ his body becomes the dwelling place of the Holy Spirit. That means that he must never take that body in any place (such as a tavern) to do anything or partake of anything (like intoxicants) which would dishonor the Holy Spirit of God.

2. He Belongs to God (v. 20).

Men have been given a free will by God. He has given them the right of self-determination. That does not abrogate God's right to man's devotion and love.

The fact that we are free to choose should make us the more determined that the right choice should be made—that we shall glorify God in our bodies, which are His.

Does it take even a moment's thought to tell us that the violation of that body (and every bit of scientific evidence proves it to be a violation) by the use of alcohol is not only disobedient, but sinful rebellion against God.

RUB FOR COLD MISERY
Spread Penetro on throat, chest, back—cover with warm flannel—eases muscular aches, pains, coughs. Breathed in vapors comfort irritated nasal membranes. Outside, warms like plaster. Modern medication in a base containing old fashioned mutton suet, only 25c, double supply 35c. Get Penetro.

How Sluggish Folks Get Happy Relief

WHEN CONSTIPATION makes you feel punk as the dickens, brings on stomach upset, sour taste, gassy discomfort, take Dr. Caldwell's famous medicine to quickly pull the trigger on lazy "innards", and help you feel bright and chipper again.

DR. CALDWELL'S is the wonderful senna laxative contained in good old Syrup Pepsin to make it so easy to take.

MANY DOCTORS use pepsin preparations in prescriptions to make the medicine more palatable and agreeable to take. So be sure your laxative is contained in Syrup Pepsin.

INSIST ON DR. CALDWELL'S—the favorite of millions for 50 years, and feel that wholesome relief from constipation. Even finicky children love it.

CAUTION: Use only as directed.

DR. CALDWELL'S SENNA LAXATIVE CONTAINED IN SYRUP PEPSIN

SNAPPY FACTS ABOUT RUBBER

In 1912 tropical Americas produced their greatest output of rubber—62,000 tons. It is expected that we will import 41,000 tons from these countries in 1943, an important supplement to our synthetic supplies.

Some experts estimate that there are around 300 million Hevea (rubber) trees in Latin America. Most of them are in jungles, difficult to get at.

"Alcohol and driving don't mix" may still be a worthy admonition, but nevertheless, millions of gallons of alcohol are needed as a raw material to make synthetic rubber for the production of tires now so essential to driving.

FALSE TEETH AND A GRAND SMILE!

LAUGH, EAT, TALK, FREE OF EMBARRASSMENT

It's so easy to enjoy all-day confidence when your plates are held in place by this "comfort cushion," a dentist's formula.

1. Dr. Wernet's Powder lets you enjoy solid foods, avoid embarrassment of loose plates. Helps prevent sore gums. 2. Economical; small amount lasts longer. 3. Pure, harmless, pleasant tasting.

All druggists—30¢. Money back if not delighted

Dr. Wernet's Powder
LARGEST SELLING PLATE POWDER IN THE WORLD

NEW METHOD FOR COLLECTING

It is the usual practice in selling a lot of farm machinery, especially tractors, to put the names of bidders in a hat and the lucky winner gets the machine. This is because of the OPA ceiling price. During the recent Red Cross drive, Rex Thomas of Guthrie Center added a new angle by telling the bidders that a Red Cross donation, possibly $2 00, would be expected, if the bidder wanted his name in the hat 45 men did. The $90 was given to the credit of Seeley township. Guy Parker got the tractor, on which he was bidding, for $735, plus his $2 donation.

Oats are not essential for good dairy production A ration containing a mixture of 700 pounds of corn to 100 pounds of oilmeal or ground soybeans, with good legume hay will be satisfactory, says C. Y. Cannon, head of dairy husbandry at Iowa State College.

When you have company or take a trip, that's news. Phone 12.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

---

Frank Ward began work last week as one of the fireman at the hemp plant at Britt.

Mr. and Mrs. Ed. Becker spent Sunday visiting at the Sylvan Johnson home near Forest City.

Otto Baack, of Tracy, Minnesota, came Sunday for a visit with relatives in this community.

C. G. Waterman has been absent from the bank since Thursday due to illness.

Dean, son of Mr. and Mrs. Merlin Neuberger, spent Monday afternoon with his grandparents, Mr. and Mrs. John Neuberger.

Miss Etta Lou Webner is spending this week visiting with her brother, Pfc. Herbert Webner and family at Madison, Wisconsin.

Mr. and Mrs. Bert Mathews of Clear Lake came Saturday evening and visited over Sunday at the J. N. Day home.

Mr. and Mrs. Donald Bacon and children, Jo Ann and Charles, of Leland spent Sunday at the parental Arthur Wellemeyer home.

Dr. and Mrs. D. P Anderson went to Forest City Thursday afternoon to attend the funeral service of Mrs. T. I Thompson.

Mrs. Verner Lewis left Tuesday morning for Marion, South Dakota to see her mother, Mrs. Dick Ebeling, who is ill.

Little Tally Epps of Des Moines is in Klemme visiting with her grandparents, Mr. and Mrs. Herman Paul until Easter.

Mrs. Naska Bock went to Mitchellville Friday for a visit with her son-in-law and daughter, Mr. and Mrs. Lyle Burr and family

Mrs. Donald Speer arrived home Friday from the West Coast for a visit with her parents, Mr. and Mrs. Verner Lewis.

Ed. Thompson went to Iowa City Sunday for a check-up on his eye at the University hospital. He returned home Tuesday.

Mr. and Mrs. Wally Smith and children of Mason City were dinner guests Sunday at the Sumner Trumbell home.

Mrs. E. J. Schneider returned home Sunday from Moville, Iowa, where she spent a week visiting with her daughter, Mrs. Dale Schreiber and twin daughters.

Mr. and Mrs. Jake Tuff of Browerv lle, Minnestoa, are spending a few days at the Dan Webner home. Mr. and Mrs. Jake Tuff are Mrs. Webner's uncle and aunt.

Mrs. Donald Turgasen has been absent from her teaching duties in the high school for the past week due to illness. Mrs. Leo Esbeck was teaching for her.

Mrs. A. H. Dulmes and mother, Mrs. Mary Mutch of Grundy Center, came Tuesday of last week and were guests until Wednesday at the George Lawhorn home.

Mrs. J. A. Chambers of Klemme, and her sister Mrs. Oma Jacobs of Corwith returned home Thursday from Rutland where they went to attend the funeral of a relative.

Mrs. Mary Aldrich and daughter, Mrs. Miles Suter of Morristown, Minnesota, spent the week end in Klemme visiting at the home of Mr. and Mrs. John Chambers.

Mrs. Donald E. Carson, of Des Moines, came Tuesday and visited until Wednesday evening with her parents, Mr. and Mrs. John A. Johnson.

Mrs. Willard Palmer and Dorothy returned home the past week from Amarillo, Texas. Mrs. Dan Webner went to Texas to accompany them home. Pvt. Palmer expects to be transferred to another camp.

Mrs. W. F. Pavey, Mrs. Gerald Koerner and Mrs. John Clements went to Garner last Thursday afternoon and visited with Mr. and Mrs. Otto Schlawin and Grandma Caroline Schlawin.

Mr. and Mrs. Ed. Rall of Hanover, Illinois, visited with relatives and friends in this community for a short time Sunday afternoon on their way home from Rochester, where they had taken a friend.

Mrs. George Lawhorn has received word that Mr. and Mrs. Tod Berlin are being transferred from San Antonio, Texas to Los Angeles. Mr. Berlin is employed by the government.

Mr and Mrs. Walter Merkel and children of Des Moines have returned to Klemme and Tuesday they moved into one of the apartments over the post office. Walter had been employed in the ordnance plant for several months.

Rev. H. E. Harvey, who has been ill for about two weeks, was able to be up and attend church services Sunday. Rev. F. Earl Burgess, the District Superintendent, delivered the morning sermon at both Klemme and Liberty.

Mrs. George Rule and Mrs. Jesse Gregory and son, Brian, of Dow City, Iowa, came Sunday morning for a short visit with their daughter and sister, Mrs. Gerald Koerner and family.

Mrs. Leppo Wessels and son Paul of Clarion, came Monday to do some wall papering in their two houses in Klemme. Mr. Wessels, who operates a bowling alley at Clarion, has not been very well this winter following an attack of the flu.

Mr. and Mrs. Howard Baack entertained neighbors to three tables of Five Hundred Friday evening. High prizes for men and women were won by Mr. and Mrs. Leslie Hartbeck and the low prizes were won by by Mr. and Mrs. Alfred Josten. Lunch was served later in the evening.

Mr. and Mrs. R. A. Jorgenson returned Sunday afternoon from a weeks visit with their son, Lt. Ray Jorgenson, Jr., wife and baby daughter at Dodge City, Kansas They also spent a couple of days in Kansas City visiting with Mrs. Jorgenson's father, Titus Davis and her brother-in-law and sister, Mr and Mrs. Hugh Chapman. The trip was made by rail from Mason City

GARNER GIRL IS WINNER OF COUNTY SPELLING CONTEST

Esther Hartbeck, Klemme, Iowa Runner-up

Margaret Brugman of Garner Elementary school was declared the winner of the Hancock County Spelling Contest held at Garner, April 1, 1944 and is eligible to represent this county in the state contest to be held later this month.

The winner of the written contest of 100 words was Margaret Brugman, Garner. Second place, Donna Hevelin, Ell No. 4.

The winner of the oral contest was Esther Hartbeck, Ell No. 5. Margaret Brugman, second.

The final oral spell down between the two winners resulted:

Margaret Brugman, Garner Independent, first, $5.00. Esther Hartbeck, Ell No. 5, second, $3.00 in war stamps.

Other war stamp winners were: Emeline Book, Madison 2, third, $1.00, in war stamps. John Burgardt, Britt No. 5, fourth, $.50 in war stamps. Emmett McMahon, Britt No. 5, fifth, $.50 in war stamps.

The contest attracted about 300 interested persons, in addition to the thirty-three (33) contestants.

GET ALL MACHINES IN SHAPE NOW FOR SEASON

D. K. Struthers, extension agricultural engineer at Iowa State College, this week sounded a last preseason recommendation to farmers to get their farm machines repaired before April 1.

After the field work starts, taking time off to arrange for machinery repairs will be difficult because many farmers will agin be operating short handed. Iowa implement shops have been extremely busy all winter. Farmers have had countless repair job done. But those who still have repair work to do should take care of it, now, he said.

Ninety-five percent of needed repair parts are available, according to Struthers. But the other 5 percent has been causing farmers inconvenience and loss of working time in attempts to secure them. The most serious shortage is in some tractor parts. This is not credited to a lack of raw materials, but rather to a conflict of orders for tractor parts and war equipment parts in the same companies.

Struthers suggests that farmers who haven't completed their repair jobs check over and repair their disks, plows and tractors immediately. The corn planter and then the cultivator follow. These machines will be needed before June 1. Haying machinery, harvesting equipment and finally the corn picker can be examined and repaired in that order.

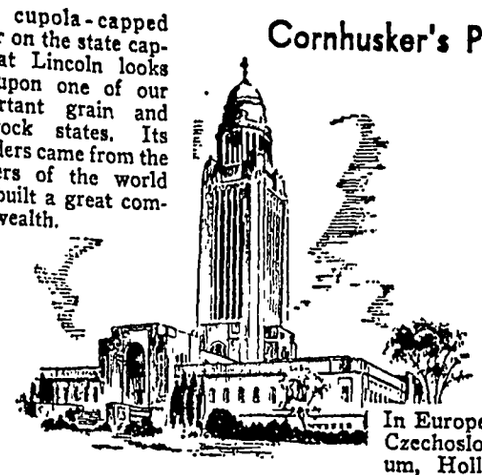
Incomplete milking may be a contributing cause of mastitis.

It takes 19 cents of the consumers' dollar for foodstuffs at the present time as compared with 31 cents during World War I.

BONDS OVER AMERICA ★ ★ ★

This cupola-capped tower on the state capitol at Lincoln looks out upon one of our important grain and livestock states. Its founders came from the corners of the world and built a great commonwealth.

Cornhusker's Pride



In Europe too, Poland, Czechoslovakia, Belgium, Holland, France, Norway and other countries were striving for better, more peaceful days and then Austria spawned Adolf Hitler.

Merten Tells Of Work Being Done On Roads In County

ROAD NOTES
By C. F. Merten, Co. Engineer

Most of you will recall that in the depressioin years, of about ten years ago, the Federal Government approriated money for various projects to provide work for idle men. Much of the money was wasted because no advance plan was made for the work that was done. There is a strong probability that many men will be idle when the present conflict is concluded and county, state and national governments are cooperating in making preparations for the critical times which may occur.

There is now pending before the Congress of the United States a bill, which would authorize funds for postwar highway construction, and it is estimated that the portion of this money to be spent on secondary roads in Hancock County will be approximately $60,000.00 per year for three years. In order to receive this money it will be necessary for Hancock County to add one dollar for each three dollars provided by the Federal Government or approximately $20,000 per year, making available $80,000. per year for three years.

The State Highway Commission has requested each county in Iowa to prepare a three-year program of highway construction, which will be sufficient to utilize the funds available, and the Hancock County Board of Supervisors, at their meeting held March 20, 1944, adopted the following program for postwar construction.

Project No. 1, 9½ miles, located Goodell to Kanawha. Project No. 2, 7½ miles, located Hayfield through Miller to SE corner of Section 28, Ellington Township. Project No 3, 7½ miles, located at Woden north and west to County Line. Project No 4, 21 miles, Corwith through Klemme to County Line. Project No 5, 4 miles, Stilson west and south.

The work will include grading, graveling and necessary bridges and culverts. The purchase of right of way and making of surveys will be started soon, but the actual construction is not to begin until the war is won.

The plans for he work must of Public Roads and the grading will be similar to the new construction on our truck roads in the last few years with a wide right of way and wide ditches. The proposed program will not interfere with the projects on the road from Hutchins to Woden and from Crystal Lake east to the paving, which are being held up until the end of the war, and will be built as soon as men and materials are available.

MRS. HENRY LAU OBSERVED 83RD BIRTHDAY FRIDAY

Children Held A Surprise Party In Her Honor In The Evening

Mrs. Henry Lau observed her 83rd birthday anniversary on Friday, March 31st at her home here in Klemme.

In the evening her children had a surprise party in her honor when they gathered at her home to help her celebrate her birthday.

Her grandson, Bruce Arnold, entertained the gathering by showing his picture slides, and also pictures Sgt. Kernut Koerner took of army life while he was stationed at Camp Robinson, Arkansas, and at Camp Ogden, Utah.

Following the entertainment and social hour of visiting, all enjoyed a lunch of cake and ice cream.

Those present were Leona, Erwin and George at home; Mr. and Mrs. Will Lau of Garner; Mr. and Mrs. Albert Koerner; Mr. and Mrs E. J. Arnold, Wilbur and Bruce; Mrs. Martha Bredbenner; Mr. and Mrs. Lloyd Lau and Cozette; Marjorie Lau; Maralee Ridder and Berleen and Sharon Bridges.

Mrs. Lau was the recipient of some birthday cards on her anniversary. Her son, George, also observed his birthday on the same day.

NEED TO CLEAN, TREAT SMALL GRAIN SEED NOW

Farmers who plan to treat their small grain seed before spring field work begins have only a short time left in which to do so, remind Iowa State College botanists.

In tests conducted by the Iowa Agricultural Experiment, Station treated seed gave an additional return 6.4 bushels per acre over untreated seed. This increase was made possible because treatment of seed controls soil-borne diseases.

All small grain seed should be treated, even the new disease resistant oats varieties, Tama, Control, Boone and Marion. Before it is treated the seed should be cleaned either with a good fanning mill at home or at a seed treating center if one is available in the community.

After the seed is cleaned, New Improved Ceresan should be applied at the rate of one-half ounce per bushel. Plans for making an inexpensive home seed treater may be secured free from county extension directors or the Iowa State College Agricultural Extension Service, Ames.

MEETING SCHEDULE

April 6. Program Committee to attend District Meeting.

April 8. Avery Sunbeam 4-H Club at Lois Ann Lau.

Bingham Boosters 4-H club at Jeanette Quinn.

Madison Live Wires 4-H club at Goldie Geddes.

April 12. Meeting of Hybrid Corn Growers and County Extension Directors on Labor at Clarion at 2:00 p. m.

April 13. Rural Young People's program planning meeting with Miss Winnifred Martin.

April 14. Orthel Township meeting at 8:00 p. m.

April 15. Liberty Busy Bees at Darlene Schultz.

Magor Farmerettes at Corwith school house.

Concord Chums at Iola Riemers.

April 17. Bingham 4-H Boys at Ben Limbergs.

ELL FARM BUREAU LADIES HELD MEETING FRIDAY

The Ell Center Farm Bureau ladies held a follow-up meeting at the home of Mrs. Les Hartbeck on Friday afternoon.

"Family Adjustments in Wartime," and "Making Children's Toys" were discussed.

Fifteen were present and lunch was served after the meeting.

LA VOHN SCHLAWIN HAD BIRTHDAY PARTY

Miss La Vohn Schlawin, daughter of Mr. and Mrs. Werner Schlawin, had a birthday Saturday, but postponed celebrating the event until Sunday when she invited six of her girl friends to a duck dinner at her home.

After dinner Miss Schlawin entertained her friends by taking them to the Avery theatre at Garner. After the show the girls enjoyed home-made ice cream and cake at the Schlawin home.

NO MORE TIRE INSPECTIONS AFTER MAY FIRST

The Hancock County War Price and Rationing Board at Garner has notified The Times to publish the fact that after May 1st it will not be necessary to have tires inspected.

However, owners are cautioned to watch their tires carefully and to get them recapped in time, as it is almost impossible to obtain new tires.

The United States and Great Britain have a large supply of wool stock.

OBITUARY OF MRS. WM. SMITH

MRS. WILLIAM SMITH

Mrs. Wm. Smith, a resident of this community for 50 years, passed away Monday morning, March 27, 1944, at the home of her daughter, Mrs. J. N. Day, Klemme, Iowa. She reached the age of 83 years, 7 months and 22 days. Her maiden name was Emma Isabelle Ross. She was born August 5, 1860 at Peotone, Illinois, a daughter of Daniel and Annie Ross.

As a young woman she was a dressmaker in Joliet, Illinois, and was also known throughout her life as an expert at needle work.

On August 22, 1883, at the age of 23 years, Emma Isabelle Ross and William Smith were married at Joliet, Illinois. They made their home in and near Joliet for 9 years, after which, in 1894, they purchased and moved to a farm in Avery township, Hancock County, Iowa, where they resided for many years. Later they retired and moved to the town of Klemme. Her husband preceded her in death many years ago.

Some six years ago Mrs. Smith discontinued housekeeping and lived with her children; part of the time with Mrs. Bert Mathews at Clear Lake, and part of the time with Mrs. J. N. Day in Klemme.

Mr. and Mrs. Wm. Smith moved into this community about the time the English Methodist Church was built. Mrs. Smith, who was a member of the Methodist Church, took a great interest in her church and its growth and made many sacrifices in its behalf. She had the honor of being the first President of the Epworth League, and served as organist for many years and was also a faithful teacher in the Sunday School.

Mrs. Smith was a charter member of the Royal Neighbors Lodge of Klemme, and retained her membership throughout her life.

She is survived by two daughters: Mrs. Bert Mathews of Clear Lake, and Mrs. John N Day of Klemme; one grandson, Dorance S. Day and wife Ruth, and one great grandson, Gary Byrnes Day, all of El Segundo, California; one sister, Mrs. S. T. Barr of Manhattenja; one sister, Mrs. S. T. Barr of Manhatten, Illinois, and three brothers, Dr. W. G. Ross of Kempton, Illinois; Alex Ross and Walter Ross, both of Garner, Iowa.

Quick Pickup . . . Cookies and Milk
(See Recipes Below)

Fill the Cookie Jar

Sometimes I think the cookie jar is a favorite piece of equipment in the American home — especially in the kitchen. At least it's the most popular, and that's not just among the youngsters for many a time the oldsters find the path to the cookie jar just as well as the children.

There are cookies in the house, it's the kind of a house that says "Welcome Home," for cookies not just delightful to have, but often take the edge off hunger when it's most necessary—after school or after a meal to give it the finishing touch.

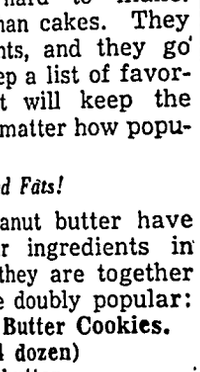
Cookies aren't hard to make. They last longer than cakes. They use ingredients, and they go further. Keep a list of favorites at hand that will keep the cookie jar filled no matter how popular it is!

Save Used Fats!

Oatmeal and peanut butter have been popular ingredients in cookies, but here they are together they're guaranteed to be doubly popular:

Oatmeal-Peanut Butter Cookies.
(Makes 4 dozen)
1 cup peanut butter
2 tablespoons shortening
1 cup brown sugar
1 cup granulated sugar
1 cup sifted all-purpose flour
1 teaspoon salt
2 teaspoons baking powder
1 cup water
2 cups oatmeal

Cream peanut butter and shortening and sugars gradually, creaming mixture. Stir in sifted dry ingredients alternately with water. Add rolled oats and chill dough. Roll dough thin on lightly floured board and cut with cookie cutter. Dough may be rolled and cut and sliced if desired thick. Bake on a greased cookie sheet in moderate (350-degree) oven for 10 to 12 minutes. If more dressified cookies are desired, sprinkle with powdered sugar icing after baked and decorate with candied cherries and nuts.



Save Used Fats!

Hermit Bars.
½ cup butter or substitute
1 cup brown sugar
2 eggs, well beaten
½ cup milk or coffee
1 cup molasses or sorghum baking molasses
3½ cups sifted cake flour
1 teaspoon salt
1 teaspoon soda
2 teaspoons baking powder

Lynn Says

Cookies! It's fun to make them when you have the "all-in-all" right at hand. Make one for yourself by following these simple directions:

Start heating the oven before you actually make the cookies so it will be in readiness when you put cookie sheets in the oven.

Assemble all the equipment you need. Assemble and measure all ingredients.

Prepare cookie sheets next. If dough does contain much fat, sheets usually need not be greased. Pans for bar cookies should be buttered, lined with waxed paper, then buttered again.

Mixing creams best at room temperature. It should not be overmixed as this injures texture and flavor of cookie.

Eggs are usually well beaten before being added to the shortening and sugar. If the quantity of eggs is small, they may be added with the shortening and sugar.

Lynn Chambers' Point-Saving Menu

Parsleyed Potatoes
Fresh Asparagus
Endive Salad—French Dressing
Whole Wheat Rolls
Orange Whip *Cornflake Cookies
*Recipe Given

1 teaspoon cinnamon
1 teaspoon each, ginger, cloves
1 cup nuts, chopped
2 cups raisins

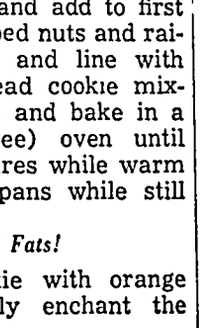
Mix butter and sugar together. Add well-beaten eggs, milk or coffee, molasses and about 1 cup of flour. Beat well. Mix and sift remaining flour, salt, soda, baking powder and spices and add to first mixture. Add chopped nuts and raisins. Grease pans and line with waxed paper. Spread cookie mixture evenly in pans and bake in a moderate (350-degree) oven until firm. Cut into squares while warm and remove from pans while still warm.

Save Used Fats!

A cornflake cookie with orange flavoring will really enchant the family:

***Cornflake Refrigerator Cookies.**
(Makes 5 dozen)
½ cup shortening
½ cup sugar
2 teaspoons grated orange rind
2 cups cornflakes
1¾ cups sifted flour
2 teaspoons baking powder
¼ teaspoon salt
⅓ cup milk

Blend shortening and sugar together. Add orange rind. Crush cornflakes into fine crumbs. Sift flour, baking powder and salt together. Mix with crumbs. Add to first mixture alternately with the milk. Shape the dough into rolls about 1½ inches in diameter. Wrap in wax paper and chill until firm. Slice and bake on ungreased baking sheets in moderately hot oven (425 degrees) about 12 minutes.



Orange Refrigerator Cookies.
(Makes 6 dozen)
1 cup butter or substitute
1¼ cups brown sugar
1 egg, well beaten
1 tablespoon grated orange rind
2 tablespoons orange juice
½ teaspoon lemon extract
2 cups sifted flour
¼ teaspoon salt
¼ teaspoon baking soda
¼ teaspoon baking powder
1 cup chopped nuts
1 cup wheat germ or wheat bran

Cream together butter and sugar. Add egg, orange rind and juice, and lemon extract. Sift together flour, baking soda and baking powder and salt. Add nuts and wheat germ or bran. Add this to creamed mixture. Stir until well mixed. Shape into long rolls. Wrap in wax paper. Place in refrigerator to chill. When ready to bake, slice thin, and bake in a moderate (375-degree) oven for about 10 minutes until golden brown. Remove from pan. Cool.

Save Used Fats!

Economy Brownies.
1 cup sugar
2 tablespoons shortening
2 squares melted chocolate
½ cup milk
1 egg
1 teaspoon vanilla
1 teaspoon baking powder sifted in
1 cup flour
1 cup nuts, chopped fine

Mix in order given, bake in a greased shallow pan in a moderate oven (350 degrees) for 20 to 25 minutes. Cut in squares and cool.

CHRIST'S VICTORY OVER DEATH

LESSON TEXT: I Corinthians 15:41-58.
GOLDEN TEXT: Thanks be to God, which giveth us the victory through our Lord Jesus Christ.—I Corinthians 15 57.

"If there be no resurrection of the dead, then is Christ not risen: and if Christ be not risen, then is our preaching vain, and your faith is also vain" (I Cor. 15 13, 14).

In other words, the truth of the resurrection is an indispensable foundation stone upon which the structure of Christian doctrine rests Beware of those who would spiritualize or explain it away!

The facts are there—fully proved and dependable; there is no need for doubt or question.

In our lesson we find:

I. The Great Change (vv. 41-50).

Since it is obvious that our present bodies are not suitable for the spiritual world (v. 50), and that there comes, sooner or later (and almost always, it seems, too soon!), an end to their existence, there must be a radical transforming change. This takes place in the resurrection of the body.

To make such a blessed—and to the human mind, almost inconceivable—truth clear, Paul uses the effective method of comparison and contrast. Following his skillful use of the illustration of the sowing of grain, which dies that it may live again (I Cor. 15:35-39), he gives us a picture of the resurrection body.

That which we must put away in the silent earth at the end of life's day is a natural body, weak and lacking eternal glory (v. 43). It has already shown the evidences of decay and corruption, which we know shall be completely manifested in a short time. Marvelous as it has been as an earthly body, it cannot go with us into eternity (vv. 47, 48), for it is natural and not at home in the spiritual world.

Note, then, the great change that takes place. In the resurrection, the body for the eternal activity of the believer stands out as glorious, incorrupt and incorruptible, powerful, spiritually quickened, and heavenly. What more could be said?

Here we stand amazed and at the same time encouraged by the revelation of what God has in store for us who believe on Christ. Death does not end all—it is only the beginning of real fullness of life and usefulness for the Christian.

And all that is because of—

II. The Great Victory (vv. 51-57).

Death is an enemy, indeed man's great enemy. There are those who have tried to deny that fact, to explain it away. They talk about death as "the great adventure," etc., but when one actually comes to face it, the truth is realized. It is an **enemy.**

But in Christ, death is a conquered enemy. The blessed message of Easter day is that "death is swallowed up in victory" (v. 54). Death could not hold our Lord (v. 57), and He was the "first fruits of them that sleep" (v. 20). This assures us that because He lives, we too, who believe on Him, shall live.

So death has lost its sting, and the grave its victory (v. 56). With Paul we cry out today from the depths of our beings, "Thanks be to God, who giveth us the victory through our Lord Jesus Christ" (v. 57). This is a day of joy, of singing, of victorious faith.

But the joy of Easter is not simply something to warm one's heart. It is—

III. The Great Incentive (v. 58).

Living for Christ and serving Him in this world is our greatest privilege, but we are all so human that we need encouragement. We need an incentive.

The Bible speaks much of the rewards of God to those who are faithful, and gives many assurances that we are not engaged in a vain task. At times it seems as though men only reject, and the work of the Lord moves but slowly, if at all.

Let us not be discouraged or disheartened. We follow and serve a victorious Christ, One who has triumphed over death and hell. What we do for Him is never done in vain.

Note the helpful thought here. We are to be "unmovable," and yet "abounding." That seems paradoxical, but it is not, for it is only the life steadfast and unmovable at the center which can abound at the circumference.

That center is the resurrected Christ, and when we are established in Him, we are ready to live the abundant life for Him.

Easter is a glad day for a believer, but it is a sad day for the unbeliever. He may attempt to maintain an outward appearance of joy, but he will know in his heart that the message of the day is definitely not for him. And yet it is, for today he may by faith take as his Saviour the Risen One and enter into fullness of joy in Him.

So many people "celebrate" Easter all their lives, year after year, but never truly "keep the feast." May many such friends make this Easter day, 1944, the beginning of a new life in Christ!

IMAGINARY CONVERSATIONS
Honorable Japanese and Honorable Ancestor

Jap — Honorable ancestor, what goes on?

Ancestor—It's got me puzzled, too.

Jap—I always understood we were a master race.

Ancestor—So did I. Could we both be wrong?

Jap—That's what I was wondering!

—*—

Ancestor—Will honorable descendant kindly give complete picture to honorable ancestor?

Jap—Don't be nervous.

Ancestor—If you can be nervous why can't I?

Jap—I am not nervous.

Ancestor—Come now, you can at least be on the level with an ancestor.

—*—

Jap—I want you to feel just as confident about Japanese supremacy as I am.

Ancestor (with a grimace)—That's what startles me.

—*—

Jap—Everything's going my way.

Ancestor—That's just a line from Oklahoma. You know better, don't you?

Jap—What Oklahoma, the play or the ship?

Ancestor—Both!

Jap—I know better, but I had hoped you didn't.

Ancestor—Sometimes I think I get a better picture of the whole war situation from the grave than you get from where you are.

Jap—I'm thinking seriously of joining you, just to prove you're right.

Ancestor—Whatever happened to that Japanese peace in the American White House?

Jap—You aren't going to hold me to that, are you, grandpappy?

Ancestor — Honorable descendant should tell honorable ancestor when he is just kidding.

—*—

Jap—We are doing fine. The American soldier doesn't know how to fight. The American sailor is a joke. The American airman is no match for the Japanese airman. You know that, don't you?

Ancestor—Of course I do. You know it and I know, but do the Americans know it?

Jap—Do you want an answer to that last question?

Ancestor—No. I just got it.

Jap—How?

Ancestor—I heard about those Pacific islands.

Jap—That's a lot of Truk!

—*—

Ancestor — Honorable ancestor must respectfully urge honorable descendant that honorable prestige is at stake.

Jap—You're telling me!

Ancestor—Honorable ancestor begins to fear he placed too much faith in honorable descendant.

Jap — And honorable descendant has same fear the other way around.

Ancestor—Who started this super race idea, anyhow, you or I?

Jap—You did.

Ancestor—Nothing of the kind. It's all your idea.

Jap—Nonsense. It comes down from you.

Ancestor—It's entirely your theory.

(This goes on indefinitely. It ends in a tie.)

* * *

Congress now talks of an income tax system under which all the burdensome business of filling out a crossword puzzle will be eliminated. But the number of public accountants and tax experts thrown out of work will create the greatest unemployment crisis the country has ever known.

* * *

Fritz Kreisler, who has always spurned the radio, has at last surrendered and will go on the air soon. Radio has been trying to get him for years but he has just been fiddling around.

* * *

We can't understand why some radio dance music program doesn't call itself "Syncopation Please."

Household Hints

Bring baby's bonnet back to shape after washing by drawing the hood over an inverted mixing bowl of appropriate size.

* * *

When making doughnuts, put them in a covered dish while still warm and they will keep fresh for some time.

* * *

In pressing hems, press from the bottom up. Pressing around the bottom of the skirt stretches the hem out of shape.

* * *

Soft soap is all right if it works. And this time it does. Nails and screws are much easier to drive if rubbed over a cake of soap first.

* * *

A girl's skirt can be made out of a pair of men's pants that are worn out in the seat. Use the bottoms of the pants for the top of the skirt and the top of pants for bottom of skirt. This makes a four-gore skirt.

* * *

Worn sheets can be cut to suitable lengths and dyed for window curtains, or they can be used as covers for dresses and coats.

* * *

To restore the fluffiness of chenille and candlewick which has been washed, shake vigorously from time to time while the articles are drying. When completely dry, brush with a whiskbroom.

* * *

No one likes greasy soup, and now we've a double reason for not wanting it—our country needs the excess grease. One way to serve both purposes is to allow the soup to harden and cool after making, then skim grease off while cold. Reheat—the results are good soup and no excess grease. And—do not forget to bring your excess fats to your meat dealer.

Indian Chief Had His Own Idea on Contentment

An American gogetter noticed an Indian chief lolling at the door of his wigwam somewhere out west.

"Chief," remonstrated the gogetter, "why don't you get a job?"

"Why?" grunted the chief.

"Well, you could earn a lot of money."

"Why?" insisted the chief.

"Oh, if you worked and saved your money, you'd have a bank account."

"Why?" again asked the chief.

"For heaven's sake!" shouted the exasperated gogetter. "With a big bank account you could retire, and then you wouldn't have to work any more . . ."

"Not working now," pointed out the chief.

RUSHING BUSINESS

Numerous land transfers in Hancock county have made busy times for County Recorder Fern Katter. During the first six days of March, 30 deeds were recorded. Transfers of land have been so many that the post office sold out its revenue stamps, so that some were not available when needed.

STORM CASUALTIES

Four hundred and fifty telephones were victims of the recent strom that left ice on the lines and poles in the Clarinda vicinity. It took the telephone company employees three or four days to complete repairs enabling all telephones to be back in service.

UNUSUAL SERVICE

A. T. Waples retired from duty as Castana rural mail carrier on March 1. Mr. Waples had served as regular carrier for 33½ years and as substitute for three years. During that time, he had hired a substitute only on two occasions.

HUGE WOLF

A wolf measuring six feet from the tip of the nose to the tip of the tail was shot by Virgil Ten Hagen of Knoxville. It was the first gray or timber wolf shot in Marion county in a long time.

The hover of the brooder should be scrubbed with hot lye water the same as the brooder house, according to Dr. C. D. Lee of Iowa State College. On the under side of the hover one often finds an accumulation of fungus growth.

Traits of Quail

The Mearns Quail, which occurs in semi-arid lands of the southwest, probably had its original home in tropical forest, according to Dr. Loye Holmes Miller, professor of biology emeritus on the Los Angeles campus of the University of California.

Dr. Miller, who recently made a study of the bird, reports that it has a number of characteristics, such as large eyes, which suggest it evolved under forest conditions. The nature of certain of its muscles are similar to those of the tinamou of El Salvador.

The bird also bears closer structural resemblances to the forest quail with which it is associated in the southwest.

Curiously, many of the habits which probably developed in the tropics also serve the quail well in its present habitat. It is able to gather food in the dim light of early dawn, and it can rise explosively to seek cover in broken desert country when flushed by man or one of its natural enemies.

Religious Testimony

On the night of December 16—in the dimly-lit parlors of Mexican families, where the Nativity is represented in a warm setting of evergreen, Spanish moss and colored paper lanterns, the entire family gathers 'round and begins the recitation of the Rosary, interspersed with songs to the Holy Child. Following this a children's procession bearing images of St. Mary and St. Joseph, and lighted candles, passes through the different rooms of the house and the patio. The few remaining people in the parlor sing the Litany of the Virgin to which the procession responds with the "Ora pro nobis." As the Litany closes the procession stops before the closed doors of the parlor, those of the procession taking the part of the travelers and those within representing the innkeepers. Then ensues a dialogue between pilgrims and innkeepers, with the ultimate joyful admission of the pilgrims.

Rabbit Gestation

The gestation period in domestic rabbits is 28 to 30 days. After the birth of baby rabbits, ranging from four to ten to the litter, they are usually kept with the mother for 45 to 60 days. In southern California, where some 35,000 rabbits are grown and killed for meat every week in the year in Los Angeles county alone, the youngsters are kept with the doe until eight weeks old. In any event, the doe is usually bred again at sixty days from the birth of a former litter, so that in 30 days more another litter is born. Even in the colder north and northeastern sections of America, under good management, it is quite possible for a healthy, well-maintained doe to produce four litters yearly.

South American Countries Preserve Colonial Coin

Old Spanish colonial days are still evoked in Mexico, Cuba, Chile, Colombia, Uruguay, Argentina and the Dominican Republic by the gold or silver peso which is the basic monetary unit of these countries. Peso, meaning "weight" in Spanish, denoted a one-ounce silver coin often used instead of standard weights in weighing. The Spaniards applied the term to money used in the New World during the colonial era and it was retained by some American nations after they had won their independence.

Until a short time ago Paraguay had a peso worth about a third of a cent in United States money, but a recent decree replaced it with the guarani, named after the original Indian inhabitants of that country. Haiti's gourde is another coin recalling early colonial days. It derives from the French word meaning "fat" or "thick" and was used affectionately to denote large coins used by the colonists. Some authorities, however, contend that the word derives from the home-grown calabashes, or gourdes, once widely used for barter.

Like Paraguay, Peru commemorates the ancient Indian inhabitants of the country with the sol, or "sun." The sun was worshipped as a god by the Incas inhabiting Peru when the Spaniards came, and figures prominently in the history and traditions of the nation's pre-colonial and colonial days.

Metal Stencils Used Exclusively for Mail

The printing and publishing industry uses today millions of metal stencils to address mail. These are made of zinc alloy and are punched on embossing machines.

In use the printing is done by machine from the raised or embossed surface. In this surface the letters are in reverse. On the non-printing side the letters are depressed below the surface of the rest of the metal.

It is this surface, the intaglio face, with which we are concerned. Here the printing is not in reverse, but may be read in the manner of any ordinary print. In all stencil reading and filing operations, in which occupation thousands of operators—many of them women—are employed in the industry, these metal stencils, before and after use, must be checked with copy for correctness of name, address and code marks, and then be sorted and filed in drawers in correct relation to the stencil lying before and behind.

It is an exacting occupation requiring a high degree of accuracy of binocular function and accurate depth perception, together with rapid ocular and manual cooperation and equilibrium.

Early Bombs

The bombing of Italian cities takes aerial warfare back to the region where its weapons were invented and forgotten 450 years ago. Experiments with bombs and airplanes were carried out in Italy in the decades of Columbus' voyages to America.

The 15th century -inventor of aerial weapons was Leonardo da Vinci, an Italian now known as one of the world's greatest religious artists. For the same warlord who commissioned him to paint "The Last Supper," Da Vinci invented a fire-bomb; a copper core bristling with explosive rockets, embedded in burning pitch and other ingredients which released poison gas. While he was painting the quizzical smile of "Mona Lisa," he spent his spare time fashioning starched taffeta, willow rods, oxhide thongs, and steel springs into models for a "flying machine."

Marshall Islands

The Marshall Islands are largely made up of two chains of atolls, extending northwestward from the Gilbert group in more or less parallel lines. Mili and its neighboring islet, Narik, form the southern extremity of the eastern, or Radak, chain. The name Radak means "sunrise." Given because of its geographic position, the word is also symbolic of the indicated promise of American action in this part of the world.

One of the 32 Marshall atolls, Mili comprises a roughly oblong-shaped cluster of islets and reefs surrounding a large lagoon. The lagoon is about 23 miles long and nearly 12 miles wide at its widest point. Navigable entrances into it are practically all from the north. The best channel, on the northwest, is about 250 yards across and deep enough to accommodate the largest ships.

Organ Pipe Cactus

Ventana cave, the discovery of which revealed that man had lived in Arizona 7,000 years ago, has a companion wonder of sightseeing interest in Organ Pipe National monument. The monument, known as Uncle Sam's miracle garden, to preserve the rare pipe organ cactus, is the dividing line between the 516 square miles of arboreal growth and the Papago Indian reservation, which contains the cave. The organ pipe cactus resembles the pipes of a giant pipe organ, with the lone whisker cactus acting as giant sentry of the desert. In a gorgeous spectrum of color, the blossoming of organ pipe cactus is one of nature's most entrancing scenes enlivened in coloration by night blooming cereus.

THE DRAFT BOARDS HAVE been takin men from the Greenhouses which sup plied us with PLANTS for our May Plan Sale.

AT MARSHALLTOWN THEY took the tw young men who owned the place, s they closed up their Greenhouse for the dur ation.

AT EAGLE GROVE THEY TOOK the tw young men who owned that place There the wives of the men will carry on but they are so short handed for help tha they closed up part of their Green house and will not be able to grow more Plants than are needed in their home town.

FROM THE ABOVE TWO PLACES we usually received 80% of the plants we sold in Klemme.

WE ARE, OF COURSE, TRYING TO get lined up with other Greenhouses, but so far we have not been too lucky. We are afraid ahere will be a shortage of Plants in May.

THEREFORE, PLEASE PLANT SOME seeds in a box and put them in your window, or make a "hot-bed" so that we all have plants for our VICTORY GARDENS this season.

QUITE A FALL!

Sergeant Neil Schissel of Decorah should be able to survive almost anything after his recent escape from death. He fell 1,200 feet from an airplane, receiving serious injuries but none critical. His parachute failed to open, as did the emergency parachute. The accident occurred at Ft. Benning, Ga.

TO THE WIND

First-class mail tied to a newspaper bundle thrown off a train at on the ground while others were letters were sucked under the wheels of the train, some scattered the ground while others were blown into a nearby creek. Some of the mail was cut beyond recognition or redemption while some letters could be partially identified. Tractor coupons included in the mail were returned to the ration board in torn envelopes.

EDUCATIONAL RIDE

The first grade students of the Sheldon public school and their teacher, Miss Dorothy Blesie, enjoyed a train ride to Hull recently. The excursion was the first train ride for the pupils. Not only was the ride thrill to the youngsters but educational as well. One of the train executives explained the many different departments and workings of the train.

Chinese cabbage or celery cabbage must be planted sometime during the last 2 weeks in July, and not in the spring, if it is to make a good crop.

VALUABLE DISCOVERY

A discovery valuable to airplane pilots in wartime as well as an aid in peacetime was made by Kenton May and Fred B. Williamson. May, formerly of Anamosa, was working in an aircraft plant in Buffalo, New York, when he and his general foreman, Fred B. Williamson, discovered a process that would make undistorted vision a reality in cabin enclosures for planes. May, now a seaman first class, is stationed in England with the Seabees and is doing contruction work.

The Presbyterian Church of Woden to Martin Smith. Wty Deed 3-14-44, $1,500 Lot 13 in block 11 in Town of Woden.

CHAIN LETTEDS ARE AGAIN TO BE FOUND IN MAILS

Chain letters are again making their appearance in the mails. The payoff this time is in war stamps and the senders claim the government has approved this method of selling more war stamps.

The sending of chain letters is against the laws of the postal department and the government has not approved of the sending of chain letters to sell war stamps.

The penalty for sending chain letters through the mails is a term in a federal prison.

If you have received a chain letter, take it to your postmaster so he can send it to the solicitor of the postal department in Washington, D C, and the senders can be warned they are 'flirting' with a federal prison term when they send them out.

BETTER IOWA GARDENS

Gardens close to trees and shrubs seldom do well. Tree roots undermine the garden bed and take away much water and fertility Some of this damage can be prevented by digging a trench about 2 feet deep between the garden and trees.

* * *

The Victory Garden fertilier has been improved this year. The formula is 4-12-4, meaning 4 percent nitrogen, 12 percent phosphoric acid and 4 percent potash. It may be broadcast at the rate of 2 or 3 pounds per 100 square feet.

* * *

Application of superphosphate fertilizer (0-20-0) is especially effective if the garden has had an application of manure. It helps produce strong root systems in plants and heavier yields of potatoes, tomatoes, sweet corn, peas and other crops. Apply at the rate of 3 or 4 pounds per 100 square feet before disking and harrowing the garden.

* * *

Garden soil should be throughly pulverized with the rake before sowing the seed. Pulverized soil will prove its value in better results through the season. Early planting is very important with potatoes, radishes, lettuce and other cool loving vegetables.

* * *

If you are unable to grow your vegtables on different soil every year or so, rotate the location of plantings to help prevent disease and utilize the fertility in the ground better. For example, if tomatoes were grown in a certain section of the garden last year, plant them in a different section this year. A root crop, such as carrots, might be planted where the tomatoes were last year.

* * *

Most vegetables do best on a slightly acid soil. Don't apply lime to the garden unless the soil has been tested and the test shows the soil very acid.

* * *

Planting seed of head lettuce directly in the garden is likely to be disappointing. This crop requires a long, cool, moist season to head. The seed should be started indoors some weeks before the ground can be worked, and strong plants of an early variety set out about the same time as early cabbage. Even then, some plants will not head.

* * *

The Alaska variety of peas should be planted as soon as the soil is dry enough to work. It takes about 55 days to mature. Little Marvel variety should be planted about 2 weeks later. Be sure to use a disinfectant dust on pea seed before planting.

* * *

The 1944 allotment of commercially processed fruits and vegetables to civilians figures out at slightly over 1 ounce per day or about 8½ ounces per week per person Compare the 1943 allotment per individual of 33 pounds with the 1944 allotment of 28 pounds Most gardens will have to produce more this year to make up for the reduced amounts. The responsibility for meeting this situation rests squarely with each Iowa family.

* * *

Be sure to plant disease-resistant cabbage and tomato plants or buy seeds of resistant varieties. Disease-resistant varieties of various kinds of vegetables are listed in "Iowa Garden Guide" pamphlet No. 80, available from your county extension director or the Iowa State College Extension Service, Ames, Iowa.

* * *

Another method of helping prevent disease is to purchase seed labeled "certified," if it is available And, be sure to treat vegetable seed with a good seed disinfectant dust as a protectant and to insure vigorous stands of healthy seedlings.

* * *

One of the biggest mistakes a gardener can make is to have no garden plan. Last year considerable waste resulted because gardeners did not plan proportionate quantities of the different vegetables to plant Sufficient spacing was not allowed (sufficient space helps keep down disease), and small successive sowings were not made. The information can all go on a plan or map of the garden.

* * *

Be sure to take special precautions to sow fine seed as thinly as possible. To make thin sowing easier, mix a goodly portion of sand with the seed. Thin sowing is a labor saver because much fewer seedling need be pulled out to give required spacing later. Neglecting to thin is a common mistake. Until gardeners learn to give plants the recommended spacing, they will continue to suffer loss in production, size and quality of the products.

* * *

Do not worry about specific dates for planting potatoes, lettuce, peas, etc. Plant cool loving crops as early as the ground is fit to work in the spring.

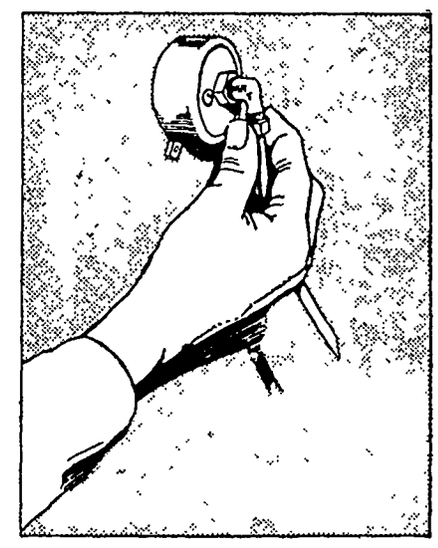
TEMPTATION!

R. B. Tjaden of Wellsberg left his wallet containing $1239.00 on a counter in a Grundy Center store. George F. Smith, proprietor of the store, found the wallet containing the money shortly after Tjaden left the store. Mr. Tjaden was much relieved the following morning when he called Smith and learned that the wallet and all its contents were safe.

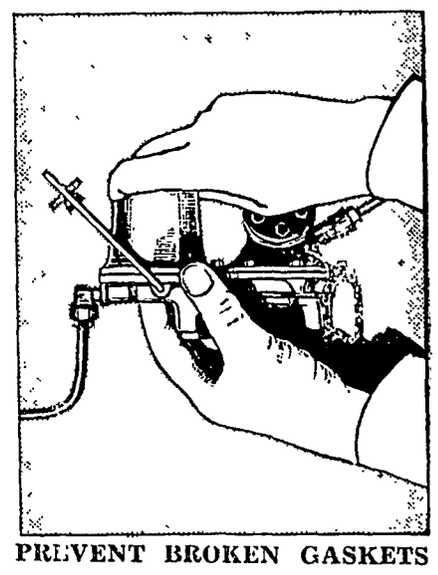
Alfalfa is a good source of protein or poultry.

Tips ON FARM MACHINERY



START COUPLINGS BY HAND

Start all fuel line couplings by screwing the first three or four turns with your fingers. Line up the couplings by bending the tubing until the threads start easily. Never use a wrench on brass or copper fittings until the threads are started straight.



PREVENT BROKEN GASKETS

Twist the sediment bowl on the tractor carburetor a quarter of a turn, says Iowa State College extension agricultural engineers, and you'll prevent many a broken gasket. The same applies when working with gaskets and parts elsewhere on the tractor and on other machines.

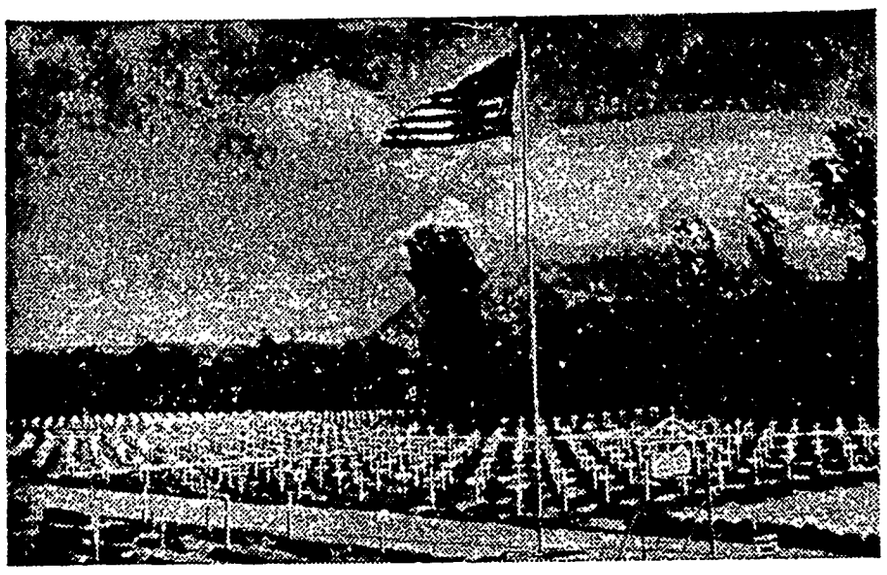
WEEKLY NEWS ANALYSIS

Nazi Forces Retreat Toward Rumania As Russians Regain Rich Farm Lands; Allied Troops Drive New Wedge Into Germans' Main Defense Line in Italy

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Released by Western Newspaper Union.



Italy—Row on row, these little white crosses in Mount Soprano cemetery mark the graves of fallen American Doughboys in Italy.

OPA:
Renewal Sought

Claiming that OPA has held wartime price increases to half the level of World War I, Price Administrator Chester Bowles appeared before the senate banking committee to testify for continuation of the agency for another year.

Chester Bowles

Following early increases to iron out prewar depression prices, the cost of living has been held absolutely stable during the last 11 months, Bowles said.

Asking for retention of present powers, Bowles said OPA would continue with present techniques for keeping down prices, including subsidies, which he called essential.

Cattle Subsidy

To bring cattle off the range and prevent a market glut in the fall, OPA considered increasing packers' subsidies by 30 cents to enable them to offer higher prices for the stock during spring and summer.

At the same time, government officials considered placing a floor under medium and lower grade cattle whose quality may be affected by the tight feed situation, with floors for the spring and summer above those for the fall.

While increased subsidies were being considered for cattle, lower subsidies were being studied for hogs, in line with government policy for decreased pig production. Now $1.30 a hundred pounds, the hog subsidy may be cut by 30 cents.

SOLDIER VOTE:
President Gets Bill

Passed by congress, the compromise soldier vote bill, allowing use of the short federal ballot if certified by the governor and state ballots are unobtainable, found its way to President Roosevelt's desk for signature or veto.

Once outspoken in his opposition to a bill limiting soldier voting to state ballots alone, the President took up the compromise measure with caution before acting, wiring all 48 governors to report to him whether they would permit use of the short federal ballot, which only lists the presidential and congressional offices without including the names of the candidates.

If the governors O.K. the short federal ballot, servicemen will only be able to use it if their states have no absentee voting laws, or if they have applied for state ballots but have not received them.

RUSSIA:
Free Ukraine

Germany's remaining foothold in the Ukraine was loosened as Russian troops smashed into Nazi lines along the Bug river, and as the enemy's forces fell back toward Rumania, the Reds regained the rich farm and mineral land.

As Russia scored its military success in the south, Finland in the north turned down Moscow's armistice offer, based on restoration of the 1940 borders and internment of German troops entrenched in the little country.

Russia's southern drive carried Red troops to within 30 miles of the prewar Rumanian border, while farther to the northwest, they were within 100 miles of the old Czech and Hungarian frontiers.

EUROPE:
Drive Wedge in Italy

Having driven a wedge into the German's main defense line by leveling Cassino with a devastating aerial attack by heavy bombers, Allied forces fought hard to advance up the road to Rome and get at the rear of the enemy hemming in U. S. and British troops on the Anzio beachhead.

Although the thunderous leveling of Cassino left that once-fortified village standing directly on the road to Rome a pile of jumbled mortar, Nazi guns established in the surrounding hills continued to rake Allied troops, making progress slow.

Preliminary to the big showdown in the west, Allied bombers continued to roar over Axis Europe, ripping at Nazi channel defenses, France's network of rails over which the enemy plans to shuttle troops to meet invasion armies, and German industries turning out the weapons of war. To counter the raids, the Nazis sent up swarms of fighter planes, and great sky battles raged.

PACIFIC:
Troubled War-Lords

As U. S. army and naval forces kept up a running fire over the entire Pacific area, Japan's jumpy little war-lords had this to worry about:

Continued Allied bombings of Weewak, New Guinea, and Rabaul, New Britain, feeder bases for Jap troops in those regions.

U. S. control of the Admiralty islands lying along the supply route to Rabaul.

General MacArthur's increasing isolation of the 30,000 Jap troops hemmed in on Bougainville island in the Solomons, with the U. S. fleet and air force in control to prevent major reinforcement or general withdrawal.

Navy and army bombers continuing attacks on the Jap fleet's big outpost of Truk, guarding the entrance into the waters of the enemy's South Pacific empire.

DRAFT:
Tighten Deferments

In order to meet the services' demands for 1,160,000 men by July to bring military strength to 11,300,000, local draft boards have been directed to tighten up on all deferments, particularly for those in the 18 - 25 age group.

Gen. Hershey

Under the new directives issued by Selective Service Chief Lewis B. Hershey, only indispensable employees, regardless of family status, are to be deferred, and only the state draft head or national headquarters is to pass on any deferments for the 18 to 25 year age group.

Only farm workers producing 16 units will be eligible for deferment, and careful consideration will be given to the cases of 470,000 farm workers under 26.

While Selective Service pressed for more men, General Hershey said few of the 3,485,000 4F's will be found acceptable for military service. Only about 11 per cent of those with dependents, including fathers, have been taken thus far, he said, and only about 1 in 10 will pass physicals.

IRELAND:
Faces Isolation

Traditionally strained, Ireland's relations with Great Britain have again tensed, this time over London's threat to completely isolate the Emerald Isle from the outside world if German and Japanese officials are permitted to remain in Dublin and carry on alleged espionage activities detrimental to Allied invasion forces massed in the United Kingdom.

Anxious to maintain its neutrality, one reason being given that its cities were open to destructive bombings, Ireland replied that it could not banish Axis diplomats without inviting war, and insisted that it had clamped down on any suspicious enemy activity.

As the U. S. refused to sell Ireland ships for carrying needed imports and Britain closed all travel between the two countries, Eire grimly awaited events, its economy already hard hit by unemployment caused by a scarcity of imported raw materials.

COLD STORAGE:
More Meat, Produce

With cooler space 73 per cent occupied and freezer capacity 92 per cent filled, U. S. storage holdings as of March 1 were at record levels, with only apples at a low mark.

Beef stocks aggregated 276,300,000 pounds; pork, 792,700,000 pounds; trimmings, 151,300,000 pounds; lard and rendered pork fat, 354,300,000, of which War Food administration held 200,200,000.

Frozen fruit stocks were 29 per cent over those of a year ago, frozen vegetables 107 per cent, creamery butter 792 per cent, cheese 85 per cent, frozen eggs 75 per cent, and poultry 117 per cent.

Knitting Vet

Ninety-two-year-old Mrs. Christine Lorenzen of Clinton, Iowa, is an old hand at knitting for the boys, having first made mittens for Civil war soldiers, and other apparel for vets of the Spanish-American and World War I conflicts. Now, Mrs. Lorenzen knits for the Red Cross for World War II's heroes.

Declaring that Americans are suffering little deprivations compared with Civil war days, Mrs. Lorenzen said: "We had no coffee at all, and, sometimes, little to eat but cornbread."

WAGES:
Control Attacked

Labor's efforts to revise the War Labor board's stabilization formula limiting wage increases to 15 per cent over January, 1941, were thwarted by the public's and industry's representatives on the board, who advised holding off consideration until congress goes over the whole question of price control.

In an effort to revise the stabilization formula, labor asked that the President be requested to modify the wage ceiling to reflect actual living costs, and the War Labor board hold public hearings to bring out facts which might justify higher pay. Steelworkers pressed for public hearings on their demands for a 17-cents-an-hour raise.

MONEY SYSTEM:
Shaped for World

Long in consideration, the United Nations' plan for an international money system after the war is taking shape, with gold to play an important part as a result of Russia's support.

Based on a plan drawn by the U. S. treasury's monetary expert, Harry D. White, the new money system would require each country to contribute a certain percentage of gold and its own currency to a stabilization fund, which would then operate to prevent any nation's exchange from rising or falling.

White's plan differs from Britain's, which considered having each nation contribute to an international stabilization fund on the basis of its prewar trade, thus tending to favor countries which had heavy foreign commerce.

With a comparatively small prewar trade, Russia found the U. S. plan more acceptable, thus swinging the balance in its favor.

POPULATION

At the present rate of increase, the Russian population will number about 250,000,000 people by 1970, or 25 million more than there will be in all northwestern and central Europe, according to a survey by a League of Nations committee. The 1939 census of the Soviet Republics gave a total of about 170 millions. Current estimates place the figure at 180 millions.

The survey stated that the population of Europe as a whole is now declining.

HIGHLIGHTS . . . *in the week's news*

PENNIES: Since the copper situation has improved considerably, the War Production board has decided to permit addition of enough of the red metal to pennies to restore the old copper-zinc ratio of 95 parts copper to 5 parts zinc. Production rate currently is at 150 million one-cent pieces per month. It is expected that the annual output will exceed a billion steel pennies.

FOOD PROCESSORS: There will be a need for at least 700,000 seasonal workers in canneries and other food processing plants this year, Paul McNutt, manpower commissioner, says. This is 100,000 more than were needed last year. Students, women, and part-time workers will be the only source, he believes, though prisoners of war and soldiers on leave can be called upon.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

LOOKING 'EM OVER

The other day, the White House called WPB's production wizard, Charlie Wilson, to come to see the President. Wilson went, not knowing what it was about and not knowing he was to stay to lunch. When he got there, he found himself lunching with FDR, all alone.

The conversation ranged over everything under the sun, from the problems of business management to Far Eastern trade to Latin American relations to war plant reconversion. When the President asked for Wilson's views on world trade, the former General Electric executive replied:

"Mr. President, I'm a manufacturer, not a merchandiser."

The luncheon lasted more than two hours and, after it was over, Wilson didn't know quite what to make of it, because no very important problems regarding war production had been discussed. When he expressed bewilderment to close friends later, they replied:

"Why, Charlie, you're just a political neophyte! Don't you know what he was doing? Looking you over to see how you would do as second man on the ticket."

Embarrassed, Wilson replied: "People don't seem to know that I'm a Republican."

—NOTE—Some politicos figure that the President is now looking for a conservative running mate with a Republican background who would swing votes from business. Undersecretary of State Ed Stettinius is an active bidder for the job. Some conservative groups also figure that, if they can pick the vice president, FDR will resign shortly after the war and they will be in the saddle.

* * *

ANZIO ORDNANCE

Although the problem of supply on the Anzio beachhead has been emphasized, another factor which the public doesn't realize is the problem of ordnance.

Inside that slender foothold in Italy, there must be not only kitchens and temporary hospitals but, even more important, ammunition dumps and repair shops. This is the job of ordnance. A tank is no good unless it is kept in repair and it is the job of ordnance not only to build tanks, but to train men to go along with them into the field of battle to see that they are kept running.

The same is true of artillery and every other type of weapon. That is why the Anzio beachhead has to maintain machine shops and repair garages; plus a large number of trained ordnance men to keep the weapons at the front operating. All of this has to be done under the terrific hazard of enemy artillery fire, because Nazi big guns are never out of range.

Paradoxical fact is that the man responsible for the good job being done by ordnance is a former navy man. He is hard-hitting Maj. Gen. Levin Campbell, chief of ordnance, who graduated from Annapolis but later joined the coast artillery and has been in the army ever since.

It was Campbell, who decentralized the somewhat moribund ordnance department shortly after Pearl Harbor, moving ammunition to St. Louis, automotive vehicles to Detroit, safety and security to Chicago, artillery carriages to Rock Island, Ill., and getting things away from Washington where, as he says, "People are always breathing down your neck."

It was Campbell who cleared the decks for the famous bazooka antitank gun. Though he has been criticized for not developing an airplane rocket gun similar to the Germans' weapon, it was really General "Hap" Arnold, chief of the air forces, who failed to take action on the airplane rocket gun when its feasibility was proposed several years ago by Arnold's arch-critic, Major Seversky.

Actually, the ordnance department has to be guided by what the fighting services want. "They never get credit for the new inventions they develop," according to Assistant Secretary of War McCloy, "but if they ever miss one, they catch hell."

* * *

MERRY-GO-ROUND

¶Mystery recently surrounded the apartment of the Argentine assistant air attache, Lieut. Ronald J. Rossiter. His rooms at the Marlyn apartments were charred and burned. In the diplomatic corps, the gossip was that dirty work had taken place because of Argentina's anti-U. S. policy . . . Solution of the mystery: Lieutenant Rossiter went to sleep smoking, had to be rushed to a hospital, and was kept under an oxygen tent to recover from carbon monoxide poisoning.

¶The warning that more farmers must be drafted comes on the heels of another warning that Italian prisoners no longer can be counted on for farm labor. The status of Italy as a co-belligerent will soon take Italians out of the prisoner category.

¶Harold Hopper, recently resigned chief of WPB's motion picture section, is urging the American cinema industry to get busy now to prevent motion picture embargoes after the war. Free distribution of movies—one of the best means of American propaganda—should be a plank at the peace table, Hopper urges.

Walter Winchell

(WNU Service)

Notes of a New Yorker

The Wireless: Radio historian Harriet Van Horne quotes a medico as saying that listeners to the daytime soap operas expose themselves to "increased blood pressure, nocturnal frights, vasomotor instability, vertigo, gastro-intestinal disturbances, profuse perspiration, tremors and a slight touch of tachycardia" . . . Of course, that doctor is talking about only those who LIKE the programs . . . Marion Coveridge, the minor (she's 14), packs a wallop with her ballads Sunday ayems via NBC . . . Too many radio jesters really believe the studio audiences' howls as legitimate. The result is that the comics are getting careless. What brings big laughter in studios often brings yawns in the parlors.

The Love Letter of the Week: From Quentin Reynolds' book, "The Curtain Rises": "Most of what I wrote in the diary is nothing but gossip. Still I suppose if a thousand years from now someone were to dig up the Winchell columns of the 1920s, he would get a pretty clear picture of life here during those hectic days. You cannot dismiss gossip columns by saying they discuss only trivial things. To a great extent they reflect the age in which we live."

Editorial Dep't Novelette: It happened in the city room of one of the Big Town gazettes . . . Two of the boys were back to say hello . . . One (who has never been out of the country) wore the army oak leaf . . . The other wore the gray-green of the marines, with a couple of hard-won stripes . . . Tippled and blustering, the Major called upon the Marine to salute . . . The kid responded quickly . . . After all, he had been only a copy-boy; the Major had been an editor, if you please . . . It was a tight, tense moment . . . A real editor looked up from his work with studied puzzlement . . . "Tell me," he said in clipped, quiet, carrying syllables, "which one of you was it who killed six Japs on Guadalcanal?" . . . The Major waddled out the door . . . The kid was too modest.

Midtown Vignette: This is one of those shawt-shawts that caress the eyes and ears . . . He is a very young member of a Fortress crew now being rehabilitated after service among the flak in Europe . . . He has most of the campaign ribbons but no medals for outstanding heroism . . . Two of his buddies have several . . . The lads had a few hours leave last night and decided to go to one of the night spots with their buddy and his bride . . . And because he had no silver star or other medals—the other two didn't wear theirs.

The Magic Lanterns: Hollywood, which has too often pictured a kick in a Jap's pants as the pay-off for Pearl Harbor, gets down to cases in "The Purple Heart." Here's a flicker that brings the film colony up to date. Its story gets inside you and twists and burns with its report on the Sneakanese savagery. The tale is told not with a ladle, but with a typewriter of cold steel. Dana Andrews, Sam Levene and Richard Conte are superb as the captured fliers . . . Nora Bayes gets her biog sung and danced in "Shine On Harvest Moon," a rich load of ye old tyme nostalgia. Its typical of the them-was-the-daysish musicals, and you can't imagine anyone not reveling in some of the memories of the big town before it went soft on crepes suzettes and laced shoes.

In the forthcoming film of Nora Bayes' life — "Shine on Harvest Moon," they omit this incident . . . Nora once wired E. F. Albee, the vaudeville magnate: "Beginning next week my salary must be $10,000 a week" . . . Albee replied: "Your salary will remain $1,000 per week" . . . Nora opened as scheduled, but after singing eight bars of "Take Me Out to the Ball Game" she stopped the music and told the audience: "That's $1,000 worth of my act"—and walked off.

Then there's the one about the playwright who was called upon to make a curtain speech . . . He rambled on and on, with words going round and round looking for an idea . . . When he came to the phrase: "I am speaking for the benefit of posterity"—a heckler in the audience drove him from the stage with the squelch: "Yes, and if you aren't quick about it, they'll be along to hear you."

No colyum on stage stories would be complete without one about John Barrymore, whose pungent wordage packed more of a wallop than most critics . . . During a rehearsal with an uppity actress, Barrymore made some harsh remarks about her work . . . The actress drew herself up to her full height and snapped: "I want you to remember that I am a lady!"

Barrymore made a long, sweeping bow and came up with the rapier reply: "Madam, I shall respect your secret!"

ON THE HOME FRONT with RUTH WYETH SPEARS

THERE are two ways a slip cover. One is then cut the actual mate on the chair; the other muslin or old sheets on and then use the pieces tern.

American Seed Raisers Grow Record Crops To Meet Unprecedented Wartime Demands

U. S. Producers Must Make Up for European Imports Now Cut Off

In a remote outpost of New Caledonia a sergeant bellows from the door of a mess hut, "Hey, Murphy, how about those vegetables?"

"Coming right up, Sarge!" And Private Murphy moves at a fast clip from the camp garden, laden with fresh vitamins and minerals in the form of sweet corn, tomatoes and string beans for the evening meal.

This scene is not as fantastic as it sounds, even in the middle of a war, according to the War Food administration. It's a fact that Uncle Sam is sending many hundreds of tons of vegetable seeds to all parts of the world with the armed forces. Wherever a permanent camp is set up, and other factors are favorable, fighters who otherwise would get none of the bulky, perishable vegetables are themselves raising the familiar things they know and like with seed from home.

Seeds are so small, compared with the vegetables they produce, that they are an economical method of exporting food via either steamer or airplane. In European countries, for example, as much as five tons of tomatoes can be raised from a single ounce of seed. Rutabagas, another favored vegetable there, will produce as much as 500 bushels from the seed contained in a pint jar.

The total vegetable supply, through June, 1944, is estimated by the department of agriculture at 391 million pounds. Of the allocable portion, (379,500,000 pounds), 73 per cent or 277 million pounds will go to American farmers, to Victory gardens—of which 22 million are sought this year—and to other civilian consumption. This is a somewhat larger supply than was available in 1943. Some varieties to which gardeners are accustomed may not answer roll call this spring, and there will be a scarcity of cabbage seed, but no U. S. gardener, says WFA, need be without plenty of vegetables.

Another allocation of 9,600,000 pounds or 2.5 per cent goes to Lend Lease outlets. About five million pounds will be available to Russia, and some four million pounds to the United Kingdom. An additional 1.3 per cent, or about 4,450,000 pounds, will be divided among the other Allied countries and liberated areas.

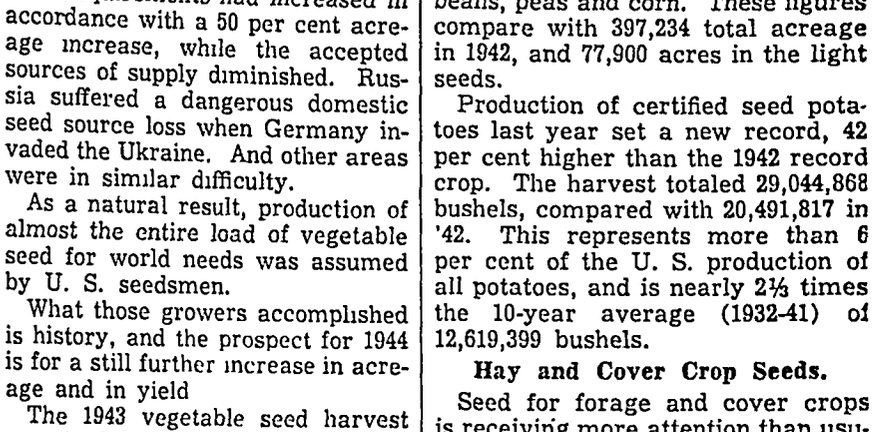
A total of 3,818,000 pounds, or 1 per cent, will be apportioned to U. S. territories, the Red Cross, friendly nations, etc. U. S. military and war services will receive substantial quantities.

All of these exports and shipments total only 4.8 per cent of the total seed allocation. The remainder of the allocable supply, 84 million pounds or 22.2 per cent, will go into what is known as "contingency reserve," a reserve to be used as need arises.

Seed needs during recent years have made increasingly large demands on America's domestic supply. Balancing available seed against claims to bring about a fair division among the claimant groups, and assisting the necessary expansion in vegetable seed production, has been a part of the War Food administration's overall food production and distribution programs.

Seeds Came From Europe.

Small vegetable seeds were produced almost entirely in continental Europe prior to 1939. When the outbreak of war cut other supply lines, it also stopped, for example, the importation of cabbage and cauliflower seeds from Denmark and Holland. Great Britain's growers, who once looked to the European seed market to answer most of their needs, faced a serious shortage. Seed requirements had increased in accordance with a 50 per cent acreage increase, while the accepted sources of supply diminished. Russia suffered a dangerous domestic seed source loss when Germany invaded the Ukraine. And other areas were in similar difficulty.



Enough seed for five tons of tomatoes is in the little pile on the scales. According to the department of agriculture, one ounce of seed can grow into that much, if carefully cultivated, as is the practice in Europe.

As a natural result, production of almost the entire load of vegetable seed for world needs was assumed by U. S. seedsmen.

What those growers accomplished is history, and the prospect for 1944 is for a still further increase in acreage and in yield

The 1943 vegetable seed harvest was the largest in United States annals, latest figures showing production of 355 million pounds. This is a 91 per cent increase over the three-year (1939-41) pre-Pearl Harbor average of 186 million pounds.

Very few American farmers grow vegetable seeds as their only cash crop. However, many give vegetable seeds first place, particularly in the Pacific coast states. A government survey has shown that production of 29 out of 48 seeds topped the 1942 record harvest for a total increase of 21 million pounds over the 334 million pounds harvested last year.

Beans, peas and corn accounted for 331 million pounds of seed in 1943, 6 per cent more than the 1942 production of 313 million pounds. The figure for small or light seeds, such as beet, carrot and cucumber, totaled about 24.1 million pounds last year, 16 per cent more than the 1942 crop of 20.8 million pounds. The harvest on these small seeds fell below expectations due to a smaller yield per acre for 27 of the seeds and a total harvested acreage 16 per cent less than was intended.

Yields Multiplied.

Phenomenal increases in acreage yields on some seed were recorded. Brussels sprouts, with an increase of 371 per cent, led the list. Other large increases were 228 per cent for okra, 225 per cent for mustard, 194 per cent for kale, and 172 per cent for salsify.

Total crop production for 1943 exceeded 1942 by 27 times for brussels sprouts, 370 per cent for mustard, 358 per cent for dill, 343 per cent for mangelwurzel, 213 per cent for okra, 202 per cent for kale, 195 per cent for looseleaf lettuce, 181 per cent for Chinese cabbage, 178 per cent for chicory, 165 per cent for carrot, 153 per cent for onion, and 150 per cent for leek seed. Greatest decline in total production probably will be recorded for broccoli, cabbage, romaine lettuce, pepper, kohlrabi and parsnip seed.

Larger acreages of most kinds of vegetable seed, 30 out of 48, helped offset decreased yield per acre of a majority of the crops. Biggest reductions in acre yield were reported for cabbage, 40 per cent less than 1942; broccoli, 56 per cent; pepper, 70 per cent; parsnip, 73 per cent; kohlrabi, pumpkin, chicory and cauliflower, each 76 per cent less.

Total land in seeds harvested in 1943 was 423,391 acres, with 80,824 acres covering the small or light seeds and the remainder in garden beans, peas and corn. These figures compare with 397,234 total acreage in 1942, and 77,900 acres in the light seeds.

Production of certified seed potatoes last year set a new record, 42 per cent higher than the 1942 record crop. The harvest totaled 29,044,868 bushels, compared with 20,491,817 in '42. This represents more than 6 per cent of the U. S. production of all potatoes, and is nearly 2⅓ times the 10-year average (1932-41) of 12,619,399 bushels.

Hay and Cover Crop Seeds.

Seed for forage and cover crops is receiving more attention than usual this year. The 1944 conservation program emphasizes cover crops to help increase production, with a consequent need for more seed.

Harvest of legume and grass seeds will be encouraged in 1944 under the provisions of the Conservation Practices Program of the Agricultural Adjustment agency. Payment of $3.50 for each harvested acre will be allowed up to a maximum of 25 acres on any farm. Seeds included are legume and grass seeds with the exception of timothy, redtop, Austrian peas, Kentucky blue grass, cowpeas and soybeans.

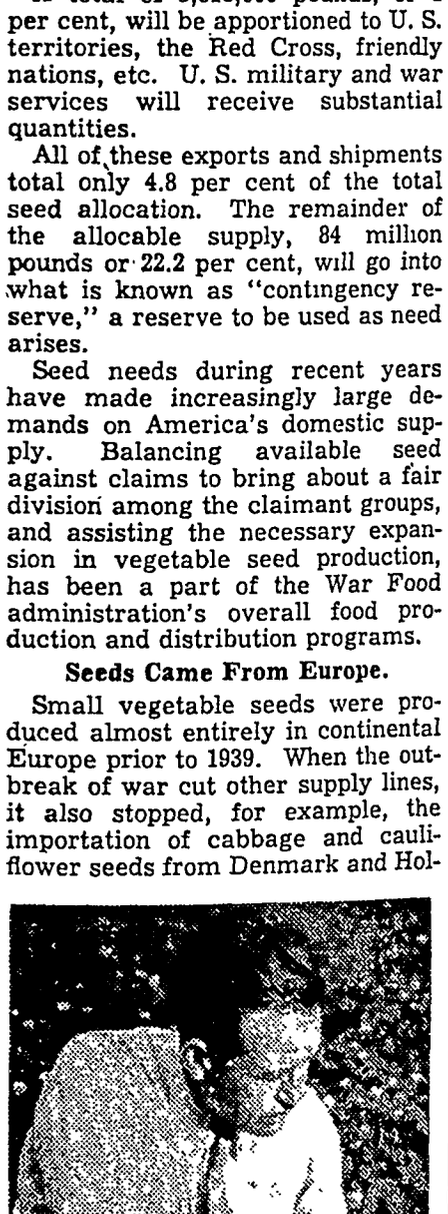
The clover seed harvest, taken as a whole, did not fare so well. Red clover seed acreage was expanded 15 per cent, with an estimated production of 1,142,900 bushels, 11 per cent more than the 1942 crop of 1,026,100 bushels. Acres harvested were upped to 1,279,600, an increase of 169,300 acres over 1942. Yield dropped from .92 of a bushel per acre to .89 of a bushel. Acreage increase was largely in Wisconsin and Michigan.

Timothy seed, with an estimated 1,499,600 bushels, dropped 11 per cent below the 1942 harvest of 1,678,500 bushels of seed. The decrease is reported due to a smaller acreage (394,000), since yield per acre of 3.81 bushels is only slightly less than the 3.84 bushels for 1942 and is more than the 1932-41 average of 3.21 bushels. Harvested acreage for seeds was smaller in all important states except Wisconsin and Pennsylvania but acreage cut for hay was larger than the previous year, apparently because of a greater need for timothy hay than for the seed.

More Lespedeza.

Lespedeza seed production totaled 159,920,000 pounds, a 67 per cent increase over the 1932-41 average of 95,564,000 pounds, but 6 per cent smaller than the 1943 crop of 170,500,000 pounds. A 9 per cent reduction in yield per acre more than offset a 3 per cent increase in planted acres. Yield was only 196.5 pounds, due to summer and fall drouth, as compared with 216.6 pounds in 1942. Total acres were estimated at 814,000.

The harvest during the coming season of increased amounts of grass and legume seeds, vegetable seeds and of seed crops in general is highly advisable, says the War Food administration. It will raise the national seed supply and provide for increased domestic farm production to meet expanding war requirements for food and fiber. And it will provide seeds to help meet the needs of the Allies and of the liberated countries as they are freed from Axis control. Making as much seed as possible available to European farmers when that phase of the war ends, will aid them to rehabilitate their land so that they can grow more food and fiber for themselves, thereby lowering their requirements for farm commodities from the United States.



Legumes such as clover are a valuable source of natural nitrogens, as every farmer knows. More seed will be needed for cover crops in 1944, present estimates show.

Supply of Grass and Clover Seed Is Extremely Low In Face of Unusually Heavy Midwestern Requirements

Wet weather in Minnesota, which reduced the crop more than one-third in that state, was chiefly responsible for last year's smaller Blue Grass seed harvest. Production of 1,516,000 bushels of cured seed totaled only about one-third as much as the 1942 crop of 4,525,000 bushels. Nebraska and North Dakota also showed a considerable drop in production. Recovery of 21-pound seed from cured seed of the 1943 crop averaged 49.74 per cent, compared with 52.67 per cent for 1942, a difference of about 2⅔ pounds of clean seed weighing 21 pounds per measured bushel from every 100 pounds of cured seed.

Of particular importance to the Northern Plains states and the Corn Belt this year will be Sudan grass seed. Some states, such as Illinois, Kansas, Montana, Iowa and the Dakotas, have so far had so little rainfall that grasses which help to hold the topsoil will be in unusual demand. Sudan also provides good grazing. Wells are reported dry in many states, with dust already blowing in Iowa and Kansas. Two million pounds of Sudan seed are already scheduled for import during 1944, and an increase in domestic production is being sought by WFA.

KLEMME LOCALS

Mr. and Mrs. Harvey Barz and Mr. and Mrs. Glenn Terhufen were Mason City visitors Saturday night.

Mr. and Mrs. R. A. Jorgenson were at Mason City on business Saturday evening.

Mr. and Mrs. A. L. Kingery of Seneca, spent Saturday and Sunday visiting with Klemme friends.

C. G. Waterman, who was on the sick list for about ten days was able to resume his duties as cashier at the Bank Monday.

Mr. and Mrs. R. A. Jorgenson were dinner guests at the Lyle Liebendorfer home in Forest City, Sunday.

Mrs. Earl Schaeffer spent Sunday at the home of her mother-in-law, Mrs. G. J. Schaeffer at Forest City and helped her celebrate her birthday with a family dinner.

The Klemme grade and high school teachers went to Fort Dodge last Friday to attend the Teachers Convention The schools were closed that day and the pupils enjoyed a long week end vacation.

Mr. and Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, drove to Mason City Sunday afternoon and visited with Mrs. John Clements and baby son at the Mercy hospital.

Walter Kimball had the small building just east of the Gruetzmacher building hauled on a truck to Boone Saturday morning. The little building had been used for a couple of summers as a popcorn and ice cream stand, and was operated by Nadine Kimball during the summer vacation.

Mr. and Mrs. J. A. Chambers, Rev H E. Harvey, Ira Overholt Mrs R A. Jorgenson were in Des Moines Friday where they attended the State Convention. Mrs. R. R. Roberts of Britt was chosen as a delegate from this congressional district to attend the National Convention in Chicago.

Dorance Day, of El Segundo, California, came early Thursday morning for a visit with his parents, Mr. and Mrs. J. N. Day. He was called here by the death of his grandmother, Mrs. Wm. Smith. Dorance, who is employed at the North American Air Crafts company near Los Angeles, will return to the west coast Friday morning.

NEW CASES FILED IN HANCOCK COUNTY COURT

The following new cases were recently filed for trial in the Hancock County district court:

Rust Gabrielson vs. T. J. Murray. A law suite on promissory note.

Klemme Cooperative Grain Co. vs. Truels Steffen. Suite on a promissory note.

Dorothea Schroeder vs. Louisa Schroeder, et al. Equity cause, partition of property action.

Mrs. Sarah Weider vs. Frank Weider. Divorce action.

G. L. Severns vs. W. J. Shipman. Suite on promissory note.

Woodford Wheeler Lumber Co., vs. Arthur P. Bartik et al, A law case.

A good cutting surface for home sewers may be devised by laying an old strip of oilcloth wrong side up on the floor or on a table. The materials will not slide on it.

Mrs. John Clements and baby son returned home from the Mercy Hospital at Mason City, Tuesday.

Mrs. Max Mace and two children were Sunday dinner guests at the home of Mr. and Mrs. Henry Busse.

Mr. and Mrs. Henry Busse and daughter Mildred, spent Friday in Mason City.

Mr. and Mrs. J. A. Chambers were at Mason City on business Tuesday.

Miss Luella Lewis, Cadet Nurse of the Methodist Hospital of Des Moines, spent Sunday visiting at the parental Verner Lewis home.

Mr. and Mrs John Day and son Dorance were dinner guests Monday evening at the Bert Mathews home at Clear Lake

Harvey Barz has his oil service truck all decked out in a new bright red coat of paint which makes it look like a brand new outfit.

Mr. and Mrs. Geo. Albers, daughter Helen, and Miss Doris Reuben were supper guests of Mr. and Mrs. John Albers Monday evening.

Mrs. Wm. Kurtz who had been ill and was a patient at a Mason City hospital, is now at her home and is getting along fine.

Mr. and Mrs. Howard Baack and children were dinner guests Sunday at the parental Mr. and Mrs. August Baack home.

Miss Etta Lou Webner has returned from a week's visit with her brother, Pfc. Herbert Webner and family at Madison, Wisconsin.

The Misses Lucille Hartbeck, Marilyn Back and Helen Albers attended the teachers meeting held at Fort Dodge last Friday.

Mrs. Henry Lewis and son Duard, Mrs. Clarence Kluckhohn and Luverne Lewis, were Mason City visitors Saturday.

Mrs. Gerald Koerner and Mrs. W. F Pavey spent Tuesday visiting with Mrs. John Clements and baby son, James Lloyd, at the Mercy hospital in Mason City.

Ira Overholt and Clifford Adair attended a district meeting of International Harvester Co. dealers and servicemen at Mason City Tuesday.

Mr. and Mrs. Lloyd Ax of Mason City visited at the parental Wm. Ax home near Klemme Sunday. They recently moved back to Mason City from Ames.

Gary, son of Mr. and Mrs. Lloyd Smith was taken to a Mason City hospital Tuesday for an emergency appendix operation. Gary became ill suddenly while in school.

Mrs. Verner Lewis returned home Monday evening from Marion South Dakota where she went to visit her mother, Mrs. Dick Ebeling who was sick.

Mrs. Leslie De Merritt and children are now staying at the home of her parents, Mr. and Mrs. Wm Ax as Mr. De Merritt has been called into the service.

Mr. and Mrs. Wallace Pavey, Miss Luella Lewis, Mrs. Don Speers and Peggy Coobs visited with Mrs. John Clements at the Mercy hospital Sunday.

Mr. and Mrs. August Larson, of Omaha, Nebraska, came Thursday for an extended visit at the home of their son, Carold Larson and family.

Mr. and Mrs. John Day and son Dorance, were dinner guests Sunday at the home of Mr. and Mrs. M. C. Kubecek at Mason City where a gathering of the Ross relatives was held.

Miss Maxine Bachman, who has been employed at the Mercy hospital at Mason City, is home to assist her mother, Mrs. Clarence Bachman with spring house work. Miss Bachman expects to return to her work at the hospital later.

When you have company or take a trip, that's news. Phone 12.

Mr. and Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, and Mr. and Mrs. R. A. Jorgenson were supper guests at the home of Mr. and Mrs. P. M. Wilson Tuesday evening. The occasion was Mr. Wilson's birthday anniversary.

Mr. and Mrs. George Albers and daughter Helen; Miss Doris Reuben; Mr. and Mrs. Fred Pringnitb, and Mr. and Mrs. Edgar Buss were dinner guests of Mr. and Mrs. Walter Lauster and Ruth Ann, last Sunday.

Merle, son of Mr. and Mrs. Bruce Peck who reside east of Klemme, suffered a fractured ankle and bursted blood vessels when a horse fell on him Saturday afternoon. Merle is getting along quite well but will have to wear a cast for 3 weeks or more.

The local Red Cross needs a lot of old felt hats, either men's or women's for making bed room slippers for army and navy hospitals. Any old felt hat will do. Wash it and bring to the Red Cross room at the school house, or leave with Mrs. Trumbell.

Mr. and Mrs. Wayne Pavey and daughter, Carol of Webster City, visited in Klemme briefly Saturday evening on their way to Plymouth to spend Sunday with Mrs. Pavey's relatives. Mrs. Donald Speer accompanied the Paveys to Webster City for a few days visit.

CARD OF THANKS

I wish to thank all my neighbors and friends for their help at my home, and for the visits, cards and letters received during my stay at the hospital.
(20-1tp) —Mrs. Wm. Kurtz.

CARD OF THANKS

I wish to thank my friends for the flowers, cards and visits which I received while I was in the hospital.
(20-1tp) —Mrs. E. C. Kluckhohn.

CARD OF THANKS

I want to thank all those who helped in giving me a radio and also for the cash presented me. I surely enjoy the radio and appreciate very much what you have done for me.—Mayvis Polsdofer. (1tp)

CARD OF THANKS

I wish to thank my friends and relatives for their visits, flowers cards, letters and gifts which I received while I was in the hospital.
(20-1tp) —Mrs. John Clements

HELLO, FOLKS!

Mr. and Mrs. Floyd Lundmark are the parents of a baby girl born to them at a Mankato, Minn. hospital on Sunday, April 2nd. They have named their new baby, Betty Ann.

Mrs. Lundmark will be remembered here as the former Miss Wava Yahnke.

A number of Klemme men left for Camp Dodge early this morning for the army physical examination. Included in the group were Keith Albertson, Orville Stokesbary, Dean Merkel, Clifford Montgomery, Ed. J. Thompson, Harvey E. Barz and Alvin Thiemann. 103 men from Hancock County left for Camp Dodge for physicals.

Mr. and Mrs. C. C. Kilgore moved their household goods to Fort Dodge Monday where Mr. Kilgore is now employed and where they will make their future home. Mr. and Mrs. Earl Ruka move into the Mrs. Wm. Smith house vacated by the Kilgores. Mr. and Mrs. Ruka resided in the Herman Stille house in the south part of town.

Miss Margaret Veenstra of Des Moines spent Tuesday afternoon at the home of her parents, Mr. and Mrs. Henry Busse. She was enroute from Minneapolis where she had spent the week end visiting with friends. While there she also had the pleasure of attending the Ice Follies.

JUDGE THOS. A. BEARDMORE TO PRESIDE AT MAY TERM OF DISTRICT COURT

Several Klemme People On Jury List For The May Term

The Hancock County District Court will convene for the May term at Garner, May 1st, with Judge Thos. A. Beardmore presiding.

The Petit Jurors will report on Tuesday morning, May 9th at 10:00 o'clock.

Jurors drawn for the May term are: Arthur Schlawin, Klemme; Mrs. Mary Jane Jorgenson, Klemme; Arthur Miller, Miller; Mrs. Carl Frick, Britt; John Meinders, Britt; R. H. Higdon, Britt; Mrs. E. E. Braley, Britt; Jerry Knapper, Britt; Minnie E. Bird, Woden; D. W. Senne, Woden; Ruth Butz, Garner.

Ed. Wetterling, Garner; Charles Kurtz, Garner; Edna Steiff, Garner; Dorothy Bethke, Garner; H. R. Gibbs, Klemme; Gilbert Koehler, Meservey; Glayds Wood, Corwith; Garfield Gouge, Corwith; Edna Enfield, Corwith; John F. Paulson, Britt; Minnie Studer, Wesley.

Clarence Lenz, Garner; D. L. Wilkie, Kanawha; C. A. Shelton, Kanawha; Mrs. Alac Anderson, Britt; D. J. Spieker, Britt; Evelin Mortenseon, Britt; William Boller, Goodell; and V. A Cook, Klemme.

SOYBEANS ARE FOE OF MANY PERENNIAL WEEDS

Are Good Smother Crop For Canada Thistle, Quack Grass And Bindweed

Soybeans, in addition to providing feed, protein, and oil supplies, are effective as a smother crop on such noxious perennial weeds as Canada thistle, quack grass or bindweed. More than 1 year is usually required for eradication, but no crops are lost in the process.

E. P. Sylwester, extension botanist at Iowa State College, says low-producing areas or those abandoned because of serious weed infectations can be brought into production by growing soybeans to kill the weeds. Soybean growth will leave the land in better condition at the end of the war emergency.

Cultural Practices

Certain cultural practices add tremendously to the value of soybeans as a smother crop according to Sylwester. The ground on which the beans are to be grown should be plowed when weed growth starts in the spring. At succeeding 10-day intervals, or whenever new weed shoots apper, cultivate with a surface cultivator or springtooth harrow. Plow the ground again about May 30; prepare a firm seedbed, and drill inoculated soybeans the same day at the rate of 3 bushels per acre. Harvest the crop at the usual time; plow immediately, and resume fallowing operations.

On Rolling Ground

On slightly rolling ground, soybeans should be drilled in on the contour. To further alleviate danger from erosion, the soybeans should be harvested so that rye may be seeded as a cover crop in early October. The rye should be plowed under the following spring and the area again seeded to soybeans. On extremely rolling ground, summer fallowing and soybeans are not recommended.

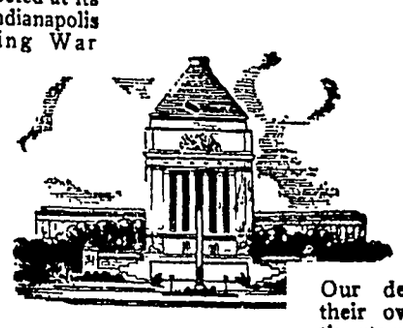
Goodell Man In Hospital

Francis Finn of Goodell underwent a major operation for a lung infection Thursday at the Mercy hospital in Mason City. Mrs. Raymond Hofer, of Goodell, registered nurse, is caring for him, and the Hofer children are staying at the parental Evans home in Mason City.

BONDS OVER AMERICA ★ ★ ★

Paying tribute to its fighting men who fell on foreign fields during World War I, Indiana has erected at its capital of Indianapolis this striking War Memorial.

Hoosier Monument



Your War Memorial; U. S. War Bonds

Our dead have left their own memorials; the starved and hounded people of captive Europe can do little more than hope and pray, but to free Americans is left the choice of their own future.

Marriage Ceremony Held At Reformed Church On Easter

MISS DOROTHY HAMPEL IS BRIDE OF CEDAR RAPIDS MAN ON EASTER DAY

Miss Dorothy Hampel, daughter of Mr and Mrs. Wm. Hampel of Ventura, and Mr. John Foster, of Cedar Rapids, were united in marriage at the Evangelical and Reformed Church of Klemme on Easter Sunday at high noon. Rev Calvin Grosshuesch officiated, using the double ring ceremony

The couple were attended by Mr. Eugene Senti of Cedar Rapids, and Mrs. Richard Ax of Ventura.

The bride was attired in a gray spring traveling suit.

Following the ceremony Mr. and Mrs. Richard Ax served a wedding dinner at their home to the immed ate relatives.

The couple will make their home in Cedar Rapids where Mr. Foster is employed as a radio engineer.

PROPER PLANTING RATE INCREASES CORN YIELD

Proper rate of planting and spacing of rows, together with use of a high-yielding hybrid seed, can help increase Iowa corn yields this year. To help select good seed, information on relative performance of various hybrids may be secured from county test plots and from the Iowa State College corn yield test.

Planting Rates

Planting rates now in general use are somewhat low for maximum production, according to Iow aState College agronomists. Available data indicate that over most of Iowa larger yields would be obtained by increasing the planting rate from two and three to four kernels per hill. At the customary planting rate fo three kernels per hill, only 2.4 plants per hill reach maturity. If the planting rate were incerased to four kernels per hill, 3.04 plants could be expected to mature resulting in an increase of 1.4 bushels an acre.

Spacing

Spacing of rows and plants within the row also may influence yield. Data from experimental plots show highest yields from 21 by 21 inch spacing, but the differences in yield are not significant. Two disadvantages for this row and hill spacing, too, are the general equipment to these row widths, and the lodging which is more severe with the closer spacings.

Apparently it makes little difference in yield as to whether corn is checked or drilled, provided the weeds are killed.

Confirmed At Reformed Church On Good Friday

The following young people of the Klemme Evangelical and Reformed Church were confirmed at the morning services on Good Friday: Dean Jacobs, Elizabeth Goll, Phyllis Kirkwood and Merle Pannhoff.

BAPTISMS AT METHODIST CHURCH EASTER SUNDAY

The following babies were batized by Rev. H. E. Harvey at the Klemme Methodist Church Easter morning:

William Sidney, son of Mr. and Mrs. Chester Renner.

Raymond Duane, son of Mr. and Mrs. Ernest Pringnitz.

David F., son of Mr. and Mrs. Keith Albertson.

John Carol, son of Mr. and Mrs. Elmer Larson.

Ellen Louise, daughter of Mr. and Mrs. John Waddingham.

Geraldine Nancy, daughter of Mr. and Mrs. Stewart Heivilin.

Marlys Joan, daughter of Mr. and Mrs. Wm. Neuberger.

NEXT IS DECLARATION OF ESTIMATED INCOME

On or before April 15, approximately one-thrid of the taxpayers are required to file a declaration of estimated income and victory tax for 1944. One-fourth of the estimated tax must be paid at the same time that the declaration is filed and the remainder is due in equal quarterly installments.

The taxpayer is to make the best estimate he possibly can and if his tax increases or decreases because of a change in income of family status, he can file an amended declaration on or before June 15, September 15 or December 15. He is not subject to a penalty for an estimate unless he underestimates a tax by more than 20 per cent, or in case of farmers 33 1|3 per cent.

These two classes of persons must file: All citizens and residents who expect to have during 1944: First, income from wages subject to withholding of more than $2,700 if single or more than $3,500 individually or together if married. Second, income individually or together of $100 or more from sources other than wages subject to withholding, and a total income of $500 or more for a single person, more than $624 for a married couple living together.

LIGHT RAKING OF LAWN ALL THAT IS REQUIRED

"Once over lightly" is a good rule to remember when raking the lawn for the first time this spring.

Iowa State College horticulturists say the spring clean-up is fine, but raking too vigorously will do more harm than good. A light raking to remove sticks, bones and other course litter should be sufficent.

Using the rake like a fine tooth comb removes decaying plant material that is needed to fertilize the soil, retain moisture, insulate the grass roots from summer heat, and improve the soil texture.

Mumps At Goodell

The Goodell community is having a siege of the mumps with several absentees from school.

Klemme Women Elected To County Auxiliary Offices

MORE HANCOCK CO. MEN LEFT FOR SERVICE

The following boys who had previously passed their pre-induction physical examination at Camp Dodge, Iowa, reported back for active duty, April 2, 1944:

Willie F. Bartik, Britt, Iowa, Marines; Donald L. Knoke, Garner, Iowa, Marines.

Albert J. Gilbert, Thornton, Iowa Navy; Alvin H. T. Halverson, Garner, Iowa, Navy; Alvin E. Townsend, Britt, Iowa, Navy; James E. Haan, Britt, Iowa, Navy; Alfred B. Malek, Garner, Iowa, Navy.

Kenneth Kuchenreuther, Woden, Iowa, who had previously passed his pre-induction physical examintion at Camp Dodge, Iowa reported back for active duty March 27, 1944, into the Army.

There were 102 boys left Britt, Iowa, Wednesday morning, April 5th, for their pre-induction physical examination.

KLEMME GIRL WINS PLACE I. S. T. C. HONOR ROLL

Miss Novella Bredbenner was one of the forty-one students at Iowa State Teachers College to win a place on the honor roll for the winter quarter. In order to qualify for the honor roll a student is required to carry at least 14 hours of college work and receive a grade point average of 3.33 or higher Miss Bredbenner earned a 3.7 grade point average with 17 hours of college work.

About two weeks ago Klemme radio listeners to KXEL heard Miss Bredbenner and two other college students appear on the radio broadcast "This Is America."

PVT. ETCHEN READY FOR PRE-FLIGHT TESTS

Keesler Field, Biloxi, Miss.—Pvt Winton Warren Etchen, son of Mr and Mrs. Albert Etchen, Klemme Iowa, has reported at this unit of the Army Air Forces Training Command to begin a phase of processing designed to determine his qualifications as a pre-aviation cadet.

Upon successful completion of and phychological tests, classification and training, he will be sent to a college or university for five months of further study. If it is found that he has sufficient academic background, he will be sent directly to a pre-flight center for cadet training.

MRS. ROOSEVELT WRITES TO KLEMME SAILOR'S WIFE

Mrs. Louis Suckow, operator of the Dainty Maid Beauty Shop, Forest City, received a personal letter from Eleanor Roosevelt stating that she had met and talked with Mrs. Suckow's husband, Louis Suckow, Seaman 1st Class, somewhere in the Caribbean area. She wrote that he was well, but was anxious to come home.

Seaman Louis Suckow is a son of Mrs. H. L. Suckow of Klemme and a brother of Mrs. Herman Paul. John and Henry Suckow.

IMPLEMENT STORE WILL SHOW FREE MOVIES

Ira Overholt, manager of the Northern Lumber Implement Store announces that they are sponsoring a free moving picture show to be given at the Community Hall next Wednesday evening, April 19th. The feature picture "The Strength Unseen," will be of special interest to farmers and their families. It is a dramatic story of winning the war on the home front.

Don't fail to see this fine entertainment next Wednesday night.

Phone your news to 12.

MRS. LESTER STILLE ELECTED PRESIDENT OF HANCOCK COUNTY AUXILIARY

Mrs. James C. Thomas, Klemme, Is Named Auxiliary Secretary

The Hancock county American Legion auxiliary met at Memorial hall at Britt April 4th for the spring conference. Mrs. Lester Stille of Klemme was elected president for the ensuing term. Other officers elected included Mrs. DeGrooth of Corwith as vice president and Mrs Margaret Thomas of Klemme as secretary. The county arganization endorsed Mrs. C. L. Strate, retiring county president, as a candidate for the office of district vice president.

The meeting took the form of a patriotic tea in observance of Army day. Guests included wives, sisters, mothers and daugthers of army personnel. Mrs. Oscar Johnson gave an address of welcome and as a special tribute to Army day presented the organization with a cash gift of $6 to be used for the benefit of men in service. The group at once voted to donate the money to the clubmobile fund designed to provide fully equipped clubmobiles to be sent into the actual fighting zone for the benefit of American soldiers.

Mrs. Luella Conard of Kanawha read an original poem dedicated to men of the army. The program also included two vocal numbers by Rev Harvey of Klemme. Mrs. Matt Smith, also of Klemme, served as accompanist for Rev. Harvey and as pianist for the formal opening and later for the retiring of colors. Miss Luella Wilkie of Kanawha played two instrumental numbers. Mrs. Ralph Jacobson of Boone, district president, was the guest speaker.

RAT KILLING DEMONSTRATION HELD AT JOSTEN FARM

Despite the disagreeable weather Tuesday afternoon there was a good crowd present at the Edmund Josten farm to see the latest methods of exterminating and controlling farm rat populations.

Effective methods of exterminating pocket gophers was also demonstrated.

Mr. Josten estimated that there was a rat population of about 1,000 on his farm. As soon as results are determined, a more detailed report of the demonstration will be given.

FRED SKOW DIED SUNDAY AT WATERTOWN, S. DAK.

John Day received word that his brother-in-law, Fred Skow, died at his home in Watertown, So. Dak., Sunday.

Mr. Skow is known to a number of people in this community.

STELLA THIEMAN HAD PARTY FOR YOUNG LADIES

Miss Stella Thieman entertained a group of young ladies at bridge and "500" Monday evening.

Mrs. Lyle Wilcox won high score in bridge and Miss Helen Albers was high scorer in "500.".

Lunch was served.

Seaman Donald Schaeffer Goes To Radar School

Donald, son of Mr. and Mrs. Roy Schaefer graduated last week from the Naval Training School at Norman, Oklahoma with the rank of Seaman 1st Class and was assigned to take special schooling in a radar course.

Minstrel Show In Liberty Twp. Thursday Night, April 13th

The Liberty 4-H Boys will present the "U-Name-It" Minstrel on Thursday evening, April 13 at 8:30 o'clock at Liberty No. 8 schoolhouse, four miles west of Klemme. Lunch will be sold.

Try this grand wake-up drink mornings. See if it doesn't help ! Use California Sunkist ons.

SNAPPY FACTS ABOUT RUBBER

Seriousness of the truck tire shortage will be appreciated when it is known that 34 of the country's largest cities receive all their milk by motor trucks.

Undersinflation is a voracious waster of tire rubber. A check on Michigan war workers' cars recently showed that more than 15 per cent were underinflated.

Rubber and processing represent about 40 per cent of the cost of manufacturing a popular size automobile tire.

The first rubber-tired motor bus was operated in Brooklyn, N. Y., in 1900. It was used for sightseeing purposes.

That Nagging Backache
May Warn of Disordered Kidney Action
Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become overtaxed and fail to filter excess acid and other impurities from the life-giving blood.
You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!
DOAN'S PILLS

Daily Menus Need Changes to Fit Family's Wants

You'll be surprised at how little chicken is needed for Chicken Noodle Paprika, but how good the casserole can taste. It meets all the requirements for a good, wartime dish.

Do you plan your meals to suit the family's mood?

In spring, for instance, do you satisfy their hunger for foods crisp, crunchy and light? Do you get away from the too hearty and heavy foods of winter and heed the change in weather and appetite? If you don't, then you should! Every family requires a change in food as well as in dress.

Food is more fun for both you and the family if you vary menus from time to time, weed out much-repeated recipes and add new ones to the family's collections. Do keep in mind the changes of season and their wealth of new foods and color schemes to add interest to the diet.

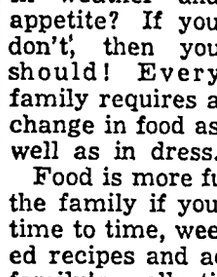
Save Used Fats!

Vegetables herald the important coming of spring—and their use in meals should be more generous, even in the meat course itself where they will act as a meat extender:

Meat Balls in Vegetable Sauce.
(Serves 6 to 8)

½ pound veal
½ pound pork
1 pound beef
1 small onion
1 green pepper
1 carrot
1 stalk celery
2 tablespoons fat
¾ cup applesauce
¾ cup moist bread crumbs
2 teaspoons salt
1 pint tomatoes
1 tablespoon flour
2 eggs
3 potatoes, diced
¼ teaspoon pepper

Chop parboiled or leftover vegetables. Grind meat and mix with applesauce, bread crumbs, salt, pepper and beaten eggs. Form into egg-sized balls. Melt fat, brown meat balls, add chopped vegetables and tomatoes. Bake uncovered 25 minutes in a moderate oven.



Save Used Fats!

Asparagus and Spaghetti.
(Serves 6)

1½ cups spaghetti, broken in pieces
1 pint canned or cooked asparagus and liquid
2 tablespoons flour
2 tablespoons fat
1 cup rich milk
3 to 4 drops tabasco sauce
½ teaspoon salt
1 cup buttered bread crumbs
Cheese, if desired

Cook spaghetti in boiling salted water until tender. Drain. Drain the liquid from the asparagus, cut stocks in short pieces and prepare a sauce from the flour, fat, milk and asparagus water, then add the tabasco sauce and salt. In a greased baking dish, place a layer of the cooked spaghetti, then one of asparagus. Cover with sauce and continue until all ingredients are used. Cover top with buttered crumbs. Top with grated cheese, if desired. Bake in a moderate (350-degree) oven until heated, about 20 minutes.

Save Used Fats!

You'll be getting the most out of your money if you serve this low-on-chicken casserole. It's thrifty but full of nutrition:

***Chicken Noodle Paprika.**
(Serves 6 to 8)

½ pound medium-cut egg noodles
4 cups boiling water
1 teaspoon salt
½ cup diced carrots
¼ cup diced celery
Salt and pepper to taste
¼ cup onion, cut fine
2 tablespoons shortening
1½ cups chicken stock or gravy
1 teaspoon paprika
½ cup minced, cooked chicken

To the boiling water add salt and egg noodles. Cook until all water is absorbed and noodles are tender. This requires about 10 minutes. Stir frequently during cooking period. Combine carrots, celery, onion and shortening and cook for a few minutes. Add chicken stock, paprika, seasonings and chicken. Cook slowly until vegetables are tender. Pour this mixture over the cooked egg noodles, place in buttered casserole and bake ½ hour at 350 degrees. Whole pieces of chicken may be used in place of the minced chicken.

An inexpensive food is the salad, but it provides the mineral and vitamin riches necessary to good health and living, and satisfies the need for change of texture and contrast in menus.

Ham Loaf.
(Serves 6)

1½ cups ham, diced
1 package lemon-flavored gelatin
1 cup boiling water
¼ cup vinegar
¼ teaspoon paprika
1 teaspoon salt
¾ cup water
¾ cup mayonnaise
2 tablespoons minced green pepper
2 tablespoons minced dill pickle
1½ teaspoons dry mustard

Pour boiling water over gelatin and stir until dissolved. Add vinegar and water and allow to cool slightly. Add the other ingredients and turn out into loaf pan. Chill until firm. Turn out on platter and garnish with lettuce, endive, sliced eggs and tomatoes.

Save Used Fats!

Vegetables should be cooked until they are just barely tender—then no more. Then most of their vitamins are intact, and the color is glorious. Here's a casserole with a riot of new spring color:

Garden Casserole.
(Serves 6)

2 cups white sauce
1 cup cooked new potatoes
1 cup cooked asparagus, cauliflower or broccoli
½ cup cooked carrots
½ cup cooked peas
1 cup yellow cheese

Make white sauce. Place vegetables in layers in buttered casserole and pour white sauce over them. Cover with finely cut cheese and bake in a moderate (350-degree) oven 20 minutes.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says

Mottoes: Produce and preserve, share and play fair are mottoes which should be in every household notebook.

This is what I mean, so check yourself on the following points so that you can tell if you're doing the job on the home front:

Save cans—to meet the quota of 400,000,000 used cans every month.

Save waste paper and collect scrap. Containers are made from these to ship supplies to forces overseas.

Start the Victory Garden early—to produce more food than we did last year.

Store leftover food correctly, prevent waste.

Shop early in the day, early in the week. Accept no goods without stamps.

Substitute for scarce foods, serve simpler meals to save time and leave you more time for vital war work.

HIAWATHA—G.O.P. STYLE

("Wendell Willkie during his visit was made a member of the Indian tribe and christened 'Flying Eagle.'"—News item.)

Forth upon the Gitche Gumee,
By the shining Big-Sea-Water,
At the doorway of the wigwam,
With the royalties about him,
Wen-Del-Will-Kie stood and waited.

All the air was full of freshness,
All the earth was bright and joyous,
And before him, through the sunshine,
Westward, eastward, northward, southward
Passed the golden swarms, the Ahmo,
Passed the bees, the presidentials,
Singing "Nice place is the White House,"
Chanting "This time you can make it."

Bright before him shone Chi-Caw-Go,
Level spread the boom before him;
From it leaped the nomination,
Sparkling, flashing in the sunlight,
Looking fair again and tempting
Even after what he'd been through.

Toward the sun his hands were lifted
Both the palms spread out against it,
And between the parted fingers
Fell the sunshine on his features,
Something in the mist of morning
Loomed and lifted from the water,
Now seemed floating, now seemed flying
Coming nearer, nearer, nearer.

Was it Brick-Er, the self-made one,
Or the Bob-Taft from Ohio?
Or the great Shu-Shu-Shu-Tom-Tom
The crusading one called Catch-'Em,
The famed warrior on rackets,
Baritone from far Owosso
Known to all the tribes as Dew-Eh?

None of these! But delegations,
Delegations from the prairies,
Delegations from the cities,
Come by birch canoe with paddles,
Trying out their vocal organs.
And the mighty Flying Eagle,
With his hands aloft extended,
Waited full of exultation,
Saying in his best make manner:
"Beautiful the sun, oh palsies,
Bright the prospects are, oh walsies.

"Never bloomed the chance so brightly,
Never shone the outlook better!"
And the delegates made answer:
"Not so fast, best-seller chieftain,
"Take it easy, global airman,
"We admit your deeds of valor
"But as yet 'tis early Springtime;
"Gentle June is still far distant,
"Anything is apt to happen,
"Keep your shirt on, keep your shirt on!"

And the Brick-Er and the Dew-Eh
From their haunts among the fenlands
Screamed "Farewell, oh, Wen-Del-Will-Kie;
"We're your buddies, we're your tribesmen,
"But the battle is the pay-off!"

And the Wen-Del-Will-Kie answered,
"How I wonder, how I wonder!"

AMERICAN DIALOGUES

"There's a fortune in it for you."

—*—

"Now look here, if you expect to get anywhere with this proposition, don't depress me."

* * *

Louis Schwartz, a New York garcon known as "Louie the Waiter" has personally sold four million dollars' worth of war bonds, a record to be proud of. It occurs to us that possibly he took to selling bonds because they are the only thing a customer could ask for and get.

—*—

We can't help wondering if Mr. Schwartz, when a customer says, "I'll take a bond, medium-well," replies, "but remember no butter."

* * *

The war department has ruled that dogs in the war may be cited but not decorated. Fido would rather have a bone, anyhow. How about a Distinguished Service Knuckle With Meat Attached?

* * *

A senator has introduced a bill asking for an investigation into the matter of why shirttails are getting shorter and shorter. It could be merely a matter of suspenders getting weaker and weaker.

* * *

If Japan intends to remove admirals and generals every time Uncle Sam kicks her in the pants she will soon be running her war entirely through first sergeants and corporals.

* * *

Two big hosiery manufacturers have been fined $40,000 for ignoring OPA ceilings. It can't be said they didn't have a leg to stand on.

—*—

Wanna Bet?

"However much the storm may rage around our fortress, the day will come when from behind the dark clouds the sun will shine and smile on us."—Adolf Hitler, in a recent address to the German people.

—*—

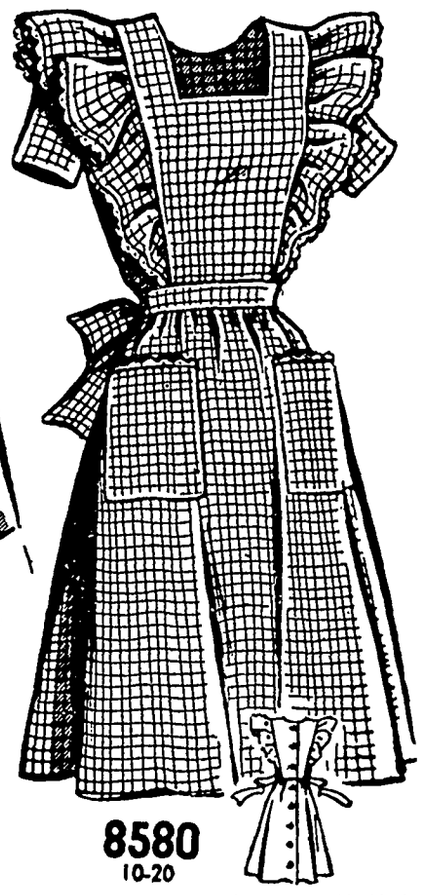
As a weather prophet Hitler is going to prove a terrible bust, too.

* * *

Ima Dodo says she can't see why the gum makers don't adopt that new song "Chew, Chew, Baby" as a radio theme song.

PATTERNS
SEWING CIRCLE

8589
12-42



8580
10-20

Pattern No. 8580 is in sizes 10, 12, 14, 16, 18 and 20. Size 12, with sleeves, requires 3⅞ yards 35-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE PATTERN DEPT.
530 South Wells St. Chicago

Enclose 20 cents in coins for each pattern desired.

Pattern No.....Size.....

Name .....

Address .....

Maternity Dress.

A GOOD-LOOKING, comfortable maternity dress which can be made in any color—any fabric. The pointed yoke, soft turn-over collar and the tie belt with long ends give it most pleasing charm!

* * *

Pattern No. 8589 is in sizes 12, 14, 16, 18, 20; 40 and 42. Size 14 requires 4½ yards 39-inch material; ⅜ yard for contrasting collar.

Pinafore Girl.

EVERY young man likes to see his best girl in a be-ruffled pinafore! Look your loveliest in this buttoned-up-the-back bit of house dress charm!

Household Hints

Cotton blankets should be washed singly in lukewarm water and enough mild soap to make a two-inch standing suds. Rinse in several lukewarm waters. Dry in shade.

* * *

Stretching is fine for the figure, likewise the budget, but don't stretch table linen when ironing it. Iron while damp and press until dry to preserve its stiffness.

* * *

An oil-silk refrigerator bowl cover is perfect to slip over the bottom of a hanging pot to catch the drip after it has been watered.

* * *

When a ladder is used to trim trees or pick fruit, a small, strong chain should be substituted for the top rung as it grips trees or poles more securely.

* * *

Here's a hint for the busy mother whose baby is at that "high-chair-tipping" age. A screen door hook fastened on the back of the chair, and a corresponding screw-eye in the woodwork at a convenient place in each room will safeguard baby from tipping while mother works.

* * *

Shoes are rationed, buckles aren't. What's the answer? Select plain black pumps that may be worn with or without fancy detachable buckles. Several pairs of buckles equal several pairs of shoes—in appearance at least.

* * *

Save all scraps of toilet soap. Put a half cupful in a 4 by 4 bag made of old bath toweling. Sew a strap across the back and you have an ideal soap mitt. A similar bag made with laundry soap odds and ends is useful for washing out bathtubs, sinks, and washpans.

All other subscriptions will be discontinued one month after expiration, if not renewed, but time for payment will be extended if arrangement is made by the subscriber.

Ink Spots And Spatters

By Jergie

ECKARD KEEPS UP HIS REPUTATION

Eckard Zeidler is an ardent fisherman and is usually the last nimrod here to hang up his rod and reel in the late fall, and the first one in the spring to try his luck.

Eckard upheld his reputation of being the first Klemme fisherman this spring to hook and land one of the finny tribe. Last Wednesday evening, April 5th he went to the river and caught a nice bullhead As evidence of his ability of catching the first fish here this spring, Zeidler brought the bullhead, while still alive, to The Times Office.

No, he didn't give us the fish!

* * *

WANTED! AT LEAST TWENTY BROOD SOWS!

Howard Baack, young farmer of near Klemme says that he is completely "sold" on the pulling power of Klemme Times want ads.

Last week Howard ran an ad on four brood sows he had for sale The ad cost him fifteen cents and worked so well that he said he could easily have sold twenty or twenty-five more brood sows, as that many more farmers came to his place to buy brood sows.

Another example of what a small want ad in The Klemme Times will do: J. A. Chambers ran a want ad on a tenant house he had for sale. The adv cost 25 cents and the tenant house sold for $300.

We could name many other instances where a small ad has brot wonderful results, bringing in dollars for a cost of only a few cents.

Which all goes to show that it pays to advertise in The Times.

* * *

EGGSPLANATION OF THE EGGSITUATION

Everybody is all riled up about the price of eggs and the government has urged folks to eat a lot of extra eggs to help stabilize the price and make the farmer happy again.

So, to help along the matter I have cooked up some Eggstra slogans (something to crow about) and as an eggsample:

An eggstra egg each Day,
Through April and May.

Eggsciting, what? So we give that old Humpety Dumpety poem a new slant: When all the King's men and all the King's horses can't keep up with the little red hen we isn't that just eggnostic?

Its no longer a question of which came first, the hen or the egg. The question now seems to be:

Will you let biddy lose her head
Or use her eggs each day, instead?

Our eggsplanation is that it is now up to you. Which must go first, the hen or the egg? So better use a few eggstra eggs.

The hen is still the most efficient shell loading plant in war production. Eggsactly so.

"Lots of energy in small packages" is one reason for including fats in wartime meals. They supply twice as much body fuel as other foods. Vary meals to let cream, fat meals, fat fish, soybeans, nuts, nut butters, egg yolks, cheese, avocados and olives supply part of the fat.

Discover Healthy Men Can Stand Under Heat

Recent investigations have revealed that men who are already in good physical condition can be expected to work effectively within a few days after they start in a hot climate, or they can be prepared for such work by a few relatively short daily exposures in artificially heated rooms, The Journal of the American Medical Association points out, adding that "These observations are of immediate practical importance to the armed forces and to industry." The Journal says:

During the winter season S. Robinson and his co-workers at the fatigue laboratory of Harvard University carried out experiments in which five men walked on a motor driven treadmill from one to one and one-half hours a day in a room in which desert conditions were simulated. The purpose of these observations was to determine the rate and degree of adjustment to hot climates. An artificially heated room, where the temperature was 104 F. and the humidity 23 per cent, was employed. The men walked on a motor driven treadmill at a rate of three and one-half miles an hour on a grade of 5.6 per cent (one walked on a grade of 4 per cent). During all experiments the men wore standard army summer clothing. Pulse rates were determined by palpitation, rectal temperatures by clinical thermometers and skin temperatures by four thermocouples respectively located on the chest, back, thigh and upper arm. The rate of water loss was determined by weighing in the nude before and after work . . . All but the one man who walked on the lower grade approached heat exhaustion in the early experiments, this being manifest by high skin temperatures, rectal temperatures of 103 to 104 F. and heart rates averaging 178 beats per minute during the last 20 minutes of work. The daily walks were continued for 23 days. The comparable heart rates of the men declined from the average of 178 at the beginning to 155 on the seventh day. The average skin temperature of the men at the end of the work experiments declined from 98.4 to 96.5 F. and of the rectal temperature from 103.4 to 101.7 F. during the same period. About 80 per cent of improvement noted was found to have occurred in the first seven days of exposure.

Recover Coal From Bed of Susquehanna

The anthracite regions of Pennsylvania are a good 150 miles from Harrisburg. Decades ago, anthracite was shipped to Pennsylvania's capital down the Susquehanna river and over a canal which then paralleled the river.

Coal still comes to Harrisburg by water—but not by boat!

Quantities of small particles of coal are carried down the river by high water and settle to the river bed in quiet waters. In the immediate vicinity of Harrisburg alone approximately 100 dredges and flatboats search for these hidden deposits of river bed coal. Each year about 150,000 tons of coal are mined in this peculiar method.

The coal which is recovered is available in three sizes, ranging from rice-sized grains down to a coal that is no larger than a grain of dust—yet it is all prime anthracite and finds a ready market.

War Declaration

The President does not have the power to declare war. This power is vested in Congress itself under Art. 1, Sec. 8, Par. 11 of the United States Constitution.

A bill or joint resolution declaring war does not differ from any other bill or joint resolution and cannot become effective until it has been approved by the President or passed over his veto by two-thirds of the Senate and House of Representatives. It has been the practice for Congress to declare that a state of war exists and to charge the President with its prosecution, as commander-in-chief of the army and navy. Congress then provides for the raising of troops and money, neither of which the President can do.

Stinging Nettle

The stinging nettle is not a newcomer to British fields. Roman soldiers carried the seed to England, planted them, and later used the plants as "stimulants" to combat the cold of the "unendurable" English winters. They rubbed the stinging leaves on their shivering bodies as an aid to circulation.

As late as 1860, England used this Roman weather gift for nettle fiber cloth, but the importation of cheaper and more easily obtainable materials placed the nettle back in the useless weed class.

Knock Out Teeth

To attain the standard of beauty demanded by bridegrooms in the far-off south Pacific isle of Malekula, as well as to maintain one's social standing by conforming to the conventions of society in that island paradise, girls must have two of their teeth knocked out. Moreover, the teeth must be the two upper central incisors. No other teeth will do, and if the dentistry-practicing medicine man makes a mistake and knocks one of the wrong teeth out, a girl loses her opportunities for marriage and becomes socially ostracized.

Brazil Fosters Poultry Improvement Program

The Brazilian-American Food Commission is fostering the development of the poultry industry in northern Brazil to meet war-expanded demand in that area for meat and eggs by armed forces and workers on strategic projects. The poultry program supplements increased production of fruits and vegetables to reduce the dependence of the area upon imported foodstuffs.

Nineteen poultry units have been established in five northern states of Brazil. Others are being added. These units soon will have more than 50,000 birds, according to reports received by the Office of the Coordinator of Inter-American Affairs.

Poultry specialists from the United States are working with Brazilians in the chicken-raising projects as part of a cooperative arrangement between Brazil and the United States for expansion of food output in the strategic northern areas. New poultry units are being stocked with improved strains from breeding stocks established from breeds largely imported from the United States and adapted to Brazilian conditions. Stock from these new units will be available for distribution to poultry raisers who wish to improve the quality of their flocks.

Domestic Rabbits Spend Entire Life in Hutches

The domestic rabbit spends its entire life cycle in an individual compartment called a hutch. Outdoor hutches must have solid backs and sides, and a good roof as protection against rain, storm and snow. Indoor hutches, as in the garage, barn, or outbuilding, may have wire-mesh floors of five-eighths inch mesh hardware cloth, allowing the droppings to fall to the floor. This type is usually preferred by progressive rabbitmen, since they are self-cleaning, cooler in summer, and a great aid to disease prevention.

The floor space in hutches for breeding does should be 10 to 12 square feet—4 feet long and 24 to 30 inches deep. Hutch compartments for each doe range in height from 18 to 24 inches. Outdoor hutches usually have solid floors. In such case, straw or peat moss bedding is used, and each compartment must be cleaned at least twice weekly. If scrap lumber is used when possible, the cost of hutches should not exceed $5.00 for each breeding doe, and are easily built by any saw and hammer carpenter.

Straw and Stubble

The burning of straw and stubble actually robs the soil of needed and necessary stability and fertility. The practice gives the land an ideal send-off for a winter of washing and gullying because the stubble is too heavy to be readily incorporated into the soil, or the real value of it as a soil binder and fertilizer is not appreciated.

You may have learned by experience that in plowing under large amounts of straw, particularly in areas where rainfall is low, that the ground is apt to dry out and a reduction in yield results.

Someone may try to tell you that just as much fertility is returned through the ashes as through the unburned stubble. There is a difference though—because one ton of ordinary straw contains about 10 pounds of nitrogen, 2½ pounds of phosphoric acid and nearly 15 pounds of potash. In addition to this, about 1,950 pounds of actual organic material is contained in each ton. Now, if you burn the straw, you destroy all of the nitrogen and all of the organic material. This just goes up in smoke and is lost. The 2½ pounds of phosphoric acid and 15 pounds of potash will remain in the ashes and are returned to the soil.

Rabbit Foods

Hit and miss feeding methods won't do in rabbitkeeping. It can be said generally that good quality hays — alfalfa, clover, soybean, sweet clover, and timothy—are the roughages needed, and must be supplemented more or less with grain foods—rolled barley, rolled oats, and even wheat and the grain sorghums. Cracked corn is relished. Feeding expensive grain foods and high-priced hay in wartime is not altogether practical, however.

The facts are that backyard rabbitkeepers have a very wide range in good feeding practice if care is taken to supplement the hay and grain rations with many items of table scraps, garden wastage, garden crops and roadside weeds, which are entirely acceptable as rabbit foods provided they are sweet, clean and palatable.

Use Crumbs

Make the most of every crumb and crust. Dress up your stale bread by using it in escalloped dishes, in puddings, or as French toast. For example, serve French toast just as you might serve waffles and top with a syrup or fruit sauce.

Or, serve French toast for a main dish with creamed meat or vegetables. Remember, too, that dry bread cubes can be used in escalloped dishes and dressings, but will require a little added moisture. Such cubes also brown nicely for croutons.

* * *

Here are some facts about manure: The amount of nitrogen, phosphoric acid and potash in any kind of manure averages about 10 pounds nitrogen, 5 pounds phosphoric acid and 10 pounds potash. Amounts of those same three elements in other manures are, respectively: Horse manure, 14, 5 and 10 pounds per ton; sheep manure, 20, 7 and 20 pounds per ton; poultry manure, 20, 16 and 8 pounds per ton. The amount of phosphoric acid in even the best of these manures is small, so applications of manure should be supplemented with superphosphate. Superphosphate is designated as 0-20-0 fertilizer, meaning that it is 20 per phosphoric acid.

* * *

The nitrogen in sheep and poultry manures is readily "available" to garden crops. Such manures should be broadcast on the plowed soil just before disking and harrowing. If applied in the spring, they should be used sparingly. Eight pounds per 100 square feet is about the right rate of application.

* * *

Still on the subject of organic fertilizers—there's the matter of a compost pile. Every town and city gardener should maintain such a pile to provide organic material which may be plowed under next fall. A compost pile 5 feet square is about the right size for a garden that is 50 feet square. The Iowa State College Agricultural Extension Service at Ames will send information on making a compost pile to anyone who requests it. A penny postcard will bring word of the method which the college horticulturists have found most effective

* * *

Production o vegetables in home gardens suffers every year because of attacks from diseases and insects. Now is the time for gardeners to start being concerened about disease. Nothing can be done when diseased plants are stricken. Disease must be prevented.

* * *

Rhubarb and asparagus require rich soil for best quality and production. Rhubarb should be divided and transplanted every 4 to 6 years but asparagus should not be disturbed. Leaflets which tell about good production practices for rhubarb and asparagus also can be obtained from the Iowa State College Extension Service at Ames.

* * *

Seed of yellows-resistant cabbage should be planted about April 1. Seed of wilt resistant tomatoes should be planted about May 15, when the ground warms up.

NOTICE OF PRIMARY ELECTION

Garner, Iowa, April 6, 1944

Notice is hereby given to the qualified electors of Hancock County, Iowa, that a Primary Election will be held at the Regular Polling places in the several election precincts of Hancock County, Iowa, on Monday June 5, 1944.

The polls will be open from eight o'clock A. M. to eight o'clock P. M. on said date.

At this Primary Election candidates are to be nominated by the Republican and Democratic Parties for the following offices:

One United States Senator.
One Governor.
One Lieutenant Governor.
One Secretary of State.
One Auditor of State.
One Treasurer of State.
One Attorney General.
One Secretary of Agriculture.
One Commerce Commissioner.
One Representative in Congress—6th District.
One State Senator—43rd District.
One State Representative—86th District.
On County Auditor.
One County Treasurer.
One Clerk of District Court.
One County Sheriff.
One County Recorder.
One County Attorney.
One County Coroner.
Two members of the Board of Supervisors, one whose term commences January 2, 1945, and one whose term commences January 2, 1946.

Township Officers

Two Justices of the Peace.
Two Canstables.
Two Township Trustees, one whose term begins January 2, 1945, and one whose term begins January 2, 1946.
One Township Clerk.
One Township Assessor.
One Party Committeeman from each Precinct.
One Party Committeewoman from each Precinct.
Delegates to the County Convention.

In testimony whereof I have hereunto set my hand and affixed the seal of the County of Hancock, State of Iowa, this 6th day of April, 1944.

A little cornstarch in a cloth bag kept in a sewing outfit may help keep light-colored, delicate material clean while it is being sewed Cornstarch dusted on the palms will absorb perspiration from the hands.

Small Defects Often Retard Child Development

Many great men and women overcame their physical defects and made their mark on the pages of history. Blind and speechless, Helen Keller graduated from college. Thomas A. Edison was deaf, and Charles P. Steinmetz, another electrical wizard, was a hunchback. The publisher of one of America's leading magazines is a stutterer, finding it difficult to carry on a smooth flow of conversation when excited. The President of the United States, with remarkable determination, overcame the handicaps visited upon him by an attack of infantile paralysis in middle life.

Because of the many great personages who have achieved successful careers in spite of great handicaps, there are some who say that minor physical defects are relatively unimportant. That is not always correct, it is asserted. For example, studies made by psychologists among school children disclose that uncorrected visual defects in youngsters tend to make them shy and slow in adjusting themselves in work and play with others. Some social investigators go so far as to say that uncorrected shortcomings in sight may be an important factor in juvenile delinquency.

While it is true that persons with unusual intelligence, vitality and courage can rise far above their fellows, despite physical defects, it also appears that in the average person correction of shortcomings, when possible, will facilitate his earning a living and improve his ability to become a useful member of society.

Says Eggs or Chicks Best Blood for Flocks

Use hatching eggs or baby chicks to introduce new blood into a breeding flock with least danger of introducing disease, says Prof. J. H. Bruckner of the New York State College of Agriculture.

Adult birds are the most dangerous to bring in, as they may appear healthy, yet carry colds, cholera, and other diseases that cause much damage on poultry farms. If birds and not eggs are brought into a breeding establishment, a few home farm birds should be put with the new arrivals in an isolated pen for a few weeks, and watched to see if all stay healthy.

Half-grown range stock is less dangerous than adult birds, and baby chicks are still better. The breeder should make sure he buys from a farm with disease-free birds, pullorum free if his own birds are tested.

In buying eggs or chicks for breeding stock, says Professor Bruckner, it is well to buy more than the number needed, so only the best will be kept for mixing with the home farm breeding birds.

The "Plimsoll" Mark

Back in the 19th century, shipping in British bottoms was not only highly competitive but also profitable. Competition, however, encouraged the ship owners to overload their ships so seriously that ship losses were extremely high—and as the losses increased, it became increasingly difficult to secure seamen.

When the situation reached a critical stage, it was evident that the only cure was legislation. Samuel Plimsoll proposed to Parliament a merchant marine act in 1876 which limited the draft to which ships could be loaded. This maximum water line was indicated by a prescribed symbol which came to be known as the "Plimsoll" mark.

The mark is located by measuring down a prescribed distance from a point on the main deckline and indicates the amount of freeboard required for safety.

Feed Fruit Trees

Early spring is an excellent time to feed fruit trees. Use a complete balanced plant food.

Fruit trees in the lawn may be fed in the same way as ornamental foliage trees—that is, by means of a series of holes about 2 inches in diameter, 12 to 18 inches deep, placed in a zigzag fashion slightly inside and outside the branch spread. Fill holes with a mixture of half plant food and half soil. Then water. In figuring the requirements of a tree, allow three pounds of plant food to each inch of diameter (or one pound for each inch of circumference) of the trunk, measuring four feet above the ground.

Where trees are surrounded by cultivated soil, surface application of plant food is satisfactory. Some gardeners broadcast the plant food under the entire branch spread.

Utah Natural Bridges

Utah, which holds distinction for its national parks, national forests and recreational wonderlands, also is unique in national bridge preservations. In San Juan county is Natural Bridges National monument where within a distance of five miles are three natural bridge preservations of rare formation, located within the Pinte Indian reservation. In the Painted desert of southern Utah is the magnificent Rainbow arch known as the "rainbow of the desert." This is the largest of all known natural bridges and is famous for its symmetrical lines which dwarf all human architecture.

'Belly Grader' Among Jobs Listed in Packing Plant

A "belly grader" in a packing plant grades hog bellies according to the cut, amount of lean meat, thickness of the slab and the perfection of trimming. But a "brain picker" must remove hog brains from the split skulls by hand and place them in pans for storage.

A "ham shaver" must pull out the nails from the hind feet and shave away any hair left on the legs as the hog comes from the dehairing machine. An "offal laborer" has the job of opening the stomachs of beeves and sheep, emptying the stomach of its contents and placing the drained stomach in a barrel. An "offal washer," or "stomach scrubber" as she is sometimes called, removes the blood and foreign matter from viscera to prepare them for packing.

A "neck washer" doesn't sound particularly unpleasant. The job, however, consists of removing the coagulated blood from the necks of suspended hog carcasses. This may be done by spraying with a water hose, by scraping with a combination scraper and hose or by scrubbing with a combination brush and hose.

Removing the fatty tissue from the pancreas is the job of a "sweetbread puller," while a "vein pumper" uses a pickle hose to inject the meat with a pickle solution. As for the "viscera table man," he trims the fat from the glands of sterilized viscera.

Colivia Noted for Highest Capital; Steamer Service

About twice as large as Texas, Bolivia has no seaport, must use rail connection with Peruvian and Chilean ports for Pacific outlet, or turn to the headwaters of the Amazon River for Atlantic contact.

Bolivia's land-locked Andean plateau, cradled two miles high between snow-capped ranges two miles higher, stirred the world's interest with its "world's highest capital, La Paz," and its "world's highest steamer service" on Lake Titicaca.

Low tropical plains to the east of the mountains make up about seven-tenths of the national domain. On the south they merge into the Gran Chaco region, scene of a recent boundary war with Paraguay.

More than half of Bolivia's 3,226,000 people are Indians, successors to one of the New World's oldest cultures. Influence of Spanish occupation endures in names and institutions. Sucre, the nominal capital, has a university founded in 1624. La Paz, biggest city, with 200,000 people, is the actual seat of government.

Damping-off

Damping-off causes much damage to vegetables, both by reducing the percentage of germination and by rotting off the stems of seedlings at the surface of the ground. It is most serious on plants started under glass, but often injures crops started in the open. For plants started under glass, the soil may be treated with formaldehyde dust, or, for small lots, heated in the oven to kill the disease organisms. However, the simplest control measure for plantings made either in the open or under glass is seed treatment with a suitable material. The home gardener will find it to his advantage to buy seed already treated, but if this is not available, he may treat his own seed.

Rough Area

The physical character of the Gallipoli peninsula makes it a formidable area to attack. This was sharply brought out in the 1915-16 campaign, when the Allies tried to advance from beachheads in the face of Turkish guns on surrounding heights. Gallipoli is so hilly that "it is impossible to move about in it anywhere without being commanded from some other point."

Its interior is a broken mass of chalk and sandstone, furrowed by winter-flowing rivers. Valley sides are steep, valley floors often marshy. Even the gentler hill slopes have been broken by erosion and covered with fragments of chalk and sandstone. Hills press close to the shore.

Willow Checks Erosion

The idea of using the willow tree as a soil-builder dates back to pioneer days, when settlers planted willows to stop soil erosion along watercourses and roadways where boggy conditions were encountered.

No native tree has a root spread as dense and water-absorbing qualities as great as the willow. Frequently the root system is greater in diameter than the crown spread. It is our greatest tree drinker, and when planted in dense stands it has been known to lower the water table of the area.

Imported Phosphate

Before the war, Japan imported as much as a million tons of phosphate rock for fertilizer a year. Most of it came from sources now closed to Japan by war.

The United States provided Nippon with a quarter of a million tons of phosphate rock a year, and even larger amounts were supplied by Egyptian and French North African sources. Christmas Island, off Java's southern coast, was another large source of Japanese imports.

IN MEMORIAM

In memory of my Daddy, W. M. Kirkwood, who passed away on April 14, 1939.

— Phyllis Jean Kirkwood.

Electric fences have proven satisfactory for keeping small pigs in check, extension agricultural engineers at Iowa State College say. Weeds must be kept away from the fences, however, or they may ground the wire and make them ineffective.

Old asparagus plants cannot be transplanted satisfactorily.

WEEKLY NEWS ANALYSIS

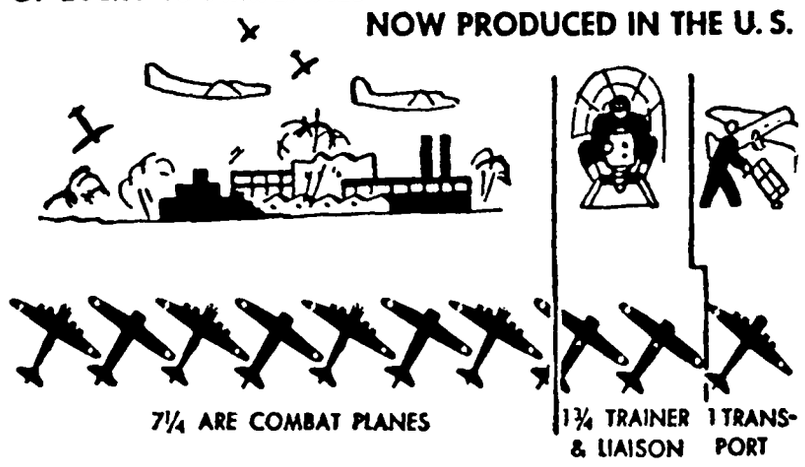
WFA Sees Ample Civilian Food Supply During Coming Year; Production Up; Allied Forces Battle Japs in India; Congress Votes Role in World Relief

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Released by Western Newspaper Union.

TELEFACT

OF EVERY 10 AIRPLANES NOW PRODUCED IN THE U. S.



AGRICULTURE:
Food Supply

Civilian food supplies during 1944 should be the same as last year with farmers continuing record-breaking performances, War Food Administrator Marvin Jones said, but stocks of milk, cheese and fats may be slightly less.

At the end of 1943, the U. S. had the largest livestock inventory in history, Jones said, with 19 per cent more hogs and 3 per cent more cattle, although sheep and lamb numbers were down 4 per cent.

With farmers urged to cultivate 16,000,000 more acres than last year, they still face manpower problems, Jones related. The outlook for production of farm machinery and fertilizer have improved, he added.

Revealing $350,000,000 was spent for supporting farm prices in 1943, Jones said they served the double purpose of offering incentive for production and holding down consumer costs.

Postwar Outlook

Addressing the National Association of Mutual Insurance companies in Chicago, Secretary of Agriculture Claude R. Wickard declared postwar America's exportable surplus of farm commodities would be 15 per cent of production.

Asserting the figure resulted after estimating increased domestic demand for consumption and industry, Wickard said: "Again we are either going to have to extend credit or give agricultural products to other nations, or we are going to have to accept goods and services in exchange."

Advances in agricultural production will pose a major problem in postwar America, Wickard said, remarking that with only moderate demand and usual educational methods, yields will jump up 40 per cent in six years.

WAGES:
Peg Sticks

Testifying before the senate banking committee considering extension of price control after June 30, War Labor Board Chairman William H. Davis declared that the WLB intended to stand by its "Little Steel formula" limiting wage increases to 15 per cent over January 1941, levels, but only if living costs remain relatively stabilized.

To assure such stabilization, Davis recommended continuance of consumer subsidies. Prohibition of subsidies would result in appreciable rises in basic commodities and make present wages inadequate, Davis said.

Davis opposed suggestions that wages be limited, declaring such action would work against promotions and upgradings, and discourage shifts to industry.

WORLD RELIEF:
Authorize UNRRA

By overwhelming vote, congress put itself on record for participating in world relief by authorizing expenditures of $1,350,000,000 for the United Nations Relief and Rehabilitation administration to help the people of occupied countries get back on their feet following their liberation.

Although UNRRA will feed, clothe and restore essential services in the stricken countries, it will do so only for the purpose of getting the people started in rebuilding their agricultural and industrial economy.

Matching the U. S. contribution, 43 other United Nations will put about $650,000,000.

PACIFIC:
Japs Invade India

While Adm. Louis Mountbatten's Southeast Asia command coped with a strong Jap drive into eastern Burma, Gen. Douglas MacArthur's staff concentrated on weakening the enemy's hold on New Guinea with heavy aerial attacks against shipping and gun positions.

Springing unnoticed from the jungle, a Jap force pressing far inland into India pointed at Imphal, key to the communications line feeding Lieut. Gen. Joseph Stilwell's Chinese-American troops opening a new supply route to China in northeastern Burma. While the Allies maneuvered to weather this charge, two other Jap columns aimed at Imphal farther to the north.

In New Guinea, Allied planes ripped the northeastern coastal shipping route while Aussie and U. S. doughboys advanced northward toward the big base of Madang over craggy foothills.

EUROPE:
Take Over Balkans

Germany made her final preparations for an anticipated double-barreled attack against the continent by the Allies by integrating Hungary, Rumania and Bulgaria into the Nazi war machine to provide a common pool of men and resources.

The Nazis' incorporation of the Balkans came as the Russ drew closer to the Hungarian border by stabbing deeper into prewar Poland and surged onward to the Rumanian boundary by chewing off Germany's last grip in the Ukraine.

As Germany moved to utilize the Hungarian, Rumanian and Bulgarian armies of over a half million men and draw upon the agricultural and industrial resources of these countries, Nazi troops streamed eastward to take up the fight along the newly organized battlefront.

Jerry Tough

While the Germans moved quickly to mend their fences in the Balkans they more than had their hands full in Italy and the west.

Around Cassino Jerry clung stubbornly to his ground to block the broad highway to Rome, fighting

Nazi Prisoners in Italy.

desperately in the hilly country to dominate the heights from which he could pour his deadly artillery fire upon Allied troops maneuvering below.

In the west, the Allies sent fleets of bombers against France and Germany to rip defenses and railways over which troops and supplies could be shuttled and blast factories turning out Axis armament.

HIGHLIGHTS . . . *in the week's news*

GOLF BALLS: About 400 tons of balata, the tough gum used to cover golf balls, has been released by the War Production board. It is showing signs of deterioration and is unsuitable for war purposes. Manufacturers of golf balls say that they do not have materials for centers on hand and not much for windings, so the balata does not mean any new balls in the immediate future.

BOWLING: Fewer perfect scores were bowled this season than for a good while back, the American Bowling Congress reports. In 1940 there were 284 perfect games in ABC sanctioned competition, the all-time high. In 1942 the score dropped to 225, and in 1943 it slumped to 137. This season there were only 84 perfect games, although 1,675 more teams were accredited.

BIG BUSINESS:
Report Incomes

With war orders accounting for 66 per cent of the business, International Harvester had gross income of $448,035,041 and profit of $25,692,944 for its fiscal year ending October 31, 1943. For the 12 months ending July 1, 1945, the company has been authorized to use 20 per cent more material for farm machinery.

Overcoming merchandising difficulties, America's No. 1 mail order house, Sears, Roebuck & Co., took in $852,596,706 and cleared $33,866,087 in 1943. Although shortages prevail, the quality of goods has improved in recent months, President Arthur S. Barrows said.

In reporting sales of $552,000,000 and profit of $7,403,000 in 1943, Wilson & Co. disclosed extensive developments in new meat preparations and packing, such as boneless beef and dehydrated corned beef, which should have wide markets after the war.

JAPAN:
Organize Workers

Again Premier Gen. Hideki Tojo told the Japanese parliament that the war situation was critical, but this time he underlined its gravity by calling for the establishment of military discipline in industry, under which an entire factory group could be punished for a single worker's offense.

Under Tojo's plan, workers would be organized under a system of military rank, with superior officers having the authority to punish employees from the boss down.

Heretofore conscripted for labor service for only four months of the year, all Japanese high school and college students will now be subject to such duty for any necessary periods.

TVA:
Under Fire

Tennessee's lank Sen. Kenneth McKellar took his battle against present TVA financial policies to the floor of the senate, demanding that the big one billion dollar government power project be compelled to operate altogether on direct appropriations from congress and turn over its revolving fund to the U. S. treasury.

Long at odds with TVA's Chairman David Lilienthal because of the latter's alleged political activities against him, Senator McKellar said

David Lilienthal and Sen. McKellar

congress should retain supervision over TVA funds to determine their proper expenditure.

Taking up the cudgels for TVA, Alabama's Sen. Lister Hill argued that acceptance of McKellar's proposal would mean congress would have to pass on all of TVA's technical operations, complicating procedure with possible paralysis of service.

SOUTH AMERICA:
Uruguayan Nationalists

With the ejection of pro-Allied ministers in the Uruguayan cabinet of President Gen. Higinio Morinigo and ardent nationalists' seizure of control of that country, ultra-neutral Argentina's isolation in South American politics appeared at an ending.

Action of the Uruguayan nationalists was aimed at promoting closer relations with Argentina, which has resisted pressure to go to war against the Axis, insisting on its sovereign right to regulate its own foreign policies.

But like Chile and Bolivia which also have recognized the Argentine regime, Uruguay sought to remain on friendly terms with the U. S. as well, and leave no grounds for a break by any illegal changes in government.

RECONDITIONING:
Heal Quickly

To heal the wounded quickly and well and restore them to suitable military duty, the army has expanded its reconditioning program, utilizing education, occupation and recreation.

Point of the program is to prevent the patients from deteriorating mentally while recuperating physically, as is often the case even in civilian treatment, and to instill them with the knowledge that they are keeping pace with their buddies in convalescing.

Establishment of personnel reassignment centers at Camp Butner, N. C., Fort Sam Houston, Texas, and Camp White, Ore., assures the recovered soldier of placement in a position more suitable to his condition.

SYNTHETIC RUBBER

America's productive capacity for synthetic rubber is now so great that the United States can now hold its ground in dealing with British and Dutch organizations that controlled the East Indian plantations before the Japs' invasion, William Jeffers, former U. S. rubber controller, declared.

Jeffers predicted that American tire manufacturers would eventually be able to turn out a synthetic rubber tire that would have all the endurance of the natural rubber.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

ALCOHOL AND WPB

A mysterious hand has reached inside the War Production board to hold up a new method of alcohol production. The process, developed in Germany, is the distillation of alcohol from sawdust and wood waste.

All over the U. S. A. there is a great surplus of sawdust and wood scraps from saw mills. In some areas, its disposal is a problem. But in Germany, some 30 plants are in operation turning sawdust not only into alcohol, but yeast and cattle feed.

This same process has been tested at a U. S. forest service pilot plant at Marquette, Wis., and recently plans were all set to open a commercial plant at Willamette, Ore. The Vulcan Copper and Supply company was scheduled to do the job, and J. Alfred Hall, borrowed from the forest service by WPB's office of production research and development, actually had gone out to Oregon to inspect the proposed Willamette site.

But now something has happened. The alcohol division of WPB is reported to be quietly throwing monkey wrenches into the works.

For two long years, WPB's alcohol division had blocked the sawdust alcohol method for the obvious reason that the big alcohol companies are entrenched with the Cuban molasses method. Their plants are near the Atlantic seaboard, where molasses is readily accessible. They don't want competition from the lumber regions of the South and Northwest. But finally, because of the desperate alcohol shortage, they were overruled and the Willamette plant was authorized.

However, queer things happened. When the Willamette application was sent by registered mail to WPB, it was "lost." WPB refused to act without the "original" application, so valuable weeks were wasted arguing.

Then, an engineer named Levy, who had had experience with the sawdust method in Germany, was brought here from England. This time, the Willamette application papers were ready. But another hitch developed. WPB suddenly found some of Levy's credentials unsatisfactory, demanded an FBI investigation. The FBI cleared him, but still the WPB's alcohol division is holding things up.

* * *

AIR WAR OVER GERMANY

Strange as it may seem, the present problem of the U. S. and British air forces over Europe is not so much to locate the targets but to locate German fighter planes. Nazi fighters have been so reduced in numbers that they are being held back, apparently for the second front. Allied bombers occasionally make a complete mission to the Continent without meeting any opposition in the air.

This is good news, but it prevents heavy attrition of the Luftwaffe unless the German planes are sought out on the ground.

As American fliers put it: "We've done a birth-control job on the Luftwaffe." In other words, they have struck manufacturing plants so successfully that fighter production is way down. This applies both to twin-engine and single-engine fighters. Plants making both types have been struck systematic and devastating blows.

Air forces officials have figures on the exact amount of that "birth control," but the figures are highly confidential. British as well as American officials are delighted with the results, and the British are now admitting the superiority of American precision bombing in knocking off certain targets.

Germans Avoiding a Fight.

In the text book of air power, after you have attacked the enemy's aircraft industry, you aim at the enemy's planes in the air. And that is what the RAF and AAF are trying to do now. But the Germans are avoiding a fight. They are trying to check losses by keeping their planes on the ground.

Occasionally, returning pilots contradict this. "The man who says the Luftwaffe is licked is just plain crazy!" And they have battle wounds for evidence. Explanation is that the Nazis concentrate fighter strength over one important target.

Air experts say Germany is now in the desperate plight England was in at the climax of the blitz of 1940-41. The British now admit that, if the Germans had come over a few more times, they would have broken the back of England. But the Luftwaffe simply couldn't stand the terrific losses.

* * *

MERRY-GO-ROUND

¶ The U. S. Quartermaster corps now operates a slow-down-the-war system which requires personal guides and 20 minutes extra time to conduct visitors from the entrance of the building to various offices.

¶ "Man Mountain" Dean, the famous wrestler, has risen to the rank of sergeant at Camp Ritchie, Md., where he supervises the "pick-up squad," removing trash from the company streets. Dean is down to a mere 275 pounds, after losing 90 pounds at this job.

Walter Winchell

(WNU Service)

Things I Never Knew 'Til Now
(About Canada's War Effort)

Canada is the only one of America's Allies which has not used Lend-Lease help . . . Most of her money payments to the Allies have been outright gifts because Canada is opposed to piling up war debts . . . The United States is Canada's best customer; and Canada is at the top of the list of our best customers . . . Canada is the world's largest producer of aluminum. Last year she produced more than the whole world did in 1939 . . . Canada is the world's largest producer of nickel and is practically the only source of supply available to the United Nations . . . Canada is the world's largest producer of asbestos, terrifically important on aircraft carriers and battleships . . . She is a heavy producer of lead, zinc and mercury, and the most important discovery of tungsten ore yet found on this continent is now being developed by the Canadian government direct . . . It's the backbone of battle armor.

Without Canadian radium the field services and hospitals of the United Nations' armies would be almost helpless . . . Canada is producing five times as much armor plate, guns and tools as she did in 1939 . . . She is producing 16 types of gun carriages and mountings, although before she entered the war she had never manufactured a big gun . . . She has delivered 100,000 units to date . . . Canada has the largest small arms factory in the British Empire. She has produced more than a million rifles and enough ammunition to fire 300 shots at every soldier in the German army . . . Canada is second only to us in building ships, although she had not built a seagoing cargo ship in 20 years when Hitler marched on Poland . . . Canada supplies all of the signal corps of the United Nations with a large amount of their equipment, including nearly 100 types of signaling sets . . . Canada has developed a new secret explosive for the invasion—the most powerful in the world.

Canada has mobilized the mightiest of all her resources, her fighting people . . . Forty thousand women are in the Canadian armed forces. Over 5,000 are in the Canadian Navy Services, and 16,000 are in the RCAF . . . On Canada's mighty munitions assembly line, one out of every four persons is a Canadian woman. They handle the technical signaling devices and secret naval codes—and, believe it or not, they plot the convoy routes . . . The Canadian Gov't has found them so proficient at Radar and Asdic that women are used as instructors. Nor is their work confined to intricate mechanical devices. They overhaul aircraft engines, operate power machines and actually operate the new instrument which determines errors in cannon fire.

The newspaper you are reading probably is printed on Canadian newsprint. Canada is by far the largest producer of newsprint in the world . . . In spite of her terrific war effort, Canada is sending more newsprint to the U. S. than she did at the start of the war. A large part of it goes in direct support of our own war effort, because American production has declined 24 per cent and our other markets have almost disappeared . . . In our crucial year of 1941 Canadian production of newsprint was more than three times that of the U. S.—and everybody knows how much paper a bureaucrat can use.

In Canada price ceilings mean something . . . The cost of living has gone up only 2 per cent in two years, while in the United States and Australia it went up almost 14 per cent on the same scale of measurement . . . The Canadian people are shelling out taxes at a rate which would equal more than 30 billion dollars in this country . . . Last year the Government of MacKenzie King threw 4 billion dollars into the kitty to beat Hitler . . . Production and national income in Canada have doubled since the start of the war . . . After the war Canada will expand like we did in 1900 . . . The Shipshaw power development in northern Canada has an installed capacity equal to the total capacity of Niagara Falls plants on both sides of the river. It has a continuous output of electrical energy greater than that of our own great Boulder Dam plant . . . Canada, with less than a fifth of its water power resources developed, has the second largest amount of hydro-electric generating capacity of any country in the world.

The Royal Canadian Air Force has 200,000 men manning its planes . . . There are 36 RCAF squadrons overseas . . . The Royal Air Force itself depends for one-fourth of its strength on RCAF crews . . . The British Commonwealth Air Training Plan is based in Canada . . . Practically every man in the service of His Majesty, who has anything to do with a plane, learned how to handle his job in Canada . . . Nineteen out of 20 of the boys who are dropping the bad news on Berlin got the know-how in Canada.

navy, marine corps, the coast guard when their own films are not available in active areas; also members of Allied armed forces operating in these zones. Both the Red Cross and USO are authorized as agents to show these 16-mm. pictures.

Movies in Training Camps.

The motion picture industry's 16-mm. gift films should not be confused, however, with the 35-mm. showings of the Army Motion Picture service, and a similar system maintained by the navy.

Through a commercial arrangement with motion picture distributors made 20 years ago, both the army and the navy rent for their own use 35-mm. prints of motion pictures which play the commercial movie houses. These films, obtained at low rental, are now shown on a nonprofit basis by the army in all training camp theaters in this country, and at established army post theaters in all territorial possessions. The average admission is 14 cents, and any profit derived therefrom goes toward expanding the service.

Ever since the declaration of war, as a special favor to servicemen, pictures playing the army circuit have, as a rule, preceded showings in commercial theaters except where these showings conflicted with exhibition contracts of movie theaters near the camps. Servicemen unfamiliar with required trade practices, complain at times because they see pictures in these commercial theaters before the camp movie houses show them.

The navy does not experience this difficulty because, generally speaking, its pictures are shown free on shipboard or, in some instances, for a small admission at naval stations, the profits going toward improving and expanding the service.

Old Films Shown at First.

When the conflict broke suddenly after Pearl Harbor, we were just as unprepared for maintaining a worldwide entertainment program as we were for global combat. The first expeditionary forces that left for the South Pacific took along 1,000 old 16-mm. pictures purchased in the open market, which were the only films of that size available at the time. Later, when the African expedition sailed, a similar war department purchase was made. And further complications were added through the indiscriminate buying of old films and portable equipment by embarking troop units as large as battalions, all striving to meet an entertainment emergency.

Although the army has been able to recall all but 300 of these old films, those still in circulation despite of efforts to recover them, combined with the unauthorized 16-mm. films remaining overseas, add up to a sizeable headache. Servicemen who still sit through these old programs complain loudly.

Another source of complaint lies in the wartime dislocation abroad of the commercial motion picture industry. In such battle-blasted areas as Sicily, films as ancient as Rin-Tin-Tin are often featured in local theaters for outrageous admission prices. But this is not strange, considering that Mussolini barred American films in Italy in 1938. No new pictures have been shipped into Italian territory since, excepting those supplied through the motion picture industry's gift service. The 16-mm. gift films, however, are now going overseas at the rate of 159 prints of three new programs each week. New combat zone circuits are being added rapidly and projection facilities are improving and increasing. This means that film shows in all theaters of war, barring the inevitable disruptions and annoyances occasioned by battle action, are bound to achieve a state of diminishing complaints and rising perfection.

In a report to Lieut. Gen. Brehon Somervell, commanding general of the army service forces, covering a 30,000-mile tour of the Pacific theater, Maj. Gen. Frederick H. Osborn, U. S. army, director of the morale services division, army service forces, said that motion pictures have proved an effective antidote to the tension and physical strain of battle, and that they are particularly welcome to men just returned from the front.

His tour, which included "the largest motion picture circuit in history" maintained by the overseas motion picture service of army service forces in the Pacific, proved to him, he said, that "the Pacific soldier is the most avid movie-goer in the world."

The distribution of first-run films to the various fronts by air is on a par with any similar commercial operation, the general pointed out, and came about "because combat officers want their men to relax after they come out of the lines. The movie has proved to be the solution. A screen against a jungle backdrop brings the soldier close to home again."

The army service forces has arranged to distribute films in rotation to the combat areas of the Pacific, after which they are routed to supporting units farther to the rear. In this way, troops in actual combat are the first to be shown the latest of Hollywood's screen offerings. Also given high priority for early showings are the wounded in hospitals.

Movies Take Him Home.

"The soldier wants to see pictorial views of streets that remind him of his home town, of people he might meet on those streets; of women to remind him of his mother, his wife; his sweetheart; of ordinary happenings in which he will again participate.

"This tremendous movie chain's value as a good will factor is beyond computation. In New Guinea, for example, where Australian and American soldiers fight side by side, they sit down to see an American film side by side. Our troops visit Australian camps where the screen is predominently American."

Newsreels, comedies, and musical pictures are high on the G.I. hit list. "Soldiers dislike war pictures with glorified heroes," General Osborn said.

"They like to see informational films, those that explain war strategy and show real battle scenes. The soldier is anxious to see what his weapons can do. The army's 'Why We Fight' series has immeasurably bettered his understanding of issues at stake. 'Snafu,' the cinema comic of the Army-Navy Screen Magazine, is a Pacific favorite."

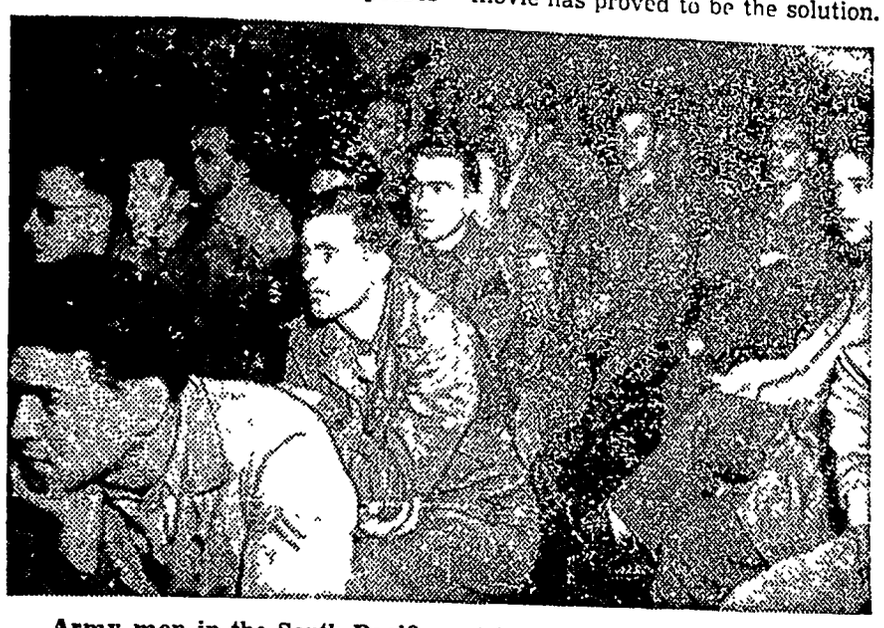
General Osborn included Australia, New Guinea, New Zealand, New Caledonia, Solomon Islands, New Hebrides, New Georgia, Bougainville, and Fiji in his 30,000-mile itinerary of the Pacific theater.

"I have seen tropical theaters seating 3,000 soldiers on wooden benches, and 1,000 sitting on crates and logs and oil tins in an outdoor excavation," he said.

"Soldiers frequently sit in tropical downpours for one and two hours before showtime to enjoy a run-of-the-mill film made 'silent' when the sound track breaks down, and then return the next night to see it again.

"During alarms the men quietly leave the theater and as quietly resume their seats afterward to see the rest of the movie. While excavations were under way on a New Guinea base, a bulldozer was assigned the priority detail of hollowing out the ground for an open-air amphitheater.

"I have seen men watch a picture from such a distance that the screen was the size of a postage stamp, and I have heard men gripe at a poor show but sit through it to the end. With several pictures playing on various bases on an island, men were known to walk nightly many miles around the entire island until they had seen all the pictures.



Army men in the South Pacific watch a movie in an open air theater. Their faces reflect varied reactions. Soldiers often see three or more pictures a week.

on Pacific Islands See More Pictures Per Week Than They Did as Civilians in U. S.

of more than 40 prints m productions, more er saw in an average are turned over to the week, in addition to "Screen Magazine," n, and other informa- cational features pro- ributed by army serv- hanges in station, con- at the tides of battle, sible for all soldiers to see every picture at the same time, but they will eventually see them," Maj. Gen. Frederick Osborn, director of morale services, states.

On Guadalcanal, for instance, 104 shows were in progress one night.

When the general was making a tour on Finschhafen, New Guinea, a jeep conveyed the general's party to a unit headquarters where three films were being shown to several thousand soldiers.

Entertainment reels from 19 army overseas film exchanges are transported by plane, boat, jeep, or hand-carried to the camp sites. Mobile special services companies with portable equipment and camera crews tour remote areas playing one-night stands.

"Today some soldier in a waterlogged foxhole, sitting atop a gasoline drum to keep his feet dry, is preseeing a picture perhaps just premiered by you in the plush seats of Radio City, New York," General Osborn commented.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

SAUL'S EARLY PREACHING

LESSON TEXT: Acts 9:19b-30; 11:25, 26.
GOLDEN TEXT: I am not ashamed of the gospel: for it is the power of God unto salvation to every one that believeth.—Romans 1:16.

"A changed man"—that oft-used expression assumes real meaning as it is applied to one who has experienced the redeeming grace of God in Christ. In a special way this was true of Paul, whose transformed life amazed those who knew him before he had met Christ on the Damascus road.

In our lesson we find him in three different cities, serving his new-found Master and Lord.

I. At Damascus—Confounding the Jews (9:19-25).

"Straightway." What a good word to apply to the servant of the Lord. Paul did not hesitate to declare his faith in Christ, to proclaim that the One who had redeemed him was able also to save others.

It is the normal and proper expression of Christian faith to give testimony to others. That should be true of every believer. With Paul there was the added element of his call to preach, for God had ordained that he should be His chosen vessel for that purpose (Acts 9:15).

One is impressed by the prompt and unquestioning obedience of so many of Christ's followers of whom we read in the New Testament. No doubt that explains their power and wide usefulness. We could learn of them.

Paul's message was Christ. He proved to the Jews that Jesus was the Christ (v. 22), the One of whom their Old Testament Scriptures spake and for whom they professed to be looking. He declared Him to be the Son of God (v. 20).

They were unwilling to accept the message. They were "amazed" at Paul and "confounded" by the truth he proclaimed, but they rejected both it and him, and he had to escape for his life. But another city must hear his witness, so we find him—

II. At Jerusalem—Disputing With the Grecians (9:26-30).

Knowing his violent persecution of the church, the disciples in Jerusalem were suspicious. Perhaps there was a measure of justification for such an attitude, but one is glad that there was present the generous, open-hearted Barnabas, ready to believe in his new brother in Christ and to sponsor him in the church.

A word of admonition to the church of our day is necessary, regarding the making of a new convert or a stranger at home in the fellowship of the saints. There is no need of putting such a one quickly into office or a place of honor, but let him know that he is accepted and believed in, and thus give him an opportunity to grow.

Paul remained in Jerusalem this time for two weeks (Gal. 1:18), going in and out, that is, in friendly fellowship. That is just what the young Christian needs, and should seek.

He also had something to make right. He had joined the Grecian Jews when they disputed with Stephen (6:9) and stoned him. Paul had agreed with and joined them on that occasion. Now by the miracle of regeneration he is a new creature and is on the exactly opposite side. Now he disputes with the Grecians, declaring that Jesus is the Christ. What a blessed change!

They refused to tolerate that word, and prepared to kill him. But the servant of the Lord was kept by Him, and delivered through the good offices of Christian brethren. How often it is true that the minister must look to the brethren for that kindness which delivers him from distress and danger.

Paul returned for a time to his home city of Tarsus, but when a need of his services arose he was called out, and we find him—

III. At Antioch — Teaching the Christians (11:25, 26).

Persecution spread the believers abroad (Acts 11:19), and like the scattered brands of a beaten fire they carried the flame of Christianity far and wide. Thus the gospel came to Antioch, the third greatest city in the world of that day. A revival broke out, and Barnabas was sent from Jerusalem to be of help.

Good and spiritual man that he was (Acts 19:23, 24), Barnabas did nothing to hinder this work of God, but admonished the people to "cleave unto the Lord," that is, to follow Him closely. Would that all spiritual advisers had such a spirit and such sound judgment.

He was also wise in sensing his need of help. So he went after Paul, the very man to teach these young Christians, and to lead them out into a radiant and abundant life for the Lord.

Here it was that the beautiful name of "Christian" was first applied to believers. It is believed to have originally been a term of ridicule, but even then it was a testimony, for it declared that these believers were devoted to Christ and concerned only with pleasing and serving Him.

Criminals Are Disgraced By Song in South Seas

Instead of going to jail for a crime, the native of South Sea islands is punished by having a song written about him and sung to the community. This method of disgracing sinners publicly has been so effective that jails and guard houses were unknown to the islands until recently when military bases became established.

But even now, the islanders regard being locked behind bars as mild punishment compared with having a song written about them.

Naval Salvage

Since 1941, the U. S. navy has salvaged, exclusive of the Normandie, naval and merchant ships and cargoes having a total salvage value of $500,000,000, or 125 times as much as the cost of saving them.

Hancock County Senior Boys Saw Camp Dodge First Hand

The U. S Army entertained nine Hancock County Senior high school boys last Thursday and Friday.

One Senior was chosen from each school in the county to make the trip. Raymond Schoenwetter represented the Klemme school.

Co Supt. Chas. Whitney and Supt. Leo Esbeck of Klemme took the boys to Camp Dodge.

The boys got a first hand glimpse of army life for two days. They ate with the soldiers, made their own bunks and slept with the soldiers, marched with them, and were really in the army for two days.

The boys said it was a fine trip and they had a lot of good, practical experience.

Mr. and Mrs. Owen Nuehring and Mr. and Mrs. Emil Blumer drove to Stratford, Iowa last Thursday to attend the funeral services held for Merlin Lynch, 18 year old son of Mr. and Mr. Justin Lynch, former residents of this community.

Mr. and Mrs. Howard Baack and children were Easter Sunday dinner guests at the parental Will Schubert home at Rockford where a three course dinner was served. All enjoyed visiting and a late afternoon lunch was served.

Mr. and Mrs. Earl Ruka moved Friday from the Herman Stille house in south Klemme to the late Mrs. Wm. Smith house on the east side of the park, vacated by Mr. and Mrs. C. C. Kilgore, who moved to Fort Dodge.

Seaman 2-c and Mrs. Lloyd Wistey, who have been visiting at the Ed. Jacobs home here, and at the parental Mrs. Louise Wistey home at Clear Lake, left Friday. Seaman Wistey returned to Davisville, R. I. and Mrs. Wistey returned to her home at South English, Iowa.

Mr. and Mrs. C. L. Adams, publishers of The Kanawha Reporter, were visitors ot The Times office Thursday morning. Mr. and Mrs. Adams purchased The Reporter several weeks ago and are giving the people of Kanawha one of the best papers ever published there.

Easter Sunday dinner guests at the Dan Webner home were Pfc Herbert Webner and family of Madison, Wis.; Mike Kinsella and family; Mrs. Kenneth Schlawin and Bobby; Mrs. Willard Palmer and Dottie; Ted Webner and Hiss Hilda Peterson.

Rev. Earl Josten of Carlyle, Ia., spent Monday in Klemme visiting with his father, John Josten, and his uncle, Erick Josten. Rev. Josten and his family reside at Carlyle, and he preaches at both the Methodist Church at Carlyle and in West Des Moines.

Mr. and Mrs. Ed. Jacobs entertained to dinner on Easter Sunday Mrs. Louise Wistey of Clear Lake and her son Edwin Wistey, machinits' mate 1-c of New London Connecticut; Mrs. Clarence Wistey of Squaw Lake, Minnestoa, and Elwyn Jacobs of Simpson College.

Mr. and Mrs. August Josten and children; Mr. and Mrs. Alfred Jurgemeyer and Elaine and Miss Esther Hartbeck were dinner guests Sunday at the John Meinders home. Afternoon visiters were the Misses Sheryl Goll, Mary Ann Wittenberg, and Jo Ann Smith.

Mr and Mrs. Emil Beier entertained the following to dinner on Easter Sunday: Mr. and Mrs. Will Riemer and Iola of near Miller; Mr and Mrs. Will Kraus of Garner; Mr. and Mrs. Ben Riemer and daughter Lois; Mr. and Mrs. Emil Blumer; Mrs. Carol Brager and Daryl; and Mr. and Mrs. Merlin Neuberger and Dean.

Mr. G. R. Bowles of Indianola, visited for a short time Thursday afternoon, at the Times Office. Mr Bowles is the father of "Bodge" Bowles, a former Klemme high school coach. There are four Bowles boys boys in the service. "Bodge" and George are in Italy and had the good fortune to meet together: Jack and Bill are in the States; one son-in-law is a fighter pilot based in England, and another son-in-law is in the States.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Herman Paul was at Mason City on business Monday afternoon.

Mr. and Mrs. Harold Ridder of near Nora Springs spent Sunday at the parental Ed. Schaefer home.

Mrs. Gifford, Klemme teacher, spent the week end in Fort Dodge visiting with friends.

Mr. and Mrs. Clarence Kluckhohn were dinner guests Easter Sunday at the Henry Lewis home.

H. D. Ramsay went to Cedar Rapids last Friday on business over the week end.

Kermit Stille and family of near Swaledale, spent Easter Sunday visiting with Klemme relatives.

Mr. and Mrs. Louis Perkins spent Easter Sunday at Webster City visiting relatives.

Mr. and Mrs. Wes Schuldt went to Davenport Sunday evening on a business mission.

Rev. H. E. Harvey and family were Easter Sunday dinner guests at the Ira Overholt home.

Miss Doris Reuben spent Sunday visiting with her parents west of of Goodell.

Mrs. Lyndon Back entered the Mercy hospital at Mason City last week for treatment.

Mr. and Mrs. Clifford Montgomery and children left Monday for Montley, Minnesota, for a visit with his parents for about a week.

Mr. and Mrs. Vaugh Rule of Sac City; and Mr. and Mrs. Geo. Rule of Dow City were dinner guests Sunday at the Gerald Koerner home.

"Bill" Grosshuesch, son of Rev. and Mrs. Calvin Grosshuesch, left Tuesday for Camp Dodge to be inducted into the army.

Mr. and Mrs. Emil Barz of Waterlco, spent the week end in Klemme visiting with relatives and friends.

Mr. and Mrs. Levi Klotzbach, were Easter Day dinner guests at the Leslie Smock home at Kanawha.

Mrs. Asa Arnold, who is teaching at Ames, came Friday to visit over Easter Sunday at the F. A Arnold home.

Pfc Herbert Webner and family of Madison, Wis., were entertained to dinner Monday evening at the Dan Webner home at Corwith.

Miss Irene Harms, who teaches at Newton, Iowa, came home Friday to visit over Easter at the J. C Thomas home.

Mrs. Earl Schaeffer went to Des Moines Friday afternoon to spend the week end visiting with her sister and family.

Mrs. R. W. Elder went to Ames Thursday night for a few days visit at the home of her son, Clarence and family.

Mr. and Mrs. Alvin Larson and children of Omaha, visited over the week end at the Carold Larson home.

C. G. Waterman was absent from his duties at the First National Bank all of the past week due to illness.

Miss Stella Thieman of Des Moines, visited over Easter with her parents, Mr. and Mrs. George Thieman.

Pfc. and Mrs. Herbert Webner and Dennis of Madison, Wis., spent a three day furlough visiting at the Dan Webner home.

Mr. Willard Palmer and Dorothy spent Wednesday afternoon and evening at the Kenneth Schlawin home in Garner.

Easter Day dinner guests at the home of Mrs. Esther Barz were Mr. and Mrs. Edmund Josten; Milvern and Edward Barz.

E. G. Ell and wife, who recently moved from Mankato, Minn., to Belmond, visited at the R. W. Elder home Sunday. "Nick" Ell was in the garage business here some 20 years ago.

Mrs. Don Speer returned Friday from Webster City where she spent several days visiting with Wayne Pavey and family.

Mr. and Mrs. J. S. Trumbull, of Mason City spent the past week in Klemme visiting at the Sumner Trumbull home.

Mr. and Mrs. Clair West and children of Des Moines spent Sunday and Monday visiting at the Sumner Trumbull home.

Mr. and Mrs Roy Schaefer and daughters were guests to a duck dinner at the Frank Ward home on Easter Sunday.

Mrs. Fred Nagel left Monday evening for Des Moines for a visit. From there she will go to Grinnell for a visit before returning home.

Mrs. Emil Beier and Mrs. Merlin Neuberger visited Sunday evening with the former's mother, Mrs Augusta Riemer at Clear Lake.

Mr and Mrs. Quentin Stille and family were dinner guests Easter Sunday at the Ned Howard home northeast of Klemme.

Miss Eunice Larsen went to Humbolt last Thursday and visited over the week end with Miss Barbara Johnson and the P W Johnson. family.

Eugene Haberkamp spent the past week at his home in Klemme as Waldorf College, which he attends at Forest City, was having a spring vacation.

Elwyn Jacobs, student at Simpson College, spent several days of the past week at home as the college was having a short Easter vacation.

Arnett Waddingham and family have moved from the Tom Blank house in the southwest part of town to the Herman Stille house in the south part of town.

Miss Jacqueline Kudje, who teaches at Kanawha, came home Thursday to spend the week end and Easter with her parents, Mr and Mrs. Art Kudje and family.

Mrs Clara Stille entertained to dinner on Easter Sunday Kermit Stille and family of Thornton, and Mr. and Mrs. Virgil Stille of Liberty township.

Mr. and Mrs. Albert Koerner entertained to dinner Friday evening Mr and Mrs. Gerald Koerner and Terry; Mrs. George Rule, and Mrs. Godfrey and son, Brian.

Mr. and Mrs. Emil Patet of Klemme; Mr. and Mrs. Kenneth Schultz and daughter of Liberty township; and Rev. and Mrs. Fred Griewe and daughters of Aredale, were dinner guests on Good Friday at the home of Mr. and Mrs. W. C. A. Gast of Garner.

Miss Ruth Stille, of Des Moines, spent the week end visiting with her parents, Mr. and Mrs. Lester Stille. Miss Stille is employed in the state Triple A office in Des Moines.

Pvt. and Mrs. Rudy Hoefte and daughter Marlys from Amarilla, Texas came Wednesday evening to spend a fifteen day furlough visiting at the parental Daisy Lemke home and with other relatives.

Pvt. Marvin Lemke left Sunday evening for Camp Swift, Texas after spending a fifteen day furlough here visiting with his mother, Mrs. Daisy Lemke and other relatives in this community.

Sgt. Melvin Schlei arrived home the latter part of the week from the army air base at Great Bend, Kansas, to spend a furlough visiting with his brother, Kermit and family.

Carold Larson, who was all set to leave for Camp Dodge Tuesday to be inducted into the army, was notified Monday by the local board not to report for duty. Men over 26 were all deferred temporarily by a new ruling.

Mrs. Daisy Lemke entertained to dinner on Easter Sunday Pvt. Rudy Hoefte and family of Amarilla, Texas; Vernon McLaughlin and family of Belmond; Albert Etchen and family; Carl Swanson and family and Phyllis Kirkwood.

Sgt. Graydon Back, who is stationed at an army air base at Great Bend, Kansas, arrived home last week and is spending a fifteen day furlough visiting with his parents, Mr. and Mrs. Herman Back and family.

Mr. and Mrs. J N. Day took their son, Dorance, to Ames Thursday night from which place he took the train back to El Segundo, California, after being here for about a week. Dorance was called home because of the death of his grandmother, Mrs. Wm. Smith.

NOTICE

RESIDENTS OF KLEMME

SPRING is here and it's time to clean up the accumulated waste of winter. ALL residents of KLEMME are asked to cooperate in the Annual Clean-Up Campaign.

Rake the leaves from your lawn— burn them, and keep your premises neat and clean. DON'T throw trash in the alleys. Property owners are RESPONSIBLE for keeping alleys clean— this is NOT the duty of the Town.

DON'T LET CHICKENS AND DOGS RUN AT LARGE

Most families in Klemme are raising Victory Gardens this year. Help protect these gardens by penning up your chickens and keeping your dog at home. If we all cooperate we can keep Klemme one of the most attractive towns in Iowa. YOU ARE ASKED TO DO YOUR PART!

LET'S WORK TOGETHER FOR A CLEAN KLEMME!

J. E. STILLE, Mayor

BRITT HEMP MILL BEGAN OPERATING MONDAY

12,000 Tons Of Hemp Straw To Be Processed At Plant

Supt. J. M Townsend of the Britt hemp mill, announced that the mill began operating Monday on a day time shift for the present and when the necessary personnel can be obtained, the plant will operate a night shift also.

About 12,000 tons of hemp straw is stacked around the plant to be processed by the mill.

The 1944 crop will be produced for the Britt mill and totals 4,500 acres and the seed for planting the crop is now in the hands of the growers.

AVOID "BUTCHERING" WHEN YOU PRUNE TREES

Cut Out Dead, Broken And Rubbing Branches, But Do Not "Behead Your Trees

Pruning often is done to trees and shrubs when the real need may be to remove the tree or shrub and plant in its place one that fits the situation. This is the observation of R. R. Rothacker of the landscape architecture staff at Iowa State College.

People will plant young, tall-growing evergreen forest trees, such as Norway spruce, in front of their porches or windows, apparently never realizing that they will eventually grow into large trees. Here is a problem of having chosen the wrong plant for the spot—its not a pruning problem.

Too Much Pruning

There are, of course, ornamental and shade trees which do need pruning, Mr. Rothacker says, but he warns against annual tree "butchering" and beheading of trees. As a general rule too much rather than too little pruning is done

The first thing that should be looked for in pruning is to find and remove broken and dead branches and those which are crossed and rubbing each other.

One needs to watch for crotches which are likely to split These crotches can sometimes be prevented from splitting and ruining the tree by tieing them together with a rod having screw threads on each end or with a cable

When branches are removed saw them off or cut with sharp pruning shears, then treat the wound with an elastic paint wich will not dry out and crack. With large branches one may saw first from the bottom of the branch and then finish by sawing from the top The cutting should be done parallel with the trunk and even with it so that a stub does not protrude

General Principles

General principles which apply to pruning of any woody plant are:

1. Heavy top pruning of a plant causes growth of more leaves and branches.

2. Heavy root pruning lessens vegetative growth but increases the production of flowers and fruit.

3. A pruned plant always tends to resume its natural habit.

4. The uppermost buds of a plant grow first.

5. Heading-back of young growth forces development of side buds.

6. Checking growth in a healthy plant induces flowers and fruitfulness.

Beauty and utility are the chief aims of tree pruning, so use a discreet balance of each to make a truly desirable tree.

Evergreen Trees

For firs, spruces and pines a desirable sompactness may be obtained by removing the central bud of each twig with the fingernail or with a small knife. When the main shoot or central leader is lost on any of these evergreens, one of the side branches may be trained with a stake to replace the injured leader.

CARD OF THANKS

I wish to thank all my neighbors and friends for their help at my house, and for the visits, cards and letters received during my recent illness.—Mrs. Paul Kramer. 1tc

YEGGS CRACKED SAFE AT CORWITH SCHOOL

Sheriff L M Brower was called to Corwith last Thursday morning to investigate a robbery at the school.

About $90 was taken from the office safe at the consolidated school sometime Wednesday night between the time the schoolhouse was closed following the class play and the reopening of the school on Thursday morning

The thieves, who seemed to know their way about the building, took tools from the manual training shop and chiseled the lock from the office safe, evidently expecting to get the proceeds of the class play which had been given that evening beore a large audience

This money, $110, as well as the hot lunch money, about $85, was not in the safe Several safety boxes belonging to the school were also molested

The rise of price of Iowa farm products in this war has followed closely the pattern in the 1st world war.

AIRPLANE STAMP NO. 2 TO BE VALID FOR SHOES MAY 1

Airplane stamp No. 2 in ration book 3 will be valid for the purchase of one pair of shoes beginning May 1, the office of price administration announced Friday.

The OPA said the new stamp, together with airplane stamp No 1, will be good for an indefinite period. Stamp 18 in book one expires April 30

OPA said distribution of rationed shoes exceeded production by more than 53,000,000 pairs in 1943. Of a total of 469,044,000 pairs produced, 46,647,300 were allocated to the military, exempt government agencies and for export. Only 295,309,000 rationed pairs were distributed compared to a demand of 348,703,000.

WORK CIRCLE MEETS THIS WEEK THURSDAY

The Work Circle of the Methodist W. S. C. S. will meet Thursday afternoon of this week at the local church Mrs C G. Waterman and Mrs J C Thomas will serve

The ladies will work on a quilt.

LATE SPRING BURNING MENANCE TO WILDLIFE POPULATIONS

Nest Of Pheasant Eggs Destroyed By Late Spring Burning

Research proves that spring burning does not improve pasture or hay land In fact, fire destroys the organic matter with which soils are enriched. Late spring burning is particularly bad from a game management standpoint At this time of year almost every grassland fire burns alive nests of helpless baby rabbits Those same grasslands harbor the nests of ground-nesting birds, and even a fast moving fire will invariably destroy the nest and its contents Burning is unwise and, especially during April and May, is a serious menance to wildlife populations.

Wild Geese Cause Blackouts

For the fourth consecutive year street lights were turned out during the blue goose flight along the Missouri River bottoms in several southwest Iowa towns. Hundreds of thousands of noisy geese circling the lights during foggy weather disturbed the slumbers of the citizenry, and at their request city officials "doused the glim" to allow the geese to get their bearings and return to the bottomland to roost.

Farmer Markets Pig The Hard Way

A farmer living near Salix in Woodbury County marketed a small red pig the hard way Mr. Peterson sighted a coyote with a dead pig in its mouth as the predator left the pig pen. Unable to catch the coyote on foot, the farmer called two of his neighbors, who ran the animal down on horseback. The coyote was shot, the scalp taken to the office of the county auditor, who paid the usual five-dollar bounty, and the skin was finally sold for a handsome profit to a fur dealer. Thus the farmer got paid for his pig!

Famous Minnesota Fish To Be Honored

Silver Tip, Minnesota's most famous walleye, will be honored by the Minnesota State Tourist Bureau at the Northwest Sports Show at Minneapolis during April. The huge fish, first caught more than 25 years ago for hatching purposes, has produced more than 300,000 eggs annually for more than two decades and is the "mother" of walleyes in hundreds of Minnesota's 10,000 lakes.

POINTS ON THE FOOD SITUATION FROM HERE AND THERE

1. Mrs. Ruth Hughes at the Han-
1. Mrs. Ruth Hughes at the Hancock County rationing office states that application blanks for canning sugar will be in all grocery stores about May 1. A person who expects to can should obtain one of these blanks, fill it out completely attach spare stamp No. 37 from ration book four, then mail it to the ration board at Garner. A canning sugar certificate will then be issued to you from the local board.

2. A spring inventory of home canned goods can be as helpful to a housewife as a grocery store inventory is to the grocerman.
Menus can then be planned to use for the new food which will be put up this season. Such an inventory will also help in planning for more adequate canning this year.

3. Have you tried a custard sauce on fruit flavored gelatin, plain cake or pudding? To make soft custard sauce, heat 3 cups of milk over boiling water. Add one-fourth cup of sugar and one-fourth teaspoon salt to 2 beaten eggs. Gradually add hot milk to the egg mixture. Cook over hot, but not boiling water. Stir constantly until mixture coats spoon. Remove from hot water at once; cook, and add vanilla.

YOUTHS ATTENDED RALLY AT THORNTON SUNDAY

Fifteen youths and their counsellors attended the Methodist Youth Rally at Thornton on last Sunday. Mrs. E. G. Schaeffer was one of the discussion leaders, and Dr. Marvin B. Kober, Methodist minister of Mason City was the evening speaker. The young people were: Eunice Larsen, Junior Larsen, Jim Thomas, Elwood Harvey, Carol Bock, Roger Ridder, Dick Finders, Dorothy Ellingson, Peggy Coobs, Ruth Smith, Shirley Stille, LaNelle Harvey, Ben Coobs and Rev. H. E. Harvey.

Those attending from Liberty were Lola Gast, Eugene Beier Marie Perkins, and Ardys Polsdofer. The next Rally will be at Belmond on June 4.

BEE HAS AN IMPORTANT PLACE IN AGRICULTURE

Iowans who plan to cut alfalfa clover or other legumes for seed during 1944 might well investigate the possibility of moving colonies of bees to the vicinity of their field at blossom time, according to F. P Paddock, Iowa State College extension bee specialist. Much more nearly complete pollinization of the blossoms and a consequent greater "set" of seed are possible because the bees transport pollen grains on their bodies as they fly from one blossom to another.

This apparently insignificant result of the bee's work actually has a great effect on seed production Paddock states that demonstrations conducted by the Iowa State College extension service in recent years have shown that production of white sweet clover seed may be tripled through liberal use of bees The Ohio Experiment Station found that red clover and alsike seed production could be increased four and five times, respectively, when bee colonies were placed near the wields during the proper season.

The principle of pollinization by bees is one in which Iowa commercial orchardists and southern bee men have long cooperated. Each year hundreds of colonies of Louisiana-owned bees are trucked north and placed in Iowa orchards. The bees not only produce a good crop of honey, but the orchard owners are assured as good a fruit crop as weather and other conditions will allow.

S. S. CLASS HAD PARTY AT MONTGOMERY HOME

The Fifty-Fifty Class of the Methodist Sunday School held a party at the home of Mr. and Mrs. Clifford Montgomery Monday evening.

Games were played and a social evening was spent, after which a nice lunch was served by Mrs. Montgomery, assisted by Mrs. Geo. Dodd.

Pilot's Best Friend

KEEPS 'EM FLYING—Sgt. Kermit K. Koerner, son of Mr. and Mrs. Albert G. Koerner of Klemme, is in the depot repair squadron somewhere in Italy, helping repair planes that return from combat. Sgt. Koerner is a graduate of Klemme High School and attended Iowa State College. He entered the service on Febr. 6, 1942, and landed in Africa in January this year. Before entering service he was employed by the Rock Island railroad. (Cut courtesy of Mason City Globe-Gazette.)

MORE HANCOCK COUNTY MEN REPORT FOR ARMED SERVICE

The following boys who had previously passed their Pre-Induction physical examination at Camp Dodge, Iowa, reported back for active duty April 11, 1944:

Edgar Tegland, Kanawha; Glen L. Broome, Britt; Clarence L. Cline, Britt; Hans Sluik, Garner; Alvin H. Swanson, Wesley, Donald D Afinson, Britt; Calvin W. Grosshuesch, Klemme; and Robert V Katter, Garner. All for the Army.

The following reported back for active duty April 16:

Martin B. Barz, Klemme, Navy; Raymond H. Peterson, Britt, Marine Corps; Eldon K. Steuerwald, Ventura, Marine Corps.

REPUBLICAN WOMEN HELD COUNTY UNIT MEETING

The Hancock County Republican Women's clubs held a county-wide meeting at the St. Boniface hall at Garner Saturday afternoon. The meeting began with a 1:00 o'clock luncheon with a speaking program following.

Chrityna Callison, county president, presided. Herman Knudsen of Mason City, republican candidate for senator from the district comprising Hancock, Cerro Gordo and Franklin counties, addressed the group, as did Sam Torgeson of Lake Mills, who is assistant charinan of the sixth district republicans.

Mrs. R. R. Roberts, of Britt, delegate from the sixth district to the national convention at Chicago, and president of the State Republican Women's clubs, and Mrs. W. S Pritchard, organization director for the State Republican Women's clubs, also spoke briefly.

Candidates for county offices, representative and senate were introduced by Fred C. Missal, chairman of the Hancock county republican central committee.

There was a good attendance of men and women from all over the county.

FIELD WORK TEN DAYS LATE IN HANCOCK COUNTY

Unseasonable cold and damp weather has retarded spring field work in Hancock county. Field work in general is about ten days behind schedule.

Some farmers were able to get into their fields the first of the week and a little seeding was done. Others found that their ground was still not in shape to work.

About 65 percent of the poor drainage in Iowa is the result of clogged outlets, says C. H. Van Vlack of Iowa State College.

Cities Issue Bulletins to Inform Citizens of Activity

In spite of wartime difficulties, cities continued to issue general annual reports to keep citizens informed of municipal activities, the International City Managers association said following a survey of more than 100 cities. Generally, cities issuing reports are those also mailing leaflets with tax or utility bills and using newspapers, radio and movies in reporting municipal affairs.

Dayton, Ohio, again published its report in Readers Digest form with articles by department heads, and Springfield, Mass., issued for the first time a similar folder to supplement the regular report with an informal review of the more interesting activities. Eight cities issued annual reports either for the first time or for the first time in several years while 10 New England cities have issued reports for 95 or more consecutive years.

Seventy-six cities, reporting information about each department, included total expenditures, number of employees, per cent of total expenditures to the city's budget, per capita cost, trends, problems and accomplishments. Reports of 86 cities carried financial statistics; numerous cities carried civilian defense information; and a popular feature this year was an honor roll of city employees in service. Postwar planning gained more prominence in this year's reports as several cities dealt with plans already formulated and brought out the need for careful planning in the near future.

Diamond Cutters Striving Constantly for More Flash

Styles in diamond cutting change with the years. Composition and design of the gem strive for ever-greater "flash." Standard patterns are the "brilliant" with 58 facets, 33 above and 25 below; and the "rose" with 12 to 32 facets above and one below. Cutting and polishing may take half the weight of the stone.

Tools of the trade are few and simple. Essentials are a firmly positioned mount for holding the stone in the shaping operation; a lathe for spinning the diamond used to shape the rough stones; a small, power-driven metal disk so mounted that its film of diamond dust and olive oil can be kept in contact with stones held in adjustable iron tongs above it. Patience is paramount—cutting a single facet may take hours. Angles must be kept true, planes exact. Splitting a big stone into smaller gems is a job to test skill and luck.

Amsterdam and Antwerp became great diamond markets, nurtured the cutting and polishing arts to world leadership — a fame now shared by New York.

Jungle Matches

The jungle match can withstand the saturating humidity of steaming jungles or the torrential downpours of the tropics. It can be dunked in the ocean for several hours and still ignite.

The jungle match is made by dipping an ordinary match in a special solution which seals or encases the inflammable tip and the stick in a water-resistant "raincoat."

The "processing" is complicated, and since it tends to slow down normal production only a small portion of the nation's 500 billion-a-year match output will wear the special-duty raincoats. These matches will be distributed only in war areas where weather conditions make ordinary matches useless.

Cream Containers

Cream should not be kept in a garage or other place where gasoline, oil or similar products are used or kept. That cream should be kept out of the barn goes without saying.

The use of makeshift containers for holding cream is hazardous to the cream. Syrup pails, lard buckets, preserving jars, cooking utensils and the like are not suitable containers because they are either hard to clean or impossible to keep covered properly. They are so objectionable that the laws of many states forbid their use for this purpose.

Holding cream in stew pans, earthen crocks, bowls and shallow pans, or other containers having large surface areas in proportion to the depth of the cream, encourages mold growth.

PAUL BECOMES A MISSIONARY

LESSON TEXT: Acts 13 1-4; 14:8-20.
GOLDEN TEXT: The Holy Spirit said, Separate me Barnabas and Saul for the work whereunto I have called them.—Acts 13 2.

Men are God's instruments for accomplishing His purpose in spreading the gospel message. They must, for such a high and holy calling, be men called and prepared by Him, faithful to Him, and willing to sacrifice all for His glory. Paul is a great example of such a life. He was—

I. Separated by the Church (13: 1-3).

God was about to begin the great missionary enterprise, which opened with the journeys of Paul and continues to this day. The church at Antioch had capable men in its membership, and the Holy Spirit called for the separation of two of these, Paul and Barnabas, for a special work.

A number of interesting things emerge here. It is good to note that the church had men trained and ready for service. Do we?

Observe that the Holy Spirit worked through the church. There are those who do not speak too highly of the place of the church in this matter. Certainly it is true that if the church has lost its vision and message, God may call men even outside of its membership. But the orderly way—and God's way, if the church is ready—is to have the church separate men for service.

The church at Antioch gave its best, without question and without hesitation. It is an example worthy of our emulation.

II. Sent by the Holy Spirit (13:4).

There is a sense in which the Holy Spirit functions as the executive member of the Trinity. His purpose is to magnify the name of the Lord Jesus Christ, to bring men to faith in Him. To carry out that plan, He sends men out to speak of Jesus.

The sent one is always successful, for he goes the way, at the time, and in the power of the Holy Spirit. To be sent by Him is the mark of distinction upon the Christian worker.

III. Serving by Deed and Word (14:8-18).

The story of the healing of the man who had been a cripple from birth centers around that beautiful word "faith."

God is always looking for faith in men and women, and so we who serve Him should learn to be alert for even the slightest indication of a belief in Christ. All too often we blunder along, a bit too eager for action, or too insistent upon a thing being done in just our way, and thus fail to see the gleam of faith to which we may address the gospel appeal.

"Seeing that he had faith" (v. 9), Paul turned all the power of the eternal God loose in the impotent feet of the man, "and he leaped up and walked." God help us to be ready to be channels for the outflowing of His power!

Impressed by the miracle, the people wanted to accord the disciples the worship of gods. One is impressed both by the promptness with which Paul and Barnabas stopped the demonstration and the skill with which they improved the occasion for a testimony for Christ!

The servants of Christ are in far greater danger when men speak well of them and would worship them, than they are in the hour of opposition and persecution. Not that anyone would suggest that a true word of appreciation or honor be withheld from a faithful teacher or preacher, but let it be given for God's glory and not for the praise of man.

IV. Suffering for Christ's Sake (14:19, 20).

The highest praise quickly turns to the most bitter hatred. Finding that they had foolishly attempted to deify two Jewish preachers, and being visited by the Jews who made it their business to pursue Paul to this city, they stoned him.

Incidentally, it is of interest to observe how zealous people can be for an evil cause. Having set out to hinder the gospel they were willing, yes eager, to spend time and money to carry out their purpose. The children of Satan are often more diligent than the children of light (cf. Luke 16:8).

Paul was left for dead; in fact, there are those who believe that he was dead, and that it was at this time he was caught up into the heavens and had the vision spoken of in II Corinthians 12:1-4. If that was the case, the raising of Paul was an actual resurrection from the dead.

For a man so stoned as to be left for dead, to arise and journey on the following day to another city, was a miracle of God's power.

In this case, God delivered His servant, not from his troubles, but through them. We must not always expect to be saved from trial, but we can be sure that God will deliver us either "out of" or "in" our troubles. Let us trust Him!

PATTERNS

SEWING CIRCLE

Patchwork Apron.

IT'S the nicest apron that ever went into a kitchen! Big enough to cover your dress, well-fitted so that it is as smooth as you'd like an apron to be, bright with color applied in an interesting design at the hemline, it's an apron which lends itself handsomely to any good bright colored percale, muslin or cotton.

* * *

Barbara Bell Pattern No. 1937 is designed for sizes 14, 16, 18, 20, 40, 42 and 44. Size 16 requires 2⅞ yards of 35-inch material; 4½ yards bias fold for trimming; ⅝ yard or bright scraps for lower facing.

Welcome the Sun!

THE sleeveless, low-necked sunback dress with full dirndl skirt, big pockets and romantic tie-sash is here to stay—everyone, young and old, is bent on getting plenty of sun and air this summer. This bolero and sun-dress is one of the prettiest to be found!

* * *

Barbara Bell Pattern No. 1942 is designed for sizes 12, 14, 16, 18, 20 and 40. Size 14, ensemble, requires 4⅞ yards of 39-inch material.

Little sister's sun-dress with its own matching bolero can be made in the same fabric as her older sister's or mother's!

* * *

Barbara Bell Pattern No. 1943 is designed for sizes 3, 4, 5, 6, 7 and 8 years. Size 4, requires 2⅜ yards of 39-inch material for the ensemble.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Paiche, 500-Pound Edible Fish, Being Raised in Peru

One of the largest fresh-water fishes in the world, the paiche, or pirarucu, 12 to 15 feet long and weighing up to 500 pounds, is now being raised commercially on a fish farm in Peru.

Dried and prepared in long strips, the flesh from the monster fish was the poor man's "beef" in the Amazon region for years.

Once it was so plentiful that fishermen from one small village could count a two-week catch by the thousand. Unrestricted fishing almost depleted the waters, so Peru has established a hatchery to replenish them.

. One thing a soldier is afraid of is a display of emotion. That's why his slang so often sounds derogatory. For example, he refers to the silver eagles on his colonel's shoulder straps as "buzzards." But when he speaks of his favorite cigarette, he says: "Camels." They're first with men in the Army as well as with Sailors, Marines, and Coast Guardsmen. (According to actual sales records in service men's stores.) And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard **wherever** they are.—Adv.

Elephant Troops

Predecessor to the modern army tank troop was the Hindu elephant troop employed hundreds of years ago. The tribes of India mounted their "bow-and-arrow" warriors in boxes on the broad backs of mature elephants.

The strategy was to crush down footmen with a stampede charge. Wrote Tartar Emperor Kublai Khan: "Infantry and cavalry took fright when these elephants mounted by archers attacked."

Unpredictable River

China's Hwang-Ho river has changed its mouth 11 times.

It's New!

It's Fast!

Ink Spots And Spatters

By Jergie

IT COULD HAPPEN IN KLEMME

A farmer walked into the hardware store in an Iowa town and asked to see an axe. After carefully examining a half-dozen, he chose one to his liking and asked its price.

"That axe is $1.50," said the proprietor.

Producing a page torn from a mail-order catalogue, the farmer said, "Here is the same axe for only $1.33."

The hardware man looked at the picture, pondered, then said, "O K., if they can sell that axe for that money, so can I."

"Fine, I'll take it," said the farmer.

The storekeeper picked up the axe, wrapped it up neatly, weighed it on a scale on the counter, and began to make out a sales slip of $1 33, plus 3 cents, plus 10 cents, plus 15 cents, total $1.61.

"Hey!" shouted the farmer. "You said $1 33, what's the 3, 10 and 15 cents for?"

"Lock," says the hardware man, If you sent off for it the 3 cents is for the postage stamp to mail your letter, the 10 cents is for the money-order, and the 15 cents is for the parcel post you would pay to get it.

The farmer admitted that the merchant was right, so counted out $1 61 and handed it to the storekeeper, who then calmly laid the axe on the shelf behind the counter.

"Say, what's the big idea?" asked the farmer. "Dog-gone, I've already paid you 11 cents more than your orginal price, now give me the axe!"

With a twinkle in his eye, the storekeeper replied, "Come back in about a week and you can have it It would take you that long to get it from Chicago!"

The farmer was a good sport and went out with a big grin.

Which all adds up to the fact that it pays to trade at home.

CYANIDE GAS KILLS GROUNDHOGS IN DENS

Cyanide gas is the cheapest and best way to rid the farm of groundhogs or woodchucks. County Extension Director Paul Henderson states that a cyanide gas gun may be used to direct the gas into the burrows, or cyanide dust will serve.

If calcium cyanide dust is used a handful is thrown back into the burrow, and the mouth of the burrow is closed so that the gas is generated within.

Eradication of groundhogs has been the means, on may farms, of checking much erosion. The burrows provide an entry way for water to cut through banks and slopes and carry away soil. In some localities where levees are maintained to protect level land against flooding, groundhog burrows have caused leaks in time of flood.

Put waste acres to work this year to produce food and feed Those acres may include unused lots, a small pasture that came through the winter poorly, an old orchard that is no longer productive.

We can print anything. Call at the Times Office.

BOARD PROCEEDINGS

REGULAR APRIL MEETING

Garner, Iowa, April 3, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read.

Notice of warning to depart is hereby ordered on Mr. and Mrs. Sidney Aldridge and family and Mr. and Mrs. John Penning and family.

On motion and second the quarterly reports of Fred C. Missal, County Auditor; Elmer Raw, Clerk and Fern Peck Katter, Recorder, are approved.

On motion and second contracts with the Park Hospital and Mercy Hospital at Mason City for care and hospitalization of indigent patients from Hancock County are approved.

On motion and second the annual report of G. H. Oxley, Justice of the Peace, is approved.

On motion and second the application and bond of B. F. Higdon, Jr., for a Class B Beer Permit are approved and permit is hereby granted.

On motion and second the bond of C. A. Frisbee, Assessor, is approved.

On motion and second the bond of Concrete Products Corporation for material on D. D. No. 137 is approved.

In the matter of a letting on the printing of the 1943 Financial Report of Hancock County, Iowa, the date and hour heretofore fixed for said letting having arrived. The Chairman proceeded to open all bids on file and after duly considering all bids on file, the bid of the Williams Publishing Company was found to be the lowest and best bid therefor.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that a contract for the printing of 350 copies of the 1943 Financial Report of Hancock County, Iowa, be awarded to the Williams Publishing Company of Garner. All other bids are hereby rejected.

This being the 3rd day of April, a date heretofore set for a letting for medicine and medical care of the Hancock County Home for the peeiod of one year from April 1, 1944 to April 1, 1945, the hour of said letting having arrived, the Board being fully advised the Chairman of the Board proceeded to open all bids on file and after duly considering all bids on file the bid of Dr. C. O. Brewster of Britt was found to be the lowest and best bid therefor.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that a contract be and it is hereby awarded to Dr. C. O. Brewster for medicine and medical care at the Hancock County Home for the year from April 1, 1944, to April 1, 1945.

WHEREAS, John H. Solberg has requested the Board of Supervisors of Hancork County, Iowa, to pay his drainage assessment against the W½ NE¼ and E½ NW¼ of Section 17, Township 97, Range 24, West of the 5th P. M. for the year 1943, in 10 equal installments on Lateral 2A, of D. D. No. 1 and 2

BE IT THEREFORE RESOLVED by the Board of Supervisors acting for and in behalf of Drainage District No. 1 and 2, Lateral 2A that an improvement certificate of Drainage be issued to John H. Solberg and charged against the W½ NE¼ and E½ NW¼ of Section 17, Township 97, Range 24, all in accordance with Chapter 353. Code of Iowa, 1939, and laws amendatory thereto.

The foregoing resolution was offered and read by Supervisor Eckels, who moved its adoption, was seconded by Supervisor Chambers, whereopon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels, and John Chambers, aye. Nays none.

Supervisor Schoun is appointed a Committee to investigate and cause repairs to be made in D. D No. 7 Main.

On motion and second Frank Gahan is hereby granted a lease on the SE¼ of Section 27, Township 96, Range 26, West of the 5th P M for the period from March 1. 1944 to March 1, 1945 at an agreed rental of $400 00, payable in advance. Chairman F. J. Schoun is hereby authorized to execute said lease in behalf of Hancock County, Iowa.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby ordered to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in sums set opposite each claim.

1ST ADJOURNED APRIL MEETING

Garner, Iowa, April 11, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and J. A. Chambers present.

The minutes of the last meeting were read and approved as read.

In the matter of Tax Sale Certificate No. 2181 which Hancock County, Iowa, holds on real estate in the town of Britt, Iowa.

WHEREAS, J. C. Blasier has requested that same be assigned to him and has offered the full amount of the Tax and penalties in payment therefore and whereas it is deemed for the best interests of the taxpayers of Hancock County, Iowa, that said Tax Sale Certificate No. 2181, be assigned to J. C. Blasier.

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that Tax Sale Certificate No. 2181 be and the same is hereby assigned to J. C. Blasier upon payment of all taxes, interest and penalties in full and the County Auditor be and he is hereby authorized to execute said assignment in behalf of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Penn Eckels, who moved its adoption, was seconded by Supervisor J. A. Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers aye. Nays none.

On motion and second the quarterly report of R. J Fritsch, Justice of the Peace is approved.

On motion and second Ray Hunsley, is appointed weed commissioner of Hancock County, Iowa, for the year 1944, and is hereby authorized to appoint his assistant subject to the approval of the Board of Supervisors

His remuneration as such Commissioner shall be 60c per hour plus 5c a mile for the use of his automobile when necessary.

Supervisor Penn Eckels is appointed a committee to make repairs in D. D. No. 46-3 Main and D. D. No. 61, Lateral No. 1.

This being the 10th day of April, A. D., 1944 a date heretofore set for a hearing on the report on the assessment of benefits as assessed by the Commission heretofore appointed in D D No. 137, a subdistrict of Drainage District No. 1 and 2, Hancock County Iowa, the hour for said hearing having arrived the proof of publication being on file and the Board being fully advised said hearing was held as scheduled.

After duly considering the report of the Commissioners appointed to assess benefits and all objections thereto oral and written, this Board does find the assessments to be equitable and just in proportion to benefits derived except that the following adjustments shall be made.

The assessment of Lars Johnson against the SW¼ SE¼ exc NE¼ NE¼ SW¼ SE¼ of Sec 23 Twp. 96 Range 25, is hereby reduced $50 00 making his assessment against said tract now read $213 95 and against W 16 3A of the NW¼ SE¼ of Section 23 Twp 96 Range 25, is hereby reduced $20 00 to read $63 94

The assessment against Maria S Schaper against the N 21 A NW¼ NE¼ of Sec. 26, Twp. 96, Range 25 is hereby reduced $100 00 to read $51 86

The assessment against County Highways is hereby increased $50 00 to read $130.00 and the assessment against Frank J. A. Hejlik and Bessie B Hejlik against the S 4 3 acres of the SW¼ SW¼ SW¼ Section 24, Twp. 96, Range 25 is increased $5 00 to read $23 89 and against the N 1.8 Acres of the NW¼ SW¼ NW¼ Section 25, Twp 96, Range 25 is increased $15 00 to read $25 14 and against the NW¼ NW¼ Exc East 10 2 Acres of the N½ of Section 25, Twp 96 Range 25 is increased $130.00 to read $1036 25

All other assessments to remain as reported by the Commission to assess benefits and said assessments as corrected by the Board of Supervisors acting for and in behalf of D D No. 137, shall be the basis for all future assessments against each tract, parcel, highways, and railroads in the district or until a new basis for assessment has been made by proper reclassification of such district.

The foregoing resolution was offered and read by Supervisor Eckels, who moved its adoption, was seconded by Supervisor John Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F J Schoun, Penn Eckels, and John Chambers aye. Nays none. Resolution was declared adopted

On motion and second the proposed post war highway construction projects No's. 1 to 5 inclusive as approved for Hancock County, Iowa, by the State Highway Commission subject to requirements and limitations of Federal Legislation, is approved.

On motion and second the Board adjourned to April 24, at 9 o'clock A. M.

F J SCHOUN, Chairman

ATTEST: FRED C. MISSAL,
County Auditor.

Early seedling o oats has a greater influence on yields than the rate or method of seeding, experiments at Iowa State College, have shown

The best way to determine the correct temperature for baby chicks is to watch them If they are happy and contented, the temperature is probably about right.

CARE FOR CARPET SWEEPERS TO OBTAIN BEST OF SERVICE

Carpet sweepers operated with minimum pressure and smooth, even strokes give best service. Their care is important, too. Miss Marie Budolfson, extension home management specialist at Iowa State College, says to empty the dustpan after each use. She advises cleaning the brush often to keep it from matting, and cutting threads and hairs that catch bewteen tufts or around the axle. Then the brush may be cleaned with a metal comb.

Another care measure is taking out the brush occasionally to clean the fine dust that collects at the ends. A dry-cleaning fluid will remove oil and wax from the brush, which should be replaced when the bristles wear down.

Experiments at Iowa State College indicate that ground soybeans have less feeding value than whole beans for beef cattle.

CONSERVATION IS BOOSTING YIELDS

Survey Indicates Farmers Are Sold on Value of New Methods Tried

Three hundred and seventy-five Iowa farmers, under new soil conservation systems, have stepped up their oats and corn yields one-fourth and their total meat, milk and egg output approximately the same amount, a statewide summary indicates.

Frank H. Mendell, state head of the Soil Conservation Service, who released the summary, said the farmers interviewed had used conturing, terracing, pasture embodied in a complete erosion control and production program for at least 2 years.

Mendell's men, assigned to the 33 soil conservation district offices in the state, made the Iowa study as a part of a nation-wide survey. The Iowa survey disclosed that the farmers estimated their corn yields are now 15 bushels per acre higher than they were when they checkrowed their crop up and down hill. This was a 32.6 percent increase.

Helps Livestock

Soybean yields likewise rose an average of 2.8 bushels per acre, or an average of 14 percent. Wheat and oats yields increased 4 and 8 bushels per acre, respectively. Clover-timothy hay yields per acre increased 21 4 percent, alfalfa 8 percent and soybean hay 5.8 percent.

Total milk production on the survey farms increased 19.2 percent, while the average production per cow went up 9.5 percent.

The extra feed resulting from the soil conservation system enabled the farmers to keep 37 percent more brood sows than they fomerly did and raise 33 percent more pigs.

Half of the farmers increased their beef cow heards an average of 21.8 percent, while more than half of them increased their yearlings 19 percent. Three-fourths of the survey farmers increased the number of calves raised while a fourth of th lamb production 17 also increased their 22 percent and their percent.

Neighbors T

Three hundred and said that the conserv they had applied to with the assistance of soil conservation dis forerunners, the demo jects and CCC camps, production per acre.

Two hundred eigh ers said that they ha sible for 1,919 of th turning to soil cons tices, while 164 said sonally helped neigh touring or other cons tices.

Two hundred fifty-soil-saving programs labor and machinery $5 to $500.

Our Men In The Service

DOCTOR (CAPT.) DULMES WRITES FROM ITALY

The Editor and wife received a nice letter from Dr A H. Dulmes, parts of which we think will be of interest to our readers Dr Dulmes, a Captain in the Medical Corps is stationed somewhere in Italy:

"I have a two or three-fold purpose in writing to you tonight First, I should like for you folks, if possible, to convey my sincere appreciation and gratitude to all the Klemme folks who wrote me Xmas cards and letters. You'll never know how truly happy they made me feel. We had been over here in Italy for a month and had not had any mail at all for about six weeks when on Christmas Eve at about 5:00 p. m we received 2 truck-loads of mail. What a Xmas present! Nothing else could have made things seem more real than those letters and packages And, on Dec 31 we received a second big batch of mail. It almost seemed as though it had been so pre-arranged Santa Claus really "came to town" that time.

"Second I had a very pleasant surprise the other day at the Hospital. We were just getting ready to have a medical meeting of the Army Doctors around this area when a fellow walked up to me and said, "Hello, Doc!" I turned around and there stood Bill Sandry from Klemme! I guess my answer was, "Well, I'll be damned!" Anyway, we had a good visit but too short so I told him to come in anytime and we'd do a little more talking He is in one of the organizations which is located a few miles out and which our hospital takes care of I don't wish him to be sick, but it will be a pleasure to take care of someone from Klemme, I assure you

"I am going to save the Klemme Times for him from now on, too. He made me wonder about one thing during the conversation. He told me he had seen me the day before but wasn't sure it was I because my "hair was too gray" I guess I must be getting older, eh? However, "there may be frost on the roof, but there's still fire in the furnace"

"From all reports there must be quite a change in citizenry in the old town, particularly in residencies of old timers there Also, there will probably be many new, new faces to see when I get back I read about them and think, "there's another baby case I should have had" It seems that I don't get so much experience in that line in the Army!

"The third reason for writing is that you have a letter due you So I'll finish up by telling you that for the past month we have really been getting Iowa butter, pork chops, and fresh beef and you should see me eat I'm not so fussy as I used to be, M J! I'll still take your burned sugar cake, though Greetings to all my friends! As always,"

"Doc"

KLEMME BOYS GET TOGETHER IN ITALY

Cousin met cousin, and brother met brother, and friend met friend in Italy recently.

First came the glad news to relatives in Klemme that Sgt. Otho Keraus and Sgt. Donald "Dutch" Turgasen, cousins both from Klemme met somewhere in Italy The boys had a great time swapping stories of news from home They found out that at one time only a narrow road separated them from each other Now they are about 200 miles apart

Another story coming from Italy tells of the meeting of brothers Capt Glenn "Bodge" Bowles, former Klemme high school coach and his brother George, from Indianola met up with each other, and as Dad Bowles tells the story, George got in touch with the Red Cross who located "Bodge" and the two brothers met George says he just had to find "Bodge" as "Bodge" never was worth a damn at fighting and George just had to be there to keep him from getting licked as he always had done when "Bodge" was a kid.

And more meetings have been heard of. Bill Sandry and Doc. Dulmes ran onto each other over in Italy, and "Pete" Paul and "Bodge" Bowles have also met in Italy.

The world isn't so big after all!

HAROLD JOST COMMISSIONED SECOND LIEUTENANT

Harold Jost, son of Henry Jost of Klemme has completed training at Miami, Florida and graduated April 1st as a Second Lieutenant in the U S Army.

Lt Jost is now stationed at New Orleans, La as Priorities and Traffic Officer and his duties are to regulate and issue priorities for men and material traveling by military aircraft.

Lt. Jost is a graduate of Klemme High School and attended Iowa State College. Before entering the service he was engaged in manufacturing machine parts for use by the army and navy.

KLEMME YOUTHS BEGIN TO SPROUT WINGS

Keesler Field, Biloxi, Miss —Two former residents of Klemme, Iowa and vicinity, have reported at this Army Air Forces Training Command station.

Here at Keesler Field they will undergo a series of medical and psychological tests, training and classification. Upon successful completion of this processing to determine their qualifications as air cadets, these soldiers will be sent to college and universities for five months of further training. Some, especially qualified by their academic background, may be sent directly to a pre-flight center for cadet training.

Those reporting here were Pvt. Aaron Donald Wille, son of Mr. and Mrs. Cornelius J. Wille, Klemme, and Pvt. John W. Schwichtenberg, son of Mr. and Mrs. David Schwichtenberg, Goodell, Iowa.

One acre of clover, alfalfa or rape pasture can carry 18 to 20 hogs that are on a full-feed of grain, or 12 to 15 that are fed limited amounts of grain.

When you have company or take a trip, that's news. Phone 12.

BETTER IOWA GARDENS

Whenever it rains frequently, as during the past several years, we have conditions that favor development of diseases in our victory gardens. This year we'll need to make especially strong efforts to prevent loss of valuable vegetables. Let's remember that control of plant diseases is a matter of prevention, rather than cure.

* * *

Garden crop diseases can be carried on or in the soil, and many are borne in the soil. For either of these types of disease, disinfecting the seed with a disinfectant dust is an important method of control. Use of certified seed if available, planting each kind of vegetable in a different place in the garden each year, keeping down weeds around the border of the garden as well as in the garden, mulching tomatoes, killing insects, and pulling and burning diseased plants are other effective disease - prevenitng methods

* * *

During the last 2 weeks of April, we can set out good, strong plants of early cabbage. Strong plants of Italian sprouting broccoli may be set out at the same time. Set the plants a little deeper than they were before transplanting.

* * *

After planting the transplants firmly, cover them to protect from winds and sun for several days, until the plants can take hold. Transplants get a boost from a fertilizer solution from your county extension The Iowa Garden Guide, available from your county extension office or from the Iowa State College Extension Service at Ames, tells how to apply this.

* * *

If you are going to raise your tomatoes from plants grown directly in the garden, the seed should be planted within the next few days. But, be sure to treat the seed with a disinfectant dust.

* * *

Straight rows in the garden are "just the ticket" They make all gardening operations much easier and improve the appearance of the garden.

* * *

If you have a small plot of ground for your garden, you can get the most use from it by planting several crops together in a row Certain crops are especially adapted to this—for example, radish seed may be mixed with beets, carrots, parsnips or salsify Small amounts of radish and lettuce seed may be sown with parsnip seed The radishs will mature first, and then will come the lettuce. The parsnips are thinned to the proper distance in the row as the lettuce is harvested.

Iowa's soils are gradually becoming less productive because of the lack of organic matter, loss of minerals such as potash and phosphorus. One measure which would help the situation is to plow under all cornstalks instead of burning them, says H. D. Hughes of Iowa State College.

It takes early chicks to get November eggs.

COUNCIL PROCEEDINGS

Klemme, Iowa, March 13 1944

Regular meeting of the Town Council called to order by Mayor Stille, with Thomas, Thompson and Kluckhohn, members of the Council present.

Minutes of the previous meeting were read and approved.

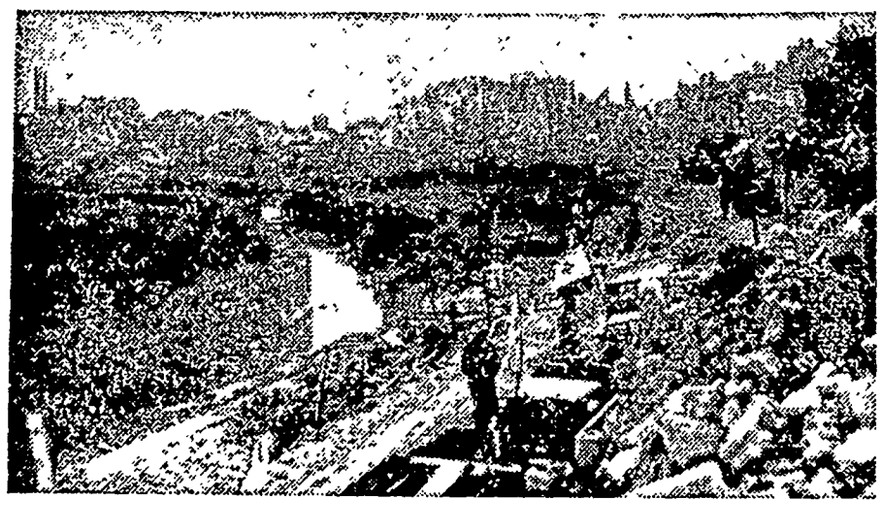
WEEKLY NEWS ANALYSIS

Increased Activity in Pacific Sector Marked by U. S. Blows on Jap Bases And Heavy Fighting in Burma, India; 4-Fs Get Study in Manpower Crisis

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union.



Italy—Against a background of war's ruin at Cassino, an Allied medical unit moves to the front to attend the wounded.

RATIONING:
Announce Changes

More gas, freer use of fuel oil and food coupons and ration changes in vegetables, fruits, meats and oils were announced by OPA.

To maintain the distribution business, it was announced drivers holding "B" cards will be allowed an additional 100 miles a month, while expiration dates for fuel oil coupons will be eliminated before the fall season of heavy consumption gets underway.

Because many shoppers cashed in their red and blue food coupons for tokens at expiration dates, OPA took off all time limits on the stamps.

While all frozen fruits and vegetables were taken off rationing, beef flank meat, pork liver, lamb and mutton hearts, liver, sweetbreads and tongue, beef tongue, cooked and barbecued pork spareribs and pork tongue were cut 1 point. Shortening, salad and cooking oil were slashed 1 point. Points on canned carrots and tomato juice also were reduced.

DRAFT:
Eye 4-Fs

To fill up the industrial and agricultural ranks left vacant by the drafting of all men except key workers under 26, the government called for the induction of all 4-Fs not engaged in essential occupations and a congressional committee moved to shape special legislation for such a program.

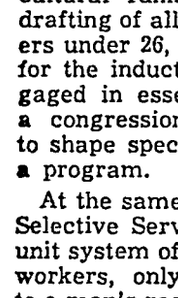
At the same time, it was revealed Selective Service was scrapping its unit system of deferring agricultural workers, only giving consideration to a man's regular employment on a farm and the problem of replacing him.

Under the government's proposal, 4-Fs doing nonessential work would be enlisted as reserves and directed to essential occupations at regular civilian pay, or they would be enrolled in labor battalions for employment at army pay if they refused to accept the assignments.

Of the nation's 3,500,000 4-Fs it was estimated that about 1,000,000 were engaged in non-essential work.

PACIFIC:
Threaten India

As bold Japanese forces thrust toward the highway hub of Imphal in India, Adm. Louis Mountbatten rallied Allied forces to a stand to hold this key to land communications all along the 600-mile Burmese front.



Admiral Mountbatten

In the Southwest Pacific area, strong U. S. naval forces again challenged the Japanese fleet to come out and fight by attacking the enemy's sea base of Palau, 460 miles from the Philippines, but the Nips once more withdrew. On New Guinea, New Britain and Bougainville, Allied ground forces continued to press the Japs, as U. S. airmen impeded reinforcement of their battered troops by shooting up shipping and bases.

Seeking to capitalize on their surprise of the Allies in India when they burst from the Burmese jungle from three points to converge on Imphal, the Japs maintained heavy pressure in the face of stiffening British resistance. Beyond Imphal lay the Bengal-Assam railroad, supplying Lieut. Gen. Joseph Stilwell's U. S. and Chinese troops pushing the Japs down the Mogaung valley in far northern Burma.

AGRICULTURE:
Food Subsidies

To peg consumer costs, War Food Administrator Marvin Jones ordered the $3,000,000,000 Commodity Credit corporation to use its powers and funds for subsidizing food prices.

In addition, the CCC was ordered to purchase, sell, store and transport food and farm products involved in the WFA's price-support and lend-lease programs.

Strongly bucked by the farm bloc in congressional debate but upheld by administration forces, the food subsidy program will cost the CCC between $650,000,000 and $800,000,000, it was estimated.

Farm Prices

Increases in returns on meat animals, feed grains, hay and oil bearing and fruit crops resulted in a one point advance in the general level of farm prices from mid-February to mid-March, the agriculture department reported.

Boosts in the above commodities more than offset declines in food grains, truck crops, and milk and egg prices, and brought the general income level to 196 of the 1909-'14 plane. A rise of one point brought prices paid by farmers to 176 of the 1909-'14 standard.

Prices received by farmers averaged 115 of parity, with only wheat, rye, flaxseed, cotton, hay, peanuts, cotton, lemon and oranges below the fair exchange value established by congress.

EUROPE:
In Balkans

While their lines held in northern Russia, German troops fell back to the Carpathian mountains in the south, where they were looked upon to make a stand with Hungarian and Rumanian forces recently incorporated into the Nazi armies.

As the Germans drew back in the east, Allied bombers headed over western Europe to drop their explosives over the expected invasion routes and hammer at Nazi production centers. In Italy, both sides traded punches at Anzio below Rome, while action tapered at Cassino, where Germans clung to their defensive posts.

In pushing the Germans back to the Carpathians, the Russians advanced to within 30 miles from the old Czecho-Slovak border, while farther to the southeast, they crossed the Prut river to lunge into Rumania.

Occupation Plans

From London last week came reports indicating Allied plans for postwar Europe shaped by the U. S., Russia and Britain.

With the reich's collapse, the authoritative London Sunday Observer said plans called for British occupation of western and north central Germany, U. S. control of the southern and south-central parts, and Russia of the eastern section. Symbol of Germany, Berlin would be occupied by all three powers.

Before establishment of stable government, the Big Three would also occupy Austria, and any movement for that country's union with Germany would be discouraged, with closer economic ties with the Balkans suggested.

Looking toward eastern Europe, information leaking from sources consulted on perfecting details of the Teheran agreements indicate Moscow will annex the Baltic states and eastern Poland and Balkan territory considered traditionally Russian, and exercise influence over Bulgaria, Rumania and Hungary.

HIGHLIGHTS . . . *in the week's news*

DAIRY SUBSIDIES: Charles Holman, secretary of the National Cooperative Milk Producers federation, told a senate committee that subsidies on dairy products would have to be increased by $200,000,000 a year to give farmers a fair return. This would raise the total paid to milk producers from $550,000,000 to $750,000,000. Holman is opposed to the whole dairy subsidy program.

SAVINGS: In the first two years of war, savings of the American people have increased by more than 50 per cent, represented by war bonds, bank deposits and life insurance. The total of these three items on January 1 of this year was 91 billion dollars. About 12 per cent of individual income goes into these forms of savings, according to the Institute of Life Insurance.

SURPLUS GOODS:
Consult Business

To prevent a disruption of ordinary business channels, U. S. agencies entrusted with the disposal of surplus war goods for civilian use have been instructed to confer with the War Production board's 750 industry advisory committees on distribution of material through established outlets.

Although most members of the industry advisory committees are manufacturers, some wholesalers and retailers have been included in the groups, and it will be their task to help determine normal outlets for certain goods, the amount of material to be released, and whether distributors should bid for the merchandise, negotiate for its purchase or buy it at auction.

While the new procedure was announced, Rep. Wright Patman (Texas) pressed for enactment of a bill under which retailers would be given equal voice in the disposal of surplus war goods along with the bigger manufacturers and wholesalers.

GERMANY:
Production Efficiency

Striving to stretch their human and material resources to maximum, Germany's production czars have reached into industrial and domestic activity alike.

In industry, the Nazis have spared men and metal by reducing locomotive models from 119 to 13, and they have economized on shipping space by extensive dehydration of foods. More efficient methods reportedly increased steel, copper and aluminum output while decreasing man hours.

To keep working women from performing house tasks at home, the Nazis have organized groups to mend their stockings and attend to other domestic functions. Persons from 65 to 70 have been enlisted to assist service men at railway depots.

Finds Long Way Back

Taken to St. Petersburg, Fla., by his master and then given to a resident there, an Irish setter, Duke, so longed for his old home that he traveled 1,200 miles back to it at Roann, Ind., where an old friend, Rev. Robert Collins, found him bloody-footed and exhausted.

Informed of Duke's plight, his master wired Rev. Collins funds to care for the dog until he should return.

ARMY AND NAVY:
Furloughs

Because of shipping difficulties and preparations for campaigns, the army will continue to grant furloughs on an individual basis rather than to whole units, Sen. Guy Gillette (Iowa) was advised by the war department.

With other midwestern senators, Gillette had queried the war department about the possibilities of furloughing the 34th division, which has been overseas for more than two years and is made up of men from Minnesota, South Dakota, North Dakota, Nebraska and Iowa.

While the war department admitted many empty cargo ships were returning to the U. S., it added that there was a problem of shore handling once the vessels reached here.

New Construction

Heralding an intensification of the war against the Japanese, the U. S. navy asked for 1½ billion dollars for the construction of shore facilities, principally on the West coast.

Plans call for the building of fleet and cargo piers, supply depots, aviation training bases, harbor improvements and repair depots.

Expansion of present hospital facilities from 60,000 to 80,000 beds and provision for malaria recuperation centers also were included in the plans.

WITHOUT COUNTRY

A bill has been passed by the house which would make men who fled the United States to avoid the draft "men without a country." These expatriates would be forever barred from reentering the United States. The bill was sent to the senate for action.

The house immigration committee reported that many men have gone into Mexico to avoid induction. In the vicinity of El Paso, Texas, alone, more than 800 evaders are known to have crossed the border.

FARMS FOR VETERANS

After all the talk about helping those who are making the big sacrifice on the war fronts and giving them an opportunity to reestablish themselves when they come home, newly appointed war liquidator Will Clayton is fighting hard against the veterans.

The issue came up when broad-gauged War Food Administrator Marvin Jones backed a proposal to take all the army and navy camps purchased during the war and turn them into farm developments for veterans after the armistice. Both Marvin Jones and Franklin W. Hancock, farm security administrator and former congressman from North Carolina, are urging the idea. They argue that, with military housing already in these areas, they will be ideally suited for getting war-torn veterans back to the land and a normal farm life of benefit both to themselves and the nation.

But Will Clayton, until recently right-hand man to Jesse Jones and the biggest cotton broker in the world, argues that the land should be sold, with the former owners getting first crack at it. While Marvin Jones and Hancock don't oppose the theory of letting former owners buy the land back, they point out that, in actual practice, the former owners will not have the money, so that the land would go to the big land syndicates and insurance companies, thus increasing the concentration of farms into big estates.

* * *

SKILLED WORKERS

Inside fact about the hot debate on deferring industrial workers is that the President first signed an order for their nondeferment without even consulting his War Manpower Commissioner Paul McNutt, or his Director of Selective Service General Hershey, or the head of his War Mobilization board, Justice Jimmie Byrnes.

What happened was that the war department sold him on the idea, and he okayed it without consulting McNutt, Byrnes, Hershey or even Donald Nelson, responsible for industrial output. When they heard about it, they rushed to the White House and persuaded the President to reverse his order.

Then ensued a tug-of-war between the army on one side and Donald Nelson, rubber czar Bradley Dewey et al, on the other. From this came the compromise to permit deferment of essential workers over 25, and permit deferment of only 40,000 skilled war workers in the 18 to 26 age bracket.

STORY FROM TARAWA

Latest story from Tarawa is about Lieut. Gen. Howland ("Howling Mad") Smith.

Just before the marines landed, a shell struck a building near the water's edge, and a white cloud arose from the ruins. Actually, it was a cloud of Jap undershirts. When the marines landed, they discovered that the building had been a Jap quartermaster supply depot, and Jap underwear was blown all over the place.

After the bloody taking of the beachhead, many Leathernecks discarded their grimy uniforms and put on clean Jap underwear, as well as sections of Jap uniforms found around the destroyed building.

While this quick-changing was under way, General Howland Smith ordered the American flag raised on a pole nailed to the top of a palm tree.

"Get a bugler out here to blow colors," commanded Smith.

Next moment, he was amazed to behold a young marine bugler standing at attention in the clearing and dressed from head to foot in a Jap uniform. The general emitted a roar that shook the island.

In the confusion that followed, the bugler literally dove into the ranks of his buddies. He emerged in jigtime, reattired in a marine uniform.

ALASKAN REPORT

Young Representative Warren Magnuson of Washington, recently returned from an inspection tour of our Aleutian and Alaskan bases for the house naval affairs committee, is making a report to the committee which will recommend:

That the present system of rotating men in isolated areas, such as Alaska and the Aleutians, be changed from 18 months to one year, provided that transportation facilities are available to bring them back to the United States for a rest.

Magnuson will reiterate the importance of the North Pacific frontier as a "prong" in the war against Japan, will stress the importance of keeping our forces in the Aleutian area fresh and ready for the big move against Tokyo.

* * *

CAPITOL CHAFF

¶ Having taken the initial diplomatic punch at Ireland, the President is reported holding back regarding further threatened moves. Home front pressure from powerful Irish-American forces apparently was too strong for him.

¶ There has been terrific undercover griping at Russia inside the administration since Stalin's recognition of the Badoglio government; several orders, previously giving Russia certain information she wanted, have been cancelled.

Walter Winchell

(WNU Service)

The first time Sinatra came to H'wood he brought three suits. This time he arrived with 18 . . . What! Only three changes a day? . . . Spencer Tracy has beaten the gas shortage with a surrey . . . Sign in a jewelry shop window in Hollywood (over the wedding ring tray): "Is the feeling nuptial?" . . . Since there were no signs of their publishers (Scribner's) throwing a cocktail poddy in honor of their debut as novelists, Kyle Crichton and Robert Glassner chucked one for their publishers on March 6. The title of the new book is "The Proud People" . . . Garbo, who will never die as a favorite over at our house, was warned by a Hollywood paragrapher to watch her step . . . "My dear man," she said, "orchids never end up in gutters."

Brawls between the White House and Congress aren't anything new . . . Almost every President has gone through the Congressional wringer . . . When, frinstance, Coolidge's inner circle told him that the legislators were after his scalp, Coolidge gazed through the White House windows and calmly answered: "Well, I see the Washington monument is still there."

Novelette: Irving Berlin arrived the other day from England with messages for kin and loved ones of members of "This Is the Army." Berlin phoned parents, wives, sweethearts and pals, and took down messages to relay to the boys in his show now abroad. He made several hundred calls.

The most touching: Two soldiers gave him the same name of "the only girl in the world."

Broadway Rembrandt: The wiseguys are still talking about it breathlessly. A drunk wobbled into one of the saloons, clutching fistfuls of $20 bills. He went to the bar and yelled: "Fill 'em up. Everybody drink!"

For a gag one of the wisenheimers asked him if he had two 20s for a ten.

"Sure, sure!" he yelled back. "Anybody else want two 20s for a 10? I can keep this up all night. But I warn you, I'll break you!"

That kept up for half an hour, and finally, out of 20s, he staggered into the night. He kept his word, too.

His 20s were counterfeit.

Ringside Seat: Robert Sherrod, whose new book, "Tarawa," is a click already, says the Pacific war was nearly two years old and he had seen much of it elsewhere when we invaded Tarawa. On the transport a youthful lieutenant asked Sherrod why he hadn't written a book. He said he was waiting for a real story.

On the first day on the Tarawa beach, where our troops held only a 20-foot beachhead, charges of dynamite were flung into a Jap pillbox. The officer turned to Sherrod, grinned and asked: "Will this one do?"

Norma Shearer is expected to resume her screen career in the role of Katy (the mother) in "Tree Grows in Brooklyn" . . . Franz Werfel, author of "Song of Bernadette" (after two heart attacks), is able to leave his bed for two hours daily . . . Maureen O'Hara and her groom expect another image in June . . . G-Man Hoover has commended the alertness of Mexican officials, who last week captured four escaped German war prisoners and deported them back across the border . . . Of about 300,000 investigations by the FBI (for draft violations, etc.) more than 140,000 men are now available for military service. G-Men also got 7,700 convictions for violators.

Quotation Marksmanship: Walter Lippmann: The writers who have nothing to say are the ones you can buy; the others have too high a price . . . James J. Walker: A reformer is a guy who rides through a sewer in a glass bottom boat . . . Ben Hecht: He ate like a man with a stowaway under his vest . . . Mark Twain: It ain't so much the things people don't know that makes trouble in this world, as it is the things that people know ain't so . . . B. Kay: He beat a hasty retreat like a Congressman screaming: "I was misquoted" . . . Hildegarde Schine: Little forget-me-nots looked up and laughed . . . Mary Roberts Rinehart: Gnawing on her grievance like a dog on a bone . . . F. Gasner: A deep kiss, up to the heart . . . M. Bonnston: No words could translate the thoughts in her eyes.

Dancers' Mirror: Maestro Melba of the Cotillion Room sums up the types of dancers who pass his gaze. To wit: The girl who doesn't shag, but will stand practically still while her partner does; the unmanageable trio on the floor—he, she and her hat; the chap who looks like a left halfback and waltzes through the crowd in much the same way he does on the gridiron; the dippers who get into positions seen elsewhere only on auto radiator caps; the couple that ogles the orchestra, waiting for heaven knows what.

Penicillin, Latest Triumph of Medical Research, Marks Another Long Step Toward Distant Goal

'Magic' Germ Killer Was Discovered by Fortunate Accident

By AL JEDLICKA
Released by Western Newspaper Union.

It is back in 1929.

Prof. Alexander Fleming of London discovers that a mold growing in a container which he is using in research has killed certain germs. Although Professor Fleming does not enter into a thorough investigation of the phenomenon, he takes the time to make a note of it, suggesting that maybe the mold could destroy germs in human infections.

Other English scientists go to work on the mold and in 1940 find it effective in human treatment. Penicillin, the magic drug, has been discovered, and like so many great other discoveries, by chance.

Penicillin is not the greatest nor the final discovery in medicine, but it is the latest and among the most effective, momentarily climaxing medicine's long, steady march forward on the path of alleviating man's pain.

Sought by king and commoner alike, penicillin has proven its usefulness in the treatment of streptococcus pyogenes, a germ that causes pus and promotes diseases like septic sore throat, childbed fever and erysipelas; of staphylococcus aureus, another pus-forming germ found in boils and in infections of the bone; of the pneumonia and diphtheria germs; of the organisms that cause gonorrhea, gas gangrene, meningitis and syphilis.

In Chicago's modern Museum of Science and Industry at the foot of Lake Michigan in Jackson Park, Dr. Milan Novak, head of the department of bacteriology and public health of University of Illinois college of medicine, has established a public exhibit demonstrating the processes in the present production of penicillin.

The penicillin exhibit is just one of many in the museum's medical section, which is under direction of Dr. E. J. Carey, dean of the Marquette university medical school, Milwaukee, Wis. In this section, we are given a graphic picture of man's gradual development of curative remedies from the early uses of vegetable and mineral substances.

Seven Benefactors.

One exhibit pictures seven great men and their works which have given mankind boundless relief from its physical illnesses:

Karl Wilhelm Scheele (1742-'86), who discovered chlorine, the constituent of common compounds like salt; tartaric acids, which make fruits taste sour; manganese, the metallic element necessary for plant development, and oxygen, the most universal of all elements.

Pelletier and Caventou, who in 1820 extracted quinine, the active medicinal constituent of cinchona, the wrinkled brown bark found by the Spaniards in Peru in 1630, and most effective in treating malaria.

Louis Jacques Thenard (1777-1857) who found boric acid and hydrogen peroxide.

Frederick Belding Powder (1853-1927), who worked on development of oil of peppermint and wintergreen, and also oil of chaulmoogra, a source of certain chemical compounds for use in treating leprosy.

Bernard Courtois (1777-1838), who isolated iodine in 1811, when he observed that washings from seaweed ashes gave off purple vapors when treated with sulphuric acid, and then turned into crystals which contained the element, now so useful in medicine.

Antoine Bilard (1802-'76), who discovered bromine in 1828.

Moderns as well as oldsters find the museum's replica of the 19th century American apothecary shop an interesting contrast to the present, streamlined drug store.

To say the least, the old apothecary shop ranked as a colorful spectacle as well as a popular medicinal center, what with its big, square jars of black zingiber, white zinc sulphide, reddish tincture of serpent and gold spirits odoratus. Drawers contained emery, talcum, manna, creta and iris.

Of interest is the 19th century doctor's bulky, varnished medicine case which he carried in his saddlebag as he made his rounds through the country. In the case, one can find quinine, turkey rhubarb, essence of peppermint, fire of magnesia, essence of ginger and tincture of orange peel.

On the counter of the apothecary shop stands a box of herbal smoking mixture for cure of catarrh, bronchitis, asthma, hay fever, lung disease, coughs, hoarseness, ulcerated throat and all pulmonary complaints, the customer merely being asked to smoke and inhale it.

Hard by the replica of the old apothecary shop, we find a drug exhibit depicting 19th century medicinal advances, from the discovery of alkaloids in 1816 to the development of hormones for treatment of glandular deficiencies in 1901, with the introduction of coal-tar synthetic drugs in 1884 and thyroxin in 1893 grouped between.

The 'Magic' Drug.

The climatic and currently most interesting exhibit, of course, is the one dealing with the growth of penicillin, from a mold to a refined liquid containing the drug which already has become an awesome, magical byword.

Step by step, the exhibit demonstrates the processes of producing penicillin:

First, there's the stock culture, with a mold similar to but not identical with green molds found on fruits or cheese, shown growing on jell-like base containing sugar.

Second, the spores (seeds) from the stock culture are transferred to a nutrient solution containing sugar, and they germinate into white woolly plants. In three days, the mold covers the surface of the liquid. This mold creates penicillin, which collects in the nutrient but not in the mold plants.

Third, as the mold plants mature, their color changes from white to gray-green because of the development of numerous spores (seeds). At this stage, the solution contains a maximum amount of penicillin and the culture is ready for collection. If allowed to become too old, the penicillin in the liquid loses some of its strength.

Fourth, the first step in collecting the penicillin is to remove the mold growth from the liquid by filtration, since the plant itself contains none of the drug. The liquid thus filtered possesses small amounts of penicillin. An elaborate process of extraction and absorption is used to concentrate and remove the penicillin from the liquid.

Fifth, the purification process removes objectionable substances. If left in its yellow-brown solution form, penicillin loses some of its strength, but is relatively stable as a powder, into which it is converted by commercial production.

When penicillin is to be injected into a patient, it is dissolved. A hypodermic syringe is used for intramuscular injection, and if intravenous injection is desired, a blood transfusion apparatus is used.

Penicillin must be tested regularly for strength. In the cup method, melted agar is uniformly inoculated with test bacteria, which cannot grow in the presence of penicillin, and is placed in a round dish to solidify. Small glass cylinders are put in the solidified agar and filled with a penicillin solution, which then seeps outward into the infected mold. The test bacteria grow and cloud the agar, except where their growth is stopped by the penicillin. The size of the clear zone is proportional to the strength of the penicillin.

If penicillin is hard to get, it's because its production is limited by its growth. From a large batch of the nutrient solution only a relatively small amount of penicillin is obtainable. As yet no synthetic method to produce the drug on a mass-scale has been developed, and until some such process is installed, the civilians' share will be strictly determined by the military and naval services' needs.

Prof. Alexander Fleming, discoverer of penicillin, is shown with a bottle holding cultures of penicillium notatum, as he converses with two visiting Turkish doctors in his London laboratory, where he made the remarkable experiments.

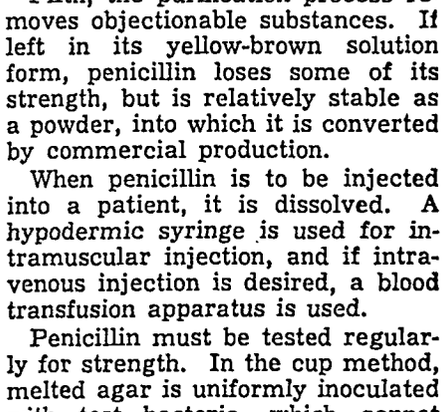
The first time the rare drug was ever released for civilian use was in the case of Patricia Malone, two-year-old New York city girl, who was suffering from the staphylococci type of septicemia. The army gave enough penicillin to halt the disease, when appealed to by a New York newspaper.

Until Synthetic Method Is Devised, Production Of Penicillin Will Remain Slow and Costly

Brought doubly into the limelight by frequent dramatic uses of the drug, penicillin has been made available in cases where the patient would respond to it, Dr. Austin E. Smith, secretary of the council on pharmacy and chemistry of the American Medical association, said.

Because of its comparative scarcity, Dr. Smith stated, unlimited use of penicillin has not been permitted, and in cases where other drugs, like the sulfonamides for instance, are effective, authorities have insisted on employing them instead.

Until synthetic production of penicillin is developed, its manufacture will continue a costly and cumbersome process. At the start of the year, about eight firms were producing quantities of penicillin, and the total was expected to be expanded to 20.



This tiny sealed vial contains 10,000 Florey units of penicillin.

For you to make

A DELIGHT to any dainty lass is this beruffled pinafore embroidered with swimming ducks or darling cubs. You may use these exciting motifs on other garments, too. All simple stitchery.

Pattern 731 contains transfer pattern of 12 motifs ranging from ¾ by 1¼ inches to 6 by 9½ inches; complete directions. Sixteen cents in coins brings you this pattern.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

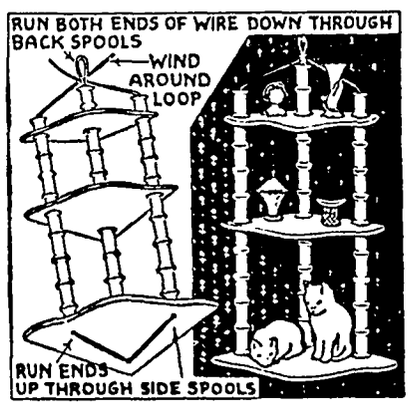
Shelves of Spools For Your Trinkets

THESE graceful corner shelves are ten inches wide and seven inches deep at the bottom. Just the right size to hold the quaint natch holder, the old-fashioned china doll head and other interesting trinkets that you have been treasuring.



The spools and shelves now may be practically welded together with new easy-to-use types of glue. The wire or cord is then run through, as shown here, so that the shelves may be hung in a corner ready to hold articles of considerable weight.

* * *

NOTE—Mrs. Spears has designed an actual-size pattern for these three gracefully curved corner shelves which are graduated in size. This pattern also contains complete directions for cutting and joining these shelves as well as a pattern for another larger set of spool shelves. Ask for pattern No. 255 and enclose 15 cents. FOR CHAFES AND SCRAPES MOROLINE PETROLEUM JELLY 5¢-3 TIMES AS MUCH FOR 10¢

ENDS 5-YEAR SIEGE OF CONSTIPATION!

"Now as Regular as Anyone!" Says H. C. Durand

Here's a sincere, unsolicited letter every disappointed "doser" will want to read:

"I'm 82 years old, and have been constipated over 5 years, going as much as 5 days without a movement. Pills and laxatives would relieve me only for the day I took them. Next day I'd be as bad as ever. Then I tried KELLOGG'S ALL-BRAN. Am now on my second box, and as regular as anyone could want, thanks to regular use of your wonderful product!" Mr. H. C. Durand, 221 N. Columbus Ave., Freeport, Long Island, N. Y.

Sounds like "magic," doesn't it? Yet, KELLOGG'S ALL-BRAN really *can*, and *does*, get at a common cause of constipation—lack of certain dietary "cellulosic" elements! That's because it is one of Nature's *most effective* sources of these elements—which help the friendly colonic flora fluff up and prepare the colonic wastes for easy, natural elimination. KELLOGG'S ALL-BRAN is *not* a purgative! *Doesn't* work by "sweeping out"! It is simply a gentle-acting, "regulating" food!

If your constipation is of this type, eat KELLOGG'S ALL-BRAN or several ALL-BRAN muffins daily. Drink plenty of water. See if you don't find welcome relief! Insist on *genuine* ALL-BRAN, made *only* by Kellogg's in Battle Creek.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Mr. and Mrs. Will Beier of Goodell spent Sunday evening visiting at the Emil Beier home here.

Kenneth Johnson of Goodell was in Klemme on business Monday afternoon.

Herman Baack and family were dinner guests Sunday at the home of Mr. and Mrs. Aug. Baack.

Verner Lewis and family were visitors at the John Johnson home Sunday afternoon.

Mrs. Mary Dominy, Josephine and Howard of near Goodell, spent Sunday at the E. J. Schneider home east of town.

Mr. and Mrs. Henry Jost and Phyllis Kirkwood drove to Mason City Sunday for a visit with Mrs. Amanda Kirkwood who is ill.

After an absence of about ten days due to illness, C. G. Waterman returned to his duties as cashier at the bank, Monday.

Mr. and Mrs. Harold Ridder, of Nora Springs, spent Sunday visiting at the parental Ed. Schaefer home.

Miss Harriett Gibbs of Mason City, spent the week end in Klemme visiting with her parents, Mr. and Mrs. Harry Gibbs.

Mrs. Julius Priebe and Mrs. Henry Medaus were visitors at the Fred Schmidt home Monday afternoon.

Mrs. Lynford Back returned to her home here Sunday, after spending a week as a patient at the Mercy hospital in Mason City where she received treatment.

Mrs. Don Speer and Miss Maxine Bachman spent the week end in Des Moines visiting with Cadet Nurse Luella Lewis, sister of Mrs. Speer.

Mrs. Don Speer left the first of the week for Havelock for a visit of a few days with friends. She expects to leave April 25th for her home in California.

Monday evening Mr. and Mrs. E. J. Schneider and son, Sgt. Robert Schneider, and P. M. Wilson were entertained to a 6:30 o'clock dinner at the R. A. Jorgenson home.

Tuesday of this week was Mrs. Henry Medaus' birthday anniversary and she received many greeting cards from her neighbors and friends, for which she was very grateful.

Sumner Trumbull became ill the latter part of the week and was unable to drive his mail route. George Lawhorn, substitute carrier, delivered the rural mail for several days.

John Griewe returned to Klemme the latter part of the week for a couple of weeks visit at the Art Wellemeyer home. John spent a part of the winter in Tennessee and part of it in Minnesota.

Floyd Franklin's mother is ill at her home southeast of Klemme. She recently returned from the hospital at Iowa City where she received treatment for a couple of months.

Mr. and Mrs. Clifford Montgomery and children returned home Saturday from Montley, Minnesota where they visited for nearly a week with Mr. Montgomery's parents.

Sgt. Bob Schneider came Saturday from Fresno, California to enjoy a fifteen day furlough which he is spending visiting with his parents, Mr. and Mrs. E. J. Schneider on the farm east of town.

Ellen Kilgore, former Klemme girl, who has been employed for a couple years by the Union Pacific railway, has recently been transferred from Yermo, California back to Las Vegas, Nevada.

Miss Evelyn Peterson of Goodell and Mrs. L. B. Titus of Las Vegas, Nevada, were Friday evening dinner guests of Miss Evelyn Arnold at the E. J. Arnold home. Mrs. Titus is the former Miss Arlene Blickenderfer.

Rev. H. E. Harvey attended a meeting of the Conference Board of Minsterial Training Monday at Emmetsburg.

Mrs. A. G. Lau left Saturday for Waterloo for a few days visit in the home of her son-in-law and daughter, Mr. and Mrs. J. B. McHugh and children, Kathryn and Jimmie.

Mrs. Francis Dahlstrom, daughter of Mr. and Mrs. Nels Back, returned home Wednesday from Colorado Springs, Colorado, where she enjoyed a four day visit with her husband, Cpl. Francis Dahlstrom.

Wm. Stille returned home Friday from Los Angeles, California where he spent the greater part of the winter at the home of his son, Don. Mr. Stille has spent several winters in California and says he enjoys it very much.

Mrs. Daisy Lemke entertained to dinner Sunday the following: Pvt. and Mrs. Rudolph Hoefte and daughter Maryls of Amarilal, Tex.; Albert Etchen and family; Verner McLaughlin and family of Belmond and Donald Lemke.

Mrs. Henry Medaus and Mr. and Mrs. Luther Schmidt were dinner guests Sunday at the home of Mr. and Mrs. Albert Schmidt. Afternoon visitors were Mr. and Mrs. George Thieman and Mr. W. C. Schmidt.

Work on the new building for F J. Arnold is progressing. Excavation has been completed and the water and sewer connections made. Work on actual construction of the building will be pushed right along.

The Klemme Cooperative Grain Company's large truck has been all re-painted which makes it look like brand new. Henry Smid, the man who does the trucking at the elevator, was the artist who transformed the looks of the truck.

Mr. and Mrs. J. A. Chambers, J. I. Overholt and Mrs. R. A. Jorgenson attended the Republican luncheon held at Garner Saturday Herman Knudsen, republican candate for state senator from this district, was the principle speaker.

Martin Barz left Sunday for induction into the U. S. Navy at Camp Dodge. Some of the men were detained for a few days, so Martin came home Monday night and reported back today, Wednesday. He expected to be sent out to Camp Farragut, Idaho, for "boot camp" training.

Mr and Mrs. Paul Grange of Mason City left last week Wednesday for Greenville, Texas, for a few days visit with their son, Lt. Dorance Grange who is an army air corps pilot instructor. Mr. and Mrs. Grange drove through in a car which Lt. Grange had purchased and had his parents deliver to him

Mr. and Mrs. Melvin Neuberger and children drove to Osage Sunday to attend a family gathering at the Bentley Halverson home held in honor of Miss Jeanette Halverson, WAVE, who was home from the west coast on a furlough. Miss Halverson is a sister of Mrs. Melvin Neuberger and taught in the Kanawha schools last year. She has been in the WAVES about one year now.

Mrs. Emma Clements; Mrs. Lester Ramsay and Bobbie, and Mrs. Ernest Roben and daughter, Dawn, of Estherville, came Tuesday for a visit with Mrs. John Clements and baby son, James Lloyd at the W. F. Pavey home. Mrs. Emma Clements is the mother of Sgt. John Clements, over-seas, and the other two ladies are his sisters. This was the first time Grandma Clements had seen her new grandson.

MRS. F. A. ARNOLD HOSTESS TO STUDY GROUP

Mrs. F. A. Arnold was hostess to the Study Group of the Methodist Church at her home last Thursday afternoon.

The Devotional topic was "Seeking New Ways of Healing." The Story of the Navajo Indians given by Mrs. Dwight Hummell. Chapter 4, "The America of Today" of the study was presented by Mrs. E. J. Arnold.

A most enjoyable afternoon was spent by the twenty-six members present. Lunch was served after the meeting.

Mrs. E. G. Schaeffer, a former member of the Womens Army Auxiliary Corps was on the program and gave an interesting description of life in the WAACS. She wore her WAAC uniform for the occasion, and also wore her uniform to school and talked to her grade pupils about the WAACS.

THE METHODIST CHURCH

JUDGE CLOCK, HAMPTON WILL ADDRESS K. H. S. GRADS

Annual Commencement Exercises Monday Evening, May 15th

Supt. Leo Esbeck has announced that the annual graduation exercises of the senior class will be held on Monday evening, May 15th beginning at 8:00 o'clock at the high school auditorium.

Judge Sherwood Clock, of Hampton will address the graduates.

School Picnic Tuesday, May 16

This year the annual school picnic will be held on Tuesday, instead of Friday as in the past and will be held on May 16th.

The Baccalaureate sermon will be held at the Methodist Church on Sunday evening, May 14th and Rev. H. E. Harvey will give the sermon.

Following are the members of this year's graduating class:

Eunice Larsen, Julia Bell, Mavis Nuehring, Mildred Busse, Corrine Merkel, Wava Schoenwetter.

Doris Spitler, Dick Legge, Merle Etchen, Carroll Etchen, Allen Lau, Melvin Pearson, Elwyn Ridder, Nadine Kimball, Larry Van Syoc.

Verne Greiman, La Vohn Schlawin, Clara Koehler, and Raymond Schoenwetter.

TWO COUPLES ASK DIVORCE IN HANCOCK COURT

Two divorce suits were filed in the office of the County Clerk, Elmer Raw.

Grace Hanson seeks separation from Ora Hanson and asks custody of their 2 minor children, $60 per month alimony and $200 attorney's fees. She charges cruel and inhuman treatment. They were married Nov. 17, 1928 at Clarion, and lived together until 1941. Plaintiff also seeks permission to marry within a year.

Marie J. Halverson, Garner, also petitions the court for a divorce from Vernon C. Halverson and asks custody of their 2 minor children, Robert 18, and Ronald 13. In her petition plaintiff states the defendant was convicted of a felony She also asks permission to remarry at any time. The couple were married at Mason City July 29, 1925.

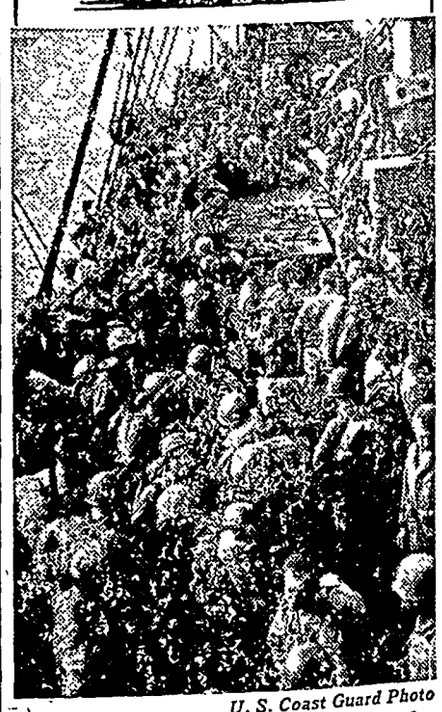
CASE AGAINST GARNER WITHDRAWN BY BECKER

J. J. Becker of Ft. Dodge withdrew his suit against the town of Garner in district court Wednesday. Becker filed his suit as a result of an accident which he had when his truck skidded on an icy street here early in January and crashed into a tree.

Surveys For Post War Work

A surveying crew from Engineer C. F. Merten's office has been at work making surveys on the road between Goodell and Kanawha and purchasing right of way in preparation for the post-war road work.

WAR BONDS in Action



U. S. Coast Guard Photo

Here are some of the boys who took Tarawa and the Marshalls. You equipped them with your War Bond purchases. Some of them may never come back, but we can do our best to bring them back . . . **Buy War Bonds and Hold 'em!**

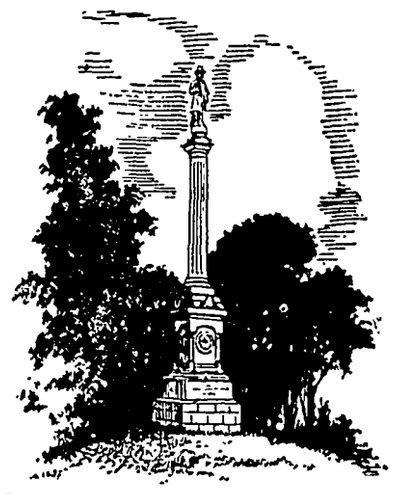
BONDS OVER AMERICA ★ ★ ★

Unknown Soldier

When Spring trips north and scents the budding apple trees of Virginia's Shenandoah Valley the folk of Winchester bring flowers to Stonewall cemetery where stands the figure dedicated to the "unknown and unrecorded dead," of the Civil War.



Buy 'Em and Keep 'Em

Our "unknown" dead are being buried today on many battlefields but the "unknown" who will never be honored is the worker whose name is "unknown" to the rolls of War Bond buyers.

Hancock County Now Out Of Debt, Says McMillin

FINAL BOND AND INTEREST TO BE PAID OFF MAY FIRST

Hancock County Had Outstanding Bonds Of Million Dollars Now All Paid Up

Roy L. McMillin, county treasurer says that May 1st will mark the payment of the balance due on Primary Road Bonds for Hancock county. $30,000 00 with interest will be paid on that date.

Hancock county has 60 miles of paving, which has been laid at different times During this time we have had outstanding bonds amounting to one million dollars When the first bonds were issued they showed 5% interest and were not callable over the first 10 year period When the Board of Supervisors found that interest rates were lower and they could call the balance of the bonds, this was then done. They have been re-financed three times and the last issue was for 1 3-4 % interest.

These bonds have been retired from gasoline tax and auto and truck license fees. While there was a provision in the law whereby if they were not taken up in this way, then they were to become a lien upon the land. This was never necessary.

When the paving was first laid there was an assessment made upon all land adjoining the paving a mile and a half back, amounting to 25% of the cost. Later this assessment was repaid.

Primary Road No. 18 was constructed in 1921 and 1922 and is still in good shape.

Primary No. 69 north and south was constructed in 1932 and 1933. No. 11 from Kanawha to Britt was built a short time ago.

HANCOCK COUNTY TAX COLLECTION SHOWS GAIN

McMillin Says About 61% Of The Assessed Amount Now Paid

County Treasurer Roy L. McMillin reports a total of $409,276, or about 61% of the toal taxes assessed for 1944, were collected during the first quarter of the year. General taxes collected totaled $400,075 and drainage taxes $9,201. Car registrations were also above last year for the same period.

Total taxes to be collected during 1944 are $658,362, an increase of $69,724 over last year. The increase was reflected in increased costs in the towns and schools of the county.

Of the taxes collected, the various funds received credit as follows: Schools of the county $222,882, about 56% of total collections; towns and villages, $30,548; road construction and maintenance, $56,341; county fund, $37,329; and poor $24,881.

All Hancock county funds are carrying favorable balances at the present time.

CANNING SUGAR

Mrs. Ruth Hughes at the War Price and Rationing Office states that application blanks for Canning Sugar will be in all grocery stores about May 1st. A person who expects to can should obtain one of these blanks, fill out completely, attach spare stamp No. 37 from Ration Book Four, then mail it to the Ration Board at Garner. A Canning Sugar Certificate will then be issued to that person and sent out by mail from the local Board.

OLD KLEMME FRIENDS GET TOGETHER

In a round about way the Times learned that Mrs. Walt Bloom, a former Klemme resident, recently had a birthday party at Los Angeles, Cal. The party was sponsored by Miss Madeline Richter, another former Klemme resident. We also heard that special decorations were used for the occasion and that the food was very good.

The Times also learns that this has become an annual affair, Miss Richter putting on a birthday party for Mrs. Bloom.

The "old timers" around Klemme know both the W. R. Bloom and the Dr. Richter families.

BIRTHDAY PARTY HELD FOR MRS. EMIL BLUMER

A birthday surprise party was held at the home of Mr. and Mrs. Merlin Neuberger Friday evening in honor of Mrs. Emil Blumer.

Those present were Mr. and Mrs. Emil Blumer, Daryl Brager, Mr. and Mrs. Emil Beier, Mr. and Mrs. Arnett Waddingham and Timothy, and Mr. and Mrs. Roy Baack and Bennie.

A fine time was enjoyed and a nice lunch was served.

CORN PLANTING RATE VARIES ACCORDING TO SECTION

Five years of experimental work indicate that rates of planting corn should vary according to the section of Iowa, reports Joe L. Robinson, of the Iowa Agricultural Experiment Station.

In northern Iowa, corn checked at the rate of 4 kernels per hill has given greatest yields. In central counties, 3 to 4 kernels have given the best performance, and in southern Iowa 3 kernels seem to be the best planting rate. Throughout the state, says Robinson, there is a trend toward closer spacing of rows.

TIMES OFFICE CLOSED FRIDAY THIS WEEK

The Times office will be closed all day Friday of this week as the publishers are attending the Iowa State Press Association Convention at Des Moines that day.

SENIOR CLASS WILL PRESENT CLASS PLAY ON MAY 11

The Senior Class of Klemme High School will present as their annual play an adaptation from the famous novel "Little Women" by Louisa M. Alcoott. This story has been adapted for the stage by Pauline Phelps and will make a charming vehicle for this group of seniors. The play will be held on Thursday, May 11, at 8:00 p.m. in the Klemme High School auditorium.

Although there are four male characters in the play, it is primarily a girls' play. All the lovcable characters of the book will be present. The four little women are Meg, the oldest who is very sweet and charming; Jo, the tomboy; Beth, the little dove and peacemeker; and Amy, the youngest and spoiled beauty of the family. Then of course there are Mr. and Mrs. March, the girls' parents; Hannah, the maid who has been in the family for years; Aunt March, a crochety old lady; Laurie Lawrence, their next door neighbor; Mr. Brooks, Laurie's tutor; and Professor Bhaer, the German professor. Not one of the principal characters of this famous book has been omitted.

The cast has been selected and with only one change is rehearsing regularly. (Raymond Schoenwetter has been taken ill with the mumps and has been replaced by Carroll Etchen.) The following have been chosen to play the parts in this play: Jo - Julia Bell; Meg - Corrine Merkel; Amy - LaVohn Schlawin; Beth - Clara Koehler; Mrs March - Eunice Larsen; Mr. March - Dick Legee; Hannah - Mavis Nuehring; Aunt March - Mildred Busse; Laurie Lawence - Allen Lau; Mr. Brooke - Carroll Etchen; and Professor Bhaer - Larry Van Syoc. The play is directed by Mrs. Howard Campbell

The time is that of the Civil War and will make an interesting production from the standpoint of costuming, furniture and properties as well as a difficult one. The speech class aided by some members of the Junior class will compose the backstage committee.

Members of the cast as well as many other high school students have been bringing clothes and locating furniture. However, we still have many such things to locate. If anyone would be willing to help us out with old fashioned clothes, furniture or general effects of that time, the Senior class would appreciate their assistance

DOGS SHOW INCREASE

Applications for dog licenses in Hancock county this year are the heaviest ever recorded in the county. Over 1,900 application have already been received as compared with 1,826 a year ago. Several assessors still have reports to get in before a final check can be made.

WAR BONDS in Action

Now On Italian Front

Staff Sergeant Milton "Pete" Paul, son of Mr. and Mrs. Herman Paul of Klemme,, entered the service in May, 1941 and took his training in engineering at Ft. Leonard Wood, Mo., and also at Camp Lewis, and Camp Brown, Mass., where he received special training in amphibian operations. He left for over-seas duty in August, 1942, landing in England and from there into Africa, and is now in Italy, where he recently met up with Capt. Glen Bowles, his old Klemme pal. S-Sgt. Paul is a graduate of Klemme High School and was a carpenter before entering the army. He worked on government projects.

FORMER HANCOCK WOMAN BURIED HERE TUESDAY

Mrs. Grant Henderson, 75, a Hancock county resident for more than half a century, died Sunday afternoon at the home of her daughter, Miss Lola Henderson, 210 6th Place S. E., Mason City, following a 3 months' illness.

Funeral services were held Tuesday afternoon at 1:30 o'clock at the McAuley & Son funeral home in Mason City with Dr. Marvin B. Kober, pastor of the First Methodist Church officiating. Burial was at the Klemme cemetery with the graveside services at 3:00 p. m. in charge of the Rev. H. E. Harvey, pastor of the Methodist Church, in charge.

Mrs. Henderson was born Carrie Belle Scott in Grant county, Wisconsin, Dec. 18, 1868. Immediately after her marriage in 1891, she came to Hancock county with her husband and lived here until his death 3 months ago.

She is survived by 3 children including Miss Henderson, Mrs. R. E. Johnson, 201 Taylor, S. W., Mason City; Pfc. Fred Henderson in England, and a grandson, Pvt. Wayne E. Johnson, also in England.

INFANT SON OF MR. AND MRS. WALTER HENSCHEN DIED

Funeral services for Franklin Donald, 4 months old son of Mr. and Mrs. Walter Henschen, who reside on their farm northeast of town, were held today, Wednesday, at the Klemme Evangelical and Reformed Church in charge of the Wellemeyer Funeral Service, with Rev. Calvin Grosshuesch officiating.

The child became sick about a week ago with influenza and other complications and seemed to be improving, when it took a sudden turn for the worse and passed away early Monday morning.

He leaves besides his parents 2 brothers, Norman Eugene, age 8, and Walter Calvin, age 5.

Interment was made in the Klemme Cemetery beside his sister Darlean, who died in 1939.

LEGION AND AUXILIARY WILL MEET TUESDAY EVENING

The Klemme American Legion and the Auxiliary will meet next Tuesday evening, May 2nd at the hall for their regular meeting.

Mr. and Mrs. Ernest Helps and Mr. and Mrs. Tom Roths are on the serving committee.

All members are asked to be present.

Fun for the Whole Family

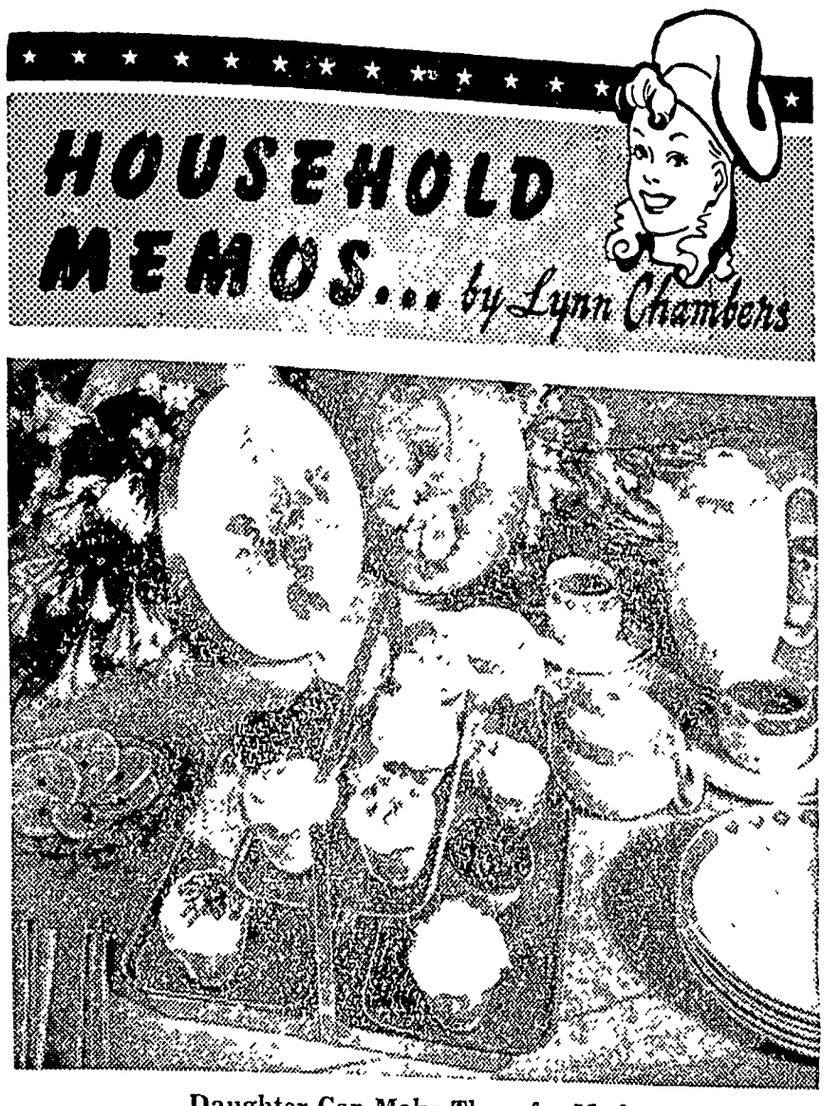
Female Weakness
Lydia E. Pinkham's Vegetable Compound is made especially for women to help relieve periodic pain with its weak, tired, nervous, blue feelings due to functional monthly disturbances.
Taken regularly—Pinkham's Compound helps build up resistance against such symptoms. Here is a product that helps nature and that's the kind to buy! Famous for almost a century. Thousands upon thousands of women have reported benefits. Follow label directions. Worth trying!
LYDIA E. PINKHAM'S VEGETABLE COMPOUND

When Your Back Hurts -
And Your Strength and Energy Is Below Par
It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood.
You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling. Sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder.
There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.
DOAN'S PILLS



Daughter Can Make These for Mother
(See Recipes Below)

Food Is Fun!

It's a good idea to let small fry take hold of the kitchen duties once in a while and give mother a rest. The children will enjoy doing new things and mother can feel she is contributing to their all-round development.

Naturally it isn't a good idea just to open wide the doors in the kitchen and leave the children up to their own designs. What I'm suggesting is that they be allowed to make up something they've watched mother do so often they know how.

There's a lot of satisfaction in making cupcakes, especially if they are iced with tinted icings and sprinkled with finely chopped nuts.

***Delicate Cup Cakes.**
(Makes 18)

2 cups sifted cake flour
2 teaspoons double acting baking powder
¼ teaspoon salt
½ cup butter or substitute
1 cup sugar
2 eggs, unbeaten
⅔ cup milk
1 teaspoon vanilla

Sift flour once, measure, add baking powder and salt and sift together three times. Cream butter thoroughly, add sugar gradually. Cream together until light and fluffy. Add eggs one at a time, beating thoroughly after each addition. Add flour alternately with milk, a small amount at a time, beating after each addition until smooth. Add vanilla.

Bake in greased cupcake tins in a moderate oven (375 degrees) 20 minutes or until done. Spread with confectioners' sugar icing or your favorite chocolate frosting. Decorate with chopped nuts, colored candies or tinted coconut.

A cookie that will keep fine and fresh and uses only a moderate amount of fat and sugar is this delectable citrus bar:

Orange Marmalade Bars.
(Makes 28 1-by-3-inch strips)

2½ cups sifted flour
3 teaspoons baking powder
½ teaspoon salt
¾ cup shortening
1 cup sugar
3 well-beaten eggs
3 tablespoons orange marmalade
2 tablespoons grated orange rind
1 cup orange juice

Mix and sift together dry ingredients. Cream together shortening and sugar, then beat in eggs, marmalade, rind. Add dry ingredients alternately with orange juice. Turn into a greased pan and bake in a moderate (350-degree) oven for 40 to 50 minutes. When cool, cut into narrow strips and spread with an orange icing made by creaming powdered sugar and orange marmalade. The icing may be omitted.

Lynn Chambers' Point-Saving Menu

Pork Chops Cream Gravy
Mashed Potatoes
Buttered Spinach
Raw Vegetable Salad
Rye Bread Beverage
*Delicate Cup Cakes
*Recipe Given

Frosted Fruit Bars.
(Makes 48 bars)

1 egg yolk
¼ cup brown sugar
¼ cup molasses
½ cup sour cream
1½ cups sifted flour
¼ teaspoon soda
½ teaspoon baking powder
¼ teaspoon salt
½ teaspoon ginger
½ cup nuts, chopped
½ cup dates, pitted and cut

Mix egg yolk, brown sugar, molasses and blend in sour cream. Sift together flour, soda, baking powder, salt and ginger. Blend into first mixture. Stir in dates and nuts. Spread into greased pan and bake for 15 minutes in a hot (400-degree) oven. Cool in pan. Frost with: ½ cup confectioners' sugar beaten into one beaten egg white. Add salt and lemon extract.

Have you tried the new toppings that don't require elaborate preparation? Most of these are low on sugar and ideal to use on cakes the children have made. Here, too, is a good basic cake recipe on which to use them:

Standard Cake.

⅓ cup shortening
¾ cup sugar
2 eggs, well beaten
1½ cups sifted flour
½ teaspoon salt
2 teaspoons baking powder
½ cup milk
1 teaspoon vanilla

Cream together shortening and sugar. Add eggs. Sift dry ingredients together and add alternately with milk and vanilla to creamed mixture. Pour into greased, floured 8-inch cake pans and bake in a moderate (350-degree) oven for about 35 minutes.

In using any of the following toppings, frost only top of cake. Square and loaf cakes take less icing than layer cakes.

I. Raisin Topping.

1 cup raisins, ground
½ cup water
⅛ teaspoon salt
⅛ teaspoon cinnamon
Dash of cloves

Mix ingredients in a saucepan and stir constantly while cooking until thickened—about 5 minutes. Cool slightly. Spread on warm cake.

II. Apricot Topping.

½ to ¾ cup apricot jam

Spread on warm cake.

Meringue Topping.

1 egg white, beaten stiff
½ cup confectioners' sugar
1 teaspoon flavoring
2 tablespoons butter, softened

Beat sugar into egg white with flavoring. Fold in softened butter and spread on cooled cake.

Honey Icing.

2 tablespoons butter
3 tablespoons honey
1 tablespoon hot milk
½ cup coconut
Dash of salt

Mix all ingredients together. Spread on warm cake and broil slowly until icing bubbles and browns but does not burn.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says

The Score Card: Good news is in store for homemakers for there will be plenty of eggs on the market and cabbage and spinach. All of these foods give a boost to health and to your menus.

You will be eating about a pound less cheese this year than last. The kind available mostly will be Cheddar—also the kind most popular. Kinds least obtainable will be limburger cream, roquefort and Italian. About 5 million more pounds of cheese are going to servicemen to help provide milk nutrients needed by armed forces. Cheese will also go to our Allies and to the Red Cross, which helps provide for our prisoners of war.

When you go marketing, watch weights and watch change. Just because you have more bookwork to do with points, don't neglect your prewar precautions of counting change.

ELMER TWITCHELL ON A SIMPLIFIED TAX BLANK
("Congressmen Discuss Simplified Tax Blank."—Headline.)

Congressman—Now, Mr. Twitchell, you are aware that we are looking for ideas for making the income tax blank simpler. Have you any suggestions?

Elmer—Yes, sir. First of all I would propose that the double-edged steel scraper be eliminated.

Congressman—There is no steel scraper in the tax blank.

Elmer—Well, whatever the thing is that draws blood in the first three paragraphs!

Congressman—Nothing in the income tax blank draws blood. Proceed!

Elmer—I'm just judging by the color. How about cutting out the electrodes?

Congressman—What electrodes?

Elmer—Now don't tell me they're not in the present tax blank! I can show you my burns.

—*—

Congressman—Please get down to fundamentals, Mr. Twitchell. Have you, seriously, any constructive ideas for a simple blank?

Elmer—Of course. It can be simplified in a thousand ways. You can start by cutting out that big black heading "FORM 1041. TREASURY DEPARTMENT, INTERNAL REVENUE SERVICE" at the top of the blank. It lowers the taxpayer's morale and vitality at the outset.

Congressman — There may be something in that. What else?

Elmer—Why not eliminate all that tripe about full name, street, town, city and state?

Congressman—How would you cut that?

Elmer—Just let a taxpayer give his first name. And only his street address without stating the town or state. That would simplify everything! Oh, boy!

Congressman — How would the government know how to locate the taxpayer?

Elmer—He wouldn't know. That's why I like the idea.

—*—

Congressman—Come, come, what else?

Elmer—Well, you could drop all parentheses. Most of the trouble comes out of those things in parentheses. And let's have fewer dotted lines.

Congressman—We have to have those dotted lines for answers.

Elmer—How are you gonna make the income tax burden simpler unless you permit taxpayers to make fewer answers?

Congressman — You have something there, Mr. Twitchell. Anything else?

Elmer—Yes. Eliminate all words like fiduciary, net gain, balance, item, schedule, computation, etc.

Congressman—What words would you substitute?

Elmer — Well, there's always "Mairzy Dotes."

* * *

FISHING BY SOUND DEVICE
("Secretary Ickes says that the echo-sounding devices developed in hunting U-boats and torpedoes may be of value to fishermen in locating schools of fish after the war."—News Item.)

Scene—Any bay.

First Fisherman—Heave the anchor and let's see if we HEAR any fish around this spot.

Pal—Okay. There she goes!

First Fisherman—Got the fish detector all set?

Second Fisherman — Which one, the small one or the big one?

First Fisherman—Try the little detector first. Wires all set? Okay? Drop the receiver overboard, and put on your ear set.

Second Fisherman—I'm not very familiar with these gadgets. I always trusted to luck, not the radio engineers. It's gonna seem funny fishing by phone. Say, how does a fish sound?

First Fisherman—It's a sort of whirring noise.

Second Fisherman **(excitedly)**—Whoops! There's something. I just heard a tremendous gurgling noise.

First Fisherman—That's just a beer bottle I threw overboard.

—*—

Second Fisherman—I think I hear fish now. They sound as if they couldn't make up their mind. It's a big school.

First Fisherman — What wave length?

Second Fisherman—I thought so. Just a lotta porpoises! Let's move.

(They move.)

First Fisherman—I'm beginning to wonder whether the fishing is poor or whether it's your hearing.

Second Fisherman—We must have used the wrong bait.

First Fisherman—We are using the wrong amplifiers.

* * *

The all - time understatement: Marshal Goering looking up at the sky from Berlin and saying, "It looks like we might get a little rain."

* * *

One of the best lines we have heard in the theater this season: A refugee taunted with the question, "Are you afraid to die?" replies, "No; I am not even afraid to live."

* * *

Voice at a post office window (now that the new rates have gone into effect):—Gimme two stamps . . . and if there's any change keep it.

Dressed Up.

ALL dressed up in a three-piece ensemble, the youngster of one to six years will be as pretty as a picture in this set. The bolero-type dress, matching bonnet and panties are perfect for spring wear!

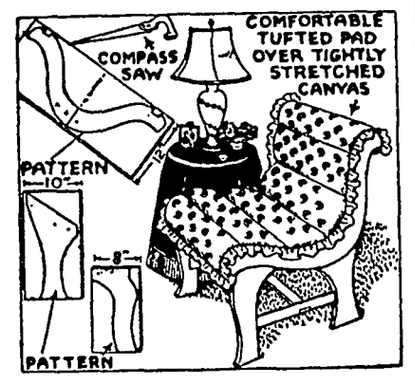
Comfortable Chair Is Easy to Make

PERHAPS you've made lawn chairs with straight cuts of the handsaw. It is almost as easy to cut curves as to make square cuts but a pattern and a little extra care are necessary for perfect results.

In this design curves add comfort as well as beauty, and a tufted cushion distributes the weight so



that springs are not missed so much. The curved pieces are shown at the left.

You can see how easy they are to cut out of odds and ends of one-inch lumber that you may have on hand or can get at the nearest lumber dealer. The reinforcing pieces are all square cuts.

* * *

NOTE: Mrs. Spears has prepared an actual-size pattern for all the curved sections of this chair. Complete dimensions and directions for the chair construction and for making the tufted cushion, with list of materials included. This is pattern 265 and will be sent postpaid for 15 cents. Write direct to:

Sprinting Ostrich Clocked At 60; Cheetah Does 70

Man is proud of his speed, but nature makes him look like a snail. The ostrich has been known to sprint 60 miles an hour and can pull a sulky almost as fast as a crack pacer.

Over a short distance, the cheetah, a leopard, is the fastest four-legged animal alive. In London it was clocked at 70 miles an hour. Almost unbelievable is the speed attributed by scientists to an insect called the deer fly, 818 miles an hour.

The despised flea, best jumper for its size on earth, can spring 200 times its own length. A human being would have to jump a quarter of a mile to match it.

Let the good earth produce

ONLY 19 WAR BALLOTS SENT TO OVERSEA VETS

Nineteen war ballots were mailed to veterans overseas by the Hancock county auditor's office during the past few days. Appliciations are not as heavy as was anticipated. A total of 26 servicemen and civilians had applied for absentee ballots at the close of business, Monday.

Much valuable shipping space has been saved by sending bacon to Great Britain in bales instead of wooden boxes.

Chileans Honor Bold Aviator Who Flew Andes

Flying across the Andes is a routine, matter-of-fact, daily operation for civilian and military aviators in this age of multi-motored planes equipped with every safety device known to science. But when Chilean airman Dagoberto Godoy piloted his primitive "flying crate" into Argentina on December 12, 1918, for the first successful flight across America's backbone, the feat was considered tantamount to suicidal madness.

Various American republics paid tribute to the intrepid Chilean ace on that occasion with special postage stamp issues and other honors. To commemorate the 25th anniversary of Godoy's historic conquest of the mountain range, his countrymen planned to present him with a house bought by popular subscription.

Appropriately enough, the drive started in Temuco, birthplace of the South American aviator, with an initial contribution of 5,000 pesos by the municipality. But the plan captured the imagination of Chileans everywhere in the republic, and the fund is growing fast on a national scale.

The idea of flying the forbidding, treacherous mountains which separate this country from neighboring Argentina first occurred to Col. Pedro Pablo Dartnell, then Chilean inspector of aeronautics. He discussed the details with Godoy, at that time a young lieutenant in Chile's air force. Godoy promptly succeeded in persuading his superior that he was the man for the job.

Frozen Wattles Hamper Production of Eggs

Many infertile eggs are produced each year because the combs and wattles of the poultry breeding males become frozen during severe winter weather. This is best prevented by dubbing the cockerels at an early age but if this has not been done, there are other means of preventing injury.

If your breeding males were not dubbed, it is wise to apply vaseline to the comb and wattles of each bird in severely cold weather. The covering of vaseline will tend to keep water from adhering to the wattles when the bird drinks.

If freezing of combs and wattles has already occurred and the parts have become swollen, it is better for the bird if the swollen areas are cut off with a pair of scissors. This will minimize the effect of freezing and enable the bird to get back into condition quicker. But be sure only to remove swollen parts. On adult birds, never cut any closer to the attachment to the head than is necessary because of the danger of hemorrhage.

Test Wells With Electricity

Once a well is drilled physics brings one of its most potent tools—electricity—into play to make sure that no possible oil production level shall be missed. While the drilling mud still fills the well, and before the hole is lined with pipe, three insulated cables are lowered to the bottom. The ends, separated by small distances, are uninsulated.

As the cables (one of them carrying an electric current) are drawn up the well, instruments properly connected at the surface trace lines that indicate the kind of rock layer opposite the cable ends at any instant. The rocks identify themselves by the differences in their resistance to the passage of electricity. Most resistant are rocks containing gas and oil. While one traced line shows resistance, another shows whether the rock is hard and tight or open and porous. If the traces indicate that a layer is both porous and highly resistant, it is probably a loose sandstone saturated with oil or gas—the condition necessary for a producing well.

Isle of Capri

Pure air and mountain vistas brought visitors from all Europe to the Italian isle of Capri in all seasons. But the attraction that brought excursionists by the thousands from Naples and other Italian cities was Capri's Blue Grotto. This is a long famous cavern at sea level in the rock wall of the shore cliff. Measuring 160 feet deep and 100 feet wide, with a tiny entrance six feet by four feet, its charm is its livid, electric-blue water. Refraction of daylight through a submarine opening causes the unusual effect.

A natural haven for migratory birds, Capri was made a bird sanctuary 10 years ago. For centuries previously, the mass capture of quails by commercial methods had been a thriving business.

What Eyes Reveal

Much interesting lore has sprung up about the eyes and their revelation of character. Eyes that slant upward and inward are said to indicate secretiveness, whereas eyes that slant downward and outward are alleged to denote an open, confiding character. People with small eyes have originality; with medium yes, sagacity and determination, and with large eyes, attentiveness and emotionality. Eyes close together are said to indicate a practical observer of details; eyes far apart, courage and willfulness.

Gray eyes are said to indicate a calm spirit; blue eyes a light heart; brown, a lover of humor; green, both an intellectual and a jealous nature, and dark eyes, excitable, emotional and vivacious dispositions.

Many Rabbit Varieties Have U. S. Supporters

Some 40 years of rabbit-keeping in America has demonstrated that the White New Zealands combine excellent meat quality, quickly maturing youngsters and top value in skins, which latter factor must always be kept in mind as a big help on the feed bill.

All standardized breeds and varieties of domestic rabbits, however, from the giant Flemish found in six color varieties and ranging up to 22 pounds at full maturity, down to the diminutive Polish, often tilting the scales at only three pounds when fully grown, have their supporters. Between these extremes range a kaleidoscopic rainbow of solid color breeds—black, blue, red, brown, chocolate, silver and fawn—every one beautiful to the eye, and good meat and fur producers. Well-bred rabbits come alike in all these colors in four variations of silky fur—normal fur (ordinary rabbits), short, velvety fur (the Rex breeds), long, wooly fur (the Angoras), and even in short, wavy, Astrakhan-like fur (The Astrea-Rex).

There are the spotted varieties, bred in black, blue, tortoise and chocolate markings on a pure white background—the Dutch belted; the white Himalayans with black ears, nose, feet and tail; and the agouti varieties, or Chinchillas, Belgian hares, silver Martens and Black and Tans. And the French and English silver breeds, and the American silver fox Giants.

Foster Hill Site of Historic Pioneer Fort

The first meeting house in Brookfield, Mass., in 1660, stood on historic Foster hill, about one-half mile southeast of the present church. This first meeting house was destroyed by the Indians during King Philip's war, August 4, 1675. This building was the first of its kind between Marlboro and the Connecticut river.

The families from the first settlement on the hill had all fled after the attack of the Indians on this memorable day, the colony realizing the value of this important outpost for travel between the Massachusetts bay and the Connecticut river as a place for refuge and refreshment for travelers, and on September 20, 1688, built a garrison or fort later known as Fort Gilbert, named for Henry Gilbert, a direct descendant of Lewis A. Gilbert, one of the settlers who had gone to Brookfield and taken up a grant of land to the west side of the garrison.

This fort was of considerable size, large enough for barracks for soldiers and also for all families who took refuge there at night within the palisade, and for the next 40 years this garrison was used as a place of religious worship by the settlers, the chaplain of the garrison acting as the minister most of the time.

Strange Fashions

Nobility in France prior to the French Revolution went in for highly decorative eyeglasses. Large jewels of various colors frequently were arranged around the lenses, and because it was fashionable to wear glasses merely to be in style. Many women carried lorgnettes whose handles were bestudded with jewels worth a fortune. One prominent lady inserted lenses in a jeweled fan, so that when she demurely hid her face behind her fan, as ladies were wont to do in those days, she still could see what was going on.

After Napoleon, who was nearsighted, came into power, he frequently used a monocle for far vision. Aping the master, many of his followers resorted to monocles. The popularity of monocles more recently among German military officers is said to trace to the Napoleonic complex.

Marshalls Valuable

The Marshall group has been considered valuable because of its large and deep-water lagoons, providing shelter for submarines and other shipping. Where protected from the wind and water, some of the atolls offer positions for repair work and refueling.

Natural disadvantages include the fact that the islands generally are extremely narrow, often only a few yards across. Although they are dotted over some 200,000 square miles of sea expanse, they cover less than 100 square miles of territory. It has been said of the Marshalls that they have perfect harbors, without land.

Moreover, the islands are nowhere higher than 33 feet above the sea. Many of them are so low that ocean waves wash across the coral reefs into the lagoons.

Mice Trap Selves

There are some mice in the West Indies that love coconuts. So a mouse nibbles a hole in the coconut of its choice, squeezes inside, and eats and eats and eats. The coconut and the milk make it fat. When it tries to get out, the hole proves too small. So it lies down and goes to sleep, and then when it wakes up, and could easily get out, the coconut proves to be too much of a temptation. It satisfies its hunger with more coconut.

Anyway, in that coconut it stays until some native comes along and picks the queer trap from the tree, and finds he has caught himself a mouse.

BETTER IOWA GARDENS

Gardeners should cast a wary eye on vegetable plants that are "shipped-in." Make sure that such plants are labeled "Certified." Uncertified plants may be diseased and produce only a little crop or no crop at all. Locally grown plants are likly to be safer than uncertified shipped-in plants.

* * *

It's time to set out early cabbage and broccoli plants, but don't make the mistake of setting out plants of tomatoes, peppers and egg plants in April or even early May. Wait until the soil has warmed up to plant heat-loving plants.

* * *

Peanuts are a heat-loving crop best adapted to sandy loam soils but can be grown satisfactorily in heavier soils. Better stands can be obtained with shelled seed, but don't shell them until just before planting time Treat the seed with a good disinfectant dust such as Arosan, 2 percent Ceresan, or Spergon, to increase stand and yields.

Only well-formed peanuts should be planted. Planting depth is about the same as for peas. Plant 6 inches apart in rows that are not less than 24 inches apart.

* * *

Vegetables that should be planted by now are onions, peas, lettuce, cabbage, beets, carrots, kohlrabi, parsnips, Swiss chard, spinach, vegetable oyster (salsify), potatoes asparagus and rhubarb. Chinese cabbage and turnips should be planted only as a fall crop. Rutabagas are not very successful in Iowa.

* * *

Planning to plant more vegetables for winter storage will provide fresh vegetables throughout the winter and save time, energy and materials that would be needed to can the products.

* * *

There is still time to prune fruit plants of all kinds. Information on pruning fruit trees, grapes, raspberries and strawberries is available without charge at the county extension office.

* * *

Here is a labor-saving method which many gardeners use: Fine seed is difficult to sow sparingly. Mix the seed with fine sand. There will be many less seedlings to thin out when it is time to space the plants in the row.

* * *

Tomatoes that are to be staked may be planted closer (about 2 ft) than unstaked plants. Setting the stakes in the ground at the time seed is sowed or the plants are set out will avoid injury to the roots.

"Who was that peach I saw you with last night?"

"Peach! That was a fruit salad."

"Huh?"

"She acted sour as a lemon; she was slippery as a banana, and when I squeezed her she hit me in the eye like a grapefruit."

Artillery Sarge: "Watch it! You almost shot our bugler!"

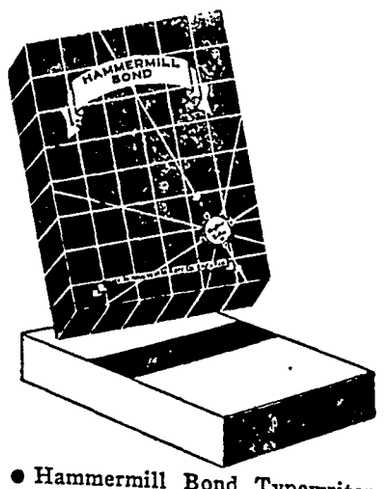
Infantry Sarge: "Did I? Well, take a crack at ours."

Private Jeep: "That Sarge is very nasty today. What's eating him?"

Private Peep: "I don't know, but I hope it's cannibals."

Sergeant: "What's a Colt Revolver?"

Private: "A small horse pistol."



● Hammermill Bond Typewriter Paper is clean and usable down to the last sheet.

Its pleasing appearance and adaptability to typewriting, carbon copies and pen or pencil work account for its popularity in thousands of homes and offices.

We sell Hammermill Bond Typewriter Paper in sturdy, protective, orange-and-silver boxes, 500 banded sheets to each box. Let us supply you.

BOYSENBERRY NOT GOOD FRUIT FOR THIS STATE

Home orchard owners who plant boysenberries in Iowa are likely to be disappointed, according to Harry Nichols, Iowa State College extension horticulturist. Winterkilling is the chief cause of failure, though occasionally an orchardist is able to get a crop of fruit by giving the canes special protection and care.

The boysenberry is really the southern type of blackberry. It grows vigorously during the summer and produces much of the new wood on which fruit would be borne the following year if the bush were not injured. However, growth continues so late into the fall that generally the first hard freeze kills most of the new wood

Boysenberry canes can be covered with 2 inches of soil in the fall and left through the winter. When uncovered early the following spring, a good crop of fruit sometimes can be obtained. In some years, an early, deep snow provides the same protection as soil.

The so-called "thornless' boysenberry and blackberry are not very fruitful, as a rule. The shoots which develop a year or two after planting generally have thorns.

Plant raspberries in rich sandy loam soil, advise horticulturists at Iowa State College.

FORMER KLEMME COACH WRITES FROM ITALY

The Times received the following letter Monday from Capt. Glenn R. Bowles, former athletic coach in the Klemme high school and now with the army in Italy. Here's the letter from "Bodge:"

April 2, 1944.

Dear M. J. and Ray:

Was in action in vicinity of Cassino prior to March fourth. Outside of that brief statement that is all I can say.

Stopped in to see "Pete" Paul when coming back from———, well I'll beat the censor to that one . . . was intending to drop back to complete our "session" but we were moved up as soon as we got back so will not see him until we go back to a rest area Was over to see Otho Keraus but his unit wasn't out of the line yet— later saw a man from his Company and found he was all right Would like to have seen him, but sometimes it just can't be done.

Was in my dug-out one night and the phone rang! Believe it or not. 'twas George (Bowles) calling me from Naples He came up and spent two days with us He only had one (?) narrow escape; we won't talk about that one either!

How goes all at Klemme? Mother told me of Klemme's B B winning the Sectional— 'twas fine work. People at home like Jake's (Elwyn Jacobs) playing very much. Too bad they've so few male students (athletically speaking) at Simpson College Maybe I should be there to help Jake out with all the damsels! Well, maybe I'd have at least a running chance on Sadie Hawkins' Day.

Tell Byrnes Missman that a buddy of his, Jim Flannigan, is Ass't G-2 in this Division, and that the Army will help the Marines when they give us the publicity men and when they hit some opposition! Only kidding, but I could use a little of that heat to put under my Parka!

Things are sometimes quiet up here, but never peaceful. The night I stopped in to see "Pete" Paul was my worst day and since I lived through that I know darn well I'll be at the "Golden Gate in Forty-eight" . . . the occasion. Seems as though I vountarily attempted (and accomplished) to evacuate a vital Jeep off a corner "Jerry" was firing heavy artillery on— and he really had the correct range! We both arrived there at the same time! He gave us twelve shells and I took the Jeep and trailer! Thank the good Lord that I was zigging while the shells were zagging!! Am thankful too that close only counts in hore-shoes!

Wrote a long one to make up for the time element—logistics are bad The Times are coming through.

"Bodge."

KLEMME DENTIST NOW IN LONDON, ENGLAND

Mrs E. G. Schaeffer has received word from her husband, Capt. Earl Schaefer that he is now stationed in London, England.

After serving three years with a field unit in the army, the Captain was transferred to a large General Dispensary in London. He says it is quite a show place in the city because of its wonderful equipment. There Capt. Schaeffer does dental work for Officers only, both men and women. His assistant is an American WAC and she has proved to be a worthy dental hygienist.

Capt. Schaefer lives in a nicely furnished government quarters and his room-mate is a Captain also.

Kenneth Bell, who is in navy training at Camp Farragut, Idaho, came last week on a furlough which he spent visiting with relatives around Klemme and with his family at Garner.

Sgt. Raymond Keeper, who is now stationed at Alliance, Nebraska, as a crew chief on a bomber, last week accompanied the plane to Wichita, Kansas, where we understand Sgt. Keeper visited with Mr. and Mrs. Ernest Gerardi.

Seaman Raymond Swalve, from Camp Farragut, Idaho, was home over the week end on a furlough visiting with his parents, Mr. and Mrs. John Swalve.

Sgt. Asa Gibbs, son of Mr. and Mrs. Harry Gibbs, has recently received a promotion to Staff Sergeant. S-Sgt. Gibbs is with the U. S. Army in Alaska.

Alvin Albers of the Navy, and John Albers of the Army are enjoying furloughs visiting relatives in this community.

Staff Sergeant and Mrs. Arthur D. Swomley, of New Jersey, spent three days last week visiting with the Sergeant's foster parents, Mr. and Mrs. Howard Spitler and family. They also visited with Mrs. Swomley's folks at Sedalia, Mo.

Earl W. Greimann, son of Mr. and Mrs. W. H. Greimann, wrote his parents of his graduation from Radar School. Earl has now a 3rd Class Petty Officer's Rating, having graduated with the highest grades of the 150 men in his class. Several weeks ago, he also was graduated from Radio School in Memphis, Tennessee, where he had been stationed for several months.

MIXING PULLETS WITH HENS IS BAD PRACTICE

Many poultry producers have met increasing feed costs and demand for greater numbers of eggs by the adoption of the all-pullet flock plan, according to W. R. Whitfield, Iowa State College extension poultryman.

These farmers, he points out, recognize the fact that pullets can lay more eggs than hens during a 12 months period, provided the pullets are grown and in production in 6 to 7 months time. And provided, too, they do not pick up parasites and disease organisms from the old hens.

Old Hens Transmitters

Although many farmers have been using the all-pullet flock plan, a far greater number have been keeping a small percentage of the old hen flock because the hens were good layers. However, the old stock and their yards menace the health of the pullets. While not all old stock is sick, many birds have recovered from certain diseases and themselves immune. These same birds may transmit the diseases or parasites to the young stock. Generally the diseases do not show up immediately when the old and young birds are allowed to run together, but the youngbirds become more susceptible as they grow.

Want Fall, Winter Eggs

Whitfield warns that the pullet does not produce the maximum number of eggs if she does not establish the laying habit before she is 10 months of age. Poultrymen are failing to secure those profitable pullet eggs if few all and winter eggs are secured. There may be some alse molt by pollets that lay during the fall and winter, but it is better to secure winter production from the pullets than not secure eggs until spring.

Confine Layers

Confining the hens to the laying house during the spring and summer is one of the major steps in securing a flock of healthy pullets this fall. Hens that are confined cannot contaminate the young stock. Furthermore the hens will continue to lay better during the summer if they have proper feed and drink. Confinement also means that the eggs will be cleaner when marketed.

SELECT STURDY MATERIALS

Sturdy cotton gabardine, herringbone twill or whipcord will best withstand the wear which women will give their work clothing on farms or in gardens this spring. Miss Elizabeth Peterson, extension clothing specialist at Iowa State College, says tests made by the United States Department of Agriculture show those fabrics are resistant to rubbing and have great strength. As a group, they are stronger than pin checks, poplins, suitings, sportswear denim, jean and ornaburg fabrics. Thickness proved no indication of durability.

COUNTY SERVICE ROLL HAS OVER 1,300 NAMES ON IT

The Hancock county honor roll now has on it between 1,300 and 1,400 names of men and women from Hancock county serving their country in the armed forces.

Experiment With Peanut Hulls to Replace Cork

Tons of "waste" hulls which accumulate at factories where peanuts are shelled for market may soon be scooped up and made into a substitute for cork. Ground into a fine meal and milled with a liquid, peanut hull "cork" may supplement supplies of natural cork now used in bottle caps, refrigerator linings, wallboards, inner soles, and many other cork needs.

Numerous attempts to grow the cork oak tree in America have been made. Experimental plantings have been carried on in California since the 1850s and although strippings from these experimental groves have produced a few tons of usable cork, the Mediterranean area still holds first place as the world's producer of the bark.

Peanuts, on the other hand, thrive in the United States, from Florida to California and as far north as Washington, D. C. Yield tops two billion pounds a year. The slow-growing cork oak takes 20 years to produce its first usable bark.

Peanut shells have been used to some extent as fodder and fuel. Some countries extract a substance from them which is used in certain types of fire-fighting foams. One of the latest uses of the goober's "coat" in addition to its contribution to the "cork" needs, is in the cleaning of greasy machinery. Ground almost powder-fine, the peanut "cleaner" is shot through an ordinary sandblast gun to absorb carbon and grease which accumulates in valves, bearings, and other machine parts.

Emphasize Good Features To Look at Your Best

Some women never get the idea that make-up is not camouflage and that one's face is made more attractive by accentuating the good features. Since the eyes are the most expressive and interesting part of the face, special attention should be given to making them as pleasing as possible, it's said. A thin, vertical line at the outer edge of the lid adds glamour. Mascara on the lashes, especially for evening, lends depth to the "windows of the soul." Eye shadow should be used on the upper lid only, and lightly applied for street wear. Color of shadow should be of the same hue as the irises. Tones of mascara should harmonize with the complexion. Rouge should be applied on the high spot of the cheek bone, fading out towards the ears and the mouth.

Women wearing spectacles often can use effectively these visual aids in improving make-up, it is said. By careful selection of lens shapes, good features of one's face can be emphasized and unsymmetrical parts can be subdued. By thoughtful fitting, long noses may appear shorter, moon faces made to appear less rotund, or sharp features may be mellowed. There's a whole bag of make-up tricks in the art of fitting faces with spectacles nowadays.

One-Man Arsenal

As an employee of Lodovico Sforza, Milan's "boss" at the end of the fifteenth century, Da Vinci had military as well as artistic duties. His patron was on the lookout for secret weapons to defend his power against rulers of the four other rival states in Italy, and the king of France.

Most of Da Vinci's inventions were laughed at—poison gas, hand grenades, shrapnel, the parachute, demountable bridges, a "flamethrower" javelin that ignited on hitting the target, and a turtle-shaped armored vehicle (called a "covered wagon") like the modern tank.

Sforza ignored these inventions, and was overthrown by the French in 1499. The great memento of Da Vinci's years in Milan is in Lodovico's favorite church, Santa Maria delle Grazie—the mural of "The Last Supper" on a wall of the refectory.

Eye Under Pressure
